IMPROVED UNIVERSAL BEVEL PROTRACTOR.

No. 495. Protractor with 6-in. blade, Price, $8.00.
No. 496. Protractor with 12-in. blade, Price, $9.00.

This Protractor is well adapted for all classes of work where angles are to be laid out or established.

The Dial is ACCURATELY graduated, in degrees, the entire circle, and when set can be clamped in position. The blades are about ⅛-in. thick, can be drawn out to their full length, and clamped independently of the dial.

Special circular mailed on application.

ANY DEALER knows that a Stove Polish which other manufacturers try to imitate, is the Polish for him to sell. The enormous sale of

Enameline

The Modern Stove Polish

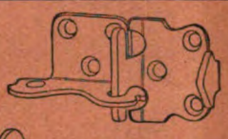
Proves that dealers are friendly to it, and that consumers will accept no substitute for ENAMELINE. Why? Because it's

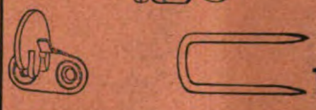
THE BEST!

U. M. C.

BEFORE.

Mushroom Bullets demonstrate the destructive power of small calibre ammunition.





AFTER.

For Fall Shooting use U.M.C. TRADE MARK the familiar brand.

"EVERYTHING IS COMING UP."

BUSINESS IS BETTER AND THERE WILL BE A LARGER DEMAND THAN EVER FOR OUR

Sheep Skin Mitten.

Acknowledged to be the best article for polishing stoves, as it does away with the old time dirtiness of the work, making this work a pleasure. Also invaluable for polishing brass or glass, or silverware, which it does not scratch. For tan shoes and cleaning bicycles it has demonstrated itself a conspicuous success.

A GOOD THING.

IT'S IN THE TEETH.

The Patent "REFORM" Curry Comb is composed of three shallow, oval trays, with corrugated edges. The parts are struck up from a fine grade of cold rolled steel, heavily tinned and bronze lacquered, firmly riveted together and warranted not to rust. The outer dimensions are 6½x4¼ inches and by reason of the large cleaning surface and peculiar arrangement of teeth, the comb will do its work with a large saving of time and labor, cleaning with equal thoroughness both long and short coats. There are no places to accumulate hair and it will not tear or injure the brush, the comb being quickly freed from accumulation by giving its face a gentle tap.

The Union Skate Sharpener

A New and Useful Article
Which Speaks for Itself.

This device is simple, being composed of but three parts—two side pieces and a short file. It is easily adjusted at once. A child can operate it perfectly and do as good work as a machine shop.

It will adjust itself to any make or style of skate.

It always works and may be carried in the pocket.

This cut shows the natural method of using.

The Circulation of "Hardware" is Larger Than That of Any Other Paper in the United States Devoted to the Hardware Trade.

Editorial Trade Review.

A very hopeful and buoyant condition pervades the trade centers of the Hardware industry. Without the good fortune of having everybody striving to the utmost to keep abreast of incoming demands, there is still a sustained acknowledgment that on every hand the elements of a continued prosperity are apparent, and each succeeding month will surely strengthen convictions so desirable to our manufacturing interests. Many of our factories are still busy on orders not yet filled, and with a willingness to keep on producing a surplus that may be needed before the season closes.

There is no longer any disguising the fact that the good ship Prosperity is known to be on her way laden to the upper deck with good crops of cotton, wheat and corn at advancing prices; with Klondike gold, Alabama iron and other metalliferous wealth, having fair winds to waft her into the harbor, a contented crew receiving good wages, and having a crowded passenger list of willing buyers who are ready to do business with the expectant throng awaiting her arrival.

The trade relying upon the Southern section of the country for its fullest development finds the continued unfavorable reports from the section visited by yellow fever influencing trade conditions to some extent. It is a gratifying fact that the lateness of the season makes the future seem more hopeful, as with the advent of frost and colder weather generally, all vestige of this dread infliction will be stamped out, and the region referred to return at once to its normal business.

In reference to trade conditions in the Southern tobacco country, the present high prices on this important product based on a short crop, seem almost phenomenal.

The wire nail producers find every encouragement to keep the price on an upward tendency, advancing prices as they have been doing, being with only moderate activity and no speculative strides. With wire rods at their present firm advanced quotations, the price of wire nails is not abnormally high, and without a greatly increased production, may not remain long at present figures, as large stocks are the exception and not the rule throughout the country.

Some of the cut nail manufacturers of the United States contemplate the formation of an organization which, while having no connection with the wire nail combination, would in a measure co-operate with it by placing the price of cut nails at a certain specified discount from the price established periodically for wire nails. If this is to be the sole object of the association, it may possibly achieve success, and it would not prove detrimental to the best interests of the cut nail industry.

Among the many gratifying exhibits of our present prosperous conditions as compared with recent years, is the announcement by the Bureau of Statistics that our exports for the first eight months of this year were so greatly in excess of 1896 it was believed they would exceed those of that record-breaking year.

Then again, the Commissioner of Navigation shows that the total documented tonnage of the United States, on June 30, 1897, was the largest for twenty-one years, with the single exception of 1893.

Are We Extravagant?

The question whether genuine prosperity will ever cover the entire country again until frugality meets it half way and they come together hand in hand, is an important element of discussion as affecting the rising generation. It creates the exculpatory judgment with which we pass upon certain expensive habits that sap the foundation of general wealth and prevent the accumulation of that competence in later life which is the ambition of every intelligent artisan in other countries than our own.

Where the attending discomforts and fears of poverty with debt environments drive the despairing foreigner to suicide, only too frequently the same conditions spur an American to his supremest efforts, and by pure force of character he rises superior to every discouragement and becomes a millionaire.

An American, with a recklessness born of free thought and free institutions, will take all the apparently impossible chances and "make or break." He firmly believes his fortune is not to be one accumulated by long years of privation and enforced economy, which in so many countries is made necessary by fewer opportunities for self aggrandizement, and the necessity of bringing up large families until they become self-supporting. The representative American gets all the good out of his salary or wages that is possible of accomplishment, provides himself with the elements of comfort that were formerly enjoyed only by the wealthy, and avoiding the burdensome family so noticeable among those of foreign extraction, he becomes selfishly extravagant with a love for an occasional splurge.

These fripperies and extravagances surrounding a normal position in life become more and more difficult of attainment, as the profits in business are constantly receding in an inverse ratio to those obtainable in years gone by. It is evident that to get the happiness out of existence which is an inalienable right, our habits must change to those more moderate and self-

Digitized by Google

denying, so as to adjust ourselves to the wages within reach of our mode of life. Some of the useless mimicry in material things which only the wealthy can consistently enjoy, will have to be discarded from our daily life, that with more simplicity in our domestic surroundings we may still know the contentment which was the prevailing sentiment of the early days of our forefathers, when a restless energy for employment was a prominent characteristic, and suicides and bankruptcy were not sufficiently numerous to establish a record.

We are in receipt of samples of very fine leather and cork grips, which Studley & Jarvis, Grand Rapids, Mich., are selling to the manufacturers. The new leather grip this firm is selling is different from anything else on the market, and is very handsome. The grip is made with a wood core, or reinforcement, is handsomely polished, and appears to be a very durable article. The cork grip is constructed somewhat different from anything else we have ever seen, and is very neat. During the past week this firm has closed contracts with the Lozier Mfg. Co., who will use this new leather grip on their entire line of wheels which will list at $50 and upwards; the Black Mfg. Co., Keating Wheel Co., Winton Bicycle Co., Snell Cycle Fittings Co., Kirk-Young Mfg. Co., and several others. Mr. Jarvis, of this firm, who has just returned from a week's visit among the trade, is very enthusiastic over the way the manufacturers have taken hold of their line, and predict a wonderful sale for the season of '98.

A report charged with infinite possibilities of labor troubles in the future, comes from Newcastle, Pa. The dispatch states that some days since, one Richard Kissinger—mark the name—an employe of a tin-plate factory, was discovered by the foreman kissing one of the girl employes. The foreman reported the kissing Kissinger to the manager, and although the kisser and the kissed both made denials, the offender was discharged. With that, 175 men and boys walked out of the establishment, and the silence of idleness reigned where the busy hum of labor had been heard before. While this may not be a warning against kissing in general, it certainly is against the pursuit of this pleasant occupation in the presence of somebody else.

The earliest English letters patent in our sense of the term, was issued in 1643 to Arnold Rotsipen, for an improvement in printing machinery. The earliest American patent was granted in 1641 by the General Court of Massachusetts to Samuel Winslow for a process of making salt, and in 1653 a royalty of ten shillings was granted to John Clark to be collected from every family which should use a method devised by him for "saving wood and warming houses at little cost."

Don't be afraid to shake the hand of an honest mechanic even if he is fresh from his lathe or drill bench. You couldn't have a better advertising agent in a full grown factory than the man who knows you're "no bloody dude," after having had such a hand-shaking episode without comment.

When a sense of gratitude urges you to return thanks for some favor extended, without being unnecessarily effusive—which might cause your sincerity to be suspected—don't be afraid nor ashamed to avoid mumbling your speech; state the few words of thanktulness in a way that carries conviction.

More business involving a money outlay can usually be accomplished in five minutes of sunshine, than in five hours under clouds and rainy influences.

Exports and Imports.

The Bureau of Statistics has issued tables showing the exports and imports for August, the first full month under the new tariff law. These figures show for that month the largest exports of domestic merchandise of any August in the history of the Government. The exports were $79,490,264, against $66,689,981 for August, 1896. For the first eight months of the year the exports were $61,810,000 in excess of the first eight months of 1896, so that the bureau officials believe that the exports this year will far exceed those of last year, which was itself a record-breaking year in the matter of exports.

The value of imports, dutiable and free, for August was $39,848,312, of which $18,629,609 were free. These figures show a decrease of about $10,000,000 from the imports of August, 1896. The decrease was due to a heavy reduction in the importation of raw wool, which decreased from 4,651,000 pounds in August last year to 2,877,877 pounds last August. Manufactured wool decreased from $3,709,000 to $638,000; wood and manufactures thereof, from $1,963,000 to $1,271,000 manufactures of cotton, from $2,553,000 to $1,623,000; manufactures of jute, flax, and hemp, from $2,221,000 to $999,289; iron and steel from $1,766,067 to $887,344, and sugars, from $5,340,000 to $2,950,000.

The following table shows the balance of trade with the several continents:

	Exports To.	Imp'ts From.
Europe	$60,505,000	$20,175,000
North America	11,500,000	4,071,000
South America	2,635,000	6,712,000
Asia	3,042,000	4,011,000
Oceania	1,820,000	2,854,000
Africa	1,291,000	260,000

Don't try to get the good will of a purveyor of orders by offering a money consideration; notwithstanding all statements to the contrary, it is not an American characteristic to accept open bribery without involving a loss of the self respect so dear to the race. You can accomplish equally as good results by presenting a sample of a new knife or a pair of new razors, etc., etc.

The monthly meeting of the New England Hardware Dealers' Association will be held at the United States Hotel, Boston, Mass., on the evening of Wednesday, Oct. 13th. J. R. Prescott, secretary of the Anthony & Cowell Co., Providence, R. I., will deliver an address on the subject: "What Constitutes a Good Salesman?"

White & Conant, Worcester, Mass., offer their Hardware stock and fixtures for sale. Any party who wants a good thing for cash can obtain particulars by seeing or addressing them.

AMERICAN GOODS IN NORTHERN EUROPE.

Editor Hardware: It being some time since we last wrote you, we thought that possibly a few lines from here might be of interest to some of your readers, especially those engaged in the manufacturing of bicycles. etc.

The bicycle season, which is now soon nearing its end, has been an exceedingly lively one, and a great number of wheels have been sold here this year, although it must be remembered that Norway and Sweden together only have a population of about six millions, so it cannot be expected that these countries should take as many machines as the more thickly populated countries. Still it is more and more getting so everybody, both young and old, wants to be the possessor of a cycle. The ladies, too, are commencing to take great interest in this both pleasant and useful sport.

Although the sales have been larger this season than in any previous year, we do not think it has been as profitable to all of the dealers as it might have been, partly on account of the very keen and often unsound competition, and partly on account of the report which came out, according to our opinion, rather early in the season, that prices on American cycles would be much lower next year, which now proves to be true.

As to competition. This is something that, of course, never can be avoided, but where the trouble comes in is that a good many dealers will buy cheap and trashy cycles and sell them for a better wheel than they really are. Such dealers are always on the hunt for a cycle, no matter of what make, and whether it has any reputation or not, only that they can buy at a very low price, so they can make a good round profit on it. Through false statements they represent these wheels to be first class and strong in every respect, and as people here, as a rule, are not yet very well posted on the qualifications a cycle ought to possess, they will buy such a wheel if they only get it a few kroners cheaper than what they would have to pay for a really first class wheel, which in most cases is worth many times the price of the wheel they are getting. When, after a short while, anything happens—the rims break, or the cones and other parts wear out in an unreasonably short time—this is at once blamed to the American wheels in general.

WOODEN VS. STEEL RIMS.

This also, is the principal reason why people here have had so much against the wooden rims, with which now nearly all American cycles are fitted, and other handlers of first class cycles, and we also, have had a great deal of work educating people to the fact that a good wooden rim is to be preferred to a steel one; but in this, we believe we are now succeeding. To illustrate the above, we will mention that a dealer who has this year sold in the neighborhood of one hundred cheap cycles, has had to replace not less than forty rims, while we ourselves, on between six hundred and seven hundred wheels of different makes, only have had three broken rims.

AS TO LOWER PRICES.

We mention the above, that the report about the lower prices on certain wheels for next year has tended to somewhat stagnate the business, which is, so far as the latter part of the season is concerned, when it has been definitely learned by everybody through the press, that such a reduction in the prices is really coming on. The consequence has been that a good many people intending to buy a cycle have said that if they did not get a cycle for such and such a price, they would wait with buying until next year. Rather than let them go, the dealer would sell them the cycle at the price they had offered, not knowing but what if it eventually was kept over until next year, he might not get any more for it.

As wholesalers, the report about the price reduction has not done us much harm, but we learn from our customers in the retail trade, and among whom we financially back three different concerns on condition, the retailers are not very well satisfied with this report coming out in the middle of the season, and we, for our part, cannot say that we think very much of it, as regarding the interests of the agents who, as the factories must have known, sat with a large stock on hand at the time. However, we must suppose that the factories had some reason for acting the way they have done.

AMERICAN AND EUROPEAN MAKES.

While some years ago the English and German makes of cycles were the dominating ones on this market, this has now changed, so we consider that of the cycles which have been sold here this season, nearly three quarters have been of American manufacture. For this one can only thank factories like the Pope, Monarch, Wm. Read & Sons, Eagle, Iver Johnson, etc., who are sending out first class goods, which have given the American cycles a reputation.

We now have the pleasure of a visit from Mr. Frank S. Beavis, the Eclipse Bicycle Co.'s representative, who is showing samples of, and trying to get an opening for their cycles in Europe. Their machines, with the "Farrow's automatic coasters," no doubt have a future before them, as they are built correctly and of good materials.

As a standing rule for factories who seek a market for their wheels in the Scandinavian countries, will say that they must be prepared to furnish steel rims on demand, as in many instances it is still impossible to get eventual buyers to make up their minds to take the wooden rims. This is especially the case with people from the country. Hand brakes are, according to the police regulations, necessary on all cycles to be ridden in the cities. Further, the cycles must be furnished with lantern-holders and wood or steel mud guards. As to tires, the demand is for a double tube rifled tire. We are finding the Dunlop and Gormully & Jeffery to give the best satisfaction. The Morgan & Wright people will come out with a rifled tire next season, we understand, otherwise their tires are all right. The Garford saddles are much in demand.

The duty on cycles has recently been increased from 20 kroners to 30 kroners (3¾ kroners equal $1.00).

A HINT TO MANUFACTURERS.

We believe we are taking the word for every dealer in cycles and cycle supplies in the non-English speaking countries when we say that it would be very desirable if the cycle factories in printing their price lists of parts would illustrate these with a good-sized cut of a bicycle, around which was printed the English names of every part of the machine. As the lists now appear they are very difficult to find out for the dealers, who do not generally possess much knowledge of the English language. The fact is that this industry is so comparatively new that other languages do not have words for all the parts, and by following our advice we think a good step would be made towards making such names as are now used in America and England a kind of universal in time, which would save a large amount of trouble and mistakes. In a recent number of the *American Referee* there appeared a

Digitized by Google

cut, such as we mean, with explanations printed all around.

Of other American iron and Hardware which are rapidly getting a large sale, we will mention: radiators for hot water and steam heating, of which there is lately sold a great deal, as a good many large office buildings are constantly under erection. The factories that have the largest trade in this line are the American Radiator Co., of the United States, and the Toronto Radiator Mfg. Co., of Canada. Besides these there are sold some German radiators, which certainly come cheaper than any of the above, but which on the other hand are not considered as good. Radiators have, up to the first part of August, been admitted free of duty, but since then they are subject to a duty of 5 milreis (1½ cents) per kilogramme.

American gas and kerosine stoves and ranges are being offered here lately, and we have seen some very attractive samples of these. Unless the price can be reduced to somewhere near the cost of German goods in this line, we are afraid there will not be much done. Otherwise there is a market here for such goods.

Rubber clothes wringers, meat grinders and choppers, berry presses, fruit peelers, etc., have been sold here, quite a good deal of which have come from the United States.

A line that commands a large sale is enameled ware, such as kitchen utensils of all kinds, etc. Most of this comes from England and Germany, but we should think the Americans ought to be able to compete in this line.

American agricultural tools—spades, hatchets, axes and forks—as well as carpenters' and mechanics' tools, files, etc., have for years been regarded as excellent and practical goods, of which large shipments are constantly arriving. Barbed and other kinds of wire for fencing purposes, wire netting for poultry yards, etc., are in constant demand, the farmers having found that wooden fences, which have in earlier days been the only kind of fencing material, come high in proportion the time they last.

As a whole, American manufactured goods of all kinds are gradually gaining more and more ground here, and to better enable our customers to see what we can offer them in American goods, we intend getting out an illustrated catalogue for 1898, which will be distributed to the dealers in Norway, Sweden, Denmark and Finland. Should any of your readers wish their manufacturers or goods mentioned in this catalogue, they only need to write us, sending us at the same time their catalogues accompanied with necessary cuts or descriptions and, if possible, with samples, quoting highest export discount f. o. b. steamer, New York, or better, c. i. f. Christiania.

Yours respectfully,

Christiania, Norway, Sept. 21, 1897. C. E. SONTUM & CO.

Riveting With Compressed Air.

In regard to riveting with compressed air, the master mechanic of the Santa Fe road is quoted as saying that by the use in the Santa Fe shops of a stationary riveting machine three men are enabled to drive 2000 rivets per day of ten hours at a cost of $4 75, as compared with 200 rivets per day at a cost of $7 by hand labor. Truck riveters—the machine being operated by two laborers at a total cost of $3 per day—drive 3000 rivets, as compared with 175 rivets driven by hand labor by three men in a day at a cost of $6, while the stay bolt breaker makes an average saving of $8 a day and the tank riveter an average daily saving of $10. Further, the mud-ring riveters will drive as many rivets as can be handed to them and will make a saving of $12 to $15 a day for this class of work. Not only is this method credited with the great saving named, but is declared to insure every rivet hole being filled entirely and to insure tight work, while of hand driven rivets in mud-rings a large percentage invariably leak.

Ruling in England in Favor of Bissell Carpet Sweeper Co.

On July 30th Mr. Justice Stirling, sitting in the chancery division of the English courts, had before him an application made on behalf of the Bissell Carpet Sweeper Co. for an injunction to restrain Messrs. G. Greiner & Co. from selling or causing to be sold any carpet sweepers "not of plaintiff's" manufacture, under the term "Grand Rapids," or in any way so as to induce the belief that such carpet sweepers are of the plaintiffs' manufacture. The plaintiffs, as is well known, have for many years sold a carpet sweeper under the name "Grand Rapids." It was stated that an undertaking would be given in writing that defendants would not sell, or offer for sale, any carpet sweeper not of the plaintiffs' manufacture under the name of "Grand Rapids Moquette" or any other name or description of which the words "Grand Rapids" form part, without clearly distinguishing they are not the plaintiffs' goods. After a consultation between counsel and the learned judge, his lordship made the undertaking as follows: "Not to sell or offer for sale machines under the name of 'Grand Rapids' or 'Grand Rapids Moquette' as hitherto, and not to sell or offer for sale any carpet sweepers, under any name or description of which the words 'Grand Rapids' form part, without qualifying words." The interest of this case is found in the fact that a manufacturer can acquire a goodwill in a title, which he could not register as a trade mark.

The Sportsmen's Exposition.

At a meeting of the board of directors held at the offices of the Sportsmen's Association, Nos. 377-379 Broadway, New York, the following resolution was offered and unanimously adopted:

That the fourth annual Sportsmen's Exposition be held at the Madison Square Garden, New York City, from January 13 to January 22, 1898, both days inclusive, the Exposition to be known as the Sportsmen's Exposition and Bicycle Show, thereby making a special feature of bicycles, bicycle sundries, machinery, etc.

The president of the Association says: The National Board of Trade of Cycle Manufacturers have officially announced that they will not hold or sanction any show before June 1, 1898. We having received a number of applications from manufacturers of bicycles and bicycle sundries for space, which shows a desire on the part of the trade to exhibit in New York, our board feels justified in adding bicycles and bicycle sundries to their Fourth Annual Exhibition.

The great success that has attended the former Sportsmen's Expositions, with the additional attraction of a bicycle show, will undoubtedly make the 1898 Exposition the most attractive ever held in the Madison Square Garden.

Spaces will be allotted as applications are received. We call particular attention to the fact that the Exposition will be open from January 13th to January 22d, making nine exhibition days. THE SPORTSMEN'S ASSOCIATION.

Chas. Tatham, president.

Ours is a marvel. We wrote: "Is there no balm in Gilead?" Supposing we didn't mean it, or were mistaken in the town, our compositor slung it up "Golaid." But that's a small matter. Some years ago, in compiling a mortuary report from exchanges, we wrote: "Dr. Jno. B. Bailyhache, *aet.* 74 years, born July 20, 1822, and died—." Imagine our consternation on finding the proof sheets to read: "Dr. Jno. Bellyache eat 74 ears corn July 20, 1822, and died—."—*Texas Medical Journal.*

A copper pan said to be the largest ever made from one piece of metal, has been turned out at Swansea, England. It is twelve feet four inches in diameter, three feet three inches deep and weighs two tons.

AMERICA AND AUSTRALIAN TRADE.

We have received from Thomas Cooper, a well-known representative of American manufacturers, located at No. 418 George Street, Sydney, New South Wales, a communication of considerable interest concerning the extension of American trade in that section of the world. Mr. Cooper has had an extensive experience in the way of introducing American goods in New South Wales, and in a private note, he informs us that this experience has taught him that: "The only way for a manufacturer to sell his goods in a foreign market, is in precisely the same way as he sells to his United States trade. I am representing various manufacturers here, who make no distinction between Australia and the United States in their business systems, and it is needless to say that they get results which have never been possible to manufacturers who, for export trade, have followed business systems which it would be impossible to do business under in their home market."

Mr. Cooper sends us also an entertaining article giving an outline of an interview had with Col. Bell, the United States Consul, by a representative of a local newspaper: "Colonel Bell said it had been his effort from the first to impress upon his countrymen the fact that Australia's market was a growing one; that Australians are the most commercial people in the world, and that American firms operating through proper agencies, furnishing goods kept up to a proper standard and packed and delivered in good faith, might rest assured of a profitable business for the future.

"Referring to the growth of trade between the two countries, Colonel Bell mentioned that in 1894 this colony's trade with America totalled £916,968; in 1895, £1,307,874, and in 1896, £3,794,835. The figures, he explained, though correct, are somewhat misleading as evidence of the growth of American trade with New South Wales, owing to the abnormal shipments of coin from Sydney to the American ports during last year. Deducting the total gold and coin shipments, however, there still remains an increase of over 130 per cent. for the three years, 1894-6, as against an increase of 20 per cent. for France and 16 per cent. for Germany, and in face of the enormous subsidies paid by France and Germany to steamship lines, with the object of increasing the trade with Australia. If, further, the entire imports of wheat and flour from the United States to this colony, which during the period were also abnormal, are deducted, a net increase of over 54 per cent. is shown in the regular staple lines.

"The consul enumerated 30 classes of articles imported into New South Wales, with the portions supplied from the United States. These included the following: Agricultural implements, total importations, £70,975: from the United States, £13,277; arms, ammunition and explosives, £138,783, £16,576; bicycles, £205,499, £50,758; boots and shoes, £381,233, £41,539; carriages and carriage material, £50,391, £23,886; drugs and chemicals, £206,862, £11,820; fish, preserved, etc., £103,623, £35,687; fruits, various, £367,272, £11,084; furniture and upholstery, £84,920, £6842; grains and products, £1,157,144, £717,200; Hardware and ironmongery, £231,537, £33,173; hops, £40,701, £9429; leather, £81,502, £24,308; machinery, £489,675, £57,328; oils, £202,067, £81,946; paper, books, etc., £372,111, £48,571; preserves, £13,637, £8061; soap, toilet, etc., £65,568, £11,742; stationery, £125,497, £7575; timber (lumber), £344,955, £117,772; tobacco and products, £231,937, £110,774; tools, £97,339, £39,353; typewriting machines, £17,046, £12,053; watches and clocks, £41,981, £10,288. The total amount of the colony's importations was £6,256,809, and the value of the United States quota, £1,522,495.

"Among the articles for which Colonel Bell anticipates a largely increasing business are agricultural implements, bicycles, drugs, boots and shoes, Hardware, paper goods, machinery, dressed lumber, high class confectionery, furniture, iron and steel. The proposal which has been made in certain quarters that American manufacturers should establish showrooms and keep on hand a moderate stock so that buyers could select and be accommodated without delay, does not meet with Colonel Bell's approval. 'To abolish the indent agent abroad would be like abolishing the drummer in America,' he says. At the same time, he has sought to enforce on American manufacturers the necessity for entrusting their goods only to men of experience, industry and integrity, who should suitably advise them as to the changing demands of the Australian market. In all such matters, however, it is an axiom with the Colonel that the buyer is the final judge of all articles placed on the market. 'The American wants the new thing, the Britisher the tried thing.' American boots are growing in favor in Sydney largely, Colonel Bell thinks, because for a few years the people have seen them exhibited in their shop windows.

"Having watched the growing trade during the past three years with pardonable pride, the Colonel feels safe in predicting a splendid future for American goods in Australia, if skill is used in studying the people's tastes, and energy and integrity are observed in supplying their requirements. 'If I have not assisted in this improved trade,' he modestly exclaimed, 'I have witnessed it with enthusiastic satisfaction, and am well pleased with the results.' At the same time, he pointed out, America wishes to buy as well as sell, so that, after all, the trade between the two countries is simply a matter of exchange, and while in the direct trade America sells more to this colony than she buys, in the indirect trade it is the other way about, because she buys largely of New South Wales products through England. 'Contrary to general notion, the balance of trade is, as a fact, in favor of New South Wales.'"

Commenting on this statement by Consul Bell, Mr. Cooper continues as follows:

Editor Hardware: Should you publish this clipping, I think it might be well for you to call attention to Colonel Bell's remark, in which he confuses the "indent" agent and the drummer as being one and the same thing.

An indent merchant in this country means a man who sells his goods first and imports them afterwards, whilst an ordinary merchant first imports his goods and then sells them. They are merely two types of middlemen.

By an indent agent I think the Colonel must have in mind commission buyers or exporters, as you call them. They are essentially part of the middleman business, as apart from manufacturers and consumers.

By a "drummer" I think we understand a man allied to the interests of a particular manufacturer.

No American manufacturers have got any men of that type in Australia. The entire business is controlled by the distributing interests of one type or another. I believe I am the only Hardwareman here who can be classified as belonging to the manufacturing interests. I am asserting for manufacturers in this country the right to be in touch with the consumer and to make satisfactory arrangements for the sale of their goods. That policy is strongly resent-

Digitized by Google

ed by a very strong section of the distributing interests, who claim to control everything, and deny the manufacturer any rights at all.

Until manufacturers can discern the difference between a salesman and a buying agent they cannot get best results possible. Yours truly,

Sydney, New South Wales, Aug. 30, 1897 THOMAS COOPER.

Will Make Stoves.

There is an encouraging prospect that with a continuance of the prosperous conditions of trade now prevailing, the stove industry in this city will again thrive and hundreds of men be given employment. Mr. Gaitley of the Troy Nickel Works Co., which has the plant of the old Perry Stove Works Co. on Van Rensselaer Island, said recently that a company will be incorporated next year with a capital stock of $50,000 for the purpose of manufacturing castings and stoves. This will be good news to those patriots who want to see Albany regain her old-time prestige as the center of stove manufactories. With the downfall of this industry, Albany lost one-third of her commercial importance. The resumption of work in the Perry foundry undoubtedly will have a rejuvenating effect on other stove works long since closed.

Mr. Gaitley attributes the cause of this revival to the general good times now prevailing. He said:

"We expect to start in with thirty-five or forty men and will make castings and a few stoves. We easily can make stoves as we have all the patterns here. We shall increase the force after awhile to fifty or sixty men and, if business is good, we will extend our work.

"We now have employed 110 men in the nickel works. We are awaiting now before opening the foundry for a shipment of iron."

The new company will be incorporated the first of the year.—*Albany (N. Y.) Evening Journal.*

He Talks About Stanley Goods.

The "Man at the Corner Desk" in the store of the W. Bingham Co., Cleveland, Ohio, knows a good thing when he sees it. In his screed for October, he says: "Among others, look over your line of butts and hinges. The W. Bingham Co. is selling the Stanley Works' corrugated strap and tee hinges, corrugated brass butts and wrought steel butts, all of superior quality. The corrugations of the strap and tee hinges not only stiffen the joints and make it impossible for them to bind on the pin, but the extra heavy goods that are stronger than the old style are lighter in weight, with a corresponding saving in cost and freight. The wrought steel butts are finely finished in all the effects of bronze metal; are very strong and practically everlasting. It is a good line to show to customers who want the best quality at a reasonable figure. In fact, there is not a poor article made by the Stanley Works. They began business in a small way a good many years ago, but their goods were always right aud everything they added to the line was of a character and made in a way that added to the makers' reputation, and they prospered accordingly, so that to-day, there is no concern in the Hardware manufacturing business that stands higher in the estimation of the trade than the Stanley Works."

True Enough.

The Hardware Club on the top floor of the Postal Telegraph building, has a women's dining room which is separated from the main dining room by portieres only. The service is the same as for the men. A neat reception room has been fitted up for the use of women, but while they are made to feel welcome there is no inducement for them to remain after luncheon.—*New York Commercial Advertiser.*

On "Selling for Spot Cash."

Editor Hardware: You get up a very readable paper, with a great many new and good ideas. That is what is wanted—all that's new, and up to date. We all know about the old, that is past and gone; don't care for that—we want the new, and what is going on now over the country in the Hardware line.

Let us say here that we think the article in the latest number, "Selling for Spot Cash," by Silas Jones, a fine one, well written, and in our opinion correct. It has always appeared to us that selling Hardware for cash in any but the large cities is impractical and unprofitable—that it cannot be done. No firm with plenty of capital could afford to try it. We never saw an article on the subject as good as that, or so near our mind. We have had some thirty years' experience and observation to go by. Yours truly,

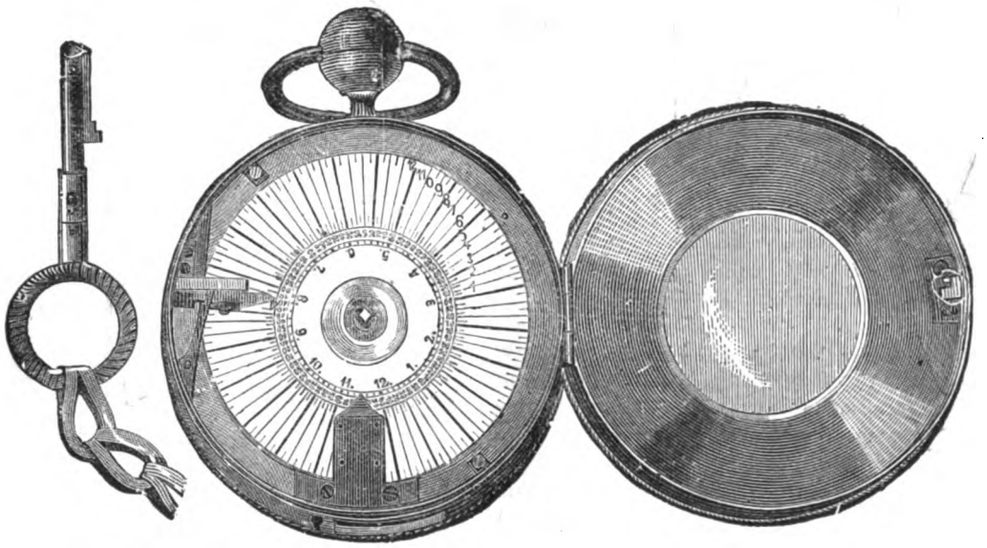
Keene, N. H., Sept. 27, 1897. SPENCER HARDWARE CO.

Bissell Carpet Sweeper Co.'s Exhibit.

The Bissell Carpet Sweeper Co. have taken medals continuously for the last fifteen years at the fair of the American Institute and are again exhibiting their attractive line of sweepers at the present exposition which is being held at the Madison Square Garden. Their exhibit consists of a very elegant line of their latest improved cyco bearing carpet sweepers. The appearance of their exhibit is very greatly intensified by the exhibit of an electric wheel, a fac-simile of the celebrated Ferris Wheel, shown at the Chicago exposition. This wheel is operated by an electric motor and flashes out some 350 one-candle power lamps, with nineteen different combinations, and the effect is most striking. The lettering on the wheel in these different combinations advertises Bissell's cyco bearing carpet sweepers. The Bissell Co. have two attendants in charge of their exhibit, which is one of the leading attractions of the Garden.

A dispatch from Reading, Pa., is to the effect that the improvement in the iron industry in that section is very marked. It is stated that the iron furnacemen of Eastern Pennsylvadia are greatly encouraged by the present state of affairs and the future probabilities, and that many of them have entirely sold their entire product for 1897. It continues: "This increased demand for pig iron does not come from any particular manufacturing industry, but seems to be general. The pipe and rail mills are very busy. The demand for pig from manufacturers of locomotives, railway appliances, structural iron and plates, nails, and small Hardware, is very good. Wrought iron pipes have just been advanced 5 per cent., and the large mills in this section are full of orders and making big shipments daily."

The annual banquet of the New Haven Hardware Dealers' Association was held in the Tontine parlors, New Haven, Conn., on the evening of September 24th. Covers were laid for fourteen, and those present were: J. R. Lyon, E. L. Nettleton, Edward Hunn, K. A Warner, W. A. Warner, W. H. Burchell, R. C. Lightbourne, M. Meyers, L. L. Rosenberg, F. L. Leighton, E. J. Selk, George J. Bassett, L. H. Jackson and W. W. Buckingham. After the banquet matters pertaining to the trade were discussed.



The C. R. Meres Heater Mfg. Co., Norwalk, Ohio, have just shipped heaters to J. W. Britton, Painesville, Ohio; E. T. Forbes, and Charles Strever & Son, Cleveland, Ohio; O. H. Tilden, Vermillion, Ohio; W. B. Otis, Jackson, Mich., and F. B. Colson, Norwalk, Ohio. Their improved heater combines heat and hot water supply for domestic purposes.

NEW GOODS AND SPECIALTIES.

Hahn's Improved Watchman's Time Detector.

Nanz & Co. Incorporated, No. 116 Chambers Street, New York, are the sole agents for the United States and Canada for the sale of Hahn's latest improved Watchman's Time Detector, with safety lock attachment, and which has met with a large and extended sale in this country since the original patent was granted in 1891, they having been accepted and endorsed by the different boards of underwriters of the United States. The case of the clock is of brass, heavily nickel plated. The clock consists of a movement, revolving a dial, which is supplied with an independent spring, so that it cannot be turned back; is divided into hours and minutes, and when operated with the keys it records the fact upon the dial, and also the time at which the watchman made his rounds. One of the great advantages of this clock is, that the registering is done by numbers ranging from 1 to 6, 1 to 12 and 1 to 18, instead of marking only either by holes or by an impression on the dial, which is the same for all stations. The movement is separate from the recording mechanism, full jewelled, lever movement, and will run about sixty hours. The clock has to be provided daily with a new dial, on which the date of the night should be written, after which it should be wound up and locked before given to the watchman. The recording is done by inserting the keys into the clock and turning them to the right once, which perforates the dial with the number of the station. On the delivery of the clock in the morning, it can be seen at once how often and at what time, the rounds have been made during the night, how long the watchman stayed at the station, and whether all the stations—even the most isolated ones—have been visited on each round; in short, the marked dial tells the exact history of the night's doings. Manufacturers contemplating improvements for 1898, should send for catalogue containing prices and full particulars.

McCabe Ball Bearing Tubular Door Hanger.

Among the many noted improvements in the hanging of parlor, barn or other heavy doors with which the trade has become familiar of late years, the McCabe Patent Ball Bearing and Tubular Door Hanger now being introduced by the McCabe Mfg. Co., Nos. 532 to 542 West 22d Street, New York, presents features of great interest to the architect and Hardware dealer which make it well worthy of the closest inspection as to points of merit. It is made in varying forms and styles under this patent, for use upon parlor, fire, barn, elevator, car and mill doors; and we present herewith, see Fig. 1, an illustration of the Parlor Door Hanger No. 2, showing its method of construction and suggesting its adaptability. It is strong, simple and durable, and consists of a tube of drawn steel with a parallel slot with flanges on both sides in which runs the carriage; this is composed of two hemispherical cones, see Fig. 2, a hanging strap and sixteen universal balls; the balls turn on the cones and in a ball race in the hanging strap, thereby reducing friction to a minimum. The track is stiff and rigid, being round with an opening at the bottom, and it is absolutely impossible for it to clog, there being no place wherein snow, ice, dust, or other matter could lodge and thus impede the free action of the doors. The manufacturers claim this parlor door hang r to be absolutely noiseless, and extremely simple of adjustment on the door as well as on the track. This adjustment is made by means of a check-washer and the end of the carriage being thread-

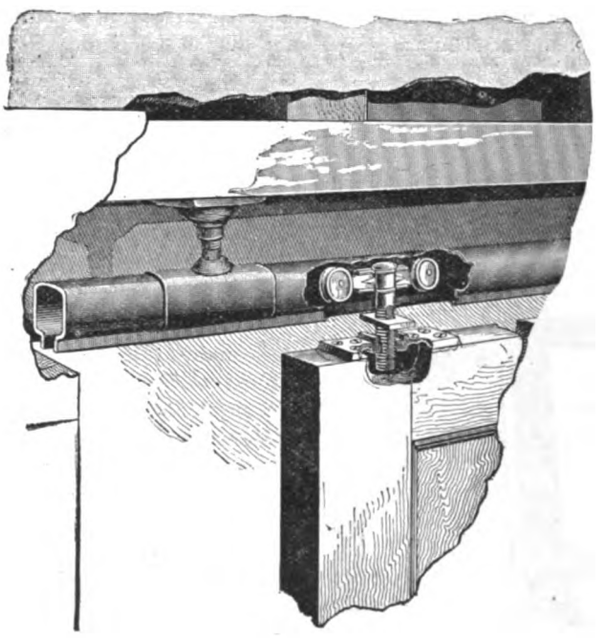

FIG. 1.

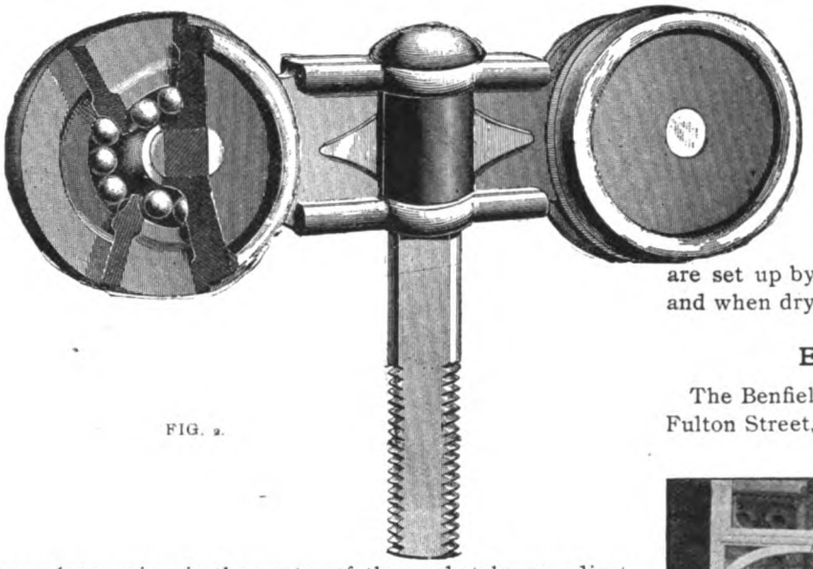
Digitized by Google

ed. By lifting the check-washer out of the slot and turning the pendant round, you can screw it down into the plate or out as desired; this will raise the door up to the jamb head or lower it, so that the track can be raised or lowered to make it level and still keep the door up to the jamb head as desired. The track is attached to the spreader in only



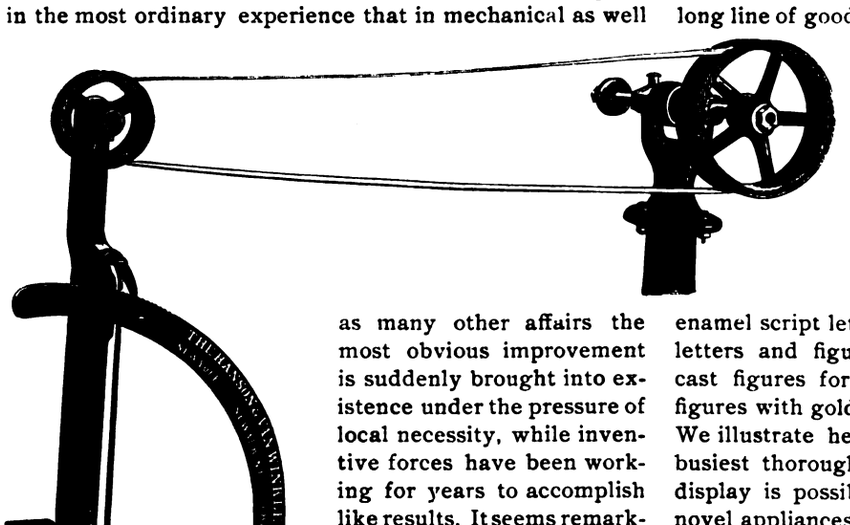


FIG. 2.

two places, viz.: in the centre of the pocket by an adjustable bracket and centre of the opening. By this means the track may be raised or lowered, or the track may be removed from the pocket by loosening the screw above the opening, without removing the door or any of the trimming, and can be adjusted with a screwdriver. By this means the pocket end of the track may be raised or lowered as desired when hanging the door. The door may be plumbed by the adjusting screw in the bracket over the opening. The extended uses to which this mode of ball bearing hanger can be applied make this catalogue a desirable one for the dealer. It will be forwarded with trade discount upon request.

New Belt St apping Attachment.

Hanson & Van Winkle Co., Newark, N. J., have just placed upon the market a new belt strapping attachment which we illustrate herewith. It is a matter of surprise in the most ordinary experience that in mechanical as well as many other affairs the most obvious improvement is suddenly brought into existence under the pressure of local necessity, while inventive forces have been working for years to accomplish like results. It seems remarkable that some like improvement to this attachment has not been discovered before. In this new device the driving pulley is placed on the end of a grinder or polishing lathe spindle. The upright which supports the smaller pulley is designed to be set up at a point that will admit of using standard length belts. The upright support is screwed to the floor, and likewise the adjusting arm. In changing the belt the operator has merely to press his foot on the lever, which releases the dog from the notched adjusting arm, and enables the operator to move the upright arm slightly forward; after which the belt can be instantly removed or replaced. The arm is then drawn up until the proper tension is reached at which point it is automatically locked. Should there be any stretch in the belt, it is also taken up by the delicate adjustment. The endless belts used with these machines are made of two thicknesses of duck with a layer of vulcanized rubber between. They vary in width from one-half inch to six inches, and are twelve feet long over all. Where space will not permit using standard lengths, any special length required can be made up on short notice. The belts are set up by being sized with glue and rolled in emery, and when dry they are ready for use.

Enameled Signs and Letters.

The Benfield & Milne Mfg. Co., Newark, N. J., and No. 92 Fulton Street, N. Y., enamelers on copper and steel, are desirous of obtaining agents among the Hardware trade for a long line of goods that find recognition in every community, including among other salable specialties enameled steel signs for street uses that will stand all changes of temperature without in any way losing their brilliant appearance; also plain block enamel letters and figures for attaching to glass, and letters and figures with holes for house, hotel, steamboat and railroad requirements. Included in the assortment of these goods now possible of attainment, are enamel script letters, bronze letters and figures, aluminum letters and figures, all for attaching to glass or wood, cast figures for house numbering, and glass letters and figures with gold backing for the most artistic sign work. We illustrate herewith a restaurant front from one of our busiest thoroughfares in this city, showing how great a display is possible through skilful use of these new and novel appliances, making an ordinary front present a picturesque and attractive appearance and fully advertising the business that uses this method of attracting attention. The addition of this line to any Hardware stock will be found highly remunerative and entail very little trouble in its distribution.

When you shake hands, give an honest pressure as though you are really glad to see the party, and don't let your hand feel as limp and lifeless as the tail of a fish, in the extended palm of your new acquaintance.

Recent Trade Publications.

The Iowa Farming Tool Co., Fort Madison, Iowa, are mailing to the Hardware and implement trade their catalogue of forks, hoes, rakes, etc., for the season of 1898. It is a very handsomely printed catalogue of over 100 pages, 6x9 inches in size, printed in two colors, typework in blue and implements in red, and with its artistically embossed cover, makes a very attractive appearance, fully in harmony with the excellence of the goods described in its pages. Among its contents is a telegraphic code, simplfying by its use the usual "rush" orders so prevalent after the season has advanced sufficiently to perceptibly reduce stocks. Its contents embrace in large assortment: scythe snaths and grain cradles, hay, manure, header, stable and spading forks; grain, barley, coke, sluice and stone forks; hoes of every possible style desired; solid and socket shank garden hoes, ladies,' toy, boys,' meadow, mortar and planters' hoes, and a greater variety of such goods than is usually noted, including cultivator, double bit, cotton chopper, scuffle and sprouting hoes. The line of garden rakes shown embraces bow braced and socket shank among the better steel grades, and malleable iron, toy and weeding rakes as well. They are also large manufacturers of Garden tool sets and such specialties as the "Kretsinger Cut Easy" corn hook, the "Hold-Easy" corn, hedge, cane and tobacco knife, etc., etc. This catalogue, covering so large and important a line of goods demanded by the trade, both here and abroad, should be sent for and possessed by those interested.

Johnson & Co., Catskill, N. Y., and No. 84 John Street, New York, have just issued an exceedingly attractive cloth bound catalogue, illustrating in a very complete manner the line of high grade heaters manufactured by them under the names of the Little Gem, Gem, Royal Gem, Crown Gem and Economist, intended either for steam or hot water, as designated in its pages. The catalogue is handsomely printed on fine plate paper, in two colors, and is written in a manner that can be easily understood by the lay reader. As the manufacturers state in their prefatory remarks: "In these heaters we have aimed to embody the very best features known to modern heater construction. An experience of fifteen years in the manufacture of house heating apparatus has made us familiar with, and enabled us to avoid, the defects to be found in many of the so-called up-to-date heaters on the market. We have seen failures and successes and have noted the cause of each. All our heaters are carefully tested and the ratings are conservative and safe, being based on practical tests in winter and on foundry tests in summer." A list of references from parties that now have these heaters in use accompanies the other contents of this catalogue and emphasizes the statements of the progressive manufacturers.

New Jersey Car Spring & Rubber Co., Jersey City, N.J., and No. 10 Barclay Street, New York, have just issued to the trade their new catalogue and price list for the season of 1897 and 1898. It forms a convenient pamphlet of 128 pages, printed on excellent paper, and with an extremely artistic cover in bronze and color. The company note the fact of their having been established since 1858, very few companies antedating them as manufacturers of rubber goods for mechanical purposes. The varied contents of the catalogue embrace about everything that can be produced by such a complete plant as is possessed by this well known company. Among the many articles so enumerated may be mentioned: Belting, of every description, from straight and quilt stitched to more ordinary styles; all the many and various kinds of hose known to the trade; from the usual brewers, fire and mill hose to the more greatly improved steel clad, steel end and wire wound varieties, mats and matting, packing, gaskets, valves, car springs, printers' blankets, etc.,etc. The catalogue is one of sufficient importance to be in the hands of every dealer selling any of this class of goods.

Underhill, Clinch & Co., No. 94 Chambers Street, New York, who have long been agents for O. Ames & Sons Corporation, the manufacturers of shovels, spades and scoops, have recently issued a revised price list dated Oct. 1st, 1897, and embodying in its compilation all the changes in prices made by the manufacturers up to that date. This price list, which is original with Underhill, Clinch & Co., has become highly appreciated by the trade; for expressed in arbitrary list prices, the goods are described properly, and the dealer, by simply taking off the discount in accordance with the discount sheet accompanying the list, finds the net price at once, and has no additions to old prices to worry him, as would be the case if he didn't have this price list to help him. Underhill, Clinch & Co. carry constantly in their extensive stock, 126 different numbers and styles of "Ames" goods; these styles they take especial pains to keep on hand, and it is very rarely that a dealer finds them "out" of anything noted on this price list.

Russell & Erwin Mfg. Co., New Britain, Conn., and No. 43 to 47 Chambers Street, New York, have just issued an extremely handsome and artistically perfect catalogue of store door handles, complete, showing 12 different varieties of locks and latches to be used in connection with the same. It forms a beautifully printed pamphlet of 26 pages, on plate paper, embellished with a profusion of half-tone illustrations and competent descriptions, the construction of which reflects credit upon the catalogue department of this prominent company. The assortment of plain and ornamental handles covers 26 varieties, from the plain and unpretending to the most elaborate in ornamental design that the most exacting architect could demand. The artistic excellence of many of the designs shown in this catalogue excites universal admiration wherever exhibited; they are undoubtedly creations of taste and elegance.

The Tabb & Jenkins, Hardware Co., No. 107 Hopkins Place, Baltimore, Md., have just issued to the Hardware trade their gun and sporting goods catalogue for the Fall season of 1897. It consists of a very attractive pamphlet of 56 pages, 9x12 inches in size, filled with excellent illustrations of almost everything in the line of guns and ammunition demanded by the Hardware and sporting goods trade, and including Parkers, Smiths, Colts and Remington hammerless breech loading shot guns, and a large assortment of other varieties and makes, that must make their catalogue invaluable to the dealer for sales purposes. Gun implements in large variety are shown—shot pouches, canvas and leather goods, and cartridges of every description are fully illustrated, and revolvers of all kinds.

The roof of the new Spence Library of the Union Theological Seminary, at Richmond, Va., will be of fireproof construction. The trusses will be steel, and the covering slate, attached directly to metal supports. One end of the building is round, making a conical shaped roof, and at various points of the roof slope are placed dormers and skylights. The peculiarity of the construction makes the iron work very intricate in order to get the pleasing architectural appearance desired. The contract for furnishing and erecting the steel work for the roof has been given to the Berlin Iron Bridge Co., East Berlin, Conn.

According to Sir Benjamin Baker, the charges of powder in guns have, since the Crimean war, increased from 16 pounds to 900 pounds, the weight of projectiles from 68 pounds to 1800 pounds, and the energies developed from 1100 foot-tons to 62,000 foot-tons. Further changes are rapidly following the introduction of smokeless powders.

NORTH DAKOTA RETAIL HARDWAREMEN.

In response to the call which was mentioned in a recent issue of *Hardware*, a representative meeting of the retail Hardware dealers of North Dakota was held in Grand Forks, on Wednesday, September 29th, for the purpose of forming a State organization. A statement of the purposes in view was made by C. N. Barnes, of Grand Forks, after which Clark W. Kelly, of Devil's Lake, was chosen temporary president, and George A. McCrea, of Drayton, temporary secretary.

It was decided by unanimous vote that an organization should be formed. The following committees were then appointed by the chair:

Resolutions and by-laws; H. N. Joy, Hamilton; C. N. Barnes, Grand Forks; H. F. Strehlow, Casselton; W. H. Pinkerton, Lakota, and W. R. McIntosh, Bottinneau.

Permanent organization: P. L. Pritchard, Hillsboro; J. F. Newgaard, Grafton, and A. H. Duntley, Grandin.

A recess was taken until the afternoon, and on reassembling, the committee on permanent organization made the following recommendations:

1. We recommend a permanent organization.

2. The organization shall be known as the North Dakota Retail Hardware Association.

3. We recommend as president, Clark W. Kelly, of Devil's Lake; vice-president, C. F. Jacobs, of Hillsboro; treasurer, George A. McCrea, of Drayton; secretary, C. N. Barnes, of Grand Forks.

The report of the committee was accepted, and the officers were unanimously elected. The committee on constitution and by-laws then made a report, and the various sections were read and adopted. The following gentlemen, in addition to the vice-president and secretary, were constituted an executive board: H. N. Joy, Hamilton; H. F. Strehlow, Casselton; W. H. Pinkerton, Lakota; J. F. Newgaard, Grafton; J. C. LeBeau, Grand Forks; A. H. Duntley, Grandin, and A. J. Smith, Fessenden.

RESOLUTIONS.

The following resolutions were also adopted:

Resolved, That the members of this association confine the purchase of Hardware, Stoves and Tinware to manufacturers and wholesale dealers who sell goods only to firms that are regularly engaged in the retail Hardware business as defined in these resolutions.

Resolved, That it is the sense of the convention that the interpretation of the term "retail Hardware dealer," as set forth in the above resolution, to entitle him to purchase Hardware, Stoves and Tinware, to be construed to mean any persons having an established place of business and carrying a line of Hardware, Stoves and Tinware, and such goods as are usually kept in a first-class Hardware store.

Resolved, Any manufacturer or jobber soliciting orders or selling goods in any town or city where a member of the North Dakota Retail Hardware Association is located and doing business, except it be to an exclusive Hardware dealer in such town or city, shall be considered as working against the interests of said association; provided that nothing of this article shall be so construed as to prevent manufacturers or jobbers from selling to manufacturers in any city or town goods actually used in articles manufactured by them, nor from selling to railroad or transportation companies. The interpretation of this resolution is hereby vested in the Executive Committee.

Resolved, That any manufacturer or jobber in Hardware, Stoves or Tinware furnishing net prices or any discount from list prices contrary to the foregoing resolutions, either by themselves, employes or agents, shall be considered as disapproving of the above resolutions.

Resolved, That this association shall, as far as lies in its power, keep a record of all goods sold, and by whom sold, to catalogue houses and department stores, and of all other violations of these resolutions.

Resolved, That any member purchasing goods from any manufacturer or jobber who has been listed by the Executive Committee as disapproving of these resolutions, shall be subject to fine or expulsion, at the discretion of the Executive Committee.

Resolved, That every member of this association is constituted a committee of one, and is expected to report to the proper officers in this State any violation of these resolutions.

Resolved, That these measures are just and necessary for our welfare, and a rigid enforcement is demanded.

Resolved, That this convention indorses the above and urges its officers to use their best efforts to bring about the formation of a national association with the end in view that a uniform system of protection for the trade will prevail throughout the entire country.

The thanks of the Association were tendered to C. N. Barnes for his efficient work in bringing about the organization, and also extended to J. E. O'Brien, of Crookston, Minn., for his attendance at the meeting, and for his valuable advice and assistance. It was ordered that the next meeting should be held in Grand Forks in February next.

SOME SPEECHES.

During the session a number of speeches were made, one of which was by T. G. Walthers, of the C. W. Hackett Hardware Co., of St. Paul, who spoke from the standpoint of a jobber. Remarks were also made by A. M. Marshall, of the Marshall-Wells Hardware Co., of Duluth. The chief address of the occasion, however, was delivered by J. E. O'Brien, of Crookston, who spoke in full as follows:

"Owing to the many matters that have commanded my attention in the past few weeks, I come before you, I may say, wholly unprepared to discuss the subject that you meet here to-day to consider, representing what I am pleased to call your 'brothers from Minnesota' in this great movement to better trade conditions, and on behalf of our president and the members of our organization to welcome you into our brotherhood, and bid you God speed in your efforts directed against placing the vast retail business interests of our country in the hands of a few, there to be controlled and manipulated in years to come by trusts and combinations that the few can form to the detriment of the masses. It is not impossible, should present trade conditions exist, to see the retail Hardware business worthy of mention of your great State placed in the hands of a few men—three or four located under three or four roofs, in possibly two cities—and should that condition be brought about what will become of the now convenient market place for the great mass of your people that are engaged in agriculture? Will they be compelled to flag a train when they want to send their produce to market?

"What will become of your beautiful cities, towns and villages that dot your fertile prairies; that to-day are used to a great extent in measuring and determining the value of the farm lands that surround them? Will their business blocks become tenantless and taxless? What will become of the great army of trustworthy and capable young men who are acting in the capacity of our confidential clerks, for we find that nearly every person we employ must be qualified to fill that important position many times during the year, and they command a salary measured by their honesty, integrity and ability that will furnish them a comfortable living for themselves and their families. Will they have to give way to persons who require the con-

Digitized by Google

stant care and watchfulness of an overseer, and this oftentimes at an age when they should be receiving an education, and who rarely ever rise above the position they occupy, and whose situation is always for sale to the lowest bidder, because it can be filled at any moment by almost any person?

"What will become of your farmer who has to ask his merchant for credit from spring to fall? Will he be compelled to give up his home, and he and his family work like slaves for some capitalist at low wages all their lives?

"No, my friends, this centralization of the vast retail business interests of this country must not continue. The Minnesota retail Hardwaremen have spoken in plain and no uncertain tone, and the force of their arguments is felt at every trade center in the United States, and re-echoes back with a cheerful submission to the will of our organization. Organization is mighty, but it must be complete. It must embrace every person interested in its success. Petty jealousies must not interfere with this plain duty that we owe ourselves, our families and our country; but united we should stand for fair and reasonable principles that should govern our organization. We are not monopolists; we are anti-monopolists. We aim to increase the number of dealers in our line of trade rather than decrease them. Where trade is concentrated in the hands of a few, there monopoly has its birth. Where it is placed in the hands of the many, monopoly is unknown. The principles for which we contend mean the upbuilding of your cities, villages and towns. If we fail, a few dealers in large cities will control mercantile trade in all its branches, crushing out all rivalry in your State, and erecting the despotism of their monopoly to the great detriment of your people. In conclusion, I wish to say again that the Minnesota Retail Hardware Dealers' Association welcomes your organized effort, and will be in full accord with you in the enforcement of your resolutions, and ask of you that you give your support toward the organization of States now organized into a national organization, for it is on the successful consummation of national unity that the success of this movement largely depends."

The Turning of the Worm.

The driver of the ice wagon was surprised to see the occupant of the house sitting on the front doorstep as he drove up. As soon as the wagon stopped the householder was at the curbstone with his eyes fixed on the scales. The ice man paid no attention to him, but, after weighing a small chunk, started toward the house with it.

"Hold on," said the customer, "I'll take that in."

"You needn't bother."

"But I know just where to put it."

"All right. But you want to be quick, for it's a warm day, and we'll have to deliver the stuff in sponges if we let it stay out in the sun much longer."

The customer siezed the tongs and dissappeared. In a little while he came out of the house, and, seating himself on the doorstep, began to whistle.

"Well! well!" shouted the ice man. "I can't stay here till next winter."

"Are you waiting for anything?" inquired the customer, blandly.

"Of course, I'm waiting for something. I want my tongs."

"What tongs?"

"The tongs you just used to carry the ice in."

"Oh! I'm sorry; but I don't care to lend them."

"Well, whose tongs do you think they are?"

"Mine."

"Maybe you've gone down town unbeknown to anybody and bought out the ice company with all its furniture," was the sarcastic rejoinder.

"No. But I bought those tongs. I pay you so much a pound for your commodity, don't I?"

"Yes."

"Well, I noticed that the tongs were weighed in with the rest, and I'm not going to pay for tongs at so much a pound and then not get them. I have been taking ice from you for the last three months, and that makes at least ninety pairs of tongs still due me. If you have any proposition ready, to trade off ice for tongs, I'm willing to listen to it." —*Washington Star.*

Muskets.

While the introduction of portable firearms into Europe is of comparatively recent date, their use was frequent among the Mohammedans of Eastern Asia at a very early period. La Brocquiere, who made a journey to Jerusalem in the middle of the fifteenth century, and who traveled extensively in the East, mentions the firing of small harquebuses at the great festivals in Damascus.

The first use of muskets in Europe was at the siege of Rhege in 1591, by the Spanish soldiers. These arms were so extremely heavy that they could not be used without a rest. They were provided with matchlocks, and were effective at a considerable distance. While on the march the soldiers themselves carried only the ammunition and the rests, and boys, bearing the muskets, followed after, like caddies on a golf-course.

Loading these cumbersome arms was a slow operation. They were clumsy and awkward to handle, the ball and powder were carried separately, and the preparation and adjustment of the match took a long time.

Before long, however, improvements began to be made. The guns became lighter in construction, and the soldiers carried their ammunition in broad shoulder-belts called bandeliers, to which were suspended a number of little leather-covered wooden cases, each of which held a charge of powder. A pouch, in which the bullets were carried loose, and a priming-horn hung at the sides of the soldier.

As late as the time of Charles I. muskets with rests were still in use, and it was not until the beginning of the eighteenth century that firelocks were successfully employed.—*Harper's Round Table.*

Business Man's Talk.

"No," said the Hardwareman to the farmer, as he tied up the package of nails in the paper, "as you say, people talk about the low price of what they buy. Take those nails, now. What do you suppose those nails would cost you ten years ago? Just about six cents a pound, and now you can take the lot of better goods at three cents and the extra wrapper thrown in. That's not much, you say. Not so much on a little lot of nails, perhaps, but ten cents isn't much on the bushel of potatoes you brought in just now, and that's all the difference in price from ten years ago, and yet you grumble at the low price. It's not the pound of nails that hurts me. Everything in my store has gone down the same way. Your wheat and hay and chickens and butter and eggs bring you substantially the same prices they did ten years ago. You farmers forget that you have things to buy as well as things to sell. Want to buy a plow this year? There's a dandy for $12. Ten years ago I'd have asked you $16 for it. There's $4 saved to you at one clip. There's a better planter than the one I sold you ten years ago for $60—a whole lot better. Take it along for $40. Remember that binder you bought of me ten years ago for $189? Must be worn out, eh? I'll sell you a fifty per cent. better one to-day and throw off the $89. You farmers don't know when you are well off."—*Superior (Neb.) Journal.*

"What are you going to be when you grow up, my boy?'
"A king," answered Willie proudly.
"And you, Dickie?"
"I guess I'll be an ace."—*Detroit Free Press.*

Review of the Markets.

The season for ordering largely for present requirements being limited now more especially to the retail trade, finds the markets for leading goods without material changes, the few that occur being of minor importance and having no bearing upon such sales as are referred to. Every day that passes indicates additional strength to the business that has done nothing but progress for months. The reports from correspondents show favorable conditions throughout the country with every prospect of profitable continuance until the holidays are passed. The jobbers are doing well, and the retailers find increasing demands daily creating additional wants.

Wire Nails: The mills continue to be well supplied with orders for future delivery even into early November, a steady demand being noticeable, no great fluctuation in price having occurred to deter purchasers from laying in stocks. Prices continue very firm, being represented at $1.50 for carload lots at mill. New York quotations are represented by $1.65 for carload lots on dock. Smaller lots from store $1.70@$1.75 in accordance with quantity.

Cut Nails: The market for cut nails, after advancing the price 10 cents a keg, pursues the even tenor of its way without marked characteristics, the mills east and west being supplied with good orders both for home and export trade. The eastern and western mills are still working on the established basis of the Pittsburg price being $1.28, with freight added to destination to make local quotations, New York price being held at $1.43 for carload lots and an addition of 10 cents a keg for smaller lots from store.

Shovels and Spades, etc.: The changes agreed upon by the manufacturers to take effect October 1st have already been placed in operation, and universally accepted by the trade, the advance being too slight in character to make serious cause for complaint under the favorable conditions now prevailing.

Linseed Oil: The Dean Linseed Oil Co., No. 181 Front Street, New York, quote prices as follows: In lots of less than 5 barrels, 35 cents per gallon: in lots of 5 barrels or more, 34 cents per gallon. Boiled linseed oil, 2 cents per gallon higher. Calcutta oil, 54 cents per gallon.

THE PITTSBURG TRADE.

September sales were quite satisfactory, and up to the mark of years preceding the slump of 1893, so that we may say that trade is in very fair condition, and will continue to improve from month to month. We are glad to find the change coming so gradually, as it gives hope of longer continuance in the new order of things.

The new Bessemer railroad of the Carnegie interest opens for business to-day (Oct. 4th). This road proposes to deliver ore from the whalebacks to the furnaces, at freight rates very much below anything heretofore known, the return trip to carry coal.

Seasonable Hardware is moving off well, as weather conditions are favorable. The improvements in gas stoves have brought these goods into very general use throughout the natural gas section. Oil stoves also are in good demand.

Collections are about up to the average. Where the coal strike affected trade, merchants have to wait until the men get one or two "pays" before they get in much money, but this will soon be remedied. Our manufactories are generally running full time.

Logan-Gregg Hardware Co.

THE ST. PAUL TRADE.

Our section is much pleased with the McKinley administration, first, because "Mac" gave us a fair crop, and again because he puts a good price on all the farmer has to sell. Comparing this year with last, there will be much more money in the hands of the farmer, and of course they buy some Hardware as well as other things. We are not having a boom, but we are having a good business, and expect it will continue so until the holidays. Prices are still badly cut, especially on staples, but we hope, with an improved business, this will stop.

The reports from all our territory show that the farmers are paying up mortgages, and generally getting themselves into better shape than ever before.

C. W. Hackett Hardware Co.

THE PHILADELPHIA TRADE.

From all sides we still hear reports of greatly improved trade conditions, and busy factories and employed workingmen tell the story of the better times which are coming.

In some lines of goods the improvement has been most manifest, and firmer prices point to a similar improvement in our own line in the near future.

Nails are still on the upward path, and with further advances almost in sight.

The shovel men have succeeded in making their advance, and manufacturers are withdrawing extreme quotations and feeling their way towards more remunerative prices.

Collections also seem to show that there is more money in the country, especially in the farming communities. As an illustration: One of our salesmen, in the agricultural section, recently reported that he knew a case where a farmer who was driving to a nearby town with a wagon of tomatoes, stopped at a country store and said on his return he would wish to buy some goods. On his way back in the evening he stopped, and not only paid for the goods, but said that he had made as much money off his one wagon load of tomatoes as he made last year off of ten acres.

Almost all farming products have brought better prices this year, and the results cannot but make themselves known in the greater demand for manufactured goods of all kinds, and, while the change in business promises to be gradual, it will probably be all the more sure and steady in consequence.

One of the most remarkable signs to-day is that so far the cost of manufactured goods has been but little changed, although raw have in some lines, advanced. We heard the other day of a textile manufacturer who had on hand a large amount of raw material which he said he could dispose of at a profit of 50 per cent. above cost. In order to run his factory, however, he was obliged to use this raw material and turn it into manufactured goods on which he could not realize at present one per cent. of an advance on the old, unprofitable prices. Of course, this condition of affairs cannot continue, and an advance which has such justification is the best possible basis for permanency.

Biddle Hardware Co.

In the manufactured iron line, shipments to Germany have been quite satisfactory. The steamer *Persia*, on her recent sailing, had on board $15,000 worth of machinery, not including pumps, of which there were $6000. Of sewing machines, there were shipments aggregating in value $18,334; in Hardware, $10,000, and in other materials made of iron and steel, the shipments on the steamer were un usually large.

Brown Bros., Hardware, stoves and furnaces, Montgomery, N. Y. *Publishers Hardware:* We are satisfied with *Hardware*, which is of value to the trade. Enclosed find check for subscription.

The Merchants' Association will be represented at Nashville next week, on the days set apart and known as Brooklyn Day, New York State Day and New York City Day.

A Glass Trust.

From Columbus, Ohio, comes the fact that the glass manufacturers who met there last week organized one of the most gigantic associations, from a commercial standpoint, that has ever been formed. They represent practically the entire glass industry of the United States, and their purpose was to bring under one head every glass manutactory in the country. Only the details of the organization remain to be completed, and these are expected to be adjusted not later than the 12th inst. The association is said to represent as much capital as the Standard Oil Co.

The president is H. Sellers McKee, of Pittsburg, who is at the head of the largest glass manufacturing concerns in America. The secretary is E. I. Phillips, of Newcastle, Pa., another large manufacturer. J. A. Chambers, of Pittsburg, who ranks with the other two, is to be the general manager. The board of directors includes the following, besides the president, secretary and general manager: T. F. Hart, Muncie, Ind.; H. B. Smith, Hartford City, Ind.; W. A. Gorby, Gas City, Ind.; William Loeffler, Pittsburg.

The directors left for New York to complete the organization. It is expected to procure the charter for the new association in New Jersey. The object is to stop the cutting of prices and insure a reasonable profit for all. Each company will be operated separately, the association controlling the prices and output.

An Effectual Remedy.

His firmly set lips and the square cut of his side whiskers showed at a glance that he was accustumed to surmount obstacles instead of yielding to them.

"We were a day late in getting that piece of work out," he remarked to the superintendent of his business.

"Yes it was one of those unfortunate things that couldn't very well be avoided."

"What was the matter?"

"You will remember that the order reached us on Friday morning. It was a pretty big job and the foreman hated like everything to begin it on Friday. The men all looked kind of glum when we talked about taking it up on that day and, to tell you the truth I didn't like to begin it on Friday myself."

"What's wrong with Friday?"

"Nothing. Only you know the old superstition about its being an unlucky day. Of course, everybody feels a little ashamed of it, but, just the same, everybody recognizes it and is more or less afraid of it."

"And you mean to tell me that this superstition has saturated these shops so that we're liable to be delayed on a contract if Friday happens to interfere!"

"I'm afraid that is the case."

"Well, I'll fix that."

"It will be hard to do."

"No, it won't. It will be the easiest thing imaginable. You notify the bookkeeper and the cashier that hereafter instead of paying off on Saturday, all employees will get their money on Friday. That'll arrange things so that instead of regarding Friday as unlucky, they'll spend the other six days wishing for it to come around."—*Detroit Free Press*

Young Men Out of Employment.

A publication representing the Y. M. C. A. in an Eastern trade centre says: There are large numbers of young men out of employment at the present time, and it is trying for us not to be able to place the many who apply to us. When scores of young men are ready to step into the first place that offers, a very little thing may turn the scale for or against a man. The following may be suggestive:

1. Expect to find work every day.
2. Never get discouraged
3. Don't go from city to city.
4. Spend eight hours a day looking for work. If you had a position you would be expected to work that many hours.
5. Be in earnest.
6. Remove your hat when entering the office.
7. Be neat and clean in your personal appearance.
8. Don't have the fumes of tobacco on your breath and clothes.
9. Have nothing to do with intoxicating liquors of any kind.
10. Impress the gentleman on whom you call that you must have something to do.
11. When you get a position stick to it. Don't leave it unless you are sure of bettering yourself.
12. If you desire to advance, make your employer's interest your interest.
13. Say but little and do a good deal.
14. Be prompt and don't watch the clock for closing time.
15. Keep yourself thoroughly posted.

The degree of rapidity with which heat is abstracted from steel during the operation of hardening is as important to-day as it ever was. Roughly speaking, if steel has to be made glass hard, ice-cold water, brine or mercury is used; if it has only to be made slightly hard, hot water or oil may be employed; while both hardening and tempering may be united in a single operation by plunging the hot metal in a bath of molten lead or other suitable metal, which will, of course, abstract the heat more slowly—*Prof. W. C. Roberts-Austen.*

In 1801 there were only 280,000 persons in the limits of the United States who spoke German as a mother tongue. Now over 7,000,000 of our people, Germans or descendants of Germans, read and speak that language.

Activity in War Materials.

It is in the heavy industries more than in the light trades that Sheffield holds her own. In war material there never was a time when so much plant and machinery were employed on the various kinds of work. All our large firms who make a specialty of offensive and defensive material are quite actively engaged, the only drawback being the hitch caused in several departments by the enforced idleness of the engineers. This applies more particularly to the planing departments in the armor-plate mills. Without their aid the armor cannot be finished. The stoppage comes at an exceptionally awkward time, for, after waiting the results of the trials of the new plates produced under the conditions laid down by the Admiralty of the type "made in Germany" by Herr Krupp, fresh orders for the whole of the side armor of four battleships had been placed with Messrs. John Brown & Co., Ltd., Atlas Works and Messrs. Vickers, Sons & Co., Ltd., River Don Works. The latter company have obtained during the last three weeks some excellent orders for the new plates. These include work for the British Government, as well as foreign powers. One good "line" is for the plates of a large battleship now being built on the Thames. Messrs. Vickers have been commissioned by Her Majesty's Government to build a first class battleship at their shipyard at Barrow-in-Furness, which they have now taken over and paid for. They have also been successful in guns, the company's design for a new 12-inch gun, with their patent mechanism, having been accepted in competition with other designs. A new 6-inch quick-firing gun, with the company's patent breach-loading appliances, has also been made for the Government, and the directors state that this gun has passed a most successful trial at Woolwich and Shoeburyness, a much higher velocity having been obtained from it than with any previously tried gun. In projectiles, the Hadfield Steel Foundry Co. have succeeded in piercing Harveyed armor plates, with two of 6-inch calibre, of special design and quality, fired with a velocity of 1960 and 1940 feet per second. A Hadfield armor-piercing projectile, 6 inch calibre, has also pierced a 9-inch special steel and water-hardened plate of Sheffield manufacture. Thus the battle of plates versus projectiles goes merrily on.—*Hardware Trade Journal.*

Estimates of pig iron production in Great Britain for the first half of the year put it close to 4,500,000 tons as against 4,403,476 as officially ascertained, for the United States in the same period. At the same time iron in public stores, in Great Britain, decreased 194,000 tons, while in this country there was an increase of 126,000 tons in stocks between January 1st and July 1st. The half year thus appears to have been one of great prosperity in Great Britain, the consumption of iron probably being the largest on record for a half year. Last year the pig iron production in Great Britain and this country was 8,563,209 and 8,623,127 gross tons respectively. The indications are, from the considerable increase in production promised for this country in the remainder of the year, that the figures for 1897 likewise will not be far apart.

A Broad Street export firm identified with the Mexican business, claims that last week buying for that market has been more active than for some time past. Among the manufactured articles bought in the last few days were mentioned $3000 worth of boiler plates, a carload of wheelbarrows, two large pumping engines and upwards of $4000 worth of Hardware and tools.

Honesty is the best policy for the merchant as well as the clerk —*Hardware and Metal Reporter.*

IN LAST "HARDWARE"

We explained why **VULCANITE EMERY WHEELS** are safest. They also cut faster and wear longer than other wheels. Why? The faster a cutting surface revolves, the faster it cuts and the slower it wears. Because Vulcanite Emery Wheels are made with rubber, they don't crack; because they don't crack, they run with perfect safety at higher speeds than any other wheel; because of higher speeds, they cut faster and easier and wear longer. **Safer work, more work, longer wear---mightn't it pay you to investigate?**

"SATISFACTORY RESULTS ON INVESTMENT."

Aladdin Lamp Co., Newark, N. J. [*Bicycle Lamps*]: We think that the Hardware trade is one of the best to handle the side line of bicycles and bicycle sundries, as it seems to be in perfect keeping with the other lines of goods which are kept in stock. We are also of the opinion that the trade will, in time, be controlled by a very few exclusive stores, and a large number of Hardware and carriage warehouses, where the bicycle can be sold at a legitimate price as a side line. Regarding HARDWARE it has always given us satisfactory results on investment made.

Iron Working in Central Africa.

The working of iron is certainly the most advanced art in this region of Africa. The ore is mined, smelted, and fashioned by the natives with great skill. Outside many of the villages stands the village smithy, merely a roof of shade boughs and grass supported by stakes. Here congregate the village gossips, who justify their presence by an occasional turn at the bellows. The tools are primitive, a rock for an anvil, a weighty stone for the sledge, and pieces of iron bound to wooden handles for the finer shaping and ornamental work. The bellows consist of two goatskins, each furnished with an open mouth like a purse, and connected up by a piece of bamboo pipe to a narrow clay union nozzle about nine inches long.

The blower sits on the ground, seizes the mouth of each skin in either hand, and raises and lowers them alternately, first with the mouth open and with a quick upward stroke to take in the air, then with the mouth closed and a tremulous downward pressure to force the blast. By this rude process, a hot charcoal fire is maintained, and the work turned out is excellent for the primitive implements used. Knives of great utility, and which take a good rough cutting edge; arrowheads and spears, many of them curiously barbed and twisted, and some showing a knowledge of the value of the "blood groove"; axes for battle and for general purposes, ornamented with linear patterns and beaded edges, and with the blades set at an acute angle to the shaft so that every ounce of power is transmitted in the direction of the blow.—*Geographical Journal.*

Our Electric Equipments.

When the Central London Railway a few weeks ago gave its order for car, locomotive and electrical equipment to American manufacturers there was a considerable undercurrent of ill-feeling noticeable in the comments of the English daily press, which took the stand that these orders ought to have gone to English firms. It is a satisfaction to note, however, that no such grumbling was manifested on the part of the English technical electric press. The reasons which dictated the giving of the order to America are well put in a recent interview with the secretary of the Central London Railway, published in the *Railway News* of London. That gentleman states that his company was influenced by the advice of the best electrical experts, who stated that the more extensive use of electric traction in the United States had brought the manufacture of plant and material to a higher pitch of perfection and to a much lower cost than had been reached in England. Our tools and manufacturing machinery were much in advance of theirs, as was to be expected when the small amount of electrical traction construction in England is considered, and as it was the desire to equip the line in the very latest and best manner, no recourse was left but to go to America for the material.

This tells the story in a nutshell. American electric railway apparatus goes to England for the same reason that smaller American machine tools find a profitable market there. It represents, as do the latter, a product peculiar to American skill and experience, and as long as we keep in the van with these manufactures we will probably find a market for our goods. It must be apparent, however, that as time passes the English manufacturers will gain that experience which is now our particularly valuable stock in trade, and that we cannot always hope to secure such sweeping orders as that for the Central London Railway equipment. But by keeping in advance we may still hope to stave off that day for some time to come. If England does not go extensively into electric railroading, her market for such electrical apparatus will be ours. Should she develop a large electric railway industry, she will certainly manufacture herself the supplies necessary. The present situation reflects on her slowness in making the change from horses and steam, and not on the ability of her electrical engineers and manufacturers.—*Electrical Engineer*.

Some Common Sense about Files.

Nearly every mechanic knows that the difference between a hand cut and a machine cut file consists in the irregular spacing of the teeth—the difference of thousandth of an inch, more or less. For some reason which has never been discovered, files with this irregular spacing—which up to a recent date was a peculiarity of those made by hand—took hold of the work better than those with regular spacing, so that quite naturally file hands have come to prefer the hand cut to the machine cut, and a good many manufacturers found it economical to furnish the former, although they cost more. Within a year or two, however, file manufacturers have been experimenting with machine made files having irregular spacing, and Mr. Alfred Weed, of the Arcade File Works, has produced what is known as the Weed Increment, cut by a patent flexible chisel which throws up an exact reproduction of the hand cut file; so exact indeed that in a well known eastern shop the Arcade Increment Cut Files, with the name obliterated, were recently handed out to the men who had previously been using hand cut files, and not one of them knew the difference. They went ahead with the Arcade Files and obtained as good results in every way as they have previously done with the more expensive hand cut files. And, in fact, there is no difference either in appearance or in results—the only difference is in the cost. Thousands of dozens of the Arcade Files are now being sold in Great Britain where hand cut files have been used almost entirely, and we fill orders sent us with the distinct provision that the Weed Increment Cut File will do as good work and wear as well as any hand cut file made, or the goods may be returned at our expense.

Which is hand cut?

One of these is a hand cut file; the other is the Weed Increment Cut. The only difference is in the price.

SEND US A TRIAL ORDER ON THIS BASIS--YOU RUN NO RISK.

Heard and Seen in the Trade.

It is reported that the Belcher & Taylor Agricultural Tool Co., of Chicopee, Mass., have completed the purchase of patents, patterns and good will of the Eclipse Corn Planter Co., of Enfield, N. H. It is said that this company had been doing a steadily increasing business in the sale of this machine, until for the last year their sales amounted to $20,000. The new machine distributes and fertilizes the corn. The Belcher & Taylor Co. have never made a corn planter, and will make a push for a big business on this machine. The New Hampshire company has sold the machine only in New England, but the effort of the Belcher & Taylor Co. will be to hold this trade and to extend it to the West and other parts of the country.

The *San Francisco Chronicle* says that Hardware dealers feel very much encouraged with the outlook and several of the largest dealers are filling more orders now than they have at this time of the year for some years past. The good prices for the crops are encouraging country dealers to buy more liberally, and even thus early farmers are buying new implements, wagons and carriages. Prices show but slight advance in some lines, but merchants are confident that the improved conditions will place this line of business on a satisfactory basis before the spring trade opens.

Fire in the nail works of Phillips, Townsend & Co., on Glenwood Avenue, Philadelphia, Pa., caused an almost total loss to the establishment. Soon after the fire started an oil tank exploded, blowing out a portion of the roof and walls. The origin of the conflagration is not known, and the loss is about $35,000, with sixty hands thrown out of employment.

W. C. Heller & Co., Montclair, N. J., are mailing to the trade an original and unique postal card, which presents the appearance of one of their well-known and popular shelf boxes, in what might almost be called life size. It is very characteristic advertising, and forcibly illustrates the handy and convenient Hardware equipment possible in a store adopting these useful appliances; which, as the manufacturers state, being made from steel, "will last longer and give better satisfaction" than is usually the case with those made by a local artisan.

The door nail in earlier times was the plate of the door upon which the old-fashioned knocker struck to arouse the inmates of the house. As the plate or nail was struck many more times than any other it was assumed to be more dead than other nails. Hence the phrase, "Dead as a door nail." If old ideas are to be revived, as now seems possible, the phrase may soon have a present application.

It is reported that a revolver carrying eight shots will shortly be placed upon the market. J. M. Browning, of Ogden, Utah, is the inventor of this new weapon, and it is said that he is negotiating with the Colt's Firearms Co., Hartford, Conn., with a view to having it manufactured and placed upon the market.

In England, an act of Parliament in 1624 prohibited the granting of exclusive privileges in trade, with the exception that letters patent might be issued for a term not exceeding twenty-one years, "for the sole working or making of any new manufacture within this realm to the first and true inventor of such manufactures."

John C. Bader, one of the oldest Hardware merchants of Jackson, Mich., passed away some days since in his 66th year. He was a native of Germany, and settled in Michigan in 1852, and for the past 27 years has been engaged in the Hardware business.

A dispatch from Vancouver, British Columbia, says that four trains loaded with American bicycles and agricultural implements, have left Toronto for shipment to Australia.

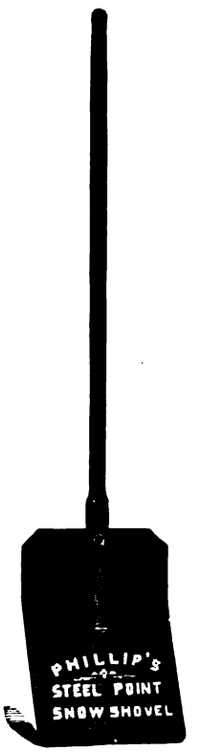
THE ADVANTAGES OF BUYING

PHILLIPS' SNOW SHOVELS

ARE THESE:

The blades are in one piece.



The bent blade shovels are bent sufficiently to be of proper form. (A mere kink does not make a well formed shovel.)

Phillips' best shovels are varnished. If you ever "carried over" any "oiled" shovels, you can see the advantage of having varnished ones.

Phillips' shovels are made for use. If you have lots of snow to shovel you can afford to buy a new No. 1 bent blade shovel every day, in the saving made over handling snow with the best iron shovel ever made. It is better to lift a good quantity of snow with a light wooden shovel than a small quantity with a heavy iron one. An iron shovel may last longer but a good wooden one is sufficiently durable and far better to use.

Do not allow your jobber to sell you anything that is the "same thing as Phillips'." There is a difference that is very plain when the imitation is placed beside the genuine article.

If it is worth your while to please the man who buys and uses the shovel, **order Phillips' goods.**

RETAIL TRADE RECORD.

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Hardware Stores.

Baltimore, Md.—Reeves & Chavannes, Hardware, have opened new store at No. 625 W. Baltimore Street.

Danville, Pa.—Hodnett & Vass have incorporated for the purpose of conducting a general Hardware, stove and tin business at the old stand of Schoolfield, Vass & Co.

Mauteno, Ill.—Mr. Farley has purchased a Hardware store in this city, and will take possession soon.

Mechanicsburg, Ind.—E. S. Brown will open soon.

Topeka, Kan.—W. S. Chaney and E. F. Morton will open soon.

Changes and Removals.

Almonte, Ont.—Gilbert A. Moir, Hardware merchant, has purchased from George Paterson the Lochead property on Mill Street—the store at present occupied by John O'Reilly—at $4000, and will move his stock thither between now and the end of this year.

Arcadia, Fla.—Alex. Miller, of Hull, has purchased the Hardware business of Thomas Gaskins, and will carry on the business in the Gaskins building.

Atlanta, Ga.—W. M. Spratlin, carriage Hardware dealer, has moved into his new warehouse, Nos. 92 and 94 South Forsyth Street.

Avalon, Mo.—Craig & Shields, Hardware, have discontinued partnership. Joseph Shields continues the business.

Austin, Tex.—G. C. Bengener & Bro., Hardware dealers, are having their present store remodeled. In the meantime they will occupy the store at No. 817 Congress Avenue.

Augusta, Ga.—D. L. Fullerton, stoves, etc., reported selling out.

Bassett, Iowa.—George H. Potter, Hardware, reported to have been succeeded by E. M. Potter.

Belfast, Me.—J. H. & J. W. Jones, Hardware, reported to have been succeeded by J. W. Jones.

Bellefontaine, Ohio.—Cook & Easton; T. J. Cook has sold his interest to his brother, C. C. Cook, of Huntsville, who takes immediate possession; the firm name will remain unchanged.

Cainesville, Mo.—J. M. Rogers, Hardware, etc., reported sold out.

Chester, Iowa. — Bratrud & Marshall, Hardware and agricultural implements, reported to have been succeeded by Marshall & Murray.

Chrisman, Ill.—A. P. Harris will sell his store and will soon purchase the Hardware and stove business of A. A. Hannah, of Paris.

Cooperstown, Wis. — Gotfredson Bros., Hardware, agricultural implements, etc., sold to F. W. Kriwanck.

Copemish, Mich.—U. J. Ackley has sold the balance of his Hardware stock to the Crawford brothers.

Danville, Va.—J. E. Schoolfield, Hardware, has retired from business.

Deadwood, S. D.—Star & Bullock Hardware Co. reported selling out.

Douglas, Neb.—T. W. Short, Hardware, reported to have been succeeded by W. Whalen.

Edgewood, Iowa.—C. S. Maxson, reported to have been succeeded by George Glazier.

Fordyce, Ark.—Fordyce Hardware Co. sold out.

Genesee, Idaho.—Bressler & Scroggins, Hardware, reported to have been succeeded by Driscoll & Thompson.

Goldthwaite, Tex.—Joe S. Clark, Hardware merchant, of San Saba, will establish a branch house in this city.

Guntersville, Ala.—Andrew J. Baker will erect a new and larger store on the lot he is now occupying.

Henderson, Iowa.—Martindale & West, Hardware and furniture, reported to have been succeeded by William Orr.

Hildreth, Neb.—R. A. Glenn, Hardware, reported to have been succeeded by James Troxell.

Holgate, Ohio.—G. F. Rothenburger has purchased the Fast Hardware store.

Kankakee, Ill.—O. N. Morris has sold his interest in Morris Bros. to Will. Frith.

Kirkwood, Ill.—C. W. Kessler has sold his interest in the Hardware store to P. W. Kessler, who will continue the business.

Lebanon, Neb.—J. Cress & Son have been succeeded by H. E. Waugh.

Lebanon, Tenn.—J. L. Jennings & Co., Hardware; the firm is now Lebanon Hardware & Furniture Co.

Lexington, Va. — White, Owen & Co., dealers in Hardware, have been succeeded by Robert L. Owen.

Los Angeles, Cal.—Scott Hardware Co., and C. A. Judd, furniture, have consolidated as Scott & Judd.

Louisville, Neb.—J. O. McClain, Hardware, reported to have been succeeded by J. R. Cox.

Lynchburg, Va.—Schoolfield, Vass & Co.; James E. Schoolfield has sold his interest to W. P. Hodnett; the style of the firm has not yet been decided upon.

McMinnville, Tenn. — Biles & Smith, Hardware dealers, are improving their store.

Minneapolis, Minn.—The firms of Gardner & Davis, No. 304-306 Hennepin Avenue, and F. R. Warner, No. 109 Nicollet Avenue, have consolidated, and incorporated under the name of the "Gardner-Warner Hardware Co.," and will continue the business at Nos. 304 and 306 Hennepin Avenue.

Mt. Sterling, Iowa.—F. D. Carr & Co., Hardware, reported to have been succeeded by W. I. Luse.

Nashville, Tenn.—Donigan & Weakley, Hardware, will remove their stock from Church and Cherry Streets to the Public Square.

Olympia, Wash.—L. M. Hall, Hardware, reported to have given bill of sale for $2000.

Packwood, Iowa.—H. S. Mitchell, Hardware and agricultural implements, reported to have been succeeded by Baker & Co.

Prescott, Ark.—Ira Gee, Hardware, reported to be closing out business.

Punxsutawney, Pa.— Newell & Hewitt, Hardware, firm is now Hewitt & Johnson.

Rahway, N. J.—Abram A. Whitenack, of Somerville, has purchased a Hardware store here and as he has had much experience in that line of business will undoubtedly make a success of it.

Ravenna, Ohio.—The Frazer Hardware store has gone out of existence.

Springfield, S. D. — P. M. Magnuson, Hardware, reported sold to L. Michel.

Vilonia, Ark — Simpson & Son, Hardware, the firm is now J. N. Simpson.

Walkerton, Ind.—T. J. Reece will move his Hardware store from this place to North Liberty.

Waldron, Ark.—W. P. Forrester, Hardware, reported to have been succeeded by Waldron Hardware Co.

Walnut Kan.—William Broughton, Hardware, reported to have been succeeded by Miller & Son.

Willis, Kan.—A. B. Clark, Hardware, reported sold out.

Wilmington, Del.—Thomas Pierce will remove to the Windsor block.

Business Embarrassments.

Elkhart, Ind.—The Jones Hardware Co. has made an assignment to D. M. Best.

Terre Haute, Ind.—Finkbiner & Duenweg, wholesale and retail Hardware, have made an assignment. The assets are $36,000, and the liabilities $25,000.

Recent Fires.

Alvin, Tex.—J. M. Harrison, Hardware, furniture, etc., estimated loss by fire, $18,000; insurance about $8000.

Augusta, Ga.—Day & Tannahill; damage, $10,000. Fully insured.

Berlin, Mich.—Joseph Raymond; damage $1600, insurance, $800.

Birmingham, Ala.—May & Thomas Hardware Co.; blind and sash repository on Morris Avenue completely destroyed by fire at a loss of $4000; covered by insurance.

Carnegie, Pa.—M. B. Brown; damage, $2000; covered by insurance.

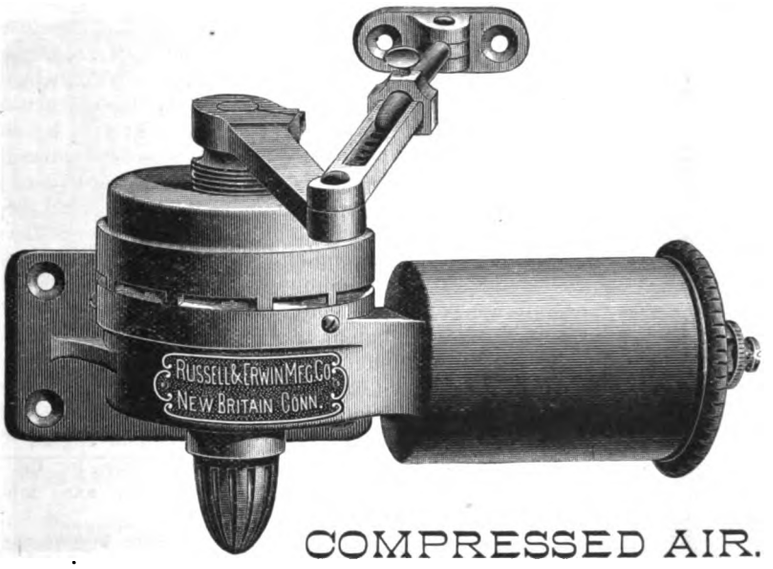
Halifax, N. S.—A. M. Bell, Hardware, stock damaged by fire, at a loss of $40,000; well insured.

Hillsboro, Ill.—H. E. Rukgaber; Hardware store has been destroyed by fire.

Hubbard, Iowa.—White & Van Patter, Hardware, damaged by fire, at a loss of $250. Not insured.

Memphis, Tenn.—S. D. Schwarzenburg, damage $1500; fully covered by insurance.

Mt. Sterling, Ky.—T. S. Barr, Hardware, loss by fire, $10,000; insurance, $6000.



Ramsey, Ill. — Chauncey O. Ruckert Hardware, furniture, etc., reported burnt out.

HARDWARE MANUFACTURERS' RECORD.

Hardware manufacturers, the country over are requested to contribute to this page. News of new factories or companies, changes, improvements, etc, will be gladly received, and promptly published.

New Companies, Etc.

Chicago, Ill.—Falcon Iron & Nail Co. has been incorporated; capital stock, $2500; incorporators, Edward C. Brainard, William E. Stockton and Harry Bennett.

Memphis, Tenn.—The Globe Stove & Tin Co. has been incorporated for the purpose of carrying on the trade of merchants. Capital stock, $5000, and the incorporators are W. R. Cross, Ike Ochs, J. H. Schwarzenberg, James Richert and Sam Behr.

Portland, Ore.—The Loewenberg & Going Co. has been incorporated to conduct a Hardware and manufacturing business. Capital $25.000. Incorporators, J. Loewenberg, J. W. Going and A. C. Going.

Warren, Ohio.—The new Union Tube & Iron Co. has organized as follows: President, Warner Arms, of Youngstown; vice-president, D. P. Wheeler, of Akron, secretary, F. M. Peet, of Warren.

Improved Conditions.

Anderson, Ind. — The American Wire Nail Works, employing 700 men; the Lippincott lamp chimney plant, which works 400.and the Macbeth Lamp Chimney Works, with a like number of men on its pay rolls, have resumed in full blast, after a shut down of two months and a half.

Bloomington, Ill. — The Bloomington Stove Works are working full time with a full force of men. Since the first of July the factory has been a busy place and there is now no sign of a let up. Ten hours a day are put in. The American Foundry Co. is also working its men ten hours a day and the works are filled with a complete complement of men. Every other industry in the city employing machinists and mechanics is running full time, and some of them are turning away orders which must be gotten out immediately, because of the press of other work ahead.

Bremen, Ind. — The Holland Radiator Works are now running night and day to keep pace with the rush of orders. New machinery and more employes have been added.

Bridgeton, N. J.—It is reported that the Cumberland Nail & Iron Co., of this city, has leased their nail mills to a party of capitalists, for the purpose of operating a tack factory here.

Bridgeport, Conn.—The Union Metallic Cartridge Co. is enjoying the usual fall rush of business, and the packing and shipping departments are being run 13 hours a day, four days a week and 10 hours a day the other two days. The entire factory is being worked, and there are no idle machines for operatives.

Buffalo, N. Y.—The Burgess Arms Co. has been incorporated with the following directors: Frank B. Rumsey, Andrew Burgess, E. H. Rounds, D. C. LeFevre and O. L Snyder, of Buffalo, for the purpose of manufacturing firearms, machines and Hardware. Capital stock, $100,000.

Columbus, Ohio. — Some eight hundred men will go to work in Salem and Findlay as the result of the settlement here recently of the strike of the employes of the Salem Wire Nail Co.

Derby, Conn.—The Griggs-Seabury Gun & Ammunition Co., into which the Brady Mfg. Co., of this city, has been merged, will establish a large plant at the shops of the former Brady Co. Between 300 and 400 hands will be employed.

Elwood, Ind.—The Alexandria Wire Nail mill has been sold by S. G. Phillips to S. Free, who will put it in operation at once.

Indianapolis, Ind.—The machinery, etc., of the Economist Plow Co., of South Bend, have been sold to the Syracuse (N. Y.) Chilled Plow Co., and will be removed to that city at once. The building will be remodeled by the Singer Sewing Machine Mfg. Co. for foundry purposes.

Joliet, Ill.—The Enterprise Wire Mill, at Joliet, which has been idle for five years, and which was purchased two years ago by the Consolidated Steel & Wire Co., resumed operations this week, giving employment to 3700 men.

Mansfield, Mass.—The Shields Foundry Co. has been incorporated for the purpose of manufacturing stoves, etc. Capital stock, $6000.

Mason City, Ind.—The entire stock of the Hathorn Foundry & Machine Co. has been purchased by Mr. Hathorn, his former holdings being one third. The business was established by Mr. Hathorn nine years ago, and since then different parties have held varying interests, all of which are now consolidated in the original founder of the company.

New Philadelphia, Ohio. — The Akron Rubber Works Co. commenced the breaking of ground at this city this morning preparatory to the erection of their plant. The works will be in operation by January 15, and will manufacture vehicle tires and druggists' rubber supplies. Two hundred hands will be employed.

Philadelphia, Pa.—Six mills at the New Philadelphia Iron & Steel Co.'s works will be put in operation. This plant gives employment to 300 men, and is one of the best equipped rolling mills in the State.

Philadelphia, Pa.—The New Philadelphia Wire & Nail Mill that has been idle for the past two years will resume operations. A force of men are now at work cleaning up, adjusting the machinery, etc., preparatory to starting the mill. The mill was formerly one of the New Philadelphia's most prominent industries, giving employment to 150 men and boys, with a pay roll of $7000 per month. The plant is now owned by the Salem Wire & Nail Co., and will be operated by them.

North Tonawanda, N. Y.—The nut and bolt works in this city will resume operations at once with a large force of men. The big plant is already in shape for business and men have been set to work to clean things. A much larger force of men will at once be put at work and all of the old hands gradually taken back. Mr. Plumb, the president of the Buffalo Bolt Co., which now owns the plant, said that the old men would not all be taken back at once because it would be some time before the works would be running at full capacity, but that eventually they would all be returned to their positions. The Nut & Bolt Works, it will be remembered, is the largest bolt factory in the world. On August 10th it was sold at public auction to John Albright of Buffalo, by the receiver for the Plumb, Burdict & Barnard Co., Homer E. Dudley.

Radford, Va.—The Radford Industrial Works has been incorporated by Captain E. F. Gill, Capt. William Ingles, Capt. John G. Osborne and others, for the purpose of making wagons, axe handles, spokes, etc.

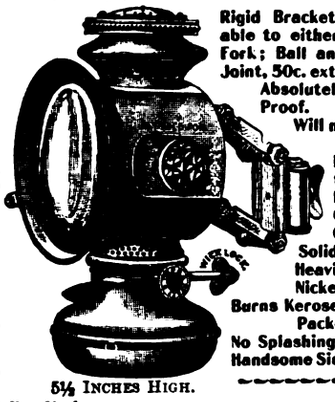
South Norwalk, Conn.—The factory of the Norwalk Lock Co., which has been running only eight hours a day and five days a week, has started on full time, ten hours a day and six days a week. A large rush of orders is assigned as the cause.

Trenton, N. J.—The Skillman Hardware Mfg. Co. have not only been busy even in the now fast-receding dull times, but have even been compelled to enlarge their plant by the erection of a new two-and-a-half-story brick wing on the west side of their main building. Its dimensions are 25x75 feet, with a one story extension in the rear, 21x30 feet. The new building is to be used as a japanning kiln and work room.

St. Louis, Mo.—Kieckhefer Bros will enlarge their manufacturing facilities by adding two stories to the main building of their tinware factory on St. Paul Avenue. The main building has a frontage of 300 feet, and that of the entire factory is 600 feet. The improvement will cost about $50,000. The additional space will enable the firm to increase its working force from 950 to 1500. These improvements are to be completed before Christmas. The factory is already the largest of its kind in the world.

Recent Fires.

Fort Madison, Iowa.—In the building of the Ideal Farm Implement Co., fire recently destroyed ninety corn cutters and shockers, all complete and ready to set up, and seventy-five Kaffir corn cutters, all complete, all of which were sold. This finished product had a value of from $12,000 to $14,000, and would have been shipped out, most of it to Kansas points, within a year.



Stockton, Cal.—One of the most valuable manufacturing plants in Stockton was destroyed by fire recently when the Stockton Combined Harvester Works were burned. The loss is $100,000, on which there was an insurance of $60,000. The foundry and pattern shop were saved. It is estimated that the insurance will pay 60 per cent. of the loss of the company.

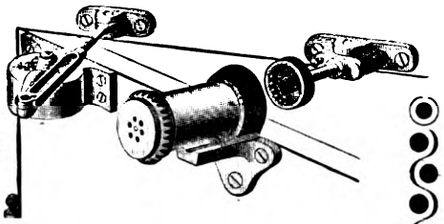
THE BANNER

Is the Cycle Lamp for '97.

None as handsome, as practical, nor as thoroughly and honestly made. Throws a powerful, broad light, having **a 3-inch optical ground double coavex lens.** No lamp so easily cleaned. Has removable top burner and reflector, removable and **reversible oil pot.** The only lamp made with a positive wick-locking device—it acts on the ratchet. Your dealer should have them; until he has will send, carriage paid, for **$3.00,** to any part of the United States.



Rigid Bracket, adjustable to either Post or Fork; Ball and Socket Joint, 50c. extra.
Absolutely Wind Proof.
Will not Jolt Out.
No Solder to Melt.
Fills on Outside Oil Fount.
Solid Brass, Heavily Nickeled.
Burns Kerosene in Packed Fount.
No Splashing.
Handsome Side Lights.

5½ INCHES HIGH.

New York. Boston. Chicago. **PLUME & ATWOOD MFG. CO.**
FACTORIES: Waterbury and Thomaston, Conn.

More sales, more profit

and the satisfaction which goes with a good season will be yours if you handle the Eclipse Door Check and Spring during the winter. The Eclipse is a door-closing, slam-preventing device that stands the test of time. It is easy to apply, easy to keep in order, profitable to the dealer. We have a booklet which gives full particulars and the reduced prices for this season, which we will mail to any dealer.

BICYCLE TRADE RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Companies, Agencies, Etc.

Albany, N. Y.—The Chainless Cycle Co., of Rochester, has been incorporated by Thomas Searle, Ella R. Searle, George Wagner, Jr., of Rochester, and others. Capital stock, $30,000.

Buffalo, N. Y.—Buffalo Cycle Mfg. Co. has been incorporated. Capital stock, $125,000. Directors, Fisher C. Atherton, Charles H. Funnell, Charles W. Roe, Willis Brown and William Rooke, of Buffalo.

Buffalo, N. Y.—Buffalo Cycle Works has been incorporated. Capital stock, $25,000. Directors, Edward J. Rogers, Charles B. Walters and Henry C. Springer, of Buffalo.

Buffalo, N. Y.—The Cycle Skate & Novelty Co. has been incorporated by A. D. S. Bell, of Boston; George W. Crofoot and Benjamin L. Love, of Buffalo, and others. Capital stock, $10,000.

Camden, N. J.—The National Cycle Armor Co. has been incorporated. The objects of the corporation are the manufacture and sale of bicycles, tricycles, velocipedes and carriages of all kinds. The capital stock of the company is $500,000. The amount paid in is said to be $1000. The corporators are Robert B. Esler and Robert B. Esler, Jr., of Philadelphia, and Jehu Wood, of Haddonfield.

Chicago, Ill.—Auxiliary Tire Co. has been incorporated; capital stock, $50,000; incorporators, Zebulon Foster, Sarah A. Foster, Stanton Foster and Mary A. Crays.

Chicago, Ill. — Manufacturers & Merchants Warehouse Co. has been incorporated to manufacture bicycle sundries; incorporators: Joseph H. Defrees, William Brice, and John G. Campbell. Capital stock, $100,000.

Cincinnati, Ohio. — The Advance Carriage Co. will engage in the manufacture of bicycles.

New York, N. Y.—The Lenox Mfg. Co. has been incorporated to manufacture bicycles and bicycle sundries. Capital stock, $50,000. Directors, Jacob Levy, Annie Levy and Nathan Levy, of New York city.

New York, N. Y.—The Lincoln Mfg. Co. has been incorporated by Alfred C. Jopling, James H. Marsh and Julius Henry Cohen, of New York city, and others, for the purpose of manufacturing bicycle equipments. Capital stock, $30,000.

New York, N. Y.—The Mesinger Mfg. Co. has been incorporated with the following directors: Frederick Mesinger, Henry Mesinger and Alexander J. Limburg, of New York city, to manufacture bicycles and bicycle sundries, Capital stock, $10,000.

Portland, Me.—The Middlesex Bicycle Co. has been incorporated with the following officers: President, Josiah Thompson, of Minneapolis, Minn.; treasurer, James Leach, of Boston, Mass.; for the purpose of buying, selling and dealing in bicycles. Capital stock, $100,000, of which $400 is paid in.

Richmond, Va.—The Virginia & North Carolina Wheel Co., at a meeting of directors, elected the following officers: W. J. Westwood, president; Thomas Potts, vice-president; E. C. Brown, secretary and treasurer; board of directors—W. J. Westwood, J. J. Montague, Howard Swineford, W. A. MacMahon, John Crow, James McGraw, Thomas Potts and N. V. Randolph.

Tampa, Fla.—Neff & Graham have established a branch house in this city, of their bicycle business.

Toledo, Ohio.— Ray T. Samberg will shortly begin the manufacture of the Blue Grass bicycle, in connection with doing a general jobbing business in cements and sundries.

Changes and Improvements.

Chicago, Ill. — Western Cycle Fittings Co. reported to have been succeeded by G. F. Fraley.

Detroit, Mich. — Grinnell Bros., pianos and bicycles, Nos. 219, 221 and 223 Woodward Avenue, closing out bicycle business.

Hartford, Conn.— Alexander & Elmer, No. 440 Asylum Street, bicycles, will remove their business to No. 7 Haynes Street.

Louisville, Ky.—Brewer & Gross, bicycles, reported to have been succeeded by William F. Brewer.

Norwich, Conn.—James McKee & Co., manufacturers of bicycle chains, reported to have been succeeded by the McKee Chain & Stamping Co.

Norwich, Conn.—The Crescent Fire Arms Co., manufacturers, E. R. Thompson, treasurer, deceased.

Quitman, Ga.—Jelks & Co., bicycles, reported to have sold out to Fred. J. Davis.

Rockford, Ill.—The Harvard Bicycle & Hardware Sundries Manufacturers will remove their plant to Rockford in the near future.

Springfield, Mass.—The Warwick Cycle Mfg. Co. will add to their list for '98 a chainless wheel.

Thompsonville, Mass.—The Lozier Bicycle Co. will increase the force of the plant. They will build 50,000 wheels of the new 1898 pattern.

Toledo, Ohio.—W. N. Boyle has disposed of his Oak Cycle plant to the Co-operative Cycle Co., which will hereafter make the Silver Star wheel. The new owners are W. L. Dildine, B. C. Gray and Henry Conselyea.

Torrington, Conn.—The great demand for bicycles has caused the Torrington Chain Co., manufacturers of bicycle chains to enlarge its plant, and it has taken the whole of the old Hotchkiss Bros. & Co.'s building, fitted it up with new machines, a new twenty-horse power engine and made other improvements. This company, whose officers and directors are from the Hendy Machine Co., was incorporated in April, 1896, at first conducting business in a small way, but steadily growing. Only high grade bicycle chains are made, and the members of the company say that with the increased facilities between 400 and 500 chains can be turned out per day.

Recent Embarrassments.

Chicago, Ill.—American Cycle Mfg. Co.; judgments by confession aggregating $30,102 were entered against them in favor of Continental National Bank and assignee Boyd, of the Haymarket Produce Bank. Reduction in the price of wheels is said to be the cause of the failure. Attachment issued against them, $5413, in favor of John H. Graham & Co., for merchandise.

Grand Rapids. Mich. — Francis Letellier's purchase of the Hamilton-Kenwood bicycle plant recently for $15,000 has been confirmed. The money for the purchase was put up by Mr. Letellier, who will endeavor to realize by selling the plant. J. Frederick Baars, cashier of the National City Bank, was trustee for the mortgage, and said recently that the plant was in operation. T. J. O'Brien was the receiver appointed by the Court, and conducted the sale.

Greensburg, Ind.—Edwin E. Doles, proprietor of the Greensburg Spoke & Rim Factory, made an assignment for the benefit of creditors. The assignment was due to the bank failure, and all the creditors wil be paid in full. Assets, $20,000, and the liabilities are $12,000.

Haverhill, Mass.—Wm. E. Burke, bicycles, reported to have made an assignment.

Kankakee, Ill.—The Kankakee Bicycle & Refrigerator Factory had been closed on judgment notes of the First National Bank of Kankakee. Other confessions of judgment increase the liabilities to $40,000. The estimated assets are $5000.

Louisville, Ky.—The Aquilla Bicycle Co., of this city, has made an assignment to W. M. McKown.

Milwaukee, Wis.—F. R. Smith has been appointed assignee for the Mystic Cycle Works.

Newark, N. J.—E. F. Beck & Son, harness manufacturers and makers of bicycle saddles, are in the hands of a receiver, Lawyer Oscar Keen having been appointed to take charge of their affairs. It is said the liabilities will reach $150,000, with nominal assets about the same. The firm was widely known on account of its extensive advertising.

New York, N. Y.—Weaver Cycle Material Co., of No. 956 Eighth Avenue. Judge Smith, of the Supreme Court, has appointed John W. Queen and Thos. F. Donnelly receivers, on the application of Joseph A. Weaver, Jr. The company was organized on February 17, 1897, with a capital stock of $100,000.

Recent Fires.

Woonsocket, R. I.—Edmund R. Darling, wholesale and retail sporting goods, damaged by fire.

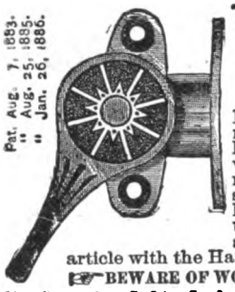
THE FULTON SIGN and PRICE MARKERS

Are the best, most complete and cheapest outfits for Business men to make their own Show and Price Cards, to print Shelf Labels, mark Boxes, Barrels, etc., etc. There is in fact no business where they cannot be used to advantage. Newspapers are using them for their Bulletin Boards, Ministers for Church Notices, Theatres for Announcements, Restaurants for Bills of Fare, etc. Their price in comparison to their usefulness amounts to almost nothing; it saves the cost of Sign Painters and Ticket Writers. A Boy can do all the lettering required in the largest Department Store. They last a lifetime and can be used for every language. We have



50 DIFFERENT STYLES

to select from in sizes from ½ to 4-inch letters. For marking Boxes and Barrels for shipping, or labels, they are far superior to adjustable stencils; the work is done quicker and neater and without blurring, making it look as if printed on a printing press. Nearly 100,000 sets of the **Fulton Sign Marker** have been sold, and they are in use daily by all large wholesale and retail business houses in the United States. Goods can be bought direct from us, or through your nearest wholesale house. Complete catalogues in English and Spanish sent free. Address

PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

CRONK'S

Combination Fencing Plier.

This newly invented fencing tool is needed by all people that build or have occasion to remove or repair wire fence, as it is made with two staple pullers, two hammers and two button cutters. They are the same heft as the 1½ Maydole Hammer, and they are made of forged tool steel. No good farmer will be without one. They are warranted to cut No. 8 hard or No. 6 soft wire. Like the celebrated Cronk Plier they are fully warranted in all respects. No. 12, 11 in. long, $12.00. Dis. . . .

To Bicycle Riders.

WE MAKE OUR TUBE OF FIFTY CARBON STEEL

Because a Tube like this of our .50% CARBON STEEL Is just as strong as a Tube like this of .25% CARBON STEEL

While weight for weight in a Bicycle our FIFTY CARBON Steel will last so long [redacted] and TWENTY-FIVE CARBON Steel will last only so long [redacted]

NOTE THE FULL IMPORT OF THE PARALLEL LINES.

The comparison which they graphically make indicates the result of the prolonged investigations of the most practical experts of the world.

That the tests in our own laboratory coroborate these results is merely so much to its credit; that the same is true of actual trial on the road equally proves the trial to have been made in bicycles of correct design and construction. THE FACT REMAINS.

The margin of safety is greatly increased by the use of this tube. Every bicycle manufacturer should use it; every dealer should insist on having it; every rider should demand it. Send for catalogue.

WIRE LATHING WITH HAMMOND'S METAL FURRING.

44 Cliff Street.
NEW YORK.
153 Lake Street,
CHICAGO:
Factories: GEORGETOWN, CONN. CHICAGO, ILL.
ESTABLISHED 1818.

THE OLDEST AND LEADING MANUFACTURERS OF GALVANIZED WIRE GOODS IN AMERICA.

"Pennsylvania" Fruit Picker

This Cut almost speaks for itself—the device being so much like the human hand, shows at once the utility of the article.

AS A FRUIT PICKER IT HAS NO SUPERIOR.

It is made of Heavy Galvanized Wire, and Easily Adjusted to a Pole. It has been sold for several years, and the demand (as it is becoming known) is steadily increasing. The difficulty of detaching fruit and securing it unbruised is apparent to everyone so engaged. This overcomes the difficulty, and saves the finest fruit which commands the highest prices.

THE LOW PRICE AT WHICH IT IS SOLD

brings it within the reach of those who have but little fruit to gather as well as those who have large quantities. *Price, per dozen, $5.00.* It will gather Apples, Peaches, Pears, etc.

MANUFACTURED BY **EDWARD DARBY & SONS,**

233-235 Arch Street, PHILADELPHIA, PA.

"Goodell's" Turret Head Glass Cutters.

(Patented March 31, 1896)

SIX CUTTERS. Carefully Hardened, Ground and Tested before mounting. Nickeled Frame, Rosewood Finish Handle.

H. H. Mayhew Co., *Shelburne Falls, Mass., U. S. A.*

BRASS SCREWS NUTS AND FITTINGS FOR ELECTRICAL PURPOSES IN STOCK. SPECIAL WORK TO ORDER.

T. F. WELCH & Co. BOSTON MASS.

"Replies From All Sections."

McIntosh-Huntington Co., Cleveland, Ohio. [*General Hardware and Bicycles*]: As an advertising medium, we have recently had occasion to test HARDWARE in a manner that would give us some idea as to how successful it can be used. Our advertisement did not occupy a very prominent position, but was of a character to excite the cupidity of the reader. We found that within two days after your paper came out, we commenced to receive replies from all sections of the country to the advertisement. This would seem to be sufficient proof that yours is a good medium.

A GOOD THING.

IT'S IN THE TEETH.

The Patent "REFORM" Curry Comb is composed of three shallow, oval trays, with corrugated edges. The parts are struck up from a fine grade of cold rolled steel, heavily tinned and bronze lacquered, firmly riveted together and warranted not to rust. The outer dimensions are 6½x4¼ inches and by reason of the large cleaning surface and peculiar arrangement of teeth, the comb will do its work with a large saving of time and labor, cleaning with equal thoroughness both long and short coats. There are no places to accumulate hair and it will not tear or injure the brush, the comb being quickly freed from accumulation by giving its face a gentle tap.

The Circulation of "Hardware" is Larger Than That of Any Other Paper in the United States Devoted to the Hardware Trade.

Editorial Trade Review.

While the dealers East in many cases feel as though trade in general does not equal their sanguine expectations, reports from the West are still of the most favorable character. The Western farmers having harvested their products, are preparing at once for the many improvements for next year, which the possession of some surplus cash undoubtedly inspires. In the South the prospects are at present clouded by a continuance of the yellow fever, which prevails in several localities, awaiting the coming of cooler weather before entirely disappearing.

The drought which has had an injurious effect on trade during the past few weeks has exerted some influence in suspending orders for current requirements, but the changes noted in the past week have lessened fears of a longer continuance, and the weather is gradually becoming of a more seasonable kind.

Goods demanded by the needs of colder and more wintry weather are still being ordered by the jobbers, and the prospects for the continuation of a good trade up to and through the holidays are very noticeable where good crops provide the stimulus. It is so natural for the retail Hardware trade to delay almost until the last moment to order supplies known to be necessary for the wants of the fall and winter, that it is not surprising to find orders are delayed this season as usual through this unwise method. Prices in general keep up fairly well, and while the disposition to advance quotations is manifested in almost every branch of the industry, still a conservative feeling prevails that slow and sure minor advances, if sustained, would prove of greater benefit to the business than more pronounced changes which might, perhaps, necessitate later revision to encourage orders.

A great many important lines of goods are not in full and abundant supply, and difficulty is experienced in obtaining sufficient for present delivery of a number of items in iron and steel; wire nails, in small sizes, especially, many gauges of steel wire rods being only in limited supply. Still the volume of business, take it all in all, is so much more satisfactory than it has been for several previous fall seasons, that satisfactory comparisons can always be anticipated to the great advantage of this year's business. With the advent of the settled weather now rapidly approaching, a steady trade may be looked for that will prove as profitable as inspiring.

Are We to Have Local Cycle Shows?

The decision of the National Cycle Board of Trade, by which they vetoed the holding of bicycle shows, begins to bear heavily now upon the desires and future wishes of many of the manufacturers and nearly all the dealers in bicycles. The wheeling multitude are inclined to favor cycle shows, as the large attendance at the last one would amply demonstrate; but the larger manufacturers, especially those compelled by competition to have their own stores in all the leading cities, are unfavorably inclined toward any annual combined exhibition. It usually has a tendency to make some small manufacturer assume an importance not justified by their manufacturing facilities or incorporated capital.

There is little doubt that the dealers in the principal cities will combine before long and exert an influence that will bring some change of front on the part of the makers. Committees have already been appointed in New York and Brooklyn to discuss the advisability of conducting a Dealers' Cycle Exhibition if no other is obtainable. Resolutions have been passed urging the Cycle Dealers' Association of the United States, with the co-operation of the National Cycle Board of Trade, to assume control of local cycle shows, and aid and abet in their opening and continuance. It is believed this will meet the approval of many manufacturers who are not on the whole opposed to local efforts, but object only to the grand annual splurge which has become too expensive and unproductive of sales, for the furtherance of which they were instituted.

The 1898 Exhibition of Our Manufactures.

The citizens of Philadelphia have invariably given to enterprises designed to advance the material interests of the city or State a liberal and well organized support, founded on a proper public spirit and well worthy of national commendation.

A number of meetings have been held recently in that city with the avowed purpose of pushing to completion an exhibition of manufactures to be held in Philadelphia in October, 1898. This desirable movement, although originating among the vested authorities of the Philadelphia museums, will be held under the auspices of the Franklin Institute as well.

The proposition now being agitated, is to hold the exhibition on the grounds donated to the museums by the city of Philadelphia, upon which a suitable building for the purpose is to be erected, of sufficient importance to become afterward a permanent part of the collection of buildings already proposed to be erected for museum extension.

It is desired that with the opening of this exhibition

Digitized by Google

of the manufactures of the country, the international advisory board of the Philadelphia museums shall be held, which, as was the case last June, might possibly bring delegates from all parts of the world. Should this prove to be the case, and the city receive in addition a large number of visitors from other countries as our own, no doubt need be entertained of the abundant success that could be achieved by the present concert of action.

The Big Strike in Great Britain.

Among the many strikes which in various parts of the world are unsettling conditions of labor, while prostrating entire industries, one of the most important is that now raging in Great Britain, between the federation of employers and their mechanical engineers. This struggle has proceeded resolutely, and as the state of affairs became more and more acute, the bitterness engendered by the contentious strife has embroiled 70,000 workmen into a state of idleness. The losses of these mechanics by abstention from labor, reaches the sum of $4,000,000, with a prospect, if much longer continued, to reach double the amount Under circumstances extending over so large a period of time, whole lines of business become stagnated and subject to a great loss of trade, which flies to other countries in many cases, making it very difficult to reclaim after becoming established under changed conditions.

A bitterness between employer and employed almost fatal to the advancing interests of favored workmen, is naturally the result as affecting the leaders, and the healthy treasuries of prosperous unions are bankrupted under the continued exactions needed for the support of the strikers; appeals are even made to Unions in the United States for support, under the pretext that the principal point of the differences underlying the strike is to compel the granting of a day of eight hours. That this principle only is involved is an opinion not shared by the employers which, in an extract from the *London Times*, which we publish in another column, shows the questions at issue are more far reaching than would be supposed. Without further waste of wages, and the jeapardizing of the best interests of all concerned, wiser counsels should prevail, and a board of arbitration settle these unwise differences.

To Sell or Not To Sell.

Editor Hardware: The selling of the goods: this is the heart and core of all merchandising. With the skill brought into play in this connection, lies the success or failure of the merchant.

He must never forget that the sole aim and object of his business life is to sell goods, and to sell them at an advance sufficiently large to ensure him a profit beyond the expense incurred in the transaction, and to get his pay for them after they are sold.

In discussing this question, we will first have something to say about

WHOM TO SELL.

There are people to whom it is especially desirable to sell: Those who pay the cash, who know what they want, who do not ask frivolous questions, and who do not dispute the price. These are the people whom every tradesman is anxious shall visit him often. They are always treated well by him and urged to buy more, but they cannot be induced to buy largely. The only trouble with them is that he cannot sell them enough; but they know just what they want, and no amount of persuasion can induce them to purchase more. The question of selling them need not be considered, as they are always welcome.

Next to the cash customer we might name the one who pays promptly. He may need quite extensive credit, but he is reliable and can be depended upon when he agrees to settle. You do not have to send your collector to him but once, as he always keeps his word. In one respect he is like our former friend, he cannot be overloaded with our wares. He only buys what he actually requires.

The question of risk is never considered when selling these persons, but there are many would-be buyers who do not belong to this desirable class. There are many where the advisability of trusting them with our goods must be considered.

The man with limited means whom we know has little property may ask for credit, and the question must be decided: Shall we sell or not?

If the man has a good reputation for honesty and sobriety, and has steady employment, we can afford to try him. Let a distinct understanding be made at the time of sale when the goods are to be paid for. If he fulfils his promise we can safely trust him again. A man may be poor and his financial condition such that a bill could not be collected by law, yet he may be one of the most desirable of customers. He pays good prices, he does not buy extravagantly, and is prompt in meeting his engagements. Use such a customer well, endeavor to keep him satisfied, but do not attempt to overload him with more than his reasonable demands, and you have a desirable account which will pay you well. His good will will also be shown by bringing you other trade.

WHOM NOT TO SELL.

This is often a difficult matter to decide. The merchant is anxious to make sales, but he must not take too much risk in crediting unknown and untried customers.

A few losses materially lessen the net profits and the aim must be to lose as little as possible in bad debts.

It is generally a safe rule to refuse credit to any one whose personal property is covered by a bill of sale or chattel mortgage. The mere fact that they have given security on their effects goes to show they so far have not been successful financially, and when you sell them goods you are placing your property where you cannot recover by any process of law, as the party holding the security may at any time take over the goods. But there are a few people why are able to pay and are financially responsible, but they have an unsavory reputation in regard to settlements.

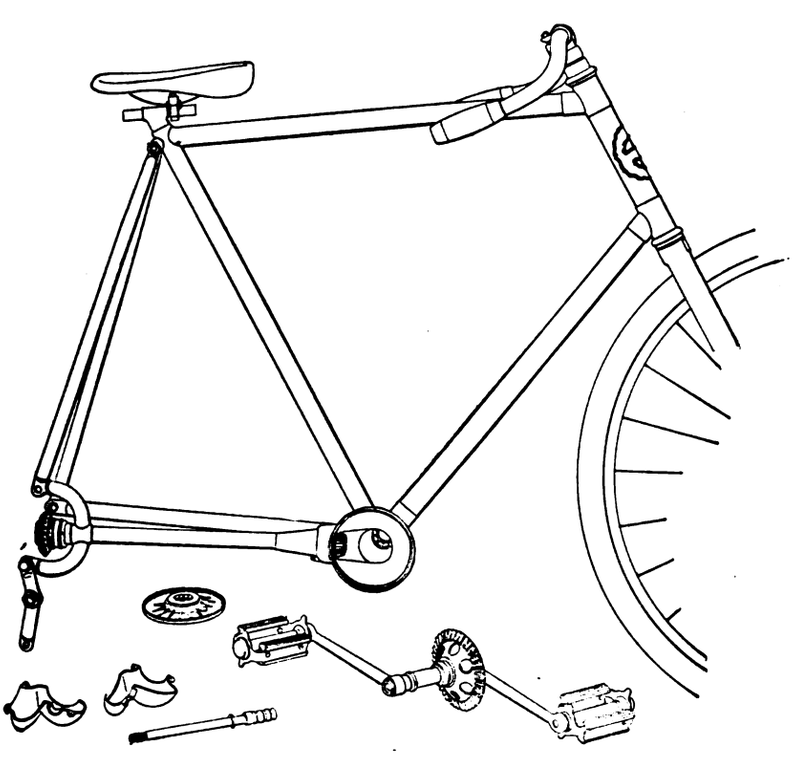
A retailer recently told me that a man owed him a small bill of a few dollars but he had repeatedly sent his collector with no result and he was compelled to sue him. This man was in receipt of an income of about one hundred dollars a month yet he never paid any bill which he could avoid. When such persons are known they should be refused credit.

It is also unwise to credit a man with a reputation for dishonesty.

If you are satisfied of the correctness of the rumor you had better err on the safe side.

This doing business is a matter of faith. We must take risks, but let judgment and knowledge of the conditions that prevail decide to whom we shall sell.

If no information can be gained from outside sources, the asker for credit should make a written statement of his condition, at your dictation. This will enable you to gain a fair knowledge, and by his appearance and apparent candor a fair conclusion may be drawn whether he is entitled to your credit. LYLE MERTON.



Turn your money over quickly handling Enameline.

The Columbia Chainless Cycle.

At last we have before us as an accomplished fact, the long-looked-for chainless bicycle, which is marketed under auspices that promise a future certain to be sustained. It predicates a long life, backed by such elements of successful effort as will make its advent in the trade form an epoch of unmistakable significance.

The Pope Mfg. Co., Hartford, Conn., have created this perfect product, and to them the cycle industry is already indebted for many of the skilled devices and superiority of construction that have made an American cycle the standard of merit in every progressive country on the globe. This company, since seeing the ultimate necessity for a cycle constructed by such methods, have succeeded in gaining, and to-day control, all the important patents governing bevel gear appliances considered essential in creating this model machine. It is altogether likely that several other companies possessing ample plant facilities will, in 1898, be found making chainless wheels in connection with their other output, but working under the base patents controlled by the Pope Mfg. Co.

The wheel as exhibited is much neater in appearance than the old style chain model, offering as it does, no teeth or other undesirable projections to cause annoyance. The crank hanger is dropped, as in the chain wheels, and the lines are identical with the ordinary chain model, except in the lower right rear fork and stay, which are shortened and connected with a semi-circular arm, the center of which supports the lower right stay, which is also the covering of the driving shaft connecting the two gears. The end of the rear axle is held in a swinging arm that is fastened to the ends of this semi-circular piece and in the open space left by the arch, the rear gear revolves.

The driving wheel takes identically the place of the old front sprocket, but owing to the fact that its depth must be greater, the tread of the wheel is increased to 5¼ inches. The crank and crank axle are similar in construction to those used in the chain wheel, and the whole is easily taken apart and assembled. The power is transmitted, and the great danger of the driving shaft being twisted out of alignment with the gears is greatly reduced if not done away with by the device at the rear axle. The machine moves backward or forward with equal ease and apparently there is no bind whatever. The claim is made that where the old style sprocket and chain become badly worn with frequent use, the new gear actually improves with age, running more smoothly at the end of a couple of months' use than when new. The working parts are all protected from rain and dust by little detachable gear cases and are always lubricated. The whole makes no more noise than the best kept chain machine. Every motion is positive and there is no back lash as in a slack chain, and for this reason the machine should be the easier controlled when on a grade.

The construction of this advanced type of bicycle has been kept a profound secret for a number of months, the present wheel being the culmination of much experiment and research on the part of Colonel A. A. Pope, the pioneer of the cycle industry in this country. Colonel Pope investigated all of the chainless models used abroad, especially the Acatene of France, the most perfect chainless wheel produced np to this time. He bought up one by one the most valuable patents covering the b evel gear device in this country, and has for the past three years maintained a factory where the most exhaustive experiments on the new style of gear have been carried, on just as he is still working on the motor carriage.

Colonel Pope says he long ago became convinced of the superiority of the new device and set about perfecting machinery for its manufacture in marketable quantities, always the most serious drawback to the bevel gear.

Some mechanics even declared that these gears (although admittedly superior when cut by hand) could not be perfectly made by machinery, but the Pope Co. claims to have disproved this. They have made a large number of wheels and show their confidence in them by offering them for immediate delivery, months in advance of the '98 season, when a few failures would ruin the reputation of the wheel.

The riding public requires no dissertation as to the mode of transmission of power as arranged in the new wheels. But one point is of the utmost interest—the price.

The new wheels will be made in ladies' and gentlemen's models, diamond and drop frames, each of which will sell at what will probably be the standard price of all high grade chainless wheels for 1898—$125.

HARDWARE costs only One Dollar a year.

Hardware Topics and Notes.

Editor Hardware: Movements out of this centre are fully 20 per cent. better than at this time last year, and in almost every branch and department denote a fuller demand than the autumnal seasons of the past four years show. At the present ratio of increase, the windup of the year will be phenomenal. There is no reason why the increase should not obtain, for the reports from the country districts correspond with the heralded prosperity among the farmers. Great activity is still characterizing builders,' plumbers' and structural Hardware. This is due to the building season opening late. The first report of dollar wheat, and a general cereal boom, seem to have brought on a building fever, that bids fair to engage capital for some time to come. This phase of activity is in itself a guaranty for the stability of the industrial revival and returning confidence. With the termination of the coal strike, a simultaneous disappearance of the retarding features of the market was at once noticeable. The carrying capacity of every railroad is overtaxed, and navigation on the great lakes was never more active. There is no mistaking these signs. They are no longer wild and irregular. The demand is no longer spasmodic, and the market subject to fits and starts. Normal conditions are rehabilitating themselves. Normal conditions are what we need. Other matters will take care of themselves.

But, are the merchants satisfied? Not generally. At places to which "crop money" has not as yet penetrated the demand has not been as voluminous as, for instance, at Kansas City or other wheat belt centres. By comparing notes the travelers have figured out a phenomenon, and in some quarters there is in consequence a feeling of insecurity. This is all wrong, however, for prosperity, like all large bodies, moves slow. We may live in an electric age, but such quantities as demand and supply have not as yet been subjugated to its influence.

THE OHIO TRADE IS ALL RIGHT

at this writing. At Cincinnati, which operates largely in the South, the quarantines are somewhat delaying movements, but, as the check is only temporary, there can be no serious consequences.

The happiest branches of the trade are probably the agricultural implement interests, and there is also signal revival among the buggy and carriage trade. This is of immeasurable importance to the manufacturers and dealers in these lines, when we consider that for the past four years this trade has been almost at a standstill, and, besides, the dealers had to carry 75 per cent. of the farmers to whom they had sold.

THE CYCLE OUTLOOK.

The outlook for next season's cycle trade is described as quite encouraging. Prices may rule somewhat lower, but they will be satisfactory if the important factors will succeed in restricting the manufacture of trashy wheels. A good wheel at a popular price, and a model that will not go out of date with every season, will be the aim of manufacturers who are not in the business for temporary exploit only. Investments going into cycle specialties and parts would prove that the cycle industry is entering upon a season of the broadest exploit.

HOUSEFURNISHING LINES

are very active. Leading dealers have advised me that more young people are going into housekeeping than at any time within a scope of experience of twenty years, and what is more, less credit is asked than ever before.

The stove season is at hand, but the mild October weather is not helping it. Yet the demand has not been below the average. Every dealer carries a stock at least one-third larger than last season, and but few doubt their ability of cleaning up at good normal prices. The wide introduction of steam heat into modern American homes, and the growing popularity of gas stoves, has naturally a tendency to decrease the demand for other fuel stoves, but just where this decrease figures in has not as yet been discovered by the dealers, which goes to show that the influx from new sources must at least be adequate to the natural slump.

Many stoves sell by reputation. But most makes are obscure. The public knows little or nothing about them, and must rely solely on the recommendation of the dealer or their own judgment. But judgment of stoves is often very fallacious at best, and in default of the maker's guaranty amounts to practically nothing. Here's where the dealer's strong points of salesmanship come in. Appearances "go a great ways," even in stoves, and the first impression generally determines the buyer. Said a veteran stove specialist: "I always rejoice at the advent of the stove season. Then my forte comes to recognition. As you see, one of my stove windows was especially constructed for the exhibition of stoves. But a mere 'inanimate' stove exhibition is not apt to attract passers-by. I have therefore arranged a family of stoves in a semi-circle about a grate as the centre attraction, and during business hours these stoves are kept alive with the fuel to which they are adapted. When I get a prospective buyer in hand, I have no trouble in explaining the characteristics of the several stoves I handle, and the time I save thereby is alone worth the trouble and expense entailed in the maintenance of the stove fire exhibition. I find that this mode of stove advertising is only second to the very best of newspaper advertising and shrewd personal solicitation, as regards value and results." J. B. Rindfleisch.

Cleveland, Ohio, Oct. 20, 1897.

Reduction of Lead Ores.

A new method of smelting galena has been suggested, which consists of first treating the ore in an open-hearth blast furnace and collecting the lead fume, containing a large percentage of lead sulphide, driven off therefrom, treating the metal-bearing slag of the open-hearth furnace and the fume in a stack furnace in which the temperature at the top of the furnace is maintained at so low a point as to prevent the oxidation of the lead sulphide fume generated in the furnace, and subsequently collecting the fume, containing a large percentage of lead sulphide, drawn off from the stack furnace, and smelting it in the same furnace, together with the slag from the open-hearth furnace. The results obtained from this process are said to have been satisfactory.—*Exchange.*

Zinc "Grey."

The use of zinc dust, or zinc grey, is steadily increasing through new applications, and merchants on the Continent, where the principal markets are to be found, are often unable to meet the demand. One of the newest uses for the substance is in the manufacture of zinc ethyl, for which it has been found to answer better than the zinc shavings formerly employed. For this purposes the zinc dust is first heated in hydrogen gas to reduce the oxide with which it is always contaminated. Another new application of zinc dust is in the refining of hydrocarbon oils. Little, if any, zinc dust is marketed by American spelter makers, the domestic consumption being supplied chiefly by importations from Germany.—*Exchange.*

A recent communication from Consul J C. Monaghan, written at Chemnitz, with regard to Prussia's railroad earnings, states that more than half Prussia's income is derived from the railroads.

The plant of the Cohoes Axe Mfg. Co., Cohoes, N. Y., located near the southern city line, has been burned. Loss, $7500; no insurance.

ASTOR, LENOX AND TILDEN FOUNDATIONS

THE PRIMITIVE DAYS OF DRUMMING.

Many an interesting little sketch might be written regarding the traveling done by the commercial traveler of the past up in the far-off regions of Lake Superior, where, in the early days to which my mind reverts, there was a large amount of adventure surrounding every dollar of business.

On one of my trips up in that locality when I was representing the old house of Hoyt, Busick & Co., I enjoyed more than my usual success, the season being one extremely favorable for trade. I stopped off at Marquette, and among a lot of other things sold Ben Niedhardt enough looking glasses to stock a car load. A more surprised man than Ben. was when he got them it would have been hard work to find between Marquette and Escanaba.

I think that was the trip I sold Ed. Breiting, of the old Pioneer Iron Co., enough files to run his mechanical department for five years to come. Of course I didn't know it at the time, but he surely was a free and easy buyer and knew how to stock up. This was about the time when some of the older heads in Portage Lake and Eagle River were casting sheep's eyes toward Duluth, believing it would be the Upper Lake city of the future. Ontonagon, Houghton and similar points, formerly so prominent, were becoming extremely dull and slow, copper mining having suffered a relapse. I extended my trip as far as Duluth, but found it well stocked with the overplus which the stores down the lake, such as Ed. Holland's, and Northrup & Butler's, found no use for, but thought to dispose of by moving. The place gave no sign of its present importance, when it probably figures a population of nearly 40,000. I only wish I had bought a few corner lots at that time and been able to hold them.

On my way down from Duluth I thought I would stop off at Bayfield and make a short cut across the country to St. Croix Falls on St. Croix River, which was a distance of 90 or 100 miles, feeling after I reached there I might sell one of those $1000 bills which was the height of my ambition. After finishing what business I could at Bayfield, and Lapointe near by, I prospected for some conveyance to take me across country. I found the trip was a hazardous undertaking in more ways than one. There was no regular post road as I had imagined, it was nothing but a trail, and a trail that continued the same in dimensions and importance for the whole distance, which was through an elegant stretch of woods all the way. I learned that the mail was carried over once a week on a two-wheeled buckboard, which was hauled by an ancient mule that still had some go in him, but was more noted for lasting and time-serving qualities, than any phenomenal bursts of speed.

I hunted up the driver of the "mail wagon," and found that the white French Canadian whose hardy hands usually guided the reins was replaced for that week by a half breed Indian who was his understudy, or substitute, when occasion demanded. He had no organized schedule of rates, but said he would carry me over if I so desired, providing I would fill a whiskey jug he carried, and which held about two or three quarts. My knowledge of whiskey has always been very limited in its character, so I hunted around town to see how cheap I could get that jug loaded, and finally compromised at a dollar. I was satisfied the trip bid fair to be an inexpensive one at that rate, and if I could only take that looked-for good order it would be a fine day's work.

About four o'clock in the afternoon he was ready, and stowing the jug carefully amidships, where the risk was slight, away we started. We rode like the very old boy over that trail and through those dense woods. The mule seemingly was more familiar than the driver with the lay of the land. As the darkness fell around us in big solid blocks of opaqueness, I began to feel a little skittish, and almost wished I hadn't trusted myself to the tender mercies of this reckless semi-barbarian, especially as I now dimly remembered having been advised by one of the storekeepers in Bayfield not to take the chances. He said this half-breed had killed a man he took over with him on some previous trip, and as my informant put it, he "wouldn't take the trip with such a pilot for $500."

I began to speculate upon what kind of hotel we should find at the nearest settlement, and while cogitating upon this possible variation in the prevailing monotony, I looked ahead and saw a big, bright, blazing fire in a cleared space, that promised to infuse a little warmth in an atmosphere invariably clear and cold after nightfall.

As we drew up to the center of interest that so warmly welcomed us, imagine my feelings when I saw six big buck Indians stretched out in all their stalwart proportions, with their feet to the fire, evidently settled to spend the night; each one reclining on his roll of birch bark, which forms the spring mattress of the children of the forest.

It wouldn't be difficult to guess my surprise when my guide informed me this was as far as he intended to travel that night, and that we might as well make ourselves as comfortable as the circumstances would permit. So we unhitched our mule, took off the harness, and let him run. The half breed selected a piece of bark for each of us, and with my grip full of samples under my head for a pillow, I lay down between the bucks and finally was in the land of dreams.

I remember among the many things I had in my mind while reclining amid such picturesque surroundings, I thought of every particular murder and hair-breadth escape for which the Lake Country had been noted for years. My conscience pricked me for buying the poorest whiskey I could find; I felt that if any of my copper-colored friends imbibed it, my passports would be vised to the happy hunting grounds with the most approved dispatch; but I finally slept the sleep of the just, dreaming of the big bills which the dealer is always going to buy "the next time you come around."

I woke up about midnight feeling too cool for comfort. The half breed and whole breeds were sleeping away enjoyably, the fire was getting low, so I got some dry wood and rails which I piled up on the smouldering embers, and soon had the satisfaction of feeling warm again. Everyone was astir at four in the morning, and we fraternized in a civilized manner, the Indians being as sociable as though they had become acquainted with the jug of jag water, and they probably had, for the half breed had no wish to be inhospitable.

Well, off we started, and we rode just as fast as the mule could jump, till about noon, when we came to an open place in the woods, where my driver desired I should hold the reins over the mule, while he went up in the woods to do some trading with the squaws, who he said were picking berries in the neighborhood; I couldn't imagine how he knew, until on looking around, I saw about a dozen papooses reclining gracefully against as many trees, each of them strapped safely and soundly to a piece of bark or board, and looking as comical and quiet as a six-day kitten. I thought then how much better that was,

Digitized by Google

than the highly civilized way of bringing them up by the aid of a milesian child's nurse, who probably shook the daylight out of them every time they tuned up their pipes and squawked.

In about an hour my half breed came back, having in his possession a superb black bear skin, and lots of huckleberries, which he had speculated for with a little sugar, a little tea and about half of the whiskey he had left.

Well, to cut this sketch of primitive commercial traveling short, we got into St. Croix Falls about 10 o'clock that night, and taking everything into consideration, I was thankful when I got into my more civilized bed that I still had a scalp to comb when morning dawned. I was made doubly happy by selling a bill of goods that footed up $1200, but you can bet I didn't return by way of the woods. I went over to St. Paul and came down the Father of Waters.

HENRY T. WAKEMAN.

Camel-Hair Belting.

Among the several products of the Rossendale-Reddaway Belting & Hose Co., Newark, N. J., the most important, and for which they are noted, is the Camel-Hair Belting.

It is a surprising, but nevertheless an incontrovertible fact, that while an immense amount of attention is constantly being given to the economical generation of power, but scant regard has hitherto been paid to its economical transmission from the prime motor to the machinery it is required to drive. It is, however, now beginning to be understood that, in the majority of power plants, much greater working economy is to be effected by increasing the efficiency of the means of transmitting power, rather than by the slightly improved economy of generation which may be obtained by the use of very high-pressure steam and quadruple-expansion engines, the economy of generation with these high-pressures being often counterbalanced by the greater cost of maintenance and risk of breakdowns inherent to the excessive pressure.

In this connection it is probably not too much to say that in the transmission of power by belting, greater opportunity is afforded for effecting economy than in any other direction. The reason is not far to seek. In no other system of transmission is so little regard paid to the underlying principles, nor so much left to the tender mercies of the ofttimes ignorant attendant, as in belt-driving. Unfortunately, moreover, carelessness on the part of those who plan the driving arrangements is, to a very large extent, the cause of much of the trouble in working which is subsequently experienced, and which a little forethought might easily have obviated. The fact cannot be too strongly emphasized that badly designed belt-gearing is a perpetual source of loss and annoyance, involving, as it does, waste of power in transmission, frequent and often costly renewals, labor and loss of time.

In the belief that practical information, based upon long experience and special investigations, would be of service to the users and designers of belt-gearing, the following hints and suggestions on belting and belt driving have been prepared, which is commended to the notice of all who are interested in this method of power transmission.

The primary agent in belt-driving is friction. It follows, therefore, that for efficiency of transmission the belting employed should be of such a nature that the coefficient of friction between its surface and that of the pulleys upon which it runs should be sufficiently high to ensure a good frictional grip of the pulley being obtained without requiring the belt to be unduly tight. Probably a greater waste of power is traceable to the employment of unnecessarily tight belts than to any other cause. It is well to observe, therefore, that any excess of belt tension, over and above that necessary to prevent slipping when starting under the load, directly causes waste of power by increasing journal friction—power not only lost, be it noted, but lost in more rapidly wearing out the plant. The bending stresses caused by the unnecessary tension of the belts are also liable to spring the shafts out of their true line and ultimately to break them. It being recognized that a good frictional grip of the pulleys is of prime importance, the careful power user will naturally select a belt which is undoubtedly satisfactory in this respect. The Camel Brand or Reddaway Belt has not only a high coefficient of friction, but, as it is exceedingly pliable, it lies close to the surface of the pulley, thus ensuring a perfect grip being obtained.

The rule of thumb has been the practice in the majority of cases but for the purpose of demonstrating to the user the actual power of frictional grip of the Rossendale-Reddaway Belting, under the direction of Charles Hopkinson, M. Inst. C. E., M. Inst. M. E, B. Sc., who designed the very elaborate and perfect machine, a testing apparatus was erected enabling him to accurately ascertain the driving power of any belt up to 50 I. H. P.

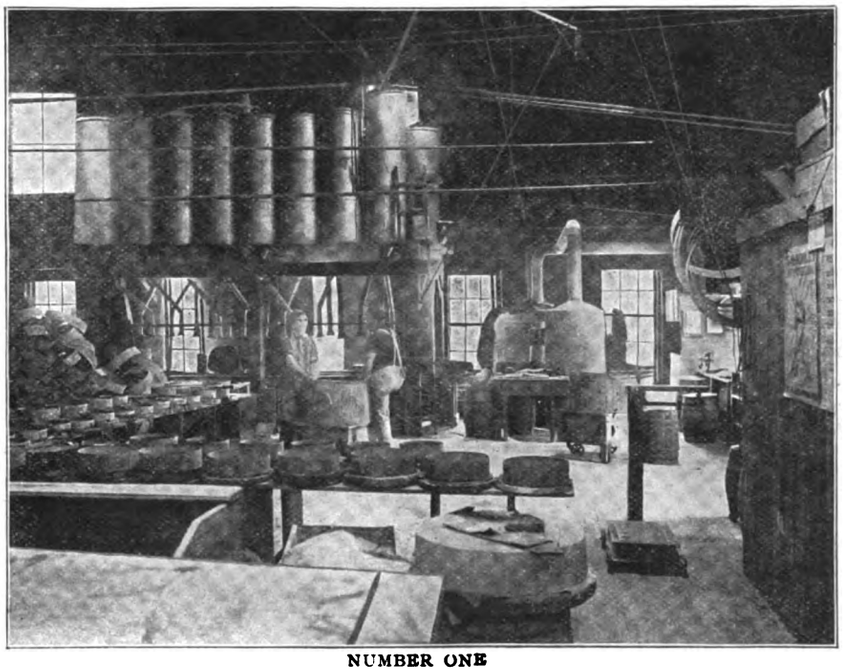
By the results of the tests, which were highly favorable to the Camel-Hair Belting, it was shown that not only has it a high coefficient of friction, but the tensile strength is so great that it is possible to reduce the thickness to 5-16 inch, as against double leather belting averaging ½ inch, thus rendering the belt exceedingly pliable, and causing it to lie close to the pulley face; a most intimate contact is thus ensured resulting in a powerful frictional grip being obtained.

Electric Light for the Necktie.

One of the latest and most interesting novelties of the age, is an electric light for the necktie. It consists of a small incandescent lamp mounted on a scarf-pin, and connected by fine wire with a pocket battery and a push button, which enables the wearer to illuminate the lamp at will, producing an elegant and brilliant effect. The outfit is durable, and will last for years, and its low price, $1.50, has made it popular among young and even the older men who care to adorn their person with something novel or elegant. An idea of the wonderful progress in electrical science is well demonstrated in the perfection of this necktie light. But a few years ago it was considered wonderful when an electric light of any efficiency was produced, even by costly and cumbersome machinery; now we use it to adorn the person and generate electricity in the vest pocket by an instrument cheaper and as reliable as a watch. These scarf-pin lights can be obtained in any color or clear crystal, also in opal, which appears like a "ball of fire," and gives the best effect. We are indebted to the Ohio Electric Works, of Cleveland, Ohio, for the latest of novelties, and their catalogue may be obtained by simply sending your address.

High Grade Bissell Sweepers in Mahogany.

The Bissell Carpet Sweeper Co. announce to the trade that in future they will furnish their high grade exclusive sweepers in cyco bearings, nickel finishes, in solid mahogany, piano finish, at $27 per dozen list. The same are to be retailed for $3.50. In their circular letter the Bissell Co. are pleased to be able to state that the new prices recently announced to the trade have been greatly appreciated, as is evidenced by the liberal orders they have received. In the same circular they also call the attention of the trade to their line of toy sweepers, which commands a large sale during the fall and holiday seasons.



The exports of rifles from Germany show a very rapid increase, having grown from 1,354,700 marks in value in 1890 to 16,000,000 marks in value in 1895, and a further gain in 1896 to 20,000,000 marks. The bulk of these shipments is made from the port of Hamburg.

THE EMERY WHEEL; ITS MANUFACTURE.

It is always a matter of interest to walk through a great manufacturing establishment and learn the methods by which some well-known product is prepared for the market, and for the use of consumers. The evidences that one sees upon every side of applied genius, of American ingenuity, of continuous industry, and of the facilities that are brought into requisition for the production of the largest amounts of goods at the lowest possible cost, are gratifying to any one who has a desire to see the natural advantages of our country put to the best and most profitable economic uses.

It was with feelings of this character that a representative of *Hardware* made a tour through the extensive plant of the Sterling Emery Wheel Mfg. Co., of Tiffin, Ohio, some days since. This institution is one of the foremost, if not the principal, manufacturers of emery and corundum wheels in the country, and a few details concerning the plant and its products cannot fail to be interesting reading to the host of users of these goods throughout the country.

NUMBER ONE

As is well known, the two abrasives which give the emery wheel its grinding and polishing qualities are emery and corundum These two substances are practically the same abrasive, for the part of the emery that does the work is corundum. Emery is a mixture of corundum and the so called oxide of iron; mother nature is the mixer. The percentage of oxide of iron in emery sometimes runs over 50 per cent. Emery is mined in Asiatic Turkey, in the Island of Naxos, and in Chester, Mass. The Chester emery has a larger percentage of corundum than the foreign emery. Corundum is found in commercial quantities only in North and South Carolina and Georgia, although there is some of it in Alabama and Eastern Tennessee. Corundum, being free from an excessive percentage of foreign matter, possesses much greater polishing and grinding qualities than emery. In the arts and sciences corundum is rated next to the diamond in hardness, emery coming next to corundum.

Referring to the illustrations of the principal departments of the plant of the Sterling Emery Wheel Manufacturing Company at Tiffin, Ohio, View No. 1 shows the mixing department, the large tanks at the rear containing the different numbers of emery and corundum. A weighing appliance is underneath each, thus allowing the mixer to draw such sizes and quantity as is needed for the mixture. The wheels, after being mixed, are put in a dry room for one night.

Cut No. 2 shows the process room, which is called the shaving department. The vitrified wheels are here shaven down to nearly the required size, leaving just enough allowance for contraction in burning. The wheels are then placed in a large dry room and remain there until thoroughly dry before being placed in the kilns, one of which is shown in the next illustration.

In No. 3 we see the kiln men drawing a kiln, the wheels having been subjected to a heat of between 2500 and 3000 degrees for about seventy-two hours, thus becoming thoroughly vitrified and one solid mass. The next process is shown in cut No 4, where the wheels are trued up and turned to exact size, after which they are tested at a speed giving them a working strain of more than double that at which they should be run when in actual use. Besides this test every wheel is tapped by an expert with a hammer the last thing before being packed for shipment, to make assurance doubly sure that no unsound wheel leaves the factory. Incidentally, it should be mentioned that every emery wheel should always be tapped in this way just before it is placed on the machine for use, as it is not unusual that a wheel is so handled in transit that a latent crack is started, and does not manifest itself until the wheel is in actual use.

Another item of interest to the user as well as the manufacturer is that an Ohio State Inspector of Factories recently stated that he found in his experience as an examiner that in at least nine cases out of ten, where emery wheels were broken while in the hands of the user, that the breakage was caused by the workman in putting the wheel on the machine. This is of especial interest for the reason that it comes from one whose duty it is to examine into accidents in the interest of the workman and not in the interest of either the buyer or the seller.

Illustration No 5 shows the principal process in the manufacture of the "advance safety" or "silicate" wheels made by the Sterling Emery Wheel Mfg. Co. The men are at work tamping the mixture into moulds. This, as will be readily understood, requires skill and experience on the part of the moulder, as he must get the mixture in

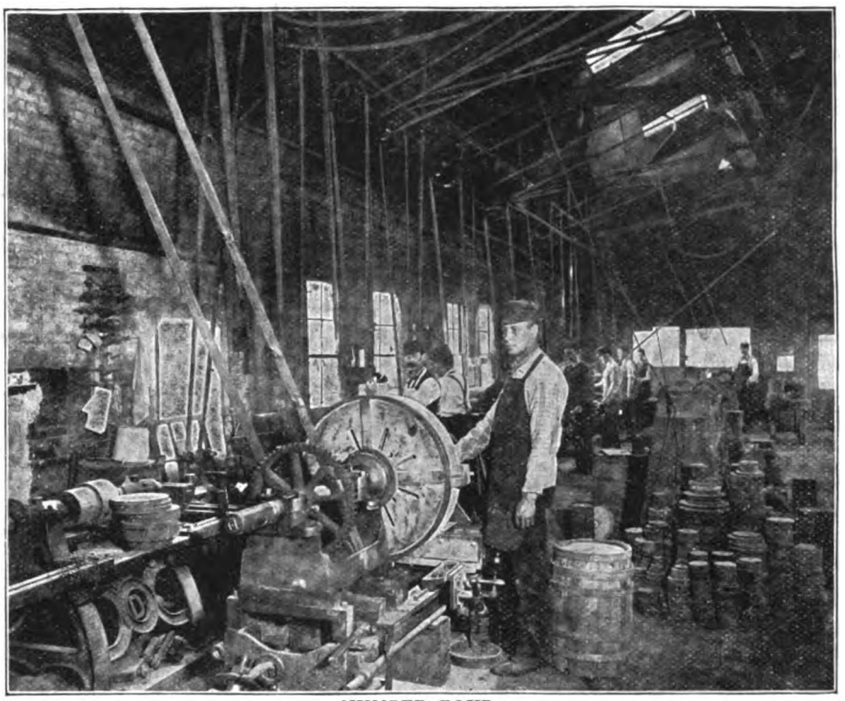
NUMBER TWO.

equally, and in such a way that the wheel will be of the same hardness through and through, and hence run true and cut uniformly. In the center of this wheel a wire web is placed when so desired. After the wheels are moulded to a proper size, they are baked in the oven shown at the rear of the illustration. They are then taken to the turning department, illustration No. 4, where they are trued

NUMBER THREE.

up and tested by the same process that is done by the Sterling or "vitrified" wheel.

By a marked exercise of ingenuity and good judgment, this factory is so arranged that the raw material which enters at one end proceeds by regular steps to the other end, where the finished product is packed for shipment. The shipping facilities of the company are unequalled, as side tracks which extend on both sides of the factory, give them direct connections with the numerous trunk lines branching out in all directions from Tiffin, to the world at large.

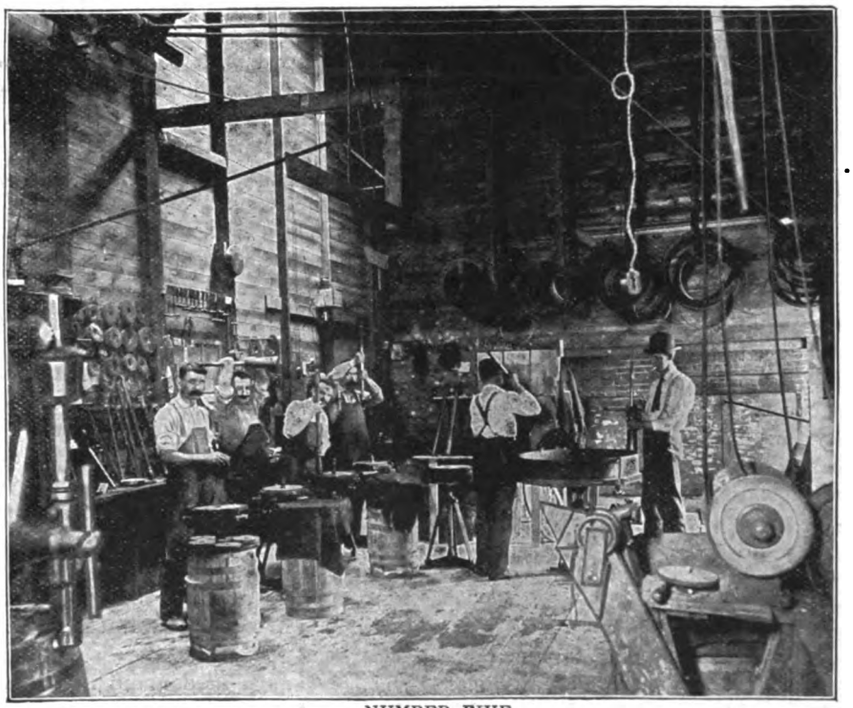


In addition to the growing home demand for the product of this concern, it is building up a very fine foreign trade, and the reputation of the product of the Sterling Emery Wheel Manufacturing Company abroad, as well as in this country, is second to none.

The plant at Tiffin is under the personal management of Alton H. Kimball, the secretary and general manager. Mr. Kimball is a thorough expert in his line of manufacture, and in addition is a most capable business man, which fact is evidenced by the character of the concern, which has grown so large under his care, and which is so ably carried on at present. He was for many years allied with the emery trade before engaging in the manufacture of wheels for himself. His personal attention is given to

Digitized by Google

every detail of the business, and buyers recognize and appreciate the courteous and businesslike treatment which they receive at his hands, and those who have once done business with this company are only too happy to repeat this experiment indefinitely.



It may be entirely appropriate here to speak more at length of the material from which these goods are made, with some general information in regard to the trade, which has been compiled by one thoroughly acquainted therewith, as follows: Both emery and corundum are prepared for use in about the same way. They are crushed down to different degrees of fineness, and after being cleaned, are graded in different sizes, ranging from No. 6 to the finest flour. These sizes take their names from the number of meshes to the lineal inch of the wire cloth through which they are graded. The coarser sizes are used mostly in making emery and corundum wheels.

NUMBER FOUR.

The principal reason why more emery than corundum is used is the difference in cost. Miners of emery ore in Turkey receive but 6 or 7 cents per day, while the minimum wages paid to miners of corundum in this country is not less than 70 cents per day Another reason for the greater cost of corundum is the fact that emery ore is brought to this country largely as ballast, and the cost to land it is, therefore, about one-twentieth of the cost attached to transporting corundum from the mines to the same points in this country.

This increased cost for the transportation of corundum is due largely to the fact that the mines are located at considerable distances from lines of transportation, and even when delivered at the railroad, the rail freight is more expensive than the ballast freight of sailing vessels.

NUMBER FIVE.

The principal difference between emery and corundum wheels is that one is made of emery and the other of corundum, the bond or cement holding the grains of emery or corundum together being practically the same in each. An emery wheel is made of such diameter and thickness as will best suit the work required of it. It is made in dif-

Digitized by Google

ferent degrees of hardness, some work requiring a soft, some a medium and some a hard wheel. It is also made of different sizes of emery, depending on whether or not the work to be done is coarse or fine.

The chief uses of emery and corundum wheels are to finish up and give a smooth surface to any iron, steel or other metallic substance, stove castings, agricultural implements, machinery, tools, cutlery, etc. Large quantities of them are used, as is well known, for gumming saws and grinding planer knives. In fact, they are sometimes called rotary files. One can readily understand that it would be practically impossible to name all the different purposes for which they are used. Their employment, however, can be summed up as follows: They are used for grinding, polishing, sharpening and shaping metal and wood substances. This does not cover all their uses, for the Sterling Emery Wheel people have made wheels for grinding feathers. They also do the work similar to that required of the planer and lathe. It is even claimed that the use of the emery wheel can be so varied and developed that the volume of the business is still in its infancy.

There are already such a variety of grades, shapes and sizes now in use that it is an impossibility for any manufacturer to carry a full stock of wheels, for if only one wheel of a known kind were kept on hand there would have to be over 700,000,000 of them. Therefore, most orders have to be made up after they are received. Comparatively few buyers understand this fact, and consequently do not place their orders as much in advance of their needs as they should. Neither do they allow for the necessary time it takes to properly make a wheel. And right here the writer desires to make an observation to buyers of emery wheels. It is most eminently desirable that when an order is placed with an emery wheel manufacturer for wheels, it should be accompanied with specific information as to the purpose for which the wheels are to be used, and also the normal speed at which they are to be run.

There are practically three classes of emery and corundum wheels—"vitrified," "silicate" and "chemical." Some users prefer one kind and some another. The "vitrified" wheel, of which there are the most in use, is burned in kilns, as shown in illustration No. 3. The "Silicate" comes next in quantity used. The difference between it and "vitrified" consists principally in the difference in the bond used to hold the particles of emery and corundum together, in that it is molded and tamped in molds instead of being cast in just the sizes required, and then cooked or baked in ovens for a much shorter time and at not near as high a heat; also, in that it can be made with or without a wire web. The Sterling Emery Wheel Mfg. Co. make both the straight "vitrified" and "silicate" wheels, and also a semi-vitrified "silicate" wheel, which combines the best qualities of the other two. For the special purpose of saw gumming this concern makes more than any other in the country. The high quality of the Sterling wheels has so won the public appreciation, and they are so well liked by all users, that the growth of the industry has been a steadily increasing one.

Our Trade With China.

The appointment of Dr. Edward Bedloe, of Philadelphia, Pa., as consul to Canton, China, was received with much gratification by the numerous friends of the doctor. His long experience in the consular service in China in years past will doubtless serve him to excellent advantage in the important position to which he has been called. American manufacturers will find in Dr. Bedloe a zealous champion of their interests in the far East. The doctor is on record as having stated:

"There is a golden future in our commerce in manufactured goods in the far East. I believe that our best and most profitable markets in the future will be found there. The difficulties and obstacles are numerous, but the national trait of Americans is to overcome such things, and by wise foresight of our legislators and diplomats and a study of conditions by our boards of trade and chambers of commerce it can be accomplished. We are bound to encounter the jealousy and hostility of the European trade interest already established in those distant lands. The Great Britain houses, the Germany companies, the Belgium and French firms leave no stone unturned to hinder or injure us and to kill or hurt our American trade to the promotion of their own. Some foreign firms, indeed, go to lengths which in our own land would be regarded as actionable at law and even punishable by our criminal courts.

"Much of my consular work while in China," continued Dr. Bedloe, "consisted in exposing and checking these infamous frauds. One example was an imitation Winchester rifle made in Belgium by an English firm of the lowest grade materials, which was as liable to kill the man who fired it as the man or animal it was fired at. Another instance was the dangerous imitation of American-made cartridges for Winchesters, Colts, Remingtons, Smith & Wessons and other first-class firearms, which were manufactured near Birmingham, England, by cheap labor and of poor materials which were worse than worthless. It is not surprising in the face of such manifest and glaring frauds practiced by the British that our gallant Admiral Belknap, when commanding our Asiatic squadron, in his official report to Secretary Tracy referred to Great Britain as 'the rich robber of the universe.'

"Among other frauds that I remember to have seen practiced," continued Dr. Bedloe, "were the filling of American flour bags with poor imitation British flour; filling canvas covers of Chicago ham and bacon with really unmarketable pork; putting up Siberian salmon in exact imitation of the best salmon canned in California and Oregon, and selling cheap imitations of Ames' shovels, Collins' Axes, McCormick's farming implements, Disston's saws, Rochester lamps and American student lamps. Worst of all, I have seen the trashiest barytes-filled English cotton cloth stamped with counterfeit labels of the Fall River, Taunton, Willimantic and other high-class American trade marks. American kerosene tins are filled with the lowest grade of Russian oil and even with the kerosene from the new petroleum discovered in Sumatra. American cigarettes, American sewing machines and American clocks are all imitated in the manner that I have described."

"What is the reason for such widespread imitation?" Dr. Bedloe was asked.

"Because American goods have such a high reputation in all eastern markets," he replied. "They are universally recognized as the best. To the orientals the mere fact that an article is American is a guarantee of its worth and value. The condition that I have described that exists to-day is what we may expect to have continued until treaties shall be enacted which shall put an end to this style of swindling and robbery.

"To promote and extend our foreign trade," said he in conclusion, "we should have keen business men and practical artisans at the principal points in the far East to learn what the people want, to ascertain how they make their own goods and the designs and patterns of goods which are most in demand in the different districts, and thus practically learn what is necessary to meet the requirements. I have always thought that a permanent exhibition of American products should be established in China, to which consignments of American-made goods could be sent, and every article in which there is a profit for the manufacturer, the merchant and the exporter displayed for the instruction of the oriental purchasers."

PUBLIC LIBRARY

NEW GOODS AND SPECIALTIES.

A Motor Lawn Mower.

When Thomas Coldwell, of Newburgh, N Y., finds himself unable to invent something new in the Lawn Mower line, he will doubtless feel that his mission in life is ended, and go and jump off the edge of everything. His latest exploit is worthy of even his previous efforts. He has invented a lawn mower that pushes itself.

The Coldwell Lawn Mower Co. have had the experiment of a horseless mower under way for some time. Several

days since, a trial was made on the Powelton Club grounds, at Balmville, and those present pronounced the machine a success, but no one was better pleased and had reason to be, than the inventors themselves. Wm. H. Coldwell, on account of the absence of his father, Thos. Coldwell, who had largely to do with the construction of the machine, said that considering the fact that it was an entirely new machine, and the first ever built in the world, and that this was the first trial, the results were far beyond what might be expected.

A machine of this kind has become almost a necessity on golf grounds and parks and other large lawns where perfection of work is the great desideratum. With the ordinary horse mower, the horse is liable to tramp down the grass, especially when it is wet or when it is tender. This is entirely obviated with the motor mower, as there is nothing in front of the cutters to tramp or roll down the grass. Another advantage in the motor mower is that it is heavier in construction, hence it tends to roll out imperfections and make a solid, even sod. The greater part of the machinery is encased in such a manner that it it hidden from view.

The frame of the main body of the machine rests upon three rollers. The first two are the main driving rollers, the third, which is in the rear, being a castor or steering roller. Resting on these rollers is a substantial platform on which is placed the engine and operator's seat. The engine is a gasoline engine of four-horse power, and can be run a whole day at an expense of twenty-five or thirty cents. The engine can be started in a minute's time and can be regulated to a fast or slow speed, as may be desired. It has a governor, which regulates the power and speed of the engine.

In testing the power of the engine, it easily carried eight men and carried three up some of the steepest hills, and cut grass so heavy that it would almost be impossible for a horse to cut. The cutter, which is forty inches wide, is situated in the front of the driving roller, and is so arranged that it can be raised from the ground and the machine can be used as a roller the same as a garden or street roller. The engine can also be disconnected from both the rollers and cutting device, and used as a portable engine for purposes of cutting feed, pumping water or any other work of a light character. It has a very ingenious device for automatically disconnecting one of the driving rollers when turning a sharp curve, by which means it can be turned round in a space not much larger than that which the machine occupies. The machine is entirely operated by the ordinary hand wheels, placed one directly over the other, very similar to those used on cable cars. By means of these wheels the operator can stop and start the machine, run it backward and forward, and direct its course without leaving his seat. The motor mower not only does much better work than a horse mower, but the inventors expect that it will be much more economical, as it moves over the ground much faster than a horse, and never gets tired. Mr. Coldwell stated that it was not yet clear as to what the expense of the machine would be, as they had some few changes to make which would increase its simplicity and efficiency, and also materially reduce the cost of the present machine.

On producing this the first motor lawn mower, the Coldwell Lawn Mower Co. have shown their usual commendable enterprise in quickly discovering a necessity in their line and being the first in the market to meet it.

The "Ski."

No doubt every visitor to Duluth, Minn., who glanced up the hill from the foot of Fifth Avenue, west, has thought, "what a fine place for coasting;" but if he could be there in midwinter, he would see some of the most exciting of winter sports, quite new to many sections of the country, and, compared with which, the ordinary "sliding down hill" is very tame. The Duluth Ski Club make their headquarters at this point, and entertain thousands with their agility when the snow and weather are favor-

able. The course starts from the Boulevard, and, after sliding for two blocks, the runners come to a short level space which, declining abruptly, sends them shooting out into space, and it is surprising the distances which are jumped in this way. From 60 to 100 feet jumps are frequently made, and the longest on record was 127 feet. The jumper is expected to land on his feet, and then continue his slide down the incline "like a flash." If the jumper fails to recover his erect position, he usually has a good roll in the snow, and loses his record, but that does not

Digitized by Google

discourage, and he is soon up for another slide. The toe goes under a strap, and the heel fits over a block, so the wearer, losing his balance, the skis are quickly detached. This sport was introduced in this country by the hardy Norsemen, but it has been proven so interesting and attractive, that it has been practiced by all classes, and many successful clubs have been formed. Over ground but little inclined, the ladies and children find the Ski running great sport, and as they are much easier used than snow-shoes, they bid fair to become much more popular. The Marshall-Wells Hardware Co., of Duluth, Minn., have made a specialty of these Skis. They are made of selected woods, and the No. 5, for men or ladies, are made with bevelled edges, swelled runners, grooved bottoms, ornamented and varnished. These are seven feet long, but they have smaller for children and larger for cruiser's use.

New York State Jobbers.

At the ninth annual meeting of the New York State Association of Hardware Jobbers, held in Syracuse, the following officers were elected for the ensuing year:

President, Charles H. Turner, Albany Hardware & Iron Co., Albany.

Vice-president, J. W. Black, Burhans & Black Co., Syracuse.

Secretary-treasurer, S. J. Weaver, of Weaver, Palmer & Richmond, Rochester.

The meeting was largely attended, and was followed by a banquet tendered by the local Hardware houses of Bradford Kennedy Sons & McGuire, and the Burhans & Black Co. J. W. Black acted as toastmaster, and speeches were made by President Turner, Frederick Barker, C. E. Walbridge and others.

A very entertaining paper was read by Hobart Weed, of Weed & Co., Buffalo, which we reproduce herewith in full. The title was "Confidence in One Another," and the points made by Mr. Weed were certainly well taken and appreciated:

"Your highly honored president has requested a paper from me, at this meeting, and I have taken as my subject, 'Confidence in One Another.' I shall not attempt to tell you that some other fellow could do a great deal better; he might, he might not. I have my own personal views. During the business depression of the country many things have happened that have brought very forcibly to my notice that 'good may come from misfortune,' that most pleasing for me to mention being the confidence that has developed among competitors. For years past the Hardware manufacturers and dealers have seen their profits gradually declining, and many good people being forced to the wall.

"But some wise ones have realized that there must be an end, and you have noticed that many of the manufacturers have made various attempts to get together in order that benefits might follow. In some cases it has proved in vain, while in others it has been crowned with more or less success. You all recall the nail manufacturers having been at swords' points for many years—in fact, till their profits were gone, and it looked as though their mills would follow suit. But after a great deal of consultation they became convinced that their only salvatien was to get together and agree on some plan that would further their interests. You all know what has happened; and these people coming together, as they have done, it has made a better feeling among them, and they have more 'confidence in one another.' Take, for instance, during the last few months, one of the largest nail companies had a very serious strike and were obliged to close their mills, but were enabled to secure nails from other competing manufacturers to serve their customers. This could not have been done some years ago.

"Then, again, take the shovel combination. Were people ever more bitter than they? I recollect that one of the most prominent shovel men was in Buffalo when he received a message asking him to meet the rest of his competitors and discuss the matter of getting together. He told me that under no circumstances would he enter into an agreement—he had no faith in his competitors. But in some way he joined them, and now at this moment they are a very strong association; and if any of you have ever attended their meetings you could but notice the friendly feeling and the confidence that exists among them, which, of course, has been to their financial benefit.

"They are making money, and the foundation is confidence in one another. Another instance of more recent date: For years two of the leading manufacturers have had any amount of trouble with Mr. ——, and they have tried in almost every way to get him to meet with them. I was in New York two weeks ago and met these two manufacturers and they said: 'We have at last succeeded in getting Mr. —— to join us in a conference. He arrived this morning, but we have very little faith that anything can be accomplished.' But they thought no harm could come of getting together. When I came up to the hotel at night I was astonished to see the three manufacturers together, and in the most pleasant frame of mind. And the two of little faith both informed me that Mr. —— was a different man from what they had anticipated, and their meeting had been most successful. These instances prove that the most important factor in our business relations is confidence in one another; and many times when you come to know people, you find they are not as black as you have thought them to be. Take our own association—how our views have been changed by our closer relations.

"I have often thought the American people were inclined to work with a chip on their shoulder, waiting for someone to jostle them a little, and then ready for a combat. We, ourselves, may have been so. For years we have been told that our competitors have been making lower prices.

"Well, we felt that the only way was to meet the competition; but I believe that if we could all be more gentle, and show a kindly spirit of good will and fellowship, there could be no better investment. It would prove of more profit than screws at 90 and 50. Of course, it is very easy to say what we ought to do, as regards being more forbearing and not too rapid at conclusions; the pride of many of us has restrained us from seeking our competitors to see if the spirit of confidence could not be entered into. But how many of us have thrown our money away in the attempt to get even with our neighbors!

"Do not, for an instant, gentlemen, let me give you the impression that Weed & Co. are free from faults. Far from it. But I do believe that if all of us would cultivate the spirit of confidence, it would make our lives happier and our pocketbooks heavier.

"We have proven in the past that our meetings have been of vast importance to us all, and I question if there is any house that has been connected with this State Association that will not readily admit that it has been a good investment for them in the frank discussion of many different matters, as I believe that every individual house has some one method that really is of great importance to them. Now bringing us altogether and discussing these different subjects, we gain new ideas, as some house will have one point of which they have made a study and another house will have others. These minor items may seem to some of very little value, but they really strengthen the foundation of our business. I seldom go through one of the large factories but some small matter strikes me which I believe is a good investment for our house to adopt. So let us strive more and more in trying to build up this confidence in one another, and in our meet-

Digitized by Google

ings be more frank in discussing the different methods in vogue in our establishments, so that we may get the benefit of our neighbors' experience. The matters of profit sharing; of dividing our stores into departments; of shipping and receiving our goods; the treatment of our employes—these are a few items that come to my mind. And there are others that can be of help to us. If we are to have years of prosperity (as many predict), we can reap great reward from Confidence in One Another."

Death of David Folsom.

David Folsom, of the H. & D. Folsom Arms Co., No. 314 Broadway, New York, died in his apartments at the Marie Antoinette Hotel, in this city, on October 21st. He had been ailing for some two years from a complication of troubles, but was seriously ill only several days before his death. Mr. Folsom was well known wherever goods of his line of manufacture were sold or used. He was born in Auburn, N. H., fifty-six years ago, his father being John Folsom, of that place. He was educated at Dartmouth College, and in 1861, immediately on leaving college, went to St. Louis to join his brother, Henry Folsom, who had established a business for the manufacture of arms a year previously. The firm was known as the H. & D. Folsom Arms Co. At different periods it had branches in Chicago, Memphis, New Orleans and New York. At present it has two establishments, one in this city and the other in New Orleans. It has been chiefly engaged in the manufacture of rifles for sporting purposes. Henry Folsom died about six years ago, and his son, Henry T. Folsom, took his place in the firm. David Folsom came to this city to conduct the affairs of the company more than twenty years ago. He lived in Orange, N. J., until a short time ago, when he moved to the Marie Antoinette Hotel. His wife and one son, David Folsom, survive him.

At a special meeting of the Gun and Sporting Goods Trade called October 21, 1897, to do honor to the memory of the deceased, the following resolution was passed:

Inasmuch as it has been the Divine will to remove from us our esteemed associate, David Folsom, with whom our constant intercourse for fully a generation had ripened our acquaintance into a deep and lasting membership. Therefore, we desire to give expression to our sorrow, and to make record of the worthy name he has left among us.

His honorable career was recognized and deeply valued—courteous, straightforward and high-minded. His sterling character and upright example are a goodly heritage.

Resolved, That this expression of our sorrow be conveyed to the bereaved family, and that it be duly published.

New Members of the Hardware Club.

At a meeting of the Board of Governors of the Hardware Club of New York, held on October 14th, the following gentlemen were unanimously elected to membership.

Henry Hopkins, Associate Editor HARDWARE, No. 143 Chambers Street.

George Davidson, No. 29 Chambers Street.

Ernest L. Baldwin, Empire Rubber Mfg. Co., No. 63 Reade Street.

A new kind of swindle has been unearthed in New York. A well-dressed man called on George Williamson, a merchant in Wappinger's Falls, and said he had been sent by Dennett & Co., Hardware dealers of Philadelphia, to correct an error in a bill of goods ordered. He asked to see the bill, and Mr. Williamson gave him a note to his wife to show it to him. The stranger told Mrs. Williamson that if she would pay the bill he would discount it at five per cent. She gave him $46, and he receipted the bill and left. Inquiry of the firm disclosed that the man was a fraud. He tried the same scheme, using the names of other firms, on merchants in this city, and collected several hundred dollars.

Review of the Markets.

Similar conditions prevail throughout the trade as have formed the features of the month just past, lessening demand being noticeable, and an absence of the impatience of delivery which characterized the earlier part of the season.

Prices keep moderately steady, and the end of the season is already anticipated by the manufacturers in their efforts to complete orders already in hand. The fact of so many orders still remaining upon their books unfilled, prevents any slump in prices for the purpose of making sales, when the advances in raw material would make any quotation except advanced ones, uncalled for and anomalous. The markets bid fair to be regulated by higher prices based on conditions that are unavoidable, with an increasing demand for goods possible for the future, met by a prevailing scarcity of material in primitive conditions for manufacturing purposes.

Wire Nails: Still keep in active demand, not quite so large in volume as a month ago, but noticeably good. Prices are well sustained in the fact that the mills have many unfilled orders still in hand, smaller sized wire nails being in anything but a full supply. Stocks have been greatly reduced in many points, and that fact alone will keep the season good until December 1st. Prices consequently are steady, with a still further advance over previous quotations for less than carload lots at mill, which are quoted at $1.50 f. o. b., advanced rates being named, according to quantity, for less than carload lots. New York quotations are $1.65 for carload lots on dock; smaller lots from store 5 to 10 cents a keg higher.

Cut Nails: Are still held at the prices agreed upon by the Eastern and Western mills as a basis for future transactions. There is by no means a large business being done in this line, bnt prices are held firmly, the New York price being for carload lots, $1.43, and for less than carload lots an advance of 10 cents a keg.

Cordage: As we approach the end of the season, fluctuating quotations on cordage become less noticeable. The following quotations may be considered as firmly held by the leading makers, the usual rebate for carload lots of ¼ cent a pound being still conceded:

Manila, 7-16 inch and larger	per pound,	5¾	cents.
" ⅜ inch	"	6¼	"
" ¼ and 5-16 inch	"	6¾	"
" Tarred Rope, 15 Thread	"	6½	"
" Hay Rope, Medium	"	5¼	"
Sisal, 7-16 inch and larger	"	4¾	"
" ⅜ inch	"	5¼	"
" ¼ and 5-16 inch	"	5¾	"
" Hay Rope, 2 to 10 Ply	"	4¾	"
" Medium Lath Yarn	"	4¼	"

Shot: After an effort to sustain prices more greatly at variance with Western quotations, the Eastern manufacturers under date of October 18th, announce reduced prices as follows:

Drop Shot, sizes smaller than B, per 25 pound bag	$1 30
" " " " " " " 5 " "	.30
" " B and larger sizes, per 25 pound bag	1.55
" " " " " " " 5 " "	.35
Buck and Chilled Shot, per 25 pound bag	1.55
" " " " " 5 " "	.35
Dust Shot, per 25 pound bag	2.00
" " " 5 " "	.50

Terms net cash, 30 days, or 2 per cent. discount for cash in ten days.

Agate Nickel Steel Ware, etc.: The Lalance & Grosjean Mfg. Co., No. 19 Cliff Street, New York, have recently issued a new price list of their various lines of enameled steel ware, to which the following discounts apply:

Agate Nickel Steel Ware	40 and 10%
Peerless Ware	70 and 10%
Crystal Steel Ware	50 and 10%
Blue and White Ware	50 and 10%
White Ware	25 and 10%

They have added a number of new articles to their already extensive assortment, and call especial attention to their important line of Agate nickel steel ware, which from its superior quality and the original and perfect methods of manufacturing, possesses advantages which make it worthy of the confidence of the trade. The prices of this ware

Digitized by Google

remain as previously, but in the other lines reductions will be noticed by the dealers.

Coil Chain: The irregularity in prices which has been the feature of the market for coil chains, during the early part of the season, has at last been settled by a number of the leading manufacturers agreeing upon the following prices, which, however, apply only to full casks of coil chain. Terms, net cash, thirty days, and a freight allowance not exceeding 21 cents per 100 pounds.

3-16	¼	5-16	⅜	7-16	½	9-16	⅝	¾	⅞	1 in.
$5.50	4.10	3.10.	2.75	2.70	2.50	2.40	2 35	2.25	2.20	2.15

Linseed Oil: The Dean Linseed Oil Co., No. 181 Front Street, New York, under date of October 15th, quote prices as follows: In lots of less than 5 barrels, 37 cents per gallon; in lots of 5 barrels or more, 36 cents per gallon. Boiled linseed oil, 2 cents per gallon higher. Calcutta oil, 54 cents per gallon.

THE BOSTON TRADE.

From reports we do not hear that the volume of business exceeds anyone's expectation, and the hope that we might be favored with an unusual amount of autumn business has vanished.

The bright, crisp weather has served as a stimulus to the trade, and all jobbers report the usual demand for such merchandise as is sold in October.

Retailers seem to be buying in such quantities as indicate nothing of a speculative nature. They prefer to run a light stock during the balance of the year and reduce their indebtedness as much as possible.

Collections are fair, and there is evidence of a good circulation of money in the manufacturing towns, which we believe is a favorable condition in anticipating a good winter and spring business.

There seem to be no advances worthy of mention, but prices are being well maintained, with absence of any willingness on the part of the manufacturer to make concessions beyond present ruling quotations.

FRYE, PHIPPS & CO.

THE PHILADELPHIA TRADE.

At present manufacturers seem to be getting more than their share of trade, as they generally report a large increase of business and a correspondingly large output of manufactured goods. These goods, however, are mostly ordered by jobbers in anticipation of a revival of trade which is now believed to be on the way.

The hopeful signs still continue, and are even on the increase, as shown in the importations of gold now on the way and soon to arrive.

Farmers are still benefitting by the advanced prices, and, as a local matter, we will say that those farmers who have been so fortunate as to have a good crop of potatoes are getting prices which are most exceptional and show a handsome profit.

With this money now finding its way into the hands of the farmers, and through the busy factories to the employees, it seems inevitable that trade should gradually increase in a very healthy manner.

Manufacturers seem disposed to withdraw extreme quotations, and, while moving conservatively, changes are almost invariably in the direction of higher figures, while some factories claim to be short of goods, and are certainly slow in filling orders.

Already bicycle agents are on the road visiting jobbers and talking about 1898. This is still, however, some distance in the future, and, as changes in styles are not apt to be many, it is not expected that many contracts will be placed early.

BIDDLE HARDWARE CO.

THE PITTSBURG TRADE.

We are pleased to again report that trade is improving from week to week. Travelers come in saying that people want goods and it is not much trouble to get an order now. There is certainly no boom in sight; only a good healthy growth in demand, as the mills and mines of this section put their men at work steadily.

The Monongahela River valley is fast becoming one vast workshop. Since the purchase of the Navigation Co. by the United States Government several new enterprises have started in this valley. Cheap fuel and cheap transportation are the attractions. The tin-plate industry is being pushed to large dimensions, two immense concerns being erected in this vicinity, one near New Castle and one in the Monongahela Valley.

LOGAN-GREGG HARDWARE CO.

THE COLUMBUS TRADE.

Trade continues very satisfactory and shows a nice increase over 1896. Prices are also becoming more settled; goods are hard to get in many lines. In the first place, manufacturers are behind with orders, and after shipment is made, transportation companies are slow in delivering. Collections have improved in the mining districts since work has been resumed. Coal operators are finding ready sale for all the coal they can mine, and the price of coal has advanced quite a little. It is hard to get cars on account of the heavy demand for Lake shipment, but they will not have that trouble long, because the Lake trade will drop off as soon as navigation is closed. We do not refer to navigation on our own beautiful Scioto River, as it never closes on our river. You can always navigate her in some way, either in a row boat or on foot. Just now you do not need a boat. Above the city they have dammed it several times with stone and wood; below the city they have dammed it many more times in another way. Now they are talking of damming it with a thirty-foot dam, and

Digitized by Google

as it is to be left to a vote of the citizens whether it is to be dammed again, it will no doubt be dammed quick. Now we are not swearing, and hope none of your readers will think so. We hardly know how to word it so it would not sound like swearing. Guess we got it all right.

Down below the city at the sewer outlet, there is a deep place that reminds us of the river in Cleveland, through the refinery district. When you want to cross the river in Cleveland in that district, you do not need a boat. You just walk on top of the water; no need of fear, you cannot sink.

Prices on a number of articles have advanced. We might name tacks, sisal rope, iron, glass, iron pipe, coal hods, lace leather, shovels, imported guns and cutlery, while a number of articles are lower in price. But articles that declined in price are mostly lighter goods. Nails and wire have taken a rest for the past two weeks, but it would not surprise us if the manufacturers took *the* rest before long. If they accomplish what they have been trying to do, nails will be longer in price if not in length. We would regret to see an unreasonable price put on them again, as there is no doubt about it interfering with building, especially among the farmers. High priced nails always scare the farmer.

Galvanized iron and tinware are both about ten per cent. higher. We would like to see the very poor tinware banished, as it interferes with the trade on sieves. People buy a five-cent pan, and after using it a few times it is just right for a sieve. As we do not handle that kind of tinware, we lose the sale on both the pan and sieve.

Rain is needed badly. We have had only one shower for more than a month. Many acres of wheat had to be re-sown. If it continues dry much longer, the wheat crop of 1898 will not be a big one. However, it is a long while before harvest, so we will trust in Providence and keep hustling. SMITH BROS. HARDWARE CO.

THE CHICAGO TRADE.

We are very much pleased to note that since the advent of cooler weather throughout the Northwest our orders are increasing in size, especially so on all seasonable goods, such as stove boards, fire shovels, coal hods, elbows, meat cutters, sheet steel, sheet iron, barbed wire and nails. In the line of wire and nails, we have received more carload orders in the past week than we have handled before in three times that length of time.

We think now that farmers are about through with their harvesting, that they are paying some attention to the rebuilding of their fences, barns and outbuildings, and in many cases are putting up new houses. At all events, the demand for builders' Hardware is increasing, and we see no reason, from present indications, why our trade should not continue good right up to Christmas.

We learn from manufacturers that wire and wire rods are not only higher, but are very scarce; it is also certain that sheet iron mills are considerably behind in filling their orders.

Our experience in cutlery is to the effect that our trade, in many years, has not been so good as that which our men have had for the past two months, and are also having at the present time. WELLS & NELLEGAR CO.

THE DAVENPORT TRADE.

Since writing you, Mr. Nutting has visited Louisville, Ky., where he was entertained most delightfully by Wm. Belknap of the Belknap Hardware Co. Was pleased to learn that good times have returned to that beautiful and prosperous city.

Our sales here for September show a larger percentage of increase compared with 1896, of any month so far this year. Collections are good; prices firm. Stocks in the hands of both wholesale and retail dealers gradually begin to increase to their normal condition. Davenport banks show an increase of ten to twelve per cent in deposits over this time last year. SICKELS, PRESTON & NUTTING CO.

THE OMAHA TRADE.

Trade, for the first half of the month, shows a very handsome increase over the corresponding period of a year ago. No reasonable complaint can be made in regard to the volume of business which, in every respect, is entirely satisfactory, and collections are equally so. The main difficulty at present appears to be a sufficient supply of goods with which to take care of the demand. The trade fully appreciate the situation, and are, as a rule, very considerate in regard to the way some of their orders are filled, or not filled, and the general feeling, both among the merchants and farmers, is that the old-time prosperity which was promised a year ago, is a materialized fact and not a contract for future delivery. The slight improvement in prices of staple goods has still further improved the situation, and caused a feeling of confidence in placing advance orders which has not been seen for a long time past, and when prices move up a little higher so as to enable both manufacturers and jobbers to secure a fair return for the capital invested and the labor employed in conducting their business, it would seem as though nothing further is to be desired. A boom is the last thing that any of us want to see, but a sufficient advance to give the desired relief in the direction indicated above would be appreciated by all. RECTOR & WILHELMY CO.

THE GRAPHITE TRADE.

We are morally certain from the appearance of our order and sales books, that we are on the same wave that is carrying so large a majority of the other manufacturers of this country to that fair land, "Prosperity."

Union Heater Supply Co.,* 91 Congress St. E., *Detroit, Mich.

Our struggle nowadays is mainly an effort to ship goods with promptness enough to keep customers good natured.

The numberless hurry orders received indicate short stocks throughout the country, and the percentage of orders for better class goods indicates a better ability to pay.

An incident gives the general situation. The writer has spent several seasons on a farm in Delaware County, N. Y.

The farmer last year, in discussing the situation of affairs, claimed that the country demanded the election of Mr. Bryan as a necessity to bring about a prosperity which would enable a farmer to make a living. He was getting 15 cents per pound for his butter and 65 cents per barrel for his apples, and would rather feed his milk and apples to the animals than attempt to make money at the prevailing prices.

This month the same farmer, in answer to an inquiry for prices, writes:

"I am selling my butter as fast as it can be made at 20 cents per pound, apples at $1.50 per barrel, and shall require a prompt order if these are wished in a reasonable time."

This same farmer is laying the foundation of a new house which will be newly furnished throughout.

Joseph Dixon Crucible Co.

Will See What Can Be Don.

The following is a verbatim copy of a letter received some days since by a jobbing house in a neighboring city. It is certainly unique in its way:

Dear Sir: Just a few lines to you to See if you got a Sprocket Weeal Witch Was Sent to you Sum five Weeks ago by ——— of ——— i have Sean him Serevl times aboute it and he sed he ad roate you Severl letters about it So there must be Sum think don one Way ore the other for i am tiard of awaiting of it if it hant here in ten days We wiell See What can be don.

George F. Carter has opened a new Hardware store in Orange, N. J., where any article desired in the Hardware line can be furnished. He will handle not only the usual lines of staple goods, but everything that can be needed in a community even as enterprising and prosperous as the one in which he is located.

That which is bargain in name is often deceitful above all things.—*Hardware and Metal Reporter.*

A Hardware Man.

There was once a Hardwareman who was determined to set up an image of a human being in his store window. He looked about his stock, and finding all the needed material, went to work, and his efforts were crowned with an unquestioned success. He took the legs of a stove, the teeth of a rake, the ears of a pail, the elbows of a stove-pipe, the tongue of a wagon, the nails from a keg, the fingers of a cradle, the head of a hammer, the nose of a tea-kettle, the hands of a cyclometer, the hair of a brush, the eyes of a needle, the bottom of a tub, the neck of a bottle, the arms from his gun department, the joints from a two-foot rule, from which he also stole the feet, the back of a refrigerator, the heel of a scythe, and the cheek of his traveling man. He was a little uncertain as to the "skin," but after a moment's thought, decided to give that part to the fellow next door.

The W. H. Elliott Electric Co., Marine Block, Middle and High Streets, Cleveland, Ohio, have been working eighteen hours a day the past five weeks, and from appearances, the manager informs us, they will be compelled to so continue for the next two months. They have just completed an M. P. 100 generator for the New York & Ohio Co., of Warren, Ohio, and two large generators U. S. type for Saudusky, Ohio. Their specialties are armature rewinding and building, commutator refilling and building, and dynamos and motors are overhauled and repaired.

George S. Parkes & Co., with headquarters at Nashville, Tenn., the well-known manufacturers of shafts, poles, rims, bows, etc., have removed their New York office from No. 64 Cortlandt Street to No. 89 Reade Street, in which new and commodious quarters they will be pleased to greet their friends.

The Miner & Peck Mfg. Co., New Haven, Conn., have removed their office and works to No. 419 Chapel at the corner of Wallace Street, where they have increased facilities for the manufacture of the Peck patent drop press, friction drop hammers, blast forges, etc.

The Employers' Side of the Engineering Dispute.

As the *Age of Steel* remarks: "There are two sides to every question, and what has to be said for either deserves a hearing, before any decision can be reached." The following is quoted from the *London Times* as giving the reasons why a lockout was enforced by the shipbuilders of Great Britain. They deserve careful consideration:

"The cause of the struggle is that the trade unions have interfered in the management of the works by their owners and have ordered the owners to make serious changes in their management, under threat of compelling the workmen to strike.

"The trade unions have ordered the owners to employ full price mechanics to work certain machine tools that can be worked by junior hands or laborers, and are so worked in other countries.

"The trade unions have ordered the owners to work each machine tool by a separate man, instead of one man working two or three machine tools simultaneously, as is done in other countries.

"They have ordered certain foremen to be discharged because not under the control of the trade union.

"They have ordered the speed of turning out work from certain machines to be limited below their full capacity for the purpose of increasing the number of workmen necessary.

"They have ordered that one mechanic shall not do any work of another trade, although competent to do it and required to do so for the convenience and expedition of completing the special work in hand.

"And now the trade unions are wanting to order the owners to pay the workmen nine hours' wages for eight hours' work, and let their machinery stand idle for the remaining hour of each day.

"The trade unions have tyrannized over the workmen by compelling them to strike when they had no desire to strike, and wished to continue in their situations, and they have further tyrannized over the workmen who are not on strike by compelling them to contribute heavily to the support of those workmen who are out on strike.

"This interference of the trade unions with the course of trade has now been carried to so great an extreme and the consequences involved to British trade in the present severe competition with other countries are so disastrous, that the owners have been compelled to unite for resisting the interference and the demands of the trade unions, and by a lockout to stop the forced contributions by which the strike has been supported."

"An Excellent Medium for Advertising."

Peerless Mfg. Co., Cleveland, Ohio. [*Bicycles*]: There is no question but that the Hardware trade is becoming a very large factor in the bicycle line. The two lines can be handled nicely together and, as a rule, a Hardware dealer has sufficient capital to add a cycle department, without danger of doing injury to his regular line. While again, few concerns have more visitors to their stores than the average Hardwareman, and this alone is a standing and effective advertisement for the bicycle that he may carry. We can see no reason why HARDWARE should not be an excellent medium for advertising.

Highest Grade Oiler.

DOES NOT LEAK.

Regulates supply of oil.

A little higher in price but,—

The Best Medium Grade Oiler.

Made in best manner possible.

Second to none but the "Perfect."

CUSHMAN & DENISON, Mfrs., 172 9th Ave., N. Y.

A Deserving Enterprise.

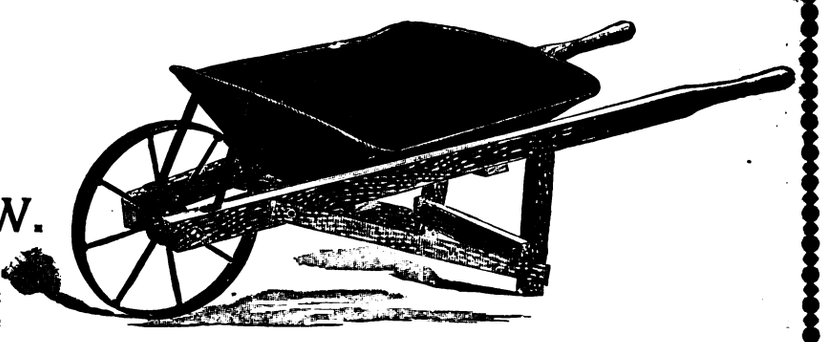
At Stanleytown, Tenn., a number of colored men have formed a co-operative association for the manufacture of foundry goods. It is called the Southern Hollow Ware & Foundry Co., C. H. Ferran, president. Their new foundry is now about completed, having a main building 50x25 feet, with a number of out buildings and annexes. They have stocked the plant with a 40-horse-power engine, new cupola, machinery, models, patterns, etc., etc., costing nearly a thousand dollars.

They expect to be in operation by November 1st, and can turn out fifteen stoves a day, employing nearly fifty colored men when running complete. They do not expect to make much profit on stoves—competition being too strong with much more extensive plants, but expect to make their greatest profit on iron hollow ware and such piecework as they can get from other foundries in their vicinity.

Although this plant may or may not prove a success, its promoters certainly deserve considerable credit. The idea of building and operating this foundry started with the president, C. H. Ferran. Ferran is a colored man, almost white, who was formerly the slave of a wealthy Huntsville family. Before the war he was the chief blacksmith, or ironmaster, on the Ferran plantation near Huntsville, and has considerable knowledge of iron making. For the past year he has been employed as head molder at Citico furnace and makes good wages.

He works all day at Citico and walks to his home in Stanleytown in the evening. Then he spends half the night working on the foundry with a number of other colored men interested, all of whom are employed at different points in the city. It has been under Ferran's supervision that the foundry was built. Ferran is a very powerful man physically, and has taken an intense interest in the enterprise.

The company as it is, is somewhat different from other concerns of this sort. They have not borrowed a cent of money on which to start the enterprise. Ferran and each man interested had some money saved, and with what they could spare from their earnings have built the plant.



Cost of Trolley Power.

A table taken from the annual reports of the Railroad Commissioners of New York and Massachusetts for nearly all of the street railway properties shows the cost of the electric power required to run a car one mile under average conditions of load, etc. The table gives the number of cars owned, the car mileage per year and the cost of the electric power per mile and per passenger. Of the nineteen companies operating less than 250,000 car miles, four are obtaining power at a cost of less than 2 cents per car mile, six between 2 and 3 cents, five between 3 and 4 cents, one between 4 and 5 cents, and three at more than 5 cents; of the five companies operating over 5,000,000 car miles per pear, one obtains the power at less than 1 cent per car mile, three between 1 and 2 cents, and one between 2 and 3 cents; other similar figures are also given between these limits. The Brooklyn Heights Co. has the cheapest power, 0.86 per car mile, followed by the Binghamton with 0.94. The cost of power for Massachusetts roads includes repairs and depreciation of the station plant, which is not the case of the New York roads.—*Street Railway Journal.*

Aluminum in Wrought Iron.

The effect of aluminum in wrought iron is not very marked in the ordinary puddling process. It seems to add somewhat to the strength of the iron, but this increase is not of sufficient value to induce the general use of aluminum for this purpose. The peculiar property of aluminum in reducing the long range of temperature between that at which wrought iron first softens and that at which it becomes fluid is taken advantage of in the well-known Mitis process for making wrought-iron castings. It is for this purpose that aluminum is chiefly used in wrought iron at present.—*Exchange.*

RETAIL TRADE RECORD.

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Hardware Stores.

Asheville, N. C.—W. S. Robertson.
Atlanta, Ga.—Fitten, Methvin Co.
Bellflower, Ill.—Johnson & Price.
Bridgeport, Conn.—Curtis & Wellington.
Durand, Mich —Sabin & Brewster.
Eagle, Wis.—D. L. Newton.
Emington, Ill.—Charles Skinner.
Gallatin, Mo.—James Drummond.
Hicksville, Ohio.—Homer Dillworth.
High Springs, Fla.—I. J. Carter.
Loogootee, Ind.—Morris & Fields.
Louisville, Neb.—John R. Cox.
Montpelier, Ohio —Miller & Lamberson.
Naperville, Ill.—J. Perry.
New York, N. Y.—A. Edmund Hildrick Co. Capital stock, $45,000.
Orange, N. J.—Geo. F. Carter.
Ord, Neb.—J. C. Hayes.
Pine Bluff, Ark.—McGaughey Hardware Co. Capital stock, $10,000.
Youngstown, Ohio.—John Allen.

Changes and Removals.

Albuquerque, N. M.—The Rose Hardware Co.'s store was purchased by M. H. Donahue, the well-known stockman of Progresso. Mr. Donahue has been in negotiation with Mrs. S. E. Rose, the former proprietor, for some time, and on completing the deal, left for his ranch, leaving the business, now known as the Donahue Hardware Co., in the hands of F. W. Heyn, the new manager. Mr. Heyn is well and favorably known to the business men of Albuquerque and needs no commendation.

Altoona, Pa.—B. B. Young & Bro. disposed of their stock of Hardware to Duff & Co., of Ebensburg. The goods will be removed to that town.

Amsterdam, N.Y.—C. W. Williams; business advertised for sale.

Ashmore, Ill.—The Zimmerman Hardware Store has been purchased by E. Monroe, who will soon take possession.

Bellville, Ill.—F. E. Leise & Son have purchased the stock of Hardware of M. R. Hartman.

Berne, Ind.—B. N. Terveer has disposed of his Hardware store at Decatur to the firm of Ashbaucher & Bell. The new firm will take possession January 1, 1898. Ashbaucher is at present serving his second term as sheriff of Adams County, and Bell is the son Charles of A. R. Bell, of the firm of Smith & Bell.

Caro, Mich.—A. H. Haukerson; stock purchased by the Watrous Hardware Co.

Cincinnati, Ohio. — Seymour, Hoyer & Co., dissolved; business continued by John Seymour.

Clay City, Ind. — The William Lester Hardware Store, purchased by J. T. Bryan.

Danvers, Mass.—Leland J. Ross, who has conducted a Hardware store in the Porter & Currier block on Elm Street, for a number of years, has been moving into his new store in the Colonial building, this week. The building is the latest addition to the modern business blocks and is owned by Mr. Ross and J. F. Dale.

Danville, Va.—G. P. Peterson; now Traylor & Peterson.

Downey, Cal.—A. S. Gray & Co. have sold their stock of Hardware to Chas. M. Benbrook, who will shortly take charge of the business. It is understood that the stock will be removed to the Smart building on the corner of Crawford and Second Streets.

Durand, Mich —DeCamp Hardware Co.; stock purchased by Sabin & Brewster.

Elnora, Ind. — R. McLoughlin, Hardware, store purchased by Newt. Miller.

Emington, Ill.—Corbitt & Skinner have dissolved partnership. Charles Skinner will continue the business.

Franklin, Va.—W. T. Pace has made extensive improvements to his store.

Gilroy, Cal.—John F. Kimball sold out.

Holland, Mich.—J. Nies will enlarge his store.

Leonore, Ill.—John Over has purchased the stock of Hardware formerly owned by J. L. Frangenberg.

Manistee, Mich.—Wm. Miller has purchased the building which he occupies.

Nauvoo, Ill.—J. F. Ochsner will erect a new agricultural implement building.

North Adams, Mich.—R. H. Jackson & Co.; stock purchased by C. Bleech.

Ogden, Utah. — The Miles, Strevell & Ulmer Hardware Co. recently filed some amendments to their articles of incorporation. The name of the company is specified as the Strevell Hardware Co., and the capital stock is placed at $50,000, at $100 per share. Ogden is to continue to be the principal place of business.

Orange City, Iowa.—Den Hartog & De Kraai; John Den Hartog gave bill of sale of half interest for $2000.

Peck, Mich.—J. T. Waterman is building new store.

Parkersburg, W. Va.—George W. Niswander, who for a number of years represented Greer & Laing, of Wheeling, at this point, and who has recently conducted the big Hardware store of the Niswander Hardware Co., has disposed of his interest to Messrs. C. H. Shattuck and J. M. Jackson, Jr., of Parkersburg.

South Bend, Ind.—The Economist Plow Co. has sold entire plant and business to the Syracuse Chilled Plow Co., of Syracuse, N. Y.

Utica, Ohio.—The D. A. Bricker Hardware stock and business is to be purchased by C. W. Jewell, and the transfer will be made as soon as an invoice can be taken. Mr. Jewell will remove the stock to his own quarters and consolidate it with his present store, and all the employees of both establishments will be retained for the present.

Waitsburg, Wash.—S. A. Ferguson, succeeded by Ferguson & Fender.

Walkerton, Ind.—Ross & Jarrell have sold out to Ross & Brady, who will continue the business.

Wilber, Neb.—F. J. Hayek, Hardware and agricultural implements, succeeded by Joseph Honzik.

Business Embarrassments

HARDWARE MANUFACTURERS' RECORD.

Hardware manufacturers, the country over are requested to contribute to this page. News of new factories or companies, changes, improvements, etc, will be gladly received, and promptly published.

New Companies, Etc.

Auburn, N.Y.—The Auburn Rex Wrench Co. has been incorporated to manufacture pipe and nut wrenches; capital stock, $5000. Directors: J. C. Schreck, F. A. Van De Water, C. I. Mam, and J. L. Eddy, Auburn; F. J. Jenny, Utica.

Buffalo, N. Y.—The Arnett Mfg. Co., has been incorporated by Silas H. Arnett, Hannah B. Arnett and Abram Bartholomew to manufacture all kinds of Hardware. Capital stock, $10,000.

Chattanooga, Tenn.—The Patten Mfg. Co. has been incorporated by Will R. Patten and G. E. Jamme, for the manufacture of cabinetware for plumbers and coffins. A $5000 plant will be equipped at once, which will employ forty men.

Evart, Mich.—J. Duesler has opened a new axe handle factory.

New York, N. Y.—A. G. Newman Co. has been incorporated to manufacture builders' Hardware and railway car fixtures; capital stock, $150,000. Directors: Charles Rhodes, of Passaic, N. J.; Augustus S. Newman, of Garrisons; William V. Newman, Robert Sparks, and Robinson Hopper, of New York City.

Improved Conditions.

Baltimore, Md.—Matthai, Ingram & Co. are building an extensive addition to their plant at corner of Light Street and Ohio Avenue. It is to be used for the manufacture of improved enamel ware, and for storage of surplus stock.

Detroit, Mich.—Prosperity has struck the Detroit Stove Works. They are now running both night and day for the first time in four years, and have more orders than they can take care of. The night force quit work at 5 A M. and the day force come on at 7. The company are mailing to their friends and customers large pasteboard cards, printed on one side a vivid red, with the picture of a Bengal tiger leaping about ten feet in the air, and the words, "You'd better hurry!"

Indianapolis, Ind. — The Indianapolis Stove Co., which purchased the buildings formerly occupied by the Indianapolis Cabinet Co., has about finished moving and will soon be ready for business at the new place. The plant is modern and thoroughly up-to-date, and has a capacity of about 500 stoves a week. The outlook for fall and winter business is good. About 125 men will be employed.

Lansing, Mich.—As an indication of increasing business, Molitor, North & Moyers, manufacturers of harrows, have been compelled to seek larger quarters, and this morning closed a deal for the large plant formerly occupied by the Michigan Stave & Barrel Co. They will take possession at once. The company was organized a year ago, and did a large business in the Central, Eastern and Middle States, but the volume of business this year increased over fourfold. It means another big manufacturing institution for Lansing.

Lynchburg, Va.—The Maryland Brass Mfg. Co., of Aberdeen, Md.; plant will be moved to Lynchburg, and put in operation in the next sixty days. Its name will be changed to the Lynchburg Brass Mfg. Co., with John S. Slaughter, president; William Hunt, vice-president; E. O. Bayles, secretary and treasurer, and E. S. Whiting, general manager. The company will manufacture all kinds of brass articles, but will devote particular attention to an electric push-button. Capital stock, $20,000.

New Albany, Ind.—The extensive stove foundry of Terstegge, Gohman & Co. is rushed with orders, and the firm has been forced to put a night force to work in order to fill their contracts. The work turned out by this mammoth industry now finds its way to all parts of the United States, and the finest and most satisfactory stoves of all descriptions are turned out by this New Albany enterprise.

North Tonawanda, N. Y.—After months of idleness, furnace B, of the Tonawanda Iron & Steel Works, has been relighted. This is the furnace lighted by President McKinley last November. It has been banked since May, but has been relighted now for good, as the officials of the company put it. About 150 extra men have gone to work, and this force will probably be increased. The big plant is to be run its full capacity to meet the demand for its iron.

Norwich, Conn.—The Richmond Stove Co. is to start up with a full force of men in all the departments. Several important changes have recently been made in the management of the plant. John Mitchell has retired as president, and W. C. Higgins, secretary and treasurer, has resigned on account of ill health. W. S. McMullen, formerly of St. Louis, has been elected to the presidency, and will assume personal management of the concern. T. Guy Hayward has been appointed secretary, and will have charge of the selling of goods. The board of directors includes John Mitchell, H. H. Osgood, Charles Bard, William N. Blackstone, Albert H. Chase, W. C. Higgins and W. H. McMullin.

Scranton, Pa.—The Scranton Axle Works. Capacity of plant has been greatly increased.

Torrington, Conn.—The local manufacturing concerns are showing signs of industrial activity. The Excelsior Needle Co., which has been running on reduced time for some months, is now on full time, and there is general rejoicing among the mill hands. The Coe Brass Mfg. Co. has found it necessary to run nights in order to keep pace with its work, while the Eagle Bicycle Mfg. Co. is running six days a week and orders indicate that this will continue for some time.

Toronto, Ont.—Berlin Brush Co., an institution that was revived a few months ago, now employs 30 men, and finds the demand growing so rapidly that working overtime is looked for very soon.

Recent Embarrassments.

Middletown, Conn.—The A. D. Williams Co., manufacturers of ice cream freezers, have made an assignment to John Winslow, of Bristol.

Recent Fires.

Centralia, Ill.—The agricultural implement and grain warehouse buildings belonging to J. W. Tate have been destroyed by fire. All the contents, including grain, implements and farm machinery, were lost. The fire is believed by nearly all to be the work of an incendiary, as the fire evidently originated from the inside, discovery being made only as the flames burst through the roof.

Rochester, N. H.—The Rochester Foundry & Machine Co. have suffered by fire. This is one of the worst places for a fire in the whole city, the foundry being placed in behind the large Hardware store of Ira B. Moore and the furniture building of Henry Evans. The fireproof roof, however, prevented the spread of the fire, despite the fact that it was a very windy night, and the department soon had it under control. The loss was in the vicinity of $1000, and the insurance amounted only to $600.

Stockton, Cal.—One of our most valuable manufacturing plants was destroyed by fire, when the Stockton Combined Harvester Works were burned. It is a loss of $100,000, on which there was insurance to the amount of $60,000, but the foundry and pattern shop, included in the insurance for $8200, was not burned. It is estimated that the insurance will pay 60 per cent. of the loss of the company. The works were built in 1883, by a company headed by the late L. U. Shippee, and three years ago the company went into liquidation and the valuable plant, filled with costly machinery, was sold to the present owner, a local corporation, for $100,000. This company paid about $25,000 on the purchase price, and are the heaviest losers, for the principal owners are sureties for the purchase money, and must pocket their loss. The owners are R. C. Sargent, B. F. Langford, W. A. Shippee, S. D. Woods and Colonel H. C. Shaw.

Toronto, Can.—A spark from the burning lumber piles at the Central Prison fired the offices of the Graham Nail Works, which are in a two-story frame building just across the railway tracks to the northwest of the burning lumber piles. The office building, which is 50 feet long and 20 feet wide, was, fortunately, separate from the main works. In the end next the works were stored several barrels of machine and coal oil, spare pulleys and machinery, and a quantity of nails. The building was almost completely gutted, and the material destroyed.

BICYCLE TRADE RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Companies, Agencies, Etc.

Austin, Tex.—Corner's Book Store has added a stock of bicycles.

Bellflower, Ill —Johnson & Price, Hardware, bicycles, etc.; new firm commenced business consisting of J. D. Price and Samuel Johnson.

Camden, N. J. — Articles of incorporation were filed recently in the Camden County Clerk's office by the Hardware Mfg. & Export Co., to manufacture a general line of Hardware and bicycles. The capital stock of the company is $25,000; the amount paid in is $1000. The corporators are Ralph Campbell, of Philadelphia; Frederick W. Hotchkiss, of New York, and George E. Campbell, of Camden.

Derby, Conn.—The Griggs-Seabury Gun & Ammunition Co. will establish a large plant here, to employ between 300 and 400 hands.

Florida, N. Y.—Crawford Bros., Hardware, will take up bicycles. They have recently enlarged their place of business.

Massillon, Ohio.—John Gow & Co., bicycles, opened new store at No. 81 Main Street.

New York, N. Y.—The Ion Specialty Co. has been incorporated to deal in bicycles, vehicles, engines, motors, electrical devices, etc. Capital, $100,000, and directors, Thomas W. Horn, of Toronto, Can.; Edward H. Power and Edwin J. Johnson, of New York City; David S. Ferris, of New Orleans, and D. W. E. Burke, of Brooklyn.

New York, N. Y.—The Universal Trading Co., incorporated by G. W. Monro, J. E. Fuller and S. S. Sugar to manufacture bicycle devices, mechanical and electrical apparatus, etc. Capital stock, $30,000.

Winder, Ga.—Dabney Hardware Co. will add a line of bicycles, and are inviting propositions from manufacturers.

Changes and Improvements.

Alexandria, La.—Roberts Bros., Hardware, bicycles, etc., new firm composed of C. E. and G. A. Roberts. Propositions from bicycle manufacturers are solicited.

Bridgeport, Conn. — Ellison & Middlebrook, bicycles, reported out of business.

Bridgeport, Conn.—The stock and plant of the Liberty Cycle Co. was sold at public auction recently. Allen W. Paige, of the firm of Paige & Carroll, purchased the place. The sale was, of course, subject to the mortgages. These amount to $15,000, with interest to the amount of $450. The mortgages are held by Paige & Carroll. The price paid was only $700. The bidding was not heavy, but it was lively while it lasted. The first bid made by Mr. Paige was $25. From this it was pushed up the scale by others until at the 26th bid Mr. Paige signified his willingness to give $700. None of the others bid higher and Patrick Coughlin, who was auctioneer, knocked it down to the $700 man. Mr. Paige was not prepared to say just what disposition of the property he intended to make.

Charleston, S. C.—Baird Bros., bicycles, No. 422 King Street, closing out entire stock of wheels.

Faribault, Minn. — E. A. Bradenburg has purchased half interest in the Hardware business of J. C. N. Cottrell and will add bicycles. The style of the new firm will be Cottrell & Bradenburg.

Louisville, Ky.—G. M. Allison & Co., typewriting machines and bicycles, have been succeeded by P. E. Allison, the firm continuing under the same style.

Newport News, Va.—Holt & Watkins, bicycles, etc., have been succeeded by W. H. K. Holt.

Orange City, Iowa.—H. S. Marvin, Hardware, etc., has succeeded M. E. Lewis, and will add a bicycle department.

Peoria, Ill.—The Rouse, Hazard Co. bicycle factory at Peoria Heights, will not shut down this season. They have had a most successful year's business and have very little stock on hand. They are compelled to remain in operation to fill incoming orders and are already preparing for the next season's work, which is expected to be the most successful in the history of bicycle manufacture. A large force of men is already engaged in the manufacture of the tools necessary. These must be ready before the manufacture of the new wheels can be undertaken. The force of toolmakers is being steadily increased and already about one hundred men are employed in the factory. This number will be continually increased until the factory is in full operation.

Rochester, N. Y.—H. S. Searle, manufacturer of bicycles, reported to have been succeeded by Chainless Cycle Mfg. Co.

Stoutland Mo.—G. C. Fuller, sporting goods, sold out to L. S. Palmer.

Tampa, Fla.—Knight & Wall, sporting goods, etc., has been incorporated, and will be known as the Knight & Wall Co. Besides M. L. Knight, the members of the corporation are C. L. Knight, Percy G. Wall, Jr., E. Edgar Wall and S. I. Craft.

Toledo, Ohio.—J. M. Murphy, formerly manager for the Arlington U. Betts Co., has purchased the controlling interest in the wholesale business of the Nelson-Hubbell Bicycle Supply Co., and will at once assume the active management. The deal has been closed, and while no figures are given out, it is learned from outside sources that the stock, fixtures and good-will amounted to $8500.

Torrington, Conn.—The Eagle Bicycle Mfg. Co., whose articles of incorporation only permit them to make bicycles, are taking steps to increase their line, and have applied for an amendment which will give them power to manufacture motor cycles, horseless carriages, horse nails and other lines. The firm have put in the foundations for a large storehouse, to be 150 by 40 feet, four stories high.

Tuscola, Ill.—Bagley Bros., Hardware, removed into larger quarters on Central Avenue, and will add bicycles.

Washington, D. C.—Arlington Cycle Co. has been sold out.

Washington, D. C.—The Carpenter Cycle Co. has succeeded W. Roy Mitchell, at the corner of New York Avenue and 14th Street.

Worcester, Mass.—The Trinity Cycle Co. will remove to Keene, N. H., early in October.

Recent Embarrassments.

Ansonia, Conn. — Royal E. Holbrook, dealer in bicycles, reported attached and made an assignment.

Chicago, Ill.—Davidson Cycle Co., factory closed by mortgagee.

East Brookfield, Mass.—Brookfield Cycle Co. recently assigned. Apparatus of the concern being sold.

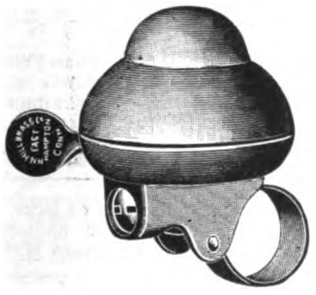
Montreal, Can.—Robert J. Latimer, manufacturer and wholesale dealer in carriages, bicycles, sleighs, etc., No. 592 St. Paul Street, has consented to assign, and a demand of assignment has been made upon the Latimer Carriage Co. Mr. R. J. Latimer, who has been in business upwards of twenty-seven years, can attribute his present misfortune at least indirectly to the People's Bank failure. When the crash came, Mr. Latimer had a large line of discount with that institution, and it became necessary to contract his then expanded business. This led to difficulties which have culminated in his consenting to assign. The Latimer Carriage & Implement Co. was incorporated last month with a capital of $40,000. This company was formed by Mr. Latimer and some gentlemen representing his creditors. The liabilities, it is said, will reach $100,000.

Montreal, Can.—The Thomas E. Howard Co., bicycles, etc., insolvent.

Philadelphia, Pa.—The Columbia Tube Co. has made an assignment for the benefit of creditors to Wilson L. Smith.

Pittsburg, Pa. — The Duquesne Tube Works were placed in the hands of Edwin W. Ohl, as receiver.

Springfield, Ill.—Hendee & Nelson Mfg. Co., Wm. C. Brown, vice-president of the Cycle & Tool Mfg. Co., of this city, appointed assignee and ordered to furnish bonds for $7000.



Trenton, N. J.—J. Denver Davies, the bicycle dealer, of No. 14 East Hanover Street, made an assignment recently for the benefit of his creditors, to Joseph A. Herron. His assets are given at $2375, and his unsecured liabilities at $1613.75. The cause of the failure is said to be insufficient business.

Worcester, Mass.—Lincoln Holland, bicycles, reported to have filed petition in bankruptcy.

PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

CRONK'S

Combination Fencing Plier.

This newly invented fencing tool is needed by all people that build or have occasion to remove or repair wire fence, as it is made with two staple pullers, two hammers and two button cutters. They are the same heft as the 1½ Maydole Hammer, and they are made of forged tool steel. No good farmer will be without one. They are warranted to cut No. 8 hard or No. 6 soft wire. Like the celebrated Cronk Plier they are fully warranted in all respects. No. 12, 11 in. long, $12.00. Dis. . . .

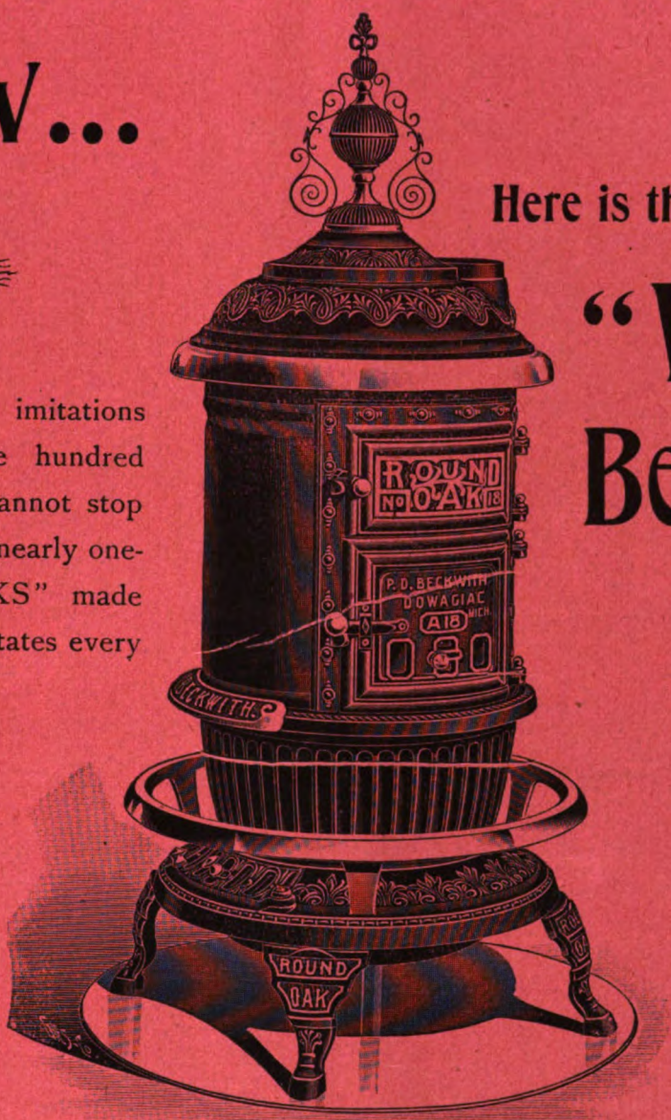
Every dealer has been advised many times this year to "Hold on. Don't place orders for Oaks."



Another "World Beater" is being evolved. Same old "chestnut."

NOW...

Here is the

"World Beater."

Four hundred imitations (and nearly one hundred manufacturers) cannot stop us from selling nearly one-third the "OAKS" made in the United States every year.

It has beat them all.

It does just as represented.

"A Good Medium for Advertising."

Edw. K. Tryon, Jr., & Co., Philadelphia, Pa. [*Bicycles, Fire Arms, Sporting Goods*]: We consider the Hardware dealers as the legitimate and best class of trade to handle bicycles, and as HARDWARE reaches a great number of them we consider it a good medium for advertising this line. We think that sooner or later the bicycle business will be done almost exclusively through the Hardware trade, and in order to keep our line continually before them we shall continue to advertise in your columns.

A GOOD THING.

IT'S IN THE TEETH.

The Patent "REFORM" Curry Comb is composed of three shallow, oval trays, with corrugated edges. The parts are struck up from a fine grade of cold rolled steel, heavily tinned and bronze lacquered, firmly riveted together and warranted not to rust. The outer dimensions are 6½x4¼ inches and by reason of the large cleaning surface and peculiar arrangement of teeth, the comb will do its work with a large saving of time and labor, cleaning with equal thoroughness both long and short coats. There are no places to accumulate hair and it will not tear or injure the brush, the comb being quickly freed from accumulation by giving its face a gentle tap.

JAMES H. KENNEDY, Editor and Manager.
HENRY HOPKINS, - - Associate Editor.
FRANK REIFSNIDER, - Western Manager.

The Circulation of "Hardware" is Larger Than That of Any Other Paper in the United States Devoted to the Hardware Trade.

Editorial Trade Review.

There is a noticeable diminution in the orders for regular standard goods now experienced by the trade, the demand largely becoming of a nature to cover articles considered desirable for holiday business, and approaching more closely household supplies of the useful and ornamental varieties, rather than those recommended for their labor-saving devices. Still, among the manufacturers many are engaged in filling orders made possible by a foreign demand, which is keeping up remarkably well in many lines where our superior skill and acknowledged inventive ability are afforded full scope.

The points in the Southern country affected by yellow fever conditions which seriously impeded a fullness of trade demands, have been benefited by good frosts, making quarantine restrictions less obligatory, and in a measure restoring the demand for such staple lines of merchandise, requisitions for which had been for months necessarily limited. A resumption of traffic and early revival of favorable trade conditions may now be anticipated, with which to initiate the anticipated improvement in business for 1898.

Up to the present time manufacturers and jobbers report better orders from the West than any other section, as the prevalent rains have been followed by cooler weather, thus greatly stimulating local sales. In regard to prices: while the indications point to a reconstruction of a number of quotations before business receives its proper impetus for another season, the present finds no radical advances to prove a deterrent influence on current orders.

Raw material in many instances is well ordered ahead of ordinary requirements, even beyond the needs of the current year; this of itself has a natural tendency to restrict unwholesome competition and strengthens the market in view of future transactions.

Our manufacturing facilities are of such importance it requires but slight stimulation afforded by prospects of future requirements to injudiciously push them to the utmost and stagnate by overproduction the important field of domestic demand. Everything seems favorable for 1898, and preparations are being made by many large establishments, as will be noticed in the "improved conditions" of our "Manufacturers Record" in every issue to be in position to take advantage of the genuine and far-reaching revival of our industrial strength and manufacturing importance, which will equal in the year to come, the agricultural prosperity which forms the happy conditions of the present.

The Bicycle Trade of the Future.

The bicycle business of the country has evidently reached bed rock, and in the calculations for the future now palpably before the large manufacturers, there are fewer elements of uncertainty as to a profitable outcome than for the two seasons just past.

The desire among the manufacturers capable of turning out a large product will be to keep the trade of the country within their reach, no matter whether it runs on a basis of low-priced product of larger volume, or is required to sustain a reputation for superiority already established. They want, and are willing to take, what they can get of it, and with the unequalled facilities which mark the opening of the 1898 season, they will leave the smaller makers steering between Scylla and Charybdis, between the vale of bankruptcy or a scale of profit anything but self-supporting.

The few factories which still entertain the belief in a growing export trade for American cycles, will be those possessing the power to turn out a surplus beyond domestic requirements; with them the foreign market furnishes an outlet for any excess that might otherwise create a glut of wheels and repeat the experience of 1896. With foreign depots, even if but little profit is shown in direct traffic, the knowledge that prices abroad have no material effect on the prosperity of the cycle trade here, will create the desire to keep up a connection that may possibly prove a safety-valve governing the business success of the manufacturers participating in the export business.

The havoc that has been made among the smaller makers, who in one way and another have made the present season unprofitable, will have the effect of destroying the inordinate desire to embark in the cycle business in competition with years of experience and limitless resources, thus leaving the past masters of the industry in control of the situation. They will so use it as to make the season of 1898 level up the output to an intelligent standard of values, encouraging no extravagant expenses to market the product, and entertaining no inflated ideas regarding a fair profit.

This will doubtless have the effect of making the coming season one long to be remembered for its freedom from retrograding influences. Products will be sustained by the leading companies, and not largely exceeded. Some forms of high-flown, expensive exploiting, such as unlimited cycle shows, and thousands of dollars daily spent in unconvincing cycle races, will no doubt be restricted, and a healthier state of affairs result therefrom, settling down to a legitimate business linked with efforts to market the product, which while pushing and persistent, will still be dignified and prosperous.

Digitized by Google

Our Export Prosperity.

Never before in the history of our export trade, has the future presented such features of encouragement to our producers of iron and steel and manufacturers of improved tools and machinery. Statistics of the most encouraging character greet us upon every hand, and a growing demand for our productions of skill in iron and steel and other metals, make possible a continuance of very prosperous conditions of trade.

The future will present claims for continued activity on export lines which have never previously been seriously entertained. Already have our rapidly-increasing exports of iron and steel—even tin is among the possibilities—so convinced the arrogant British competitors that our popular ascendancy over industries arbitrarily deemed their own, need no longer be deemed either illusive or visionary in character. We have at last compelled this most combative of contestants to regard us as aggressive competitors in any field of industry requiring superior skill, economy of construction, and a date of delivery that may be calculated upon as being definite. Nothing, except it be high tariffs or obstructive restrictions, imitating methods of our own, can keep us out of those markets of the world that already possess the knowledge of our productive supremacy.

Give us to know the needs of a foreign constituency, and at once we become a formidable bidder although our average rate of wages is admittedly higher by comparison than any country which is our natural competitor. It will at once be made evident that the directness of American methods, the conscientious devotion to an employer's interests, the intelligent and undeviating skill of our workmen, who are always keenly alive to any possible improvement by which labor may be saved or product made more perfect, are points of superiority in our artisans that have made possible this unprecedented expansion of our foreign trade.

Let it be fully understood this state of affairs has not come to us unsought, but is the result of a commercial development through persistent and sustained endeavors, following a period of depression that made every effort necessary, and the knowledge of a possible recurrence in some uncertain future will inspire us to hold and keep advantages we have earned so successfully.

The Seymour Cutlery Co., Holyoke, Mass., successors to the Henry Seymour Cutlery Co., manufacturers of shears, scissors and sheep shears, announce in their card elsewhere in this number, that they will give an elegant display show case to their customers, the same measuring 3 feet by 22 inches. The case has antique oak trimmings, curved plate glass around the display shelf, and receptacle for stock. Further particulars in regard to this generous offer can be obtained by writing to this company at the address above given.

A writer in *Hardware* declares that "advertising is a commodity—as much so as dry goods, shoes or flour." "Yet there is a difference," remarks the *Philadelphia Record*. "When a man buys dry goods, shoes or flour, he usually wants such commodities in limited quantities. When he wants publicity he wants a first-rate article, and he wants it by wholesale. Half the success of business nowadays is in knowing how these wants may be most fully satisfied."—*Pottsville (Pa.) Chronicle.*

National Hardware Association.

The fourth annual convention of the National Hardware Association will be held in Buffalo, N. Y., from November 17th to the 20th, both inclusive. It is hardly necessary to say that arrangements are being made for the hospitable entertainment of a large number of members who will be present on this occasion. The local arrangements are in the hands of a committee consisting of Hobart Weed, of Buffalo, chairman; Gen. C. Whitney Tillinghast, Troy; Charles H. Turner, Albany; G. D. Palmer, Rochester; Harry Walbridge, Buffalo; John R. Griffith, Philadelphia; George J. Laighton, New York. The programme will include a smoker at the Ellicott Club, and a dinner at the headquarters in the Hotel Iroquois.

The annual convention of the Equity Protective Stove Association of the United States was held at the Troy House, Troy, N. Y., some days since. Prominent stove manufacturers from all parts of the country were present. Various matters of interest to the stove trade were discussed. It was announced that the stove manufacturers had decided not to put up the price of stoves, and that the condition of the stove trade was generally satisfactory. The annual election resulted in Charles A. McLeod, of Troy, being chosen president. E. T. Anthony, of Boston, was elected secretary and treasurer.

The monthly meeting of the New England Hardware Dealers' Association will be held at the United States Hotel, Boston, on Wednesday, November 10th, at 6:30 P.M. The special guest and speaker of the occasion will be Pierre Humbert, who will speak upon "The Development of the Klondike Gold Region." The entertainment committee upon this occasion are George W. Burditt, Charles O. Tukey, James W. Eustis.

The officers of the Heavy Hardware Jobbers' National Union for the ensuing year, are as follows:

President, W. B. Dean, St. Paul.
First vice-president, Robert Donahue, Burlington.
Second vice president, Gaius Paddock, St. Louis.
Third vice-president, F. K. Maus, Chicago.
Secretary and treasurer, W. C. Brown.

Cleveland Machine Screw Co.

Some recent changes that have occurred in the manufacturing circles of Cleveland, Ohio, cannot fail to be of interest to the Hardware trade in general. They relate to the advance step taken recently by the Cleveland Machine Screw Co., a concern that was established six years ago, and that has steadily prospered and progressed from that time to the present, until to-day it has correspondence with all sections of the globe, and is probably the largest producer of steel balls for ball-bearing bicycles and other machinery, in the world.

A short time ago some of the original stockholders, who desired to retire from the active management of the business, disposed of their interests to a syndicate of French capitalists, who had watched the growth of the enterprise, and were desirous of securing a part thereof. With this addition of strength, it was decided to reorganize the company, and enlarge its possibilities. Its capitalization was therefore increased, and at present it stands at $3,000,000.

In the past, the principal business of the Cleveland Machine Screw Co. was the manufacturing of steel balls for ball-bearing bicycles, but recently the business was increased, so that the company are now manufacturing balls for large machinery. The screw machines which they have been constructing, and on which they have exclusive patents, have been shipped to all parts of the world. For several years the plant ran night and day to its full capacity, but during the past year it has made so many improvements to its machinery, and so enlarged its facilities, that the output now in ten hours is equal to what it formerly was in twenty-four hours. Every department of the original factory is running to its full capacity, and the A. L. Moore factory, or stamping department, is being operated night and day to keep up with the orders.

The French syndicate is represented in the company by M. B. Johnson, who is chairman of the board of directors. A. L. Moore, formerly of the A. L. Moore Co., is now president and general manager of the Cleveland Machine Screw Co., the name of which was not changed by the reorganization and the bringing in of this foreign capital. It is not too much to say that no man in the country is better or more favorably known to the cycle trade than Mr. Moore.

The A. L. Moore Co. was organized in 1895 to sell bicycle material and supplies. The phenomenal growth of this concern, and the magnitude of the business they succeeded in obtaining, by their modern business methods, keen foresight and unwearied enterprise, led them to complete the stamping works, of which A. L. Moore is president, and of which notice has already been made in *Hardware*. The capacity of the plant was doubled last year, and new additions in the shape of elegant buildings for a second doubling of the product, are now under way. The A. L. Moore Co. will continue as sales agents for the products of the combined forces. That the success of the past will be continued and greatly increased in the future, is made sure by the fact not only that Mr. Moore is the executive head, but from the fact also that he is associated with men who have so far successfully performed their share of the labors of life, and who with renewed experience and larger opportunities, are certain to do more effective work in the future.

At the late annual meeting of the Cleveland Machine Screw Co. the following officers were elected: A.L. Moore, president; M. B. Johnson, vice-president and chairman of the board of directors; J. B. Climo, secretary and treasurer; J. B. Clyne, superintendent, and J. J. Grant, mechanical engineer. The board of directors consists of the following gentlemen: J. B. Climo, J. B. Clyne, M. B. Johnson, A. L. Garford, P. H. Jordan, H. H. Johnson and A. L. Moore.

Mr. Climo, who has been with the Cleveland Machine Screw Co. since its organization, remains, as will be seen by the above, secretary and treasurer of the new concern. Mr. Clyne is an authority on mechanical matters, both at home and abroad, and is an expert on the subject of ball-bearings and similar manufactures. Mr. Grant, who has just returned from Europe, who occupies the position of mechanical engineer, is an expert in his line, and is the inventor of the automatic screw machine which has made this company famous throughout the world. Mr. Jordan, who is also a member of the new board of directors, is also connected with the A. L. Moore Co. The board also includes A. L. Garford, who is famous in the trade as president of three leading saddle manufacturing concerns, two national banks, and last, but not least, president of the National Board of Trade of Cycle Manufacturers.

In speaking of the recent additions to the establishment in the line of new buildings, etc., President Moore says: "We simply had to build, or take our men off the road and stop taking orders."

As soon as the annual meeting of the stockholders above mentioned had occurred, orders were immediately telegraphed to several Eastern concerns for a large supply of new presses and other machines. On the morning following, a contract was signed for a building, the exact duplicate of the one then in operation, and ground was broken on the same afternoon. At the present time a large force of men are at work on the foundations, and according to the terms of the contract, the completed building must be ready by December 1st, which will require work both by day and by night. Mr. Moore states that parts for half a million bicycles will be turned out by the factory before the end of the season.

Tasted Leather and Iron.

"Talking about a fine and discriminating taste for whiskey," said the old gentleman over in the corner of the store, "recalls to my mind an incident that occurred up in the Catskills last summer. A friend of mine was entertaining a number of gentlemen who prided themselves upon their keen sense of taste in the whiskey line, and subsequent events showed that they were justified in their boast. The host had just received a keg of the finest Kentucky whiskey to be found, and opened it with anticipations of pleased commendation from his friends. One of them drained his glass, smacked his lips, and said critically: 'That's mighty good whiskey, but I can't understand the taste of iron that goes with it.' The other one said: 'Yes, I noticed that, and also detected a slight taste of leather.' The host was quite chagrined, and when his friends had departed, determined to investigate. He emptied the keg, and there in the bottom found a small leather-covered carpet tack."

From present indications, Manager Frank W. Sanger, of the Fourth Annual Sportsmen's Exposition, to be held January 13th–22nd, at the Madison Square Garden, New York, will have no trouble in making a selection of the most desirable exhibitors from too large an array of applicants to be accommodated. Every exhibitor, so far as heard from, who has shown in the three previous Sportsmen's Shows at the Garden, has been well satisfied with the results to business, and is anxious to come in again. The management promises numberless up-to-date novelties in all manner of sporting goods and equipments. There will, in all likelihood, be rifle and revolver contests, fly casting contests; in fact, there will not be one moment while the show is in progress without action of some kind.

Mrs Nexdoor—I haven't seen your parents for ever so long.

Little Fannie—Mamma has got scarlet fever and cannot come out.

Mrs. Nexdoor—And what has your papa got?

Little Fannie—He's got six months, and he can't come out either.—*London Fun.*

Talk About Alaska.

Alaska is two and one-half times as large as Texas.

It is eight times as large as all of New England.

It is as large as the South, excluding Texas.

It is as large as all of the States east of the Mississippi and north of the Ohio, including Virginia and West Virginia.

It makes San Francisco east of our centre.

Its coast line is 26,000 miles.

It has the highest mountain in North America.

It has the only forest-covered glacier in the world.

It has the best yellow cedar in the world.

It has the greatest seal fisheries.

It has the greatest salmon fisheries.

It has cod banks that beat Newfoundland.

It has the largest river in the world.

A man standing on a bank of the Yukon, 150 miles from its mouth, cannot see the other bank.

The Yukon is twenty miles wide 700 miles from its mouth. With its tributaries it is navigable 2500 miles. It discharges one-third more water than the Mississippi. The water is fresh fifteen miles from its mouth. It has more gold in its basin than any other river.

Yukon basin gold is estimated at $5,000,000,000.

Silk should be worn next to the body, then woolen, and then furs.

Citric Acid should be taken to prevent scurvy.

Snow glasses should not be forgotten.

Nowhere are mosquitoes so numerous.

There are two kinds of poisonous flies.

There are no snakes in Alaska.

Moose are plentiful. The flesh resembles horse flesh.

It is probable that in twelve months Dawson will be within four days of Juneau. In Central and Northern Alaska the ground is frozen to a depth of 200 feet.

Snowfall in the interior is very light—six inches or so.

The heaviest rain and snow are on the southeast coast.

No land contains finer spruce timber.

In its low temperatures gold filling in teeth contracts and falls out. Use amalgam.

Men born in southern latitudes have become insane in the long dark.

Take a chessboard and men. They prevent dementia.

A temperature of 75 degrees below zero has been recorded.

When it gets lower than 50 there is no wind.

A tent is as good as a house, and is cheaper.

No shelter is needed except when the wind blows. At other times a sleeping bag answers all purposes.

Just below rapids ice forms only nine feet thick, and there fishing is done. In other places it will reach forty feet.

In the dark season twilight lasts six hours and almost any kind of work can be done.

Elk, cariboo and grouse are common, and easily killed.

Don't eat snow or ice. Melt them. Else quinsy.

In low temperature the inside of the throat sometimes freezes. This is locally called "frost burning."

For frozen fingers use cold water.

Sweat under blankets in summer or get rheumatism.

In Summer all land not mountain is swamp.

Talk on the ice pack is heard a half mile.

An expert placer miner can pan dry.

Alaskan "dust" is as big as wheat.

Some gold is fine enough to float.

Wear silk gloves and then fur.

Reindeer will be the future locomotives.

Alaskan dogs are wonderfully intelligent—the result of selection and heredity.

The natives are all honest.

Hay grows as high as a man's head.

Hardy vegetables can be raised.

All streams show true gold fissures.

Take plenty of flour. Buy all you think you need, then buy more. Last winter a man killed himself because he had five pounds of baking powder and no flour.

Under act of Congress communities of miners can make their own laws.

No thief gets a fairer trial anywhere nor any prompter execution.

Make caches on platforms six feet high. Wolves.

It will pay to wait a year or two. It costs $1000 now and will cost $200 then.

All distances are gigantic. It is 2000 miles from Sitka to Klondike.

All wood in the Aleutian Islands grew on glaciers in Alaska.

Whole forests break into the sea

Some streams are bridged by glaciers.

Some wood is beautifully polished by glacier action.

Avalanches in the interior are unknown.

Owing to dryness there is not much suffering from the cold.

Take a 40 80 rifle, with telescope sights.

One small tribe makes $2500 a year from silver fox skins. They are worth $250 each.

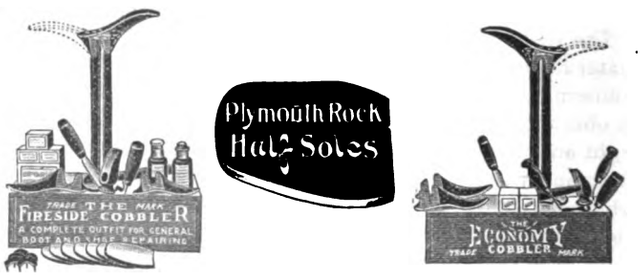
Exposed portions of the body freeze in three minutes.

Enough library: One Bible, one Shakespeare.

Snowshoes not needed in the mine country.

Buy mines from discouraged miners.

Trading companies will not carry goods for competitors.



Next year competition will bring down their prices 50 per cent.

Meals on the boat up the river cost $1 each.

Men who have gone this winter to make their living sawing wood will not have time to say much.—*Chicago Times-Herald.*

Iron Lasts and Home Repairing Outfits.

The Root Bros. Co., Plymouth, Ohio, manufacturers of Buckeye iron lasts and stands, cobblers' sets and Plymouth Rock halfsoles, are having a tremendous sale in this line of goods. Their fall business usually does not open up before

October 1st, but this year orders began piling in as early as the first of August, and they are now obliged to run both night and day to keep up with the demand. We illustrate herewith their "Fireside" and "Economy" cobblers, which are great and popular sellers, and "Plymouth Rock" halfsoles, which are well known to the trade. In addition to these two outfits, they make a full line of cobblers' sets, their "Buckeye" lasts and stands being used in all. They are staple sellers with the trade, and are for sale by all up-to-date Hardware dealers. Circulars and prices may be had by addressing the manufacturers.

The Collins Co., of Collinsville, Conn., in order to better their facilities and to meet the demands of their increasing business, are making extensive improvements in their plant at Collinsville, and have placed the contract with the Berlin Iron Bridge Co., East Berlin, Conn., for a large addition to their forge shop. The new construction will be entirely of iron, in order to have it fireproof, no woodwork being used in the construction.

The Requirements of a Good Salesman.

The following very entertaining points are from a speech delivered by J. R. Prescott, of the Anthony & Cowell Co., Providence, R. I., at a recent meeting of the New England Hardware Association, in Boston. Mr. Prescott is thoroughly competent to speak upon the subject of "What Constitutes a Good Salesman":

The speaker first touched upon the employer's responsibility in the development of the salesman, the employer being largely responsible for the quality of the salesmanship of the present time. A first-class salesman presupposes a first-class house. The employer should furnish the proper environment for the best development of the prospective salesman. Where there is feebleness in the selling force, there is generally some antecedent feebleness in the store management, which reacts on the clerks.

The store is practically a commercial school, where the boy or young man gets his sole knowledge of business. The employer should never forget that he is first of all a teacher and an example. In the school or college the teacher counts for more than the system. The most successful of these institutions have been those whose teachers have been men of strong personality, who have influenced pupils by the force of personal contact. The same is true in the commercial schooling a boy gets in a business house. It's the strong personality and inspiration of some employer that influences the career of the boy, and furnishes him with a stimulus and an ideal. The employer cannot escape this great responsibility of example, and the speaker considered this the first and most important requisite in the training of a salesman.

It is for the interest of the employer to make thorough business men out of his clerks. They are likely to be his competitors some day, and the better training they get in his store the better competitors they will be. The worst competition comes from men who have had a superficial training, whose employers have failed to impart sound business principles and methods. It's the competition of the unintelligent dealer that hurts.

Referring to the responsibilities of the salesman, the speaker emphasized most of all thoroughness. This means a thorough knowledge of the goods, their construction and uses. The man who knows how an article is made, why it is so made and how it should be used, can talk about it interestingly and convincingly; without this preliminary knowledge, he can only show the goods in a slip-shod way, and rely upon the inspiration of the moment for something to say about them. The best inspiration comes to the man who is prepared, and no great salesman or great business man was ever produced by any process except through a thorough, painstaking knowledge of details.

Knowledge of the goods leads to a knowledge of men, and knowledge of men enables the salesman to know what to say and what to leave unsaid, how much of the story the goods should tell, how much the salesman should tell. The whole selling process hinges on previously acquired knowledge of the article being sold, and the first duty of the salesman to himself and to his employer is to know all about what he is selling.

To get this knowledge the salesman must study as well as observe. Observation is good, but the progressive salesman will appreciate the advantages of special study. Business, like a profession, requires study, and the man who reaches the top of the ladder must apply himself.

The mastery of some department is important. Know that thoroughly, and be the one clerk in the store who is an authority on that department. The well-equipped salesman should learn to write advertisements. This will show him where his knowledge is weak, and he will strengthen himself accordingly. Writing about a thing makes that thing clearer.

In the "Good Old Times!"

Amid these hazy November days, the "Man in the Corner" at Bingham's, Cleveland, grows reminiscent, and discourses of things that are of the past. A package of old papers, in a faded yellow wrapper, and tied with a bit of tape, has fallen into his hands, and he naturally finds them interesting—old price lists with quaint, ornamented headings and heavy, ornate borders; Oliver Ames' first letter to the house—in '43—quoting a hundred dozen shovels at five per cent. discount in six months and an additional five per cent. for cash; a bill from Sidney Shepard, of Buffalo, for lead pipe furnished in exchange for pig lead, which was sold at a profit that nearly cut the price of the pipe in two; bills for cut nails at $5.25 for 4's to 20's, crowbars at 6½ cents and copper wire at 47 cents per pound; bills for manilla bed cords, snuffers, knitting pins, marbles and Jew's harps; bills of lading for shipments from Pittsburgh and Columbus by canal, the latter endorsed with the shippers' hope that the "goods will arrive in due time"; a letter from Atkins, Allen & Co., expostulating with William Bingham & Co. for wanting a better grade of saws than could be made from steel then in the country (they always were sticklers for quality), a quotation on box stoves in '43, payable April 1st, 1845; quotations of Collins' axes at $13.50 per dozen; bar iron at 4 cents for base sizes and sheet iron at 7¼ cents; a quotation on brass Hardware, evidently for a steamboat; a number of invoices for imported goods which are now never bought abroad, and priced in York shillings, etc., etc.

With these relics as a text Mr. Comstock recalls the fact that in 1841 it took from three to four months to get goods from the factories—thirty to sixty days of ocean transit, and an equal time from New York to Cleveland—by river to Albany, canal to Oswego and lake to Cleveland. Goods for Cincinnati took the same route and went by canal from Cleveland to Portsmouth, and thence by river. Land communication was by stage coach and prairie schooner, which wound their slow way among the stumps and in the ruts of the roads of a new country. Now, the factories are scattered over our own land, which the iron bands of the steam and electric roads cover like the meshes of a great seine, and the time of freight transit is reckoned in hours, with a minimum of six hours from Pittsburg, twenty-four from Chicago, thirty-six from St. Louis, forty-eight from New York, and an increase in time from smaller places according to distance and location.

That was the time of wild cat money, and a catch-as-catch-can banking system, when William Bingham & Co.'s collector must have an accurate knowledge of the responsibility of different banks, and when he found it difficult, if more than fifty miles from Cleveland, to get money that would pass at home; when the best of Ohio and Indiana bank bills were rated at one-half to one and a half per cent. discount, and Illinois at thirty to fifty per cent. off. Now, not one man in fifty knows or cares what bank issued the bills he has in his pocket, or ever has one refused in payment for indebtedness.

In the early forties postage on a letter varied from ten to twenty-five cents, and the recipient had it to pay. Now, Uncle Sam carries a missive of twice the weight for two cents, and an organized, concentrated row is being made because the deficit caused by the too low rate on periodicals prevents one cent postage on letters.

Who still longs for "the good old times"?

Mrs. Nughwed (to Hardware dealer)—"That stove I bought of you is no good; it eats up more coal than a locomotive, and gives out about as much heat as a parlor lamp; and you said it had no superior and was the best stove out."

Hardware dealer (suavely)—"Madam, I told you it had no superior for burning hard and soft coal."—*Exchange.*

The New York Credit Men.

At the October meeting, held in the rooms of the Arkwright Club on October 27th, the New York Credit Men's Association had a very successful session. There were over sixty-five members present. Mr. Kanzler, introduced by Mr. Messiter, president, read a report on the legislative and more especially on the workings of the investigating committee, and was listened to with the greatest attention. He was followed up by addresses by J. G. Cannon, the national president; F. R. Boocock, national secretary; H. Schieffelin Sayers, attorney for the committee; G. Waldo Smith, chairman of the Wholesale Grocers' Association; Vice-President Bates, of the Tradesmen's National Bank, and Messrs. Lundquist, Biggs, Hooper, Bannin and others.

This investigating committee is one that will make a vast difference in the counting rooms of the members of the Association, as the mode of procedure laid down will be most effective and promises to be carried out exceedingly stringent. The report was as follows:

Mr. Chairman and Members of the New York Credit Men's Association: In this State the bills introduced in the two Houses numbered 4533, of which 1300 were finally passed. Of these, 797 became laws; the remainder of the 1300 failed to receive the approval of the Governor. Notwithstanding the activity that now prevails in striving to supplement and amend old laws, and in devising and passing new ones, I have been from time to time debating with myself to solve a problem which has, beyond a doubt, also confronted you gentlemen, viz.:

"Why is it that the merchants do not protect their interests and their rights, and demand at the hands of the Legislature such laws to which they are justly entitled for the protection of their property?"

It is singular, nevertheless it remains a conspicuous fact, that statutes, and especially criminal laws, have been enacted in our State intended to punish fraudulent debtors, yet few benefits have flowed from their enforcement, and, in fact, few convictions can be pointed to.

It, therefore, devolves upon this and like Associations to insist upon having measures put upon the statute books that will call a halt on the unabated robberies that take place day after day, and also put within the reach of merchants satisfactory and sound laws which even "genius of counsel" cannot circumvent.

Your Association has been working diligently in this direction, and has within the past few weeks constituted a committee whose duty it will be to investigate and carefully scrutinize failures, to fasten upon some tangible evidence and proof in cases of criminally fraudulent failures. This evidence will be a support and a guidance to the district attorney for the people, in his effort to secure the indictment and prompt conviction of the perpretrators and of all guilty parties.

This committee, I assure you, will work sedulously and will shirk no duty; it will fathom the evidence and secure the most minute materials and relevant details, so that a case placed in its hands for examination will be pushed with such energy that the words Credit Men's Association will become a word of terror to the fraudulent debtor. Determined and unrelenting will be the action of this committee in the vigorous prosecution of every such fraudulent failure, and with the aid of complaining members success is assured.

I appeal to you gentlemen, individually, in the most emphatic sense to extend a helping hand to assist us in securing evidence that there be no escape of a dishonest debtor from the original meshes in any case brought before your committee for investigation.

Now, as to the legislative committee which has just begun its labor in the preparation of bills to cover the present loop-holes in the civil and criminal law. We are all familiar with the shrewd and unblushing methods that are adopted by a failing debtor, who, owing to the present statutes, successfully accomplished the evasion of payment of a just debt.

The work of this committee will be in a direction to give a creditor an immediate standing before the court and promptly check the gambling away of assets. The next Legislature will accordingly be urged to give us a remedy that will afford the creditor a prompt hearing before the forum, whether his claim is due or is not due, and whether it is or is not in judgment; so that in cases of assignment for the benefit of creditors (or other acts of insolvency), the creditor will be permitted immediately to assail any attempt at fraudulent dispositions of property or assets in utter disregard of other creditors; we propose thus to tie the hands of a debtor until the claim and rights of the merchant have been adjudicated.

It is not my purpose to burden you by outlining further the various matters which the legislative committee in the course of time will take up, but assurance can now be given that the time is not far off when the going out of business of the debtor in the "most convenient form" will be one of ancient history and be chronicled as a matter of the past.

Hugo Kanzler,
Chairman Legislative Committee and
Chairman Investigating Committee.

C. H. & E. S. Goldberg.

Among the many changes of location usually occurring at this season of the year, there are few which have so important a bearing upon the future usefulness and prosperity of their business, as that of C. H. & E. S. Goldberg, the leading jobbers in woodenware and the numerous specialties that have long been considered as analogous to that line of business, who have removed from the old stand at Nos. 326 to 330 Washington Street and Nos. 39 and 41 Jay Street, in which they commenced business in 1867, to the superbly located building so well adapted for their use, formerly occupied by the Thurber, Whyland Co., and their successors, the American Grocery Co., occupying the entire block on Reade Street, from Hudson Street to West Broadway.

In this six story building, with its basement and subbasement, the firm will possess about double the facilities they had in their old location, enabling them to ship goods even more promptly than ever before, and exhibit their large and varied assortment under the most advantageous circumstances.

The trade established by this enterprising and progressive house during the past thirty years extends to the leading dealers in Hardware and housefurnishing goods, groceries, and country stores, all over the United States. Their export department, which has grown greatly during the few years just past, has made trade connections in many foreign countries where our products are held in just esteem.

The business was originally established by George Goldberg, father of C. H. Goldberg, the present senior partner, the other member of the firm, E. S. Goldberg, being his cousin.

The line of goods handled by this firm covers almost everything in the line of housekeeping Hardware, woodenware, etc., covering cordage, baskets of all kinds, pails, tubs, refrigerators, floor and table oil cloths, etc. In brooms they handle, in their home and export trade, the entire products of several large factories. They are shrewd business men, with an honorable record of thirty years standing, and deserve the success to which this recent change of location cannot do otherwise than increase.

William Hogg, manufacturers' agent, No. 1345 Penn Avenue, Pittsburg:—Please find enclosed check for $1, for renewal. *Your paper is worth the whole dollar, and more.*

Holiday Prize Competition for Window Display.

Immediately after November 1st the Bissell Carpet Sweeper Co. made to the trade a very important announcement, which will doubtless be of interest to all dealers who pride themselves upon their attractive window displays for the Christmas season. Any dealer who is desirous of obtaining any one of these cash prizes will have an opportunity of accepting the offer, which is announced as follows:

"To dress a window attractively is the constant aim of every well conducted business. The Bissell Carpet Sweeper being one of the best known and best advertised household articles on the market, will, if properly displayed in your window during the holiday season, not only attract a great many people to your store, but also largely increase your sales on carpet sweepers. To stimulate an interest among our customers to make a better display of our goods, something that cannot fail to result to our mutual benefit, we have decided to offer prizes for the best window display of Bissell's Cyco Bearing Carpet Sweepers made during the holiday season of 1897. Awards to be made from photographs of the displays, same to be furnished by the dealers and sent to us not later than January 5, 1898. First prize, $40 cash; second prize, $30 cash; third prize, $25 cash; fourth prize, $20 cash; fifth prize, $15 cash; sixth prize, $10 cash; seventh prize, $5 cash; eighth prize, $5 cash.

"We will furnish gratis, if requested, on conditions named in accompanying letter, the necessary easels, display cards, etc., to aid you in making a fine window display; hence, we trust this proposition will appeal to you in the right way, and that you will see wherein you can be benefited by the effort in a general way outside of standing a good chance of securing a liberal cash prize. Prizes will be awarded by a competent committeee of three professional window drapers, and awards made as soon as possible after January 1, 1898. Illustrations of the successful displays wil be sent to all who enter the competition.

"CONDITIONS OF THE DISPLAY.

"First. Bissell's Cyco Bearing Carpet Sweepers *only* can be used in the display, it being permissable, however, to use such other accessories as may be required to produce the finest effect.

"Second. Display must be made between November 15 and January 1, '98, and remain in your window at least one week.

"Third. Photograph of display must be mailed to us so as to reach us not later than January 5, 1898.

Grand Rapids, Mich. "BISSELL CARPET SWEEPER CO."

Holmes & Edwards Silver Co.'s New Catalogue.

We have received from the Holmes & Edwards Silver Co., Bridgeport, Conn., their new catalogue No. 21, which they have ready for distribution to the trade, and which forms one of the handsomest catalogues covering this line of goods we have seen this season. It is an artistically printed volume of 126 pages, 9½x12 inches in size, printed on fine coated paper, and every pattern of goods made by the Holmes & Edwards Silver Co. is fully illustrated in the main by beautiful wood cuts, which show off to the best advantage the desirable features which have become so popular in the output of this company. Among the goods illustrated of each pattern, are such articles as oyster and pickle forks; jelly, pie and cake knives; orange and berry spoons; cream, gravy, oyster and soup ladles; fish knives and forks, asparagus tongs, egg spoons and cheese scoops, sugar sifters; pie, tomato and pea servers; crumb knives and salad forks and spoons. All of these new lines of goods are illustrated, in addition to the usual assortment of plated flat ware, which makes up a part of the stock of every first-class Hardware store in the country.

Among the latest and handsomest designs placed on the market by this progressive company, may be mentioned "The Marina." The beauty of this pleasing design makes it admirably fitted to be added to their "Sterling Silver Inlaid" quality of goods, which indisputably possess all the advantages and characteristics of the solid silver article at an extremely moderate price by comparison.

Sterling silver inlaid spoons and forks are sterling silver at the points exposed to wear. They are more durable than light solid silver, and are guaranteed for a term of twenty-five years. These spoons and forks are made of the best nickel silver, places are cut out at the points exposed to wear, which are filled with solid silver, then they are plated and finished, using five times as much silver as is used in standard market plate. By this process it is impossible for the spoons and forks to show any wear whatever.

This desirable line of goods deserves to be better known to the trade, possessing as it does patented features which enable the manufacturers to "guarantee this quality in ordinary family use, to wear twenty-five years, and in hotels from ten to fifteen years." They also agree to receive as half payment in exchange for new, such goods as show wear during the next five years after the term of guarantee, if otherwise in good order. This catalogue should be requested by all dealers in high grade goods in this important line.

A Little Yellow, But——

A town may be besieged by yellow fever, and yet the courage and good spirits of its business men may be kept at the top notch. All that is needed is a lively sense of humor, plenty of industry, and the ability to enjoy life as it passes along. A letter comes to us from New Orleans, La., perforated until it looks like a sieve, and showing that it has gone through a very systematic process of disinfection. This epistle is from William Kline, whose Boston Twentieth Century Store, at Nos. 537 and 539 Canal Street, commonly referred to as "the busiest store on the busiest street," is still wide open and running for all that it is worth. Mr. Kline seems to be in excellent spirits, for he writes us: "I am in the Hardware jobbing business simply to make money. Please remember that. It is a little yellow in this section at present, but—— Merrily yours." A man imbued with this spirit is certain to get business, and the yellow fever will have to move very rapidly if it gets hold of him.

A. M. Scheffey & Co., No. 92 Reade Street, New York city, as Eastern sales agents of the Geneva Cycle Co., announce that they will have two grades of bicycles only for 1898, samples of which are now being shown by their travelers. Their best wheel, called the Geneva, will list at $60, and be made with two-inch drop in crank hanger, and will include the Seymour patent two piece crank with tubular sleeve. Their second grade, called the Ohio, will list at $40, and will also have two-inch drop with crank hanger. The agents announce that this machine will be fully up-to-date in every particular, and that they expect an immense sale on the same. They cover seventeen states for the Geneva Cycle Co., and will have ten travelers on the road. They are now sending to the trade a neat book of testimonials, showing the favor with which their wheels have been received by the public. An advance catalogue is in course of preparation.

It is reported that the American Tinplate Co., of Elwood, Ind., have begun to ship tinplates to Europe on regular orders. The first lot consisted of a carload of 500 boxes, destined for Italy. A similar order is said to have since been filled for England, and it is stated that other shipments to foreign buyers may be expected to follow.

THE COLUMBIA CHAINLESS CYCLE.

In our issue of October 25th we made some extended reference to the new chainless cycle placed upon the market by the Pope Mfg. Co., Hartford, Conn., but were unable from want of space to illustrate the general features in full so as to make the description of its original points fully intelligible. As it is possible for the new mechanism in

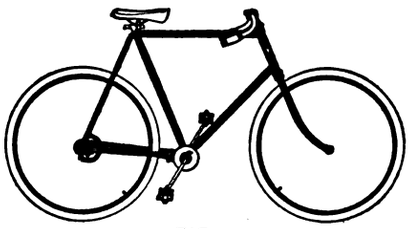

FIG. 1.

time to largely succeed older methods of cycle propulsion with advanced cyclists, we take pleasure in this issue of *Hardware*, in connection with the illustrations given herewith, to complete our notice. The improved general appearance of the Columbia Chainless as compared with the wheels requiring the old style sprocket and chain is noticeable in Fig. 1 and Fig. 2, which show the new models, presenting a much cleaner and trimmer appearance; and as there is a growing belief that the new gear will be found to im-

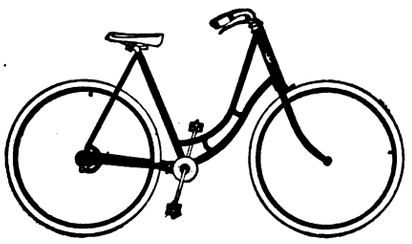

FIG. 2.

prove with age, working easier and more freely as use is made of it, it is confidently claimed by the manufacturers that "It will go faster and further with less effort. Is much easier to keep clean. Every motion being positive, there is no back lash. It has no links or teeth to catch things inadvertently. The driving mechanism is always in a lubricated condition. The motive parts are not affected by the weather, or from rain, mud or dust, being well protected. It makes possible less liability for repairs and

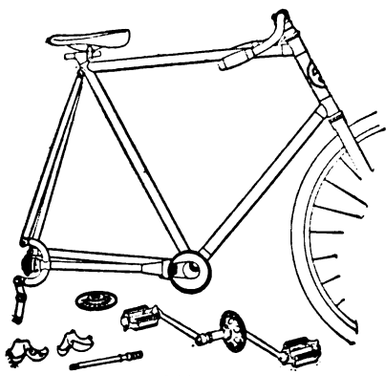

FIG. 3.

necessarily lessens the work and worry usually the lot of a cyclist, while it increases the safety and delight of cycling, substituting a higher degree of confidence for previous apprehension."

The driving mechanism of the cycle has for years been subjected to experiments without number, every effort being made by inventive skill to supplant the cumbrous sprocket and chain and substitute the direct-acting gear. At the beginning of 1897, more than one hundred patents had been issued on bevel gears, for use on bicycles in the United States and England, to say nothing of the large number of those granted in France and Germany. But notwithstanding the large amount of bevel gear construction, and the great expense and difficulty surrounding gear cutting, it seemed as though too many obstacles stood in the way of complete success, until aided by the practically unlimited resources of the Pope Mfg. Co., the ex-

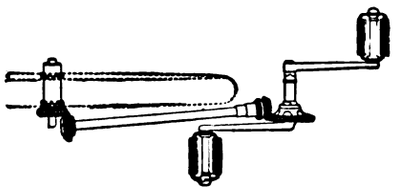

FIG. 4.

periments finally showed results which proved success was at last attained. The first chainless wheel which possessed points of acknowledged merit was the "League Chainless," made four years ago in Hartford. It was faulty in that perfect construction demanded by the riding public, and of the small number made but few were successfully marketed. But even the few sold found admirers who did seemingly impossible things on these advanced wheels, testifying strongly that a foundation for skilled improvement would be found based upon their controlling patents. Every one of these patents, when the League company ceased to exist, went into the hands of the Pope Mfg. Co., and they began experimenting, and more than a dozen distinct variations have been tested. All this, besides the work and waiting of getting bevel gears cut accurately, and of getting the costly equipment needed to produce them in quantities. Up to that time there was no proper machinery for cutting such gears in sufficient quantity.

"Each member of a bevel-gear is the frustum of a cone with teeth cut in its periphery. If cut in the face of an entire cone the teeth and the spaces between them would each come to a point at the apex of the cone. This tapering

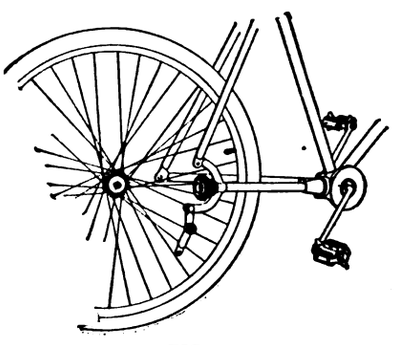

FIG. 5.

of the teeth and the spaces must be exactly uniform in whatever length of the cone is used for the gears, and all the teeth of both members of the gear must be precisely alike or there cannot be perfect work.

"But each tooth must have other peculiarities. Its outline must be considered with the greatest care. Its lateral diameter must be increased from the face toward the axis, and by a gradual and mathematically exact swell (an epicycloid curve), so that when the teeth are in operation they will come together and then separate with a rolling motion, with no slipping or grinding, with no friction. The

Digitized by Google

point where this enlargement reaches its maximum is usually about half way down the depth of the tooth, and is called the "pitch circle." There must also be a slight clearance for the face of each tooth when fully in mesh."

The elements of the problem were easy to understand; the theory was simple enough, but putting it in practice was the difficult part. The necessities of bicycle use lifted gear-cutting from an art to a fine art, and the present "Columbia Chainless" is the result; a cycle which can be taken apart and put together by any person of ordinary intelligence in less than twenty minutes. The Columbia Chainless, with the exception of the driving mechanism, is the same Columbia cycle which is acknowledged "high grade."

It is the same wheel, including the famous Hartford single-tube tires, the same forks and handle-bar, the same seat-post and choice of saddle, the same perfect frame of nickel steel, the same pedals and cranks. The difference is entirely confined to the driving mechanism, to three sides of a parallelogram having the rear axle and the crank axle as its ends, and the shaft as one side, a method of construction illustrated in the small cuts shown in the course of this article.

The general manager of the Sportsmen's Exhibition and Bicycle Show is Frank W. Sanger, general manager of the Madison Square Garden. James A. H. Dressel is secretary and treasurer of the Sportsmen's Association, whose headquarters is at No. 377 Broadway. The press agent is Allen S. Williams, at Madison Square Garden. All the arrangements for the great combined show have been completed, and the success of the exhibition of 1898 is now fully assured. When the doors of the Garden are opened on January 13th the public will be treated to a unique display showing the most wonderful kaleidoscopic effects of color and light formed by the intermingling of electric lights with more sombre articles of the hunt and chase, thus presenting a picture entirely at variance with the usual exhibition of purely trade interests.

Hardware publishes in its latest issue a letter from an Ohioan, which suggests the explanation of Mr. McLean's distaste for Senatorial sour grapes. "Farmers," he says, "all have a big roll of money this fall and are feeling well. Prosperity is certainly in the air, whether McKinley brought it or not." The writer was last year a Populist and a pessimist, says the *Hardware*, and that fact gives emphasis to the concluding observation: "There is nothing that helps good times along so much as to talk about them, and for that reason I will not be a Populist or a pessimist any longer." No doubt this man fairly represents a large class of those who supported Bryan last year. That class did not croak and moan from any morbid or demagogical motive, but because they felt the pinch of hard times and thought free silver the road to prosperity.—*Inter-Ocean, Chicago.*

The Detroit Stamped Ware Co. has been formed in Detroit, Mich., with the following board of directors: Oliver Goldsmith, R. W. Gillett, L. H. Jones, W. A. Montgomery and C. D. Milne. The officers were also elected as follows: President, L. H. Jones; vice-president, O. Goldsmith; treasurer, W. A. Montgomery; secretary, C. D. Milne. The plant will be located at the corner of River and Clark Streets, and about fifty men will be given employment. The goods to be manufactured will be of a high grade, and will consist of tea kettles, coffee pots, saucepans, and articles of a kindred nature, all of which will be made of either brass or copper.

In buying a bicycle, be sure to get the best. Any of the advertisements will tell you which that is.—*Somerville Journal.*

Some Up-To-Date Announcements.

We Knife the Trade

Come and see how we do it.

Free Exhibition in our Window.

The Natural Refrigeration Season is about at hand.

. . . . But that's neither here nor there.

We are in for artifical refrigeration, which is the up-to-date thing.

Aren't we talking loud?
But our Prices talk louder.

Yours for Household Refrigerators.

WE SELL AT LOWEST MARKET PRICES.

No Trading Stamps.
We are not fools.

We don't believe our customers are.

No, we don't give trading stamps.

THE TRADING STAMP IS A FRAUD AND DELUSION. . .

Come to our store and we shall explain to you why.

It will be worth money or its equivalent to you to know why.

To indemnify you for the time expended in getting this information, we shall offer you the choice of an easel or work basket at the face value of whatever trading stamps you might have in your possession.

Don't be a Clam.

Be at least a mud turtle and have some snap to you. . .

That's what we tell our travelers.
That's what we tell our clerks.
That's what we practice ourselves.
We are a snappy concern.
We have snaps to sell.

. . Come and see us, if you are interested. .

The Foreign Trade of Germany, 1896.

The commercial and industrial prosperity of Germany, which was so elaborately described in consular reports from this country for the year 1895, continued with steadily increasing volume throughout the following year. In respect to foreign commerce, there was a notable increase in both the quantity and values of imports and exports, in comparison with those of the three preceding years. The importation of American bicycles has continued on a scale far beyond that of any previous year, and the product of several leading makers is now retailed in all the more important cities. Their price is from 20 to 30 per cent. greater than is asked for home-made wheels, and they are used generally by the more wealthy, luxurious classes, who appreciate and can afford to pay for the best of everything that can be obtained. This has naturally roused the German bicycle manufacturers to an attitude of militant hostility against all imported bicycles, especially those of American origin, which are recognized as the most dangerous to their own trade. Their resentment has taken the form of fervid appeals to the government to impose greatly increased duties on all imported bicycles, with a differential and much higher rate against those of American manufacture. Several of the cycle-trade journals, organs of the manufacturing interest, refuse to accept advertisements of American bicycles or fixtures, and their editorial columns are eloquent with patriotic appeals to their countrymen to ride only German-made wheels.

Meanwhile, the German cycle manufacturers, of whom there are about fifty established firms, employing in all over 25,000 workmen, have gone on studying and copying many of the superior features of high-grade American bicycles, and have thus rapidly improved their standard of excellence, though it is conceded that the peculiar grace of model, easy running qualities, and rigidity of structure combined with extreme lightness that characterize the best grade of American wheels has not yet been attained in this country. Wooden wheel rims and handle bars, single-tube tires, and American lamps, cyclometers, and other materials and fixtures are now more extensively used in this country than ever before, as the German-made bicycle approaches more nearly to the best American type. There will continue to be here, at least for some years to come, a market for the highest grade of American-made bicycles, but their quality must be kept up to the highest attainable standard, and their price gradually reduced to meet upon equal terms the best product of the native manufacturers.

American consulates in this country receive constant inquiries from manufacturers, merchants, and exporters' associations asking what chance there may be here for the introduction of every conceivable product, from shoe laces to printing paper and fertilizers. Some of these inquiries are obviously made at random, as the articles to which they refer are more abundant and cheap here than anywhere else in the world, and are exported, through more or less advanced import duties, to the United States.

It should be clearly understood that Germany offers no open, ready market for the manufactured goods of any country. Her imports are principally food products and the raw materials which are consumed by her own rapidly growing industries. When Germany imports a manufactured product it is because that product is better in quality or cheaper in price, one or both, than can be produced at home.

There ought to be in Germany a far more extensive market than has yet been developed for American mechanics' tools, but this branch of trade presents some peculiar difficulties. The carpenters' and joiners' tools used in this country, notably saws, hammers, planes, and mortising and boring implements, are rude and poor compared with those made and used in the United States; but they have two important merits—they are very cheap and they are what the German mechanic has been accustomed to use since his boyhood. Hardware dealers will generally admit the superiority of American tools, locks, and other Hardware, but say that, by reason of their higher price, their sale is and must long remain limited in this country. There are indications, however, that the conservatism of German mechanics in this respect is slowly yielding to more progressive ideas, and with the increased use of improved machinery and machine tools, the demand for mechanics' tools of improved forms and quality has been noticeably stimulated.

But—and here is the marrow of the whole matter—whatever the article to be sold, it is useless for American exporters to expect, as so many of them obviously do, that German retailers and jobbers will order direct supplies of American manufactured goods from catalogues and circulars printed in English, in dollar prices and pounds avoirdupois, pay for them free on board at the factory or New York, and take all the chances and risks of importation in small quantities on their own account. Generally speaking, American goods, to be introduced in Germany, must be offered here as German and English goods are offered in the United States and other importing countries, either by established agents or by salesmen who can show and explain samples and make prices and conditions in currency, weights and measures that the purchaser can readily understand. If it be a machine, it should be sold by a man who can not only explain its working, but can set it up and put it into operation; if it be a tool or implement, it should be presented by a salesman who can show how it is to be used.

And in all cases, whatever the article offered or price demanded, absolute faith is requisite; fair, honest dealing—the honesty that scorns to send abroad anything inferior in quality to the sample from which it was sold. For the lack of this sort of integrity, no mere cheapness in price will atone. Whatever market there may be in Germany for American manufactured merchandise can be conquered only by the best that our country can produce and retained by a strict fulfillment of every contract and obligation.

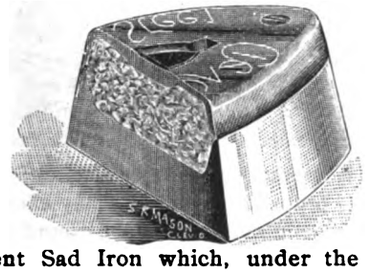
Frank H. Mason,
Consul-General.

Frankfort, July 22, 1897.

Chicago Branch Store of New Jersey Car Spring & Rubber Co.

The New Jersey Car Spring & Rubber Co., Jersey City, N. J., are about to open a splendidly equipped store at Nos. 175 and 177 Lake Street, Chicago. This fine double store has been remodeled and fitted up in a most thorough manner. A complete stock will be carried, including the full line manufactured by this well-known concern, and will include all the different grades of hose, belting, packing, mats, matting, linen and cotton hose, etc. The stock of belting will be specially full and any size or ply will be found in stock, including the popular "Gladiator" quilt-stitched brand.

The New Jersey Car Spring & Rubber Co. are one of the pioneers in the trade, having been established since 1858. They are progressive, and have a fine up-to-date plant, with every new appliance in the way of machinery to make their goods quickly and well, and the opening of the Chicago store is looked for with interest by the trade. The store will be conducted under the management of Frederick G. Davis, who is well and widely known by buyers and users of mechanical rubber goods. Mr. Davis brings to his duties an extensive experience, and as the products of the New Jersey Car Spring & Rubber Co. are of known reputation and worth, the success of this new move of the company seems assured from the start.



What would the farmer think of the management of a railroad with so bad a track that only half a load could be drawn over it?—*L. A. W. Bulletin.*

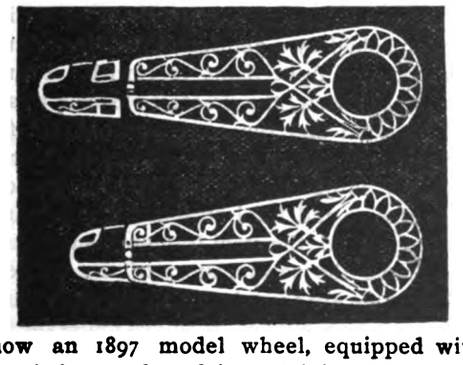
NEW GOODS AND SPECIALTIES.

The "Ferrosteel" Sad Iron.

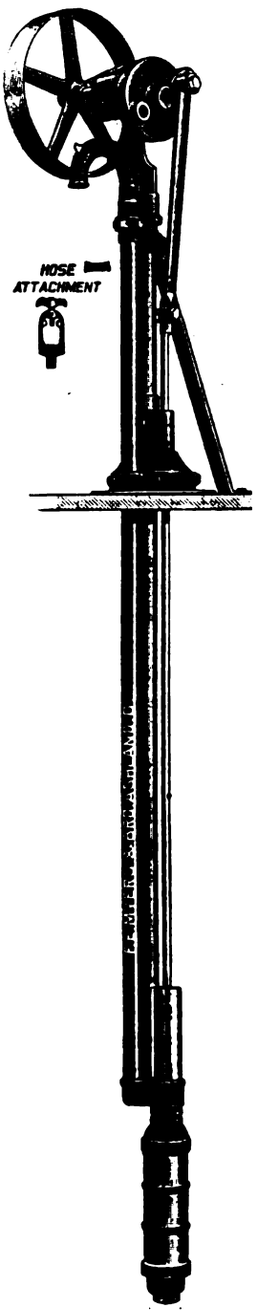
The Ferrosteel Co., Cleveland, Ohio, who are favorably known as leading manufacturers of registers, for house-heating purposes, are placing upon the market a new and



unique patent Sad Iron which, under the name of the "Ferrosteel," is destined to be heard from in the immediate future. It possesses enough original features to separate it from similar irons now before the trade, and which will doubtless secure for it a widely extended distribution. In the illustrations we present herewith, one of its most important improvements will be noticed, that of filling in the top of the iron with mineral wool, so as to largely overcome the reflection of heat from the top to the handle. The top of the iron is finished in antique bronze plate, so, also is the handle and stand. The top of the iron is perfectly smooth, thus enabling it to be kept clean more

easily. They are intended to be sold to the trade at $10 per dozen sets, and will no doubt be found an attractive addition to a stock of Hardware and house furnishing goods.

Aluminum Chain Guard or Sprocket Shield.



The Aluminum Sign & Novelty Co., Columbus, Ohio, who are well known as manufacturers of aluminum sign letters and aluminum castings of all kinds, are manufacturing an Aluminum Chain Guard or Sprocket Shield which is herewith illustrated. They make these in various sizes and styles, while any design desired is made to order promptly.

They show an 1897 model wheel, equipped with their aluminum chain guard, and it certainly makes a very attractive appearance. The illustrations carry their own explanation, showing two specimens of these guards, with a suggestion as to the method by which they are connected to the wheel. They will be pleased to send a circular descriptive of full line, with prices, etc., upon application, or to furnish estimates as suggested above.

Myers' New Dairy and Factory Pump.

F. E. Myers & Bro., Ashland, Ohio, are constantly making additions to their already extensive assortment of pumps and other specialties, the latest of which consists of a dairy pump, Fig. 730, an illustration of which we present herewith. It is especially constructed for dairy or factory uses, etc., where a light, self-contained back-geared power pump is required. It is constructed on the well-known form of their branch pipe pumps; is back geared, 2½ to 1 inch, and is adapted to operate in any well from 10 to 200 feet deep; it has 4, 5½ and 7-inch stroke. It is claimed by the manufacturers that the construction is the very best throughout, and fills every requirement for a force pump, with great power, adapted to

operate in almost any depth of well.

A Word to Cutlers.

I have often noticed, writes a correspondent, that when ladies select scissors they pay more attention to the points than to any other detail. Neither beauty of design, excellence of finish, nor goodness of material is regarded by them as of equal importance to well-shaped and very sharp points. Some makers are more careful in this respect than others. Speaking generally, German manufacturers have not overlooked its importance. The cheaper sorts of English scissors, though otherwise good, are in this particular not as carefully made as the foreign articles. It is a pity that the sale of articles of sterling quality should be hindered through inattention to what is, after all, a mere trifle. Yet such is the case.—*Ironmonger.*

A man who is perfectly sure of his position is not likely to get mad because some one differs with him. —*Exchange.*

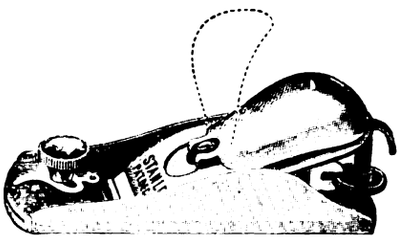
Recent Trade Publications.

The Cleveland Twist Drill Co., Cleveland, Ohio, Eastern office and salesroom No. 99 Reade Street, New York, have just issued a new catalogue covering a complete line of their goods, embracing the many important styles enumerated below, which have become staple goods in every stock of Hardware. The catalogue is of a very convenient size for shop reference, as it can be carried in a hip pocket or sent by mail in an envelope, and as the type is the same in size as is used in their larger catalogue, no disadvantage is observed in the smaller sized pamphlet used. Their large line covers straight shank, taper shank and square shank ratchet drills, bit stock drills for metal or wood; wood bits for brace, gimlet, bell hangers' and electricians' bits, Miller's patent self-feeding reamers, and Common Sense expansion reamers. The catalogue also illustrates two new lines which have attracted a vast deal of attention, and are very favorably regarded by all who have examined them. They are the drills having oil tubes, made with straight shanks for use in screw machines, and the drill and countersink combined; tools that are original, unique and labor-saving to a great degree. The company, for the convenience of their customers East, carry at the New York office their complete line in full stock, which enables them to fill all orders for regular goods at sight, greatly to the advantage of dealers handling their line. The company is ably represented here by C. I. Markham as manager.

The Aluminum Sign & Novelty Co., Columbus, Ohio, manufacturers of aluminum sign letters, street signs and house numbers, brass drum and sill signs, bar and trade checks, etc., have issued a very attractive illustrated catalogue and price list. This publication is so printed that the signs which they show stand out in bold relief, and are the best possible exponent of the character and quality of the goods they manufacture. Aluminum has become so widely known in the manufacture of letters, that little need be said of the character and value of these signs. In this catalogue, prices are given, with full description of the various lines manufactured. All kinds of door and other plates are exhibited with house numbers, and a large variety of trade checks. A number of bank and other signs are also exhibited, while on the final page is shown an office and storeroom in Columbus, where these signs predominate in large quantities. The company are prepared to furnish estimates on any design on application, or to fill orders for advertising novelties or aluminum castings. They call special attention to the fact that their aluminum chain guards and sprocket shields for bicycles are light, inexpensive, handsome and durable, and add that they will not break, bend or tarnish, and that with their use there is no danger or troublesome lacing.

The National Saw Co., with main office at Newark, N. J., are sending their friends a little blotter that is as "cute" and taking as anything we have seen for a long while. While it does not depict, we are certain, the frame of mind in which the National Saw Co. finds itself, it still conveys the idea that this great concern "Is Crying for your Orders."



A. M. Scheffey & Co., dealers in bicycles, No. 92 Reade Street, New York, have issued an attractive little publication, headed "As Others See Us," which gives a large number of testimonials as to the character and quality of the output of the Geneva Cycle Co., for which A. M. Scheffey & Co. are agents.

The employer who expects to get a man's work for a boy's pay is usually disappointed.

Have plenty of "backbone," but keep it straight.—*Ex.*

Stanley's Knuckle-Joint Block Plane.

Among the large number of iron planes manufactured by the Stanley Rule & Level Co., New Britain, Conn., and No. 29 Chambers Street, New York, one of the most popular for general use as a block plane is the Knuckle-Joint Block Plane illustrated herewith. This plane has a new throat adjustment which is an important improvement The knuckle joint which forms the feature of the cap is so con-

structed that it operates as a lever also, and when the cap is placed in its proper position securely clamps the cutter in its seat. These planes are to be found in the leading Hardware stores of the country and find annually constantly increasing sales.

Evolution of the Wheel.

The old-fashioned high-wheel bicycle is never seen at the present day, except in burlesques and in trials of trick riding. It is hard to make the public remember the times when riders shot by on lofty, wabbling machines, and it is still more difficult to recall the derision which met the introduction of the safety. The low wheels were looked upon as babyish, and the first men to appear on them were scorned as weak and timid.

Only ten years have elapsed since the omnipresent safety made its advent. The type now generally known as the diamond frame was introduced by Thomas Humber, although not in exactly the same form as it is now known. As early as 1886 there were signs which promised the early advent of a wheel which is now called the safety. But at that time the Humber front wheel (twenty-two inches in diameter) was much less in size than the rear one (thirty-six inches). At that time other makes of bicycles came nearer having wheels of the same size. During the last decade wheels have varied from 18 to 36 inches in diameter in front and from 24 to 36 inches in the back. It was in 1886 that Humber's diamond frame made its appearance. Since that time it has become almost universal except in the cases where women riders refuse the more masculine styles of dress and are thus compelled to accept the drop frame. The excellence of the principles set forth by Mr. Humber is accepted by the whole cycling world, and that, of course, means almost the entire population of America and Europe.—*Chicago News.*

What is claimed to be the first successful attempt to put to practical use an electric plant driven by a windmill has been accomplished by a gentleman in Massachusetts, who operates a private light plant therewith. From an electricians' point of view, the greatest obstacle was the variability of the wind and the consequent erratic fluctuations of the electric pressures, which rendered their utilization impossible by subjecting the ordinary mechanical connections to excessive and fatal strains. The windmill proper is the ordinary kind, the steel frames or supports extending fifty feet above the second story of the stables. At the top of this frame are the wheel and fan which are operated by the wind. As the wheel revolves under the influence of the slightest breeze it operates a series of cog-wheels, which work upon a long vertical shaft running from the head of the machine to the basement or cellar of the stables, where it communicates with a second shaft leading directly to the dynamo of the plant.—*Exchange.*

All About Sponges.

The English consul at Naples writes about the sponge industry of Southern Italy: The immense volume of the sponge trade and the manifold uses to which sponges are put by civilized mankind, from the cradle to the grave, together with the fact that of late years it has become an industry of Italy, whereas formerly the fishermen were nearly all Greeks, have suggested to me the following observations for publication. In the first place it is desirable to understand what a sponge really is, and for this purpose permission has been obtained from the editor of the popular handbook to the Naples Aquarium to extract a few of the leading facts which biologists have ascertained respecting this remarkable animal; for science has declared that a sponge is an animal, and the process by which this dictum was arrived at is particularly interesting. The distinction between animals and plants is sometimes so fine that it is no matter for wonder that mistakes were often made by the earlier school of naturalists, and it is only by applying the differential tests that the truth can be ascertained. Thus, a piece of sponge, when burnt, gives off a smell as of burning hair or horn, and exact analysis shows it to be allied to these substances. Again, though a living sponge is fixed and apparently motionless the holes in its surface are capable of opening and shutting, and from the largest of them, when open, a stream of water issues which is supplied by innumerable smaller holes, generally invisible except under the microscope.

Young sponges, varying in microscopic size to that of a pin's head swim freely about by means of little waving hairs upon their surface. when they reach an age when they prefer security to independence and monotony to danger. Finally, it has been proved that sponges live on solid food. While thus possessing all those characters that are more frequent among animals than plants, they never contain any traces of the cottony and woody substances especially characteristic of the vegetable kingdom. The water entering by the small pores passes through a system of branching and fine canals, and is collected again by a similar system into the outflowing current from the large holes. At the junction between the two systems of tubes are the most vital organs of the sponge, little swollen cavities of microscopic size, walled in with tiny living particles, each bearing a vibrating hair with which it lashes on the current, and a transparent filmy skirt with which it catches any food that may pass. All this labyrinth of canals and cavities is living soft flesh. To prevent it falling a prey to the first hungry animal that passes, it is set through and through with little flinty needles or thorns.

The Mediterranean sponge differs from and is superior to the sponge of Florida and the Bahamas, which form a large part of the British supply, and it has been in contemplation to export living sponges from here to those countries for propagation. No forecast can be made of the result of such an experiment, except that it would be a very costly one, as the living sponge must be taken up together with a portion of the rock upon which it grows, placed in a special tank on board a steamer so constructed that an equal temperature could be preserved throughout the voyage, and then the locality of the new colony would have to be carefully selected in order to keep up the distinction between the natives and the colonists.

In the ordinary course of sponge fishing, the fisherman, having once secured the sponge, proceeds to prepare it for the market. In this climate the animal rapidly decomposes if exposed to the air, and as soon as this process has set in the body must be rapidly beaten, or washed in running water till the fleshy substances are thoroughly removed. If decomposition has advanced too far, no process is known by which the skeleton can be purified and rendered fit for use.

Mutilation injures a sponge but little. Divided with a sharp razor even the smallest fragments retain their life, and under favorable conditions they will live and grow. So much is this the case that experiments in sponge-farming have been made, but the results have not been sufficiently sure to make the enterprise assume a practical form. Its advocates tell us that if a living sponge is cut into pieces with a sharp instrument, and the pieces fastened to canes immersed in clean sea-water, the fragments will grow to marketable size in five years, when of course they can be fished without expense or trouble. The great practical obstacle is in establishing ownership over a suitable spot, apart from the initial difficulty of finding such a spot. There is just that difference between cultivating oysters and sponges, that the f rmer can be grown in waters where ownership is obtainable, and where stealing them would bring an offender in reach of the law, whereas this is not the case with sponges.

Things Worthy of Imitation.

It would be worth while to imitate the elephant in his stately quietness.

It would be worth while to imitate the seal in his amiability.

It would be worth while to imitate the trained dog in his patience.

It would be worth while to imitate the bear in his affection.

It would be worth while to imitate the camel in his willingness to assume burdens.

It would be worth while to imitate the horse in his air of good breeding.

It would be worth while to imitate the tiger in his diplomacy.—*Exchange.*

Enter door-ways, the best thing they can land on is rubber. It is water-proof, dirt-proof, germ-proof. Besides its sanitary strength it outlasts and out-looks any fibrous material. Made up into **perforated mats,** there are two more good points: We shape to fit any space, however irregular, and mould into each mat the owner's name and number in such style that no thief can remove it.

Winter is coming—and with it rain, mud, slush, snow. You can't get away from them out of doors, but you can in doors if you have good mats. **Perforated rubber mats are the best you can buy**—if made of first-class rubber. That's our kind. Our mats have been the standard for quality ever since we originated rubber floor coverings—years and years ago. You will find them in such buildings as the Waldorf, Delmonico's, Metropolitan Opera House, New York Life Building, etc. Always a pleasure to submit samples, designs and prices. After choice is made it takes about a week to complete the mats.

Review of the Markets.

With a gradual lessening of the usual and customary orders which at this time of the year is to be anticipated, the season is beginning to wane. The trade of the past month while failing to reach in some sections of the country the amount anticipated, was still greatly in advance of a year ago, and more orders than usual for November are anticipated during this month and up to the holidays, the enquiries from the West and South indicating a greater demand for staple goods than was the feature of the October trade. Changes in prices are not occurring with any alarming frequency, and it looks as though the present low prices would be current quotations without material change until the season closes.

Wire Nails: The mills are gradually catching up on their orders, and the market may be noted as being a shade easier, in order to induce transactions that will keep the wheels of this industry moving in harmony with business generally. At present prices, wire rods are held at too high a figure to make wire nails very profitable at the manufacturers' present quotations. The market is not held at the firmness recently manifested, a concession being made by the quotation of $1.45 for carload lots at mill, an advance of 5 or 10 cents a keg being made on lesser quantities. New York quotations are: $1.60 for carload lots on dock, smaller lots from store being held at $1.70.

Cut Nails: Easier conditions in the wire nail market have made it inadvisable to hold cut nails at the advanced prices recently named, the demand not being a very heavy one, but at the lower prices quoted fairly sustained. The quotations are $1.15@$1.18 for carload lots at mill, New York prices being represented by carload lots on dock, $1.33; smaller lots from store, $1.43.

Linseed Oil: The Dean Linseed Oil Co., No. 181 Front Street, New York, under date of November 4, quote prices as follows: In lots of less than 5 barrels, 38 cents per gallon; in lots of 5 barrels or more, 37 cents per gallon. The five-barrel price only applies to deliveries of that quantity at one time. Boiled linseed oil, 2 cents per gallon higher than raw. Calcutta oil, 54 cents per gallon.

THE PHILADELPHIA TRADE.

Business may be classed to-day as fair, with somewhat of a tendency towards improvement, as indicated by the large number of mail orders, and rather more generous quantities ordered in this way.

It is universally conceded that prices on Hardware are entirely too low, and that a general advance all along the line would probably be welcomed by the manufacturers, jobbers and dealers alike, and it has been often said there is business enough doing if values were only what they were twenty years ago, but as Hardware has decreased from thirty to forty per cent. in that time—perhaps more—it needs a correspondingly strong effort to increase sales, when the amount in dollars and cents is thus constantly curtailed by reductions in price.

This is felt by all classes of dealers, and as Hardware is now in many cases at—or below—the cost of manufacture, it only seems reasonable that better times are pretty sure to bring reaction and higher values. Perhaps it is a realization of this fact which explains the larger quantities now being ordered by the dealers.

Prices have shown but few changes—there seems to be no room for further declines—and manufacturers are conservative in making advances.

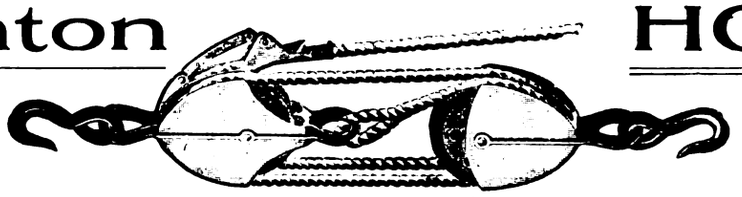
Cut nails appear to have weakened slightly, but this might be expected at this time of the year, with the winter in sight.

Collections are certainly better, showing that the country trade are more amply supplied with money, and the farming community especially are paying up their old bills with alacrity that is most gratifying, and which is sure to have its effect on trade ere long.

Manufacturers are doing increasing business, and it is a welcome sight to see the mills once more lighted up at night. The writer, like all good Hardwaremen, usually keeps early hours, but occasionally makes an exception, and has been glad to see the brilliantly lighted windows of several factories, showing that increased wages are being paid to operatives, and this will inevitably find its way into the trade later. BIDDLE HARDWARE CO.

THE BUFFALO TRADE.

You will have to excuse us from sending you any letter for your issue of November 10th. Anxiety for the welfare of the National Hardware Association, and looking after you and your friends, is about as much as we feel we are able to do for the present. WEED & CO.



THE PITTSBURG TRADE.

Welcome rains have gladdened the heart of the agriculturists during the past few days, making possible the springing of grass and wheat so much needed. We must all come back to Mother Earth and her products for prosperity, so that merchant and manufacturer will unite with the farmer in rejoicing over the welcome moisture. The fall weather has been delightful for out-door sports and exercise, but absence of cold and mud cuts off demand for seasonable goods, such as gas stoves and the like. Trade is good in guns and ammunition, as squirrels and birds are plentiful. A very good volume of general trade is moving, especially in the coke and manufacturing districts, where work is plenty. Collections are about up to the average, although some sections still seem to have hard work to pay up. This is especially the case in the coal mining towns, where the long strike left the men so much in debt that it will take months for them to get paid up. Conse-

The Canton HOIST

Can be used perpendicularly, horizontally, and at any angle in factories of all kinds, foundries, quarries, mills and warehouses; also by contractors, carpenters, stone masons and all classes of mechanics.

MANUFACTURED BY THE NEY MFG. CO, CANTON, OHIO.

quently the local merchants cannot pay as promptly as usual.

LOGAN-GREGG HARDWARE CO.

THE ST. PAUL TRADE.

The situation in our section is not changed from last report. Our jobbers are doing a good business, and expect it to last up to Christmas. We have no such demand for goods as there is said to be southwest of us, but ours is fair. With more business, prices are firmer. We are still selling nails and barbed wire at cost, by reason of the competition of a certain manufacturer. This causes trouble for cities whose territory laps on ours, but as this condition has existed for a year, we are getting somewhat used to it.

Our houses will all be represented at Buffalo during the National Convention. We hope to derive some benefit from contact with our competitors, and are willing to give our experiences as well as hear the experiences of those in the same line of business.

We hope to meet many of our contemporaries in Buffalo.

C. W. HACKETT HARDWARE CO.

THE OMAHA TRADE.

Trade, for the past two weeks, has not evidenced the same activity that has characterized it during the early part of October. The weather has been a little unseasonable, which, to some extent, has interfered with the movement of season goods, and the easing off in the price of grain has made the farmers unwilling to sell, and even those who are anxious to sell are having trouble on account of the scarcity of cars. These circumstances combined have slackened the movement a little. Nevertheless, the volume of business in all lines easily exceeds the corresponding period for a year ago by from 25 to 40 per cent., and collections are all that could be desired. Nails and barbed wire, in particular, have been moving freely, and with the advent of seasonable weather a good movement of season goods may be anticipated, which will make the volume of business even more satisfactory than at present.

RECTOR & WILHELMY CO.

THE DAVENPORT TRADE.

Election passed off quietly. For once neither the campaign nor election day interfered with trade, and we do not think the result will affect business. Trade continues good, especially in seasonable goods and assorted Hardware. It represents an increase over last year at this time. While the drouth continues, there never could have been more delightful weather for either pleasure or outside work, than we have enjoyed this season. We feel that our climate in autumn cannot be surpassed anywhere.

The dropping of the price of grain is to some extent holding the crop from market, but so far has not seriously interfered with collections, which continue satisfactory. Prices are firm and where changes have occurred they have advanced. It is to be hoped that the meeting of the National Hardware Association at Buffalo will be well attended, and that the result of its deliberations will be an advantage to the members of the association.

SICKELS, PRESTON & NUTTING CO.

From Houghton, Mich., it is announced that the Six-Mile Copper Mine, adjacent to that city, has been sold to a syndicate of New York capitalists, whose names are not made public, for $5,000,000. Capt. W. A. Dunn began work at the mine three months ago, and the sale attests his success. The property has three shafts, none of which is very deep. The richness of the shafts in native copper is such that reliable persons reporting upon the showing, after personal inspection, find it difficult to secure full credence. Capt. Dunn will remain in charge of the work, and preparations are now being pushed for vigorous development. It probably will cost half a million more for development before the mine will begin earning even operating expenses. Over 1000 men are now at work, and others will be added as rapidly as possible. It is hoped the mine can be made a producer early next spring.

Good streets make good cities. Good roads make good farms.—*Exchange.*

Exports to Russia.

Since the Russian Government decided to abolish the duties on agricultural machinery and implements, considerable effort, it is said, is being made by several manufacturers in that line to materially increase their Russian business, even though it may be done through foreign representation. This move on the part of the Russian Government cannot be but of the greatest interest to the American manufacturers. Parties in the trade claim that the American manufacturers are bound to increase their Russian business if the undertaking is properly handled. Although a large quantity of agricultural machinery and implements is manufactured in the country, the imports are yearly increasing. The total imports of agricultural machines and implements into Russia amounted in 1892 to $2,010,123; 1893, $2,495,045; 1894, $3,635,800; 1895, $3,850,120; 1896, $3,710,000. To this the United States contributed in 1892 the amount of $107,268; 1893, $284,665; 1894, $271,190; 1895, $699,353, and 1896, $457,622. As it will be seen the American share in this trade is insignificant to anyone who realizes the possibilities of extension. Manufacturers, however, should take more care in securing proper foreign patents, so that the imitation of machines would be impossible. This inattention on the subject of foreign patents is costing American makers, it is said, millions of dollars, as not only do the foreign manufacturers pirate upon American ideas in goods not protected by patents abroad, but they infringe upon protected goods to an extent which calls for some united action from American manufacturers.—*N. Y. Journal of Commerce.*

At last there is something new under the sun. Battery Table Lamps at prices from $1.50 up are the latest, and the Ohio Electric Works, Cleveland, Ohio, the pioneer manufacturers of portable lights with primary batteries, are the producers. This company first introduced the successful necktie lights, then the bicycle electric light with primary battery, which they have brought up to a high standard of perfection, and their carriage lights with dry batteries, which have become so popular. The popular-priced battery table lights will have a large sale, and dealers can obtain exclusive sale by applying early for agencies. The new catalogue for 1898 is now ready for distribution, and a copy will be mailed to any one who will mention this paper. Address Ohio Electric Works, Cleveland, Ohio.

"Is the editor in?" asked a caller in a Western newspaper office.

"Yep," replied the boy with a grin; "he's in $7 old Judkins paid him this mornin' for a column ad, an' he's over at the saloon playin' poker. As soon's he's out the $7 he'll be in."

Accommodated His Clerk.

A newly engaged clerk in the employ of the Standard Oil Co. was sent to work in a small room that contained a health lift. Every morning at about 10 o'clock, when this clerk was particularly busy with figures, a small, black-mustached man, quite diffident in manner, entered, said "good morning," walked on tiptoe to the corner, and exercised for a quarter of an hour. It became a bore to the clerk, who at last one day remarked with considerable heat to the stranger:

"How do you expect me to do my work properly while you are fooling with that blasted machine? I'm getting tired of it. Why don't you put it where it won't worry a person to death?"

"I am very sorry it annoys you," said the stranger, flushing; "I will have it removed at once."

A porter took it away within an hour. A few days later the clerk was sent for by Mr. Flagler, whom he found in earnest conversation with the small, black-mustached man. The latter smiled at seeing him, gave Flagler some instructions, and left the room.

"Will you tell me who that gentleman is?" the young man asked, a light beginning to break upon him.

"That was Mr. Rockefeller," was the reply.—*Boston Journal.*

Old and New Steel Rails.

Steel rails fresh from the mills can often stand a considerable shock before breaking, while upon being taken up after some length of time in service, and subjected to the same tests, they break easily. A special feature is the brittleness of the rail when laid head down, which causes tension in the head when struck by the drop hammer. This brittleness is, however, found only in the head, for, on removing about an eighth of an inch by planing, old rails prove to be as strong as new ones. A microscopic examination of the heads of old rails has revealed the fact that the surface is frequently covered with microscopic cracks which extend inwards no further than one-hundredth of an inch on the average, and it is to the presence of these fissures that the brittleness is in a large measure due.

An English contemporary states that the corporation of Blackpool has resolved to abandon the underground electric conduit system in favor of the overhead trolley. This was one of the first electric railroads in the United Kingdom. The reason for the change is the high cost of maintenance of the conduit equipment.

Give your clerks their due as well as your customers their weight.—*Hardware and Metal Reporter.*

Side Line Wanted.

The Iron Trade Increasing.

The production and consumption of iron products for the last forty eight years are not only remarkable, but very interesting. In 1850 we produced and consumed a little over half a million tons, or sixty pounds per capita per annum. In 1860, the production and consumption had increased to 800,000 tons, or 62 pounds per capita; in 1870, to 1,800,000 tons, or 102 pounds per capita; in 1880, to 3,800,000 tons, or 240 pounds per capita, and in 1890, to 9,200,000 tons, or 334 pounds per capita.

If in 1890, with a population of 62,000,000, we consumed 334 pounds of iron per capita, how much will we consume in 1900 with a population of 75,000,000? If the same ratio of increase in consumption is maintained it will require over 18,000,000 tons to supply our wants, and why not?

Between 1870 and 1880 the price of pig iron went from $60 per ton to $13 50 at Southern furnace yards. This was during the depression following the panic caused by the failure of Jay Cooke & Co., in 1873, which continued until 1879. Notwithstanding these seven years of depression, consumption increased more than 100 per cent. per capita.

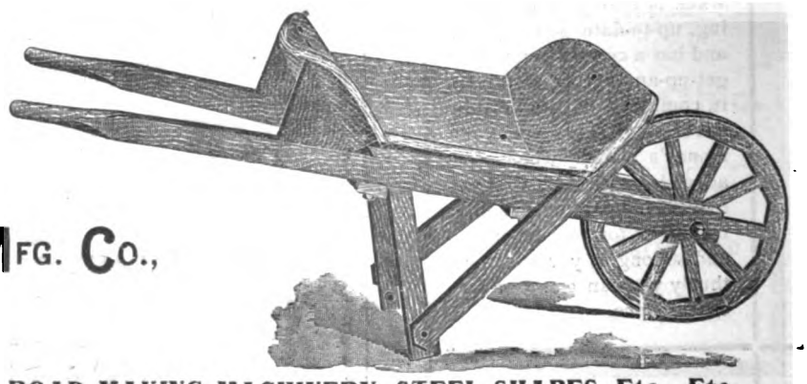
Between 1880 and 1890 we again had a long night of depression and restricted consumption following the Seney failure, in 1883, and lasting until 1888, when the price of pig iron went from $40 per ton at the furnace to $11 per ton, and still consumption increased during this decade nearly 100 per cent. From 1890 to the present time the price has gone down from $15 per ton to less than $6 per ton, caused by the great depression following the Baring failure.

The fact that the whole country has starved itself for iron since 1893 will only make the appetite the sharper, the consumptive capacity the greater, since confidence has been restored and normal conditions again obtain.

Another reason why our consumption will not only be maintained, but relatively increased, is the fact that in 1890, when we consumed 334 pounds per capita, we were paying $15 per ton for it, and not only consumed all we made, but we imported over 700,000 tons that year. The price to-day is $7.50 per ton at the furnace, and, instead of importing, we are exporting large quantities. and, if present prices continue in England and Germany, this country will export more than a million tons next year.

As the past is our only criterion for judging the future. does it not look as if 1898 and 1899 will be remarkable and eventful years in the history of the iron trade?

The balance of this year will take care of itself. Furnaces are generally sold up to the end of the year. Manufacturers have placed their orders for raw material and have well filled order books for their product. To-day we are producing at the rate of more than 10,000,000 tons, and consuming at the rate of more than 11,000,000 tons. Next year and the year after is the time when the great production and consumption must and will come. In order to do this, and keep up the pace that has been set for us by the last two decades, we will have to produce and consume nearly 15,000,000 tons in 1898 and nearly 20,000,000 tons in 1899.



A. M. SHOOK.

—*New York Times.*

Peter D. Wanner, of Reading, Pa., renominated for president of the State Foundrymen's Association, in speaking of the condition of the iron trade, made reference to the contemplated improvement in the gas and water works of a number of cities, notably Philadelphia, where, he predicted, the people will authorize the twelve-million dollar loan, and where the improvements will require 150,000 tons of iron for new gas and water pipes, will create an additional boom in the iron trade that will solve the problem of prices for ten or fifteen years to come. If the larger firms were not so avaricious, he declared, prices now would be better than they are, although the recent advances have been encouraging. A movement, it is reported, is on foot to form a defensive alliance of Eastern foundrymen, to act in conjunction with a Western organization, with the purpose of counteracting, in a measure, unreasonable demands of labor organizations.

RETAIL TRADE RECORD.

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Hardware Stores.

Champaign, Ill.—F. K. Robeson & Bro. have opened a tinware business.

Covington, Tenn.—The Covington Hardware Co. has been incorporated by Henry D. Rose, Wm. C. Boyce, Herbert Hamilton, Wm. T. Hamilton and Wm. Hamilton. Capital stock, $4500.

Ellsworth, Ill.—B. F. Staugen, agricultural implements.

Freeport, Me.—Wm. A. Davis, agricultural implements, on Main Street.

Girard, Ind.—A. Schoen.

Grand Rapids, Mich.—T. W. Dunn, Hardware specialty and factory supply store.

Luckey, Ohio.—W. Holden, agricultural implements.

Maryville, Mo.—H. S. Joy, who purchased the Davey & Armstrong stock of Hardware, moved his family down from Elmo recently and is now a full-fledged citizen of Maryville.

Pine Bluff, Ark.—The McGaughy Hardware Co. has been incorporated. The capital stock of the company is $10.000, of which $5000 has been subscribed. The corporators are R. D. McGaughy, H. C. McGaughy and C. H. Triplett, all of this city.

Port Huron, Mich.—J. Watson, Hardware, has opened new store on Elmwood Street.

Changes and Removals.

Alvin, Tex.—Pridmore & Kimmins, dealers in Hardware and furniture, have purchased the opera house block of Charles Batterson, of Galveston, and will move their business to same.

Ashmore, Ill.—Brown & Kimball, Eva Kimball's interest has been purchased by J. W. Brown.

Asheville, N. C.—J. E. Dickerson Co., business purchased by W. S. Robertson, president of the Watkins-Cottrell Co., of Richmond, Va.

Belvidere, Ill.—The Disotell & Wilcox Hardware stock which was sold at sheriff's sale, was bid in by W. W. Ray, for a consideration of $1100. The stock is worth considerably more than the successful bidder paid for it.

Blythedale, Mo.—E. O. Smith, Hardware, reported to have sold out.

Brewton, Ala.—Luttrell Hardware Co. contemplate taking up bicycles.

Calkinville, Mich.—Carmen & Reeves, stock purchased by L. Wing.

Carthage, S. D.—John Dixon, Hardware merchant, has sold his stock and interests to Henry Morris, who will continue the business on an enlarged scale.

Champaign, Ill.—H. Trevett, agricultural implements, sold out to F. M. & O. W. Lamb, who will conduct it in the future under the name of F. M. Lamb & Co.

Clay City, Ind.—George Motz, stock purchased by J. E. Bryan.

Delta, Ohio.—Grisman Bros., R. L. Geizer has entered partnership.

Des Moines, Iowa.—John F. Kauffman gave a bill of sale for $4800 on his stock of Hardware, No. 425 East Walnut Street, to E. L. and Nancy J. Ebersole.

Durand, Ill.—P. W. Fenton has resumed his agricultural implement business.

Durand, Mich.—The De Camp Hardware Co., purchased by F. B. Sabin and W. K. Brewster, who will run it under the name of Sabin & Brewster.

Evart, Mich.—The Evart Hardware Co. has added a stove department.

Iron Mountain, Mich.—The well-known Hardware firm of Hancock & Sundstrom, doing business at the corner of Stephenson Avenue and Ludington Street, has been dissolved, Robert Hancock retiring from the firm. Negotiations leading toward this end have been going on for several days, but the deal was not closed until recently. Mr. Sundstrom has purchased the interest of his partner, Mr. Hancock, who will be succeeded by Will Sundstrom, Jr.

Ivesdale, Ill.—A. Konow, stock purchased by Mr. Cox.

Lafayette, Ill.—Charles White, Y. Fell has purchased a half interest.

Lyle, Minn.—John Reding, succeeded by W. A. Eggert.

Manistee, Mich.—A. B. Leonard & Son, Hardware, etc., reported to have been succeeded by C. M. Pepperman Co., Ltd.

Marshall, Mich.—Rickett & French have been dissolved. The business will be continued by the Messrs. French.

Mendon, Mich.—Zach. Beard will erect a large building for his agricultural implement and carriage business, next spring.

Melrose, Wis.—J. S. Miller, succeeded by the Wyman Hardware Co.

Napoleon, Ohio.—Utz & Militz, Mr. Militz has sold his interest, and the firm will hereafter be Utz & English.

Ney, Ohio.—Ed. Bergman, new store being built for him by Charles and William Lantz.

Parker, S. D.—J. L. Weaver, sold to Harper, Jones & Co.

Quakertown, Pa.—W. H. Davis, who has for a number of years been in the Hardware business on West Broad Street, has sold his stock to a Mr. Weber, of Tamaqua, Pa. They are taking stock account at present and Mr. Davis will give possession shortly.

Red Oaks, Ill.—Meyers Bros., store purchased by E. Man.

Reynoldsville, Pa.—J. C. King & Co., Hardware, etc., closing out stock.

Saratoga Springs, N. Y.—The stock and fixtures of the Van Dorn Hardware store were purchased by Frank M. Cozzens and William C. Van Dorn, who will hereafter conduct the business under the firm name of Cozzens & Van Dorn.

Sioux City, Iowa.—The stock of the Burns & Hunt Hardware Co. was sold at mortgagee's sale recently by C. K. Williams. The stock was bid in by D. S. Lewis for $1860, and he also bought the book accounts for $150. F. B. Robinson bought the outstanding notes for $50.50.

Sycamore, Ill.—The Poor Man's Axle Grease Co., R. Lovering has sold out his interest to William Beckett.

Tavistock, Ont.—Geo. McKay, the enterprising young implement dealer, has purchased the premises occupied by H. Reiber, tinsmith, on Hope Street west. The price paid was $1200. The property is very conveniently situated for business.

Trenton, Ohio.—Bork & Funk are erecting a large agricultural implement establishment.

Vergennes, Ill.—Perry Bros. contemplate the erection of a large Hardware store.

West Derry, N. H.—F. L. Bray has sold out his stock to John Gegenheimer, of Old Orchard, Me., who will continue the business.

Business Embarrassments.

Baltimore, Md.—Ideal Heating & Plumbing Co., applied for relief in bankruptcy.

Bay City, Mich.—Teeporten & Kent, Washington Avenue, are in the hands of the sheriff.

Madisonville, Tex.—Dallas Hawkins has assigned to James Cleere with preferences for $1055.22. The assets are about $1200.

Marysville, Ohio.—John P. Connor, Hardware, has made an assignment to Aaron Boylan, of Milford Centre. His liabilities are estimated at $6000, and his assets will reach $4000.

Nashville, Tenn.—J. M. Hamilton & Co., Hardware, William Livingston, surviving partner, has made a special assignment to W. M. Pollard, trustee.

Peoria, Ill.—J. S. Tammen, stock has been sold by sheriff to C. E. Ulrich.

Rochester, N. Y.—Judge Sutherland has granted a decree directing Frank Croston as assignee of Homer A. Kingsley & Co., to distribute the funds in his hands among the creditors of the Hardware concern. The unpreferred creditors will receive about forty cents on a dollar. The total assets amount to $6000, of which about $2000 are preferred.

Smith Falls, Ont.—George R. McCarthy has assigned to Ogle Carss.

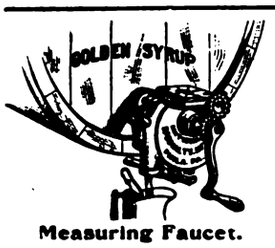
Toronto, Ont.—D. J. Dow has assigned to R. Lee.

Recent Fires.

Centralia, Ill.—J. W. Tate, agricultural implements, etc., destroyed by fire. Loss, $3000.

Coldwater, Mich.—The Ward & Dolson Building, occupied by J. P. Garber, agricultural implements, destroyed by fire.

Georgetown, Ohio.—A. Markey, store destroyed by fire.



Gibsonburg, Ohio.—Schumaker's Hardware store, destroyed by fire.

Kingsville, Ont.—A. G. Adams, damaged by fire. Loss, $4000; insured for $2000.

Oakwood, Ill.—Hayworth & Lonstreth, Hardware, destroyed by fire.

Pilot Mountain, N. C.—F. L. Smith, damaged by fire; insured for $300.

It Strikes Every Hardware Dealer.

Harden Saddle & Specialty Co., Toledo, Ohio. [*Bicycle Saddles*]: In your HARDWARE of May 10, 1896, you were kind enough to give us a write-up, and must say from the number of inquiries we received on the strength of the same, that your journal, it seems, must strike every Hardware dealer in the United States. We have a number of new and improved saddles for the '97 trade, and wish to have an advertisement in HARDWARE. We enclose you clipping showing size of space we would want. Kindly send us price table and oblige.

THESE may seem hot subjects for this season, but it is the time to talk about them.

HARDWARE MANUFACTURERS' RECORD.

Hardware manufacturers, the country over, are requested to contribute to this page. News of new factories or companies, changes, improvements, etc, will be gladly received, and promptly published.

New Companies, Etc.

Bliss, N. Y.—Bliss Mfg. Co. has been incorporated by Hattie J. Cross, Norman D. Cross and John D. Howes; to manufacture pumps. Capital stock, $5000.

Chicago, Ill.—The McCormick Harvesting Machine Co. will erect a large five-story building, which will be the largest foundry in the West.

Indianapolis, Ind.—The Buffkin - Nobel Mfg. Co. has been incorporated, to manufacture hand and feed cutters. Capital stock, $60,000.

Irwin, Pa.—Norman C. Ball and John W. Irwin have purchased the handle works of the C. H. Datz Mfg. Co. The deal has been closed and the new firm will take charge at once. The new management will turn out all kinds of handles and hope to be soon running double turn. The name of the new company will be the Irwin Handle Works. The company make a specialty of all kinds of pick handles and hammer handles, making twenty different styles; also manufacturing single-trees.

Lansing, Mich.—The Lansing Implement Co. has been incorporated for $10,000. A. T. Van Dervoort is one of the principal incorporators of the company.

Latrobe, Pa.—A party of Eastern capitalists are endeavoring to locate here and are after the buildings of the defunct Nation's Mower & Reaper Works. It is stated that they will employ 2000 men.

Louisville, Ky.—A stove foundry is to be established at Ashland which will employ 125 men when running at full capacity.

Muncie, Ind.—The Ontario Silver Co. has been incorporated by L McGlashan, C. B. Hyde and E. G. Clark; to manufacture silverware, plated and sterling. Capital stock, $150.000.

New York, N. Y.—Borcher & Axelby Co. has been incorporated by Thomas Borcher, Henry D. Axelby, Henry E. Cowan, Charles J. Hardy and Joseph M. Shellaborger; to manufacture silverware. Capital stock, $15,000.

New York, N. Y.—Empire Wrought Iron Works has been incorporated. Capital stock, $5000. Directors: J. Charles Weschler, Jacob Albert and Charles Hoffman, of New York City.

New York, N. Y. — The Consolidated Pneumatic Tool Co. has been incorporated, to manufacture pneumatic tools and air compressors. Capital stock, $150,000. Directors: John Evans, George T. Hartford and Harry B. Torrey, Boston; O. W. Norcross, Worcester, Mass.; Peter Gray, Philadelphia; George Cohen and W. P. Pressinger, New York City.

Plattsburgh, N. Y. — The Plattsburgh Foundry & Machine Co. has been incorporated. Capital stock, $6000. The directors for the first year are Sidney S. Whittelsey, John Ross and John M. Wever, all of Plattsburgh. The officers are: J. M. Wever, president; John Ross, secretary and treasurer, and S. S. Whittelsey, general manager. Mr. Whittelsey will abandon the Hartwell foundry, having sold his plant to the new company.

Wheeling, W. Va.—The Enterprise Enamel Co. has been incorporated by Theodore Rosshack, C. L. Dover, James F. Dubois, F. F. J. Caldwell and C. A. Schaeffer; to manufacture brown ironware, steel hollowware and other ware. Subscribed capital, $10,000, and the authorized capital, $100,000.

Improved Conditions.

Albany, N. Y.—Some of the prosperity that has been coming for such a long time has at last found its way to this city, and revived the stove industry. The Rathbone, Sard & Co.'s foundry is running on full time, and it has been found necessary to open another shop, No. 2, thereby giving employment to about 500 men. Not since 1893 has shop No. 2 been in operation, and only a few days ago the cobwebs and dust, the accumulation of four years, were swept out, and the men put to work. There are about 150 molders employed in shop No. 2 and about twice that number of helpers.

Anniston, Ala.—Since the burning of the pipe works of the Anniston Pipe & Foundry Co. here a few weeks ago, there has been considerable talk of the plant being removed to Birmingham, but the officers of the company recently decided definitely to rebuild in Anniston, and work has commenced. This is the largest pipe works in the United States.

Ashley, Ind.—The Daisy Implement Co., an effort being made to reorganize the company.

Cincinnati, Ohio.—The Cincinnati Hardware Co. has increased its capital stock from $35.000 to $100,000.

Columbus, Ohio.—The National Hardware Co., of Cincinnati, has increased its capital stock from $35,000 to $100,000.

Detroit, Mich.—The Detroit Brass Works will erect new $8000 factory on Seventh Street.

Dunkirk, N. Y.—The Cortland Howe Stove Mfg. Co., employing about two hundred hands, are contemplating moving to Dunkirk, where better shipping facilities can be had. The Board of Trade has decided to call a special meeting to take prompt action on the matter, and it is thought a suitable proposition will be made to the company to get them to locate here.

Fairhaven, Mass.—The electric plant at the Atlas Tack Co.'s Fairhaven factory was started last week. There are eighteen 1200 C. P. arc lamps lighting the lower floor and office. Charles F. Dillingham is in charge of the plant. The plant was formerly used in the works of the company at Plymouth, and was taken out and installed here by Norman M. Paull.

Fitchburg, Mass.—C. W. Day & Sons, manufacturers of paint brush handles, have just received an order from a Philadelphia firm, for 425,000 ice cream freezer floats, and they report that their business is of a much greater volume than at any previous time since they opened their factory.

Louisville, Ky.—The Kentucky Stove Co. filed articles increasing its capital from $10,000 to $26,000.

Montpelier, Ind. — The National Steel Casting Co., plant now in full operation.

Orleans, Ind.—Shirley Bros., the well-known Hardware dealers, report a decided improvement in business in all lines. In order to take proper care of their largely increased trade, they have just put in a Warner Standard Hand Power Elevator, which will greatly facilitate the handling of the immense stock of Hardware, buggies and implements which they carry.

Seattle, Wash.—President Price, of the Port Angeles steel plant, is in the city en route East. Work will begin at once on the mill. It is intended to put in machinery to make tin plate, as well as steel rails, bar iron and nails. The iron ore and coal are found within shipping distance of the plant. The local demand on the coast is sufficient to keep a large mill busy the year round.

Southington, Conn. — Business at the Southington Cutlery Co. shows a marked improvement. The bicycle crank department, which has been anything but a profitable venture, has taken a turn for the better. The company has orders sufficient to keep the department running until next June. There is a marked improvement in other departments and the working force will be considerably increased this winter.

Springfield, Ohio.—The Thomas Mfg Co., farm implement department has been opened, and about eighty men put to work.

Terre Haute, Ind.—The Terre Haute Shovel & Tool Co. is enjoying the advance posters of prosperity in the form of orders for their products to be shipped to Japan and even to the far away regions of South Africa. One hundred and fifteen men are employed; the factory has only closed down once the past season, and that was but for a short time in July at the regular annual inventory, when a receipt of all stock is taken. The present output, when working with ordinary force, is 125 dozen shovels, 50 dozen forks, 100 dozen D handles and 100 dozen long handles per day.

Wabash, Ind.—The stockholders of the Standard Lamp Co. met to elect a board of directors and other officers for the company and arrange for the removal of the establishment from Marion, its present location, to this city. John A. Bruner was elected president of the new company, W. A. McNamee, vice-president; D. C. Gibson, secretary; A. F. Opperman, general manager, and Jacob Hyman, assistant manager and treasurer.

Wrightsville, Pa.—The Wrightsville Hardware Co. is now running night and day. A year ago they were running on half time.

BICYCLE TRADE RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Companies, Agencies, Etc.

Arkansas City, Ark.—J. N. Davis, newspaper publisher, will embark in the bicycle business. He is inviting propositions from manufacturers.

Assumption, Ill.—J. A. Turgeon, musical merchandise, is preparing to add bicycles, and invites propositions from manufacturers.

Black Rock, Ark.—Chas. G. Blakeslee Hardware and machinery, will add a line of bicycles.

Chicago, Ill.—Boyce Cycle Pump Co., at Chicago, has been incorporated. Capital stock, $10,000. Incorporators: Benjamin Boyce, R. D. Davis and C. H. Magoon.

Chicago, Ill.—The Northwestern Bicycle Protective Association has certified to a change of name to the Columbian Guaranty Co., also a change of object of incorporation.

Chicago, Ill.—The Zeller Tire Machine Co. has been incorporated by R. C. Robinson, E. H. Ashcraft and F. M. Cox; to manufacture tire setting machine. Capital stock, $20,000.

Cleveland, Onio.—The Cleveland Cycle Supply Co. has been incorporated; capital stock, $10,000; the object being to sell bicycles with supplies and fittings. Edwin A. Bonfield, George H. Bonfield, J. H. McNair, J. W. McNair and M. W. Beacom are the incorporators.

Cleveland, Ohio.—The Crown Mfg. Co. has been incorporated with a capital stock of $50,000. to manufacture and sell bicycles.

Cleveland, Ohio.—The Lambeth Bicycle Saddle Mfg. Co. has been incorporated. Capital stock, $5000. The object is to manufacture and deal in bicycle supplies. M. M. Hobart, A. B. Footer, John C. Lowe, W. D. McCrory and A. A. Clay are the incorporators.

Columbus, Ga.—J. F. Weathers & Bro., furniture, etc., will add a line of bicycles, and are inviting propositions from manufacturers.

Cortland, N. Y.—The Cortland Carriage Goods Co. has been incorporated to manufacture bicycle goods, etc. Capital stock, $100,000. The directors are E. H. Brewer, E. A. Brewer, D. H. Brown, A. W. Brown and Andrew Aimsley.

Downers Grove, Ill.—Brode Hardware Co. will add chainless bicycles.

Franklin Grove, Ill.—A. F. Dieddorff & Co., Hardware, etc., will add bicycles.

Grand Rapids, Mich. — The Hamilton-Kenwood Wheel Co. has been incorporated by Francis Letellier, J. D. Crane, N. L. Avery and R. C. Luce. The company is the reorganized Hamilton-Kenwood Cycle Co. The company will continue the manufacture of the Hamilton-Kenwood wheel.

Keithsburg, Ill.—Perry B. Humbert, bicycles, will commence business. He is inviting propositions from manufacturers.

Lakeland, Fla.—L. W. Cowdery, Hardware, will add bicycles.

Luverne, Ala.—P. F. Folmer Hardware Co. have commenced business, and will add a bicycle department.

New York, N. Y.—The Bayveigere Bicycle Co. of New York City has been incorporated, to manufacture bicycles and other vehicles. Capital stock, $30,000. Directors: Robert Taylor, Greenwich, Conn., and Theron Baldwin and George William Burleigh, New York City.

New York, N. Y.—The Liberty Cycle Co. has been incorporated. Capital stock, $100,000. Directors: William I. Allen, of Bridgeport, Conn.; William F. Wilson and John H. Holden, of New York City.

Plant City, Fla.—O. A. Strickland, Hardware, etc., desires agency for good bicycle.

Springville, Ala — J. W. Ash & Co., drugs, will add a line of bicycles.

Toledo, Ohio.—The La Fave Clip & Handlebar Co.. since the purchase of the plant by H. D. Wood, has been changed to the Wood Mfg. Co.

Toledo, Ohio.—H. J. Young, formerly of the Kirk-Young Mfg. Co., will shortly launch another bicycle manufacturing enterprise on the market.

Toledo, Ohio.—The Toledo Cycle Supply Co. has been reorganized by taking in Latimer Thompson and J. F. Draper. The business will be greatly extended.

Changes and Improvements.

Albany, Ind.—The Albany Mfg. Co., operating the Albany Bicycle Tubing Works, has received an order from the Western Wheel Works, of Chicago, for 1,000,000 feet of cold-drawn bicycle tubing. This, with many other smaller orders, will necessitate the employment of a night force.

Aurora, Ill.—Smith & Keene, bicycles, have sold out.

Defiance, Ohio.—The Defiance Bicycle Co. has put its plant in operation on a large order for wheels for 1898.

Jacksonville, Fla.—Sabel Bros., vehicles, bicycles, etc , foot of Laura Street, closing out entire stock of wheels.

New York, N. Y.—Anglo-American Cycle Fittings Co., No. 105 Chambers Street, have dissolved. A receiver was dispensed with, as the company have no assets and no liabilities.

Ogden, Utah.—The Browning Bros. have been incorporated, with a capital stock of $100,000, and succeeds to the bicycle business formerly conducted by Browning Bros.

Peoria, Ill.—The Sieberling bicycle factory, which is now employing 200 hands, will put on 200 more this week or the next, and it is expected to have 600 or 800 employed later. It is intended to turn out 40,000 wheels during the coming year.

South Norwalk, Conn.—George F. Bearse, bicycles, reported to have been succeeded by Frederick W. Rogers.

Springfield, Ohio.—The Springfield Rubber Tire Co., manufacturers, reported to have sold out.

Stamford, Conn.—John C. Robinson, bicycles, etc., reported to have sold out.

Toledo, Ohio.—The Kirk-Young Mfg. Co. is now the Kirk Mfg. Co.

Westboro, Mass. — Cycle Improvement Co., bicycle pedals, succeeded by Waltham Watch Tool Co.

Westfield, N. J.—The Bard Cycle Co. has purchased the business of the Plainfield Cycle & Sporting Goods Co., on North Avenue, and will continue to handle the same line of goods, with the Keating bicycle as a specialty. The president of the company is George L. Colgate.

Williamsport, Pa —The Tivy Cycle Mfg. Co., whose plant on Walnut Street, just north of Third. is much too small to accommodate their growing business, will erect on the present site a handsome four-story building, equipped with the most modern machinery for the manufacture of bicycles. L. Maxwell, the manager, has received a number of tempting offers to locate in other nearby cities, but having secured the present building and ground for a nominal sum, he has decided to remain in Williamsport. The Tivy bicycle plant was one of the busiest workshops in the city the past summer, giving employment to a day and night force for many weeks. The material for the new building will be of iron or brick. Work will begin at once.

Recent Embarrassments.

Boston, Mass.—B. B. Emery & Co., bicycles, reported application to force into bankruptcy.

Buffalo, N. Y. — Finn & Sullivan, bicycles, advertised to be sold out by sheriff.

Clinton, Ont.—T. L. Brown, bicycles, reported to have made an assignment.

Derby, Conn.— P. P. Francis. harness and bicycles, reported to have made an assignment.

LaPorte, Ind.—The Allen Mfg. Co., makers of bicycles and operators of a large plant within the walls of the Northern Indiana prison, A. S. Nichols, appointed receiver.

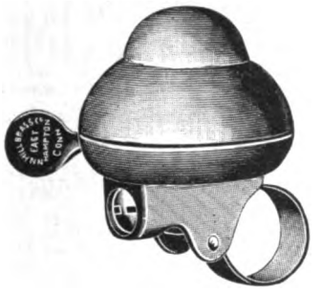
Newark, N. J.—The Beck Bicycle Saddle Co., Oscar Keen, appointed receiver. The assets of the concern are placed at $36,000 and the liabilities at $34.000.

Philadelphia, Pa. —Columbia Tube Co., manufacturers bicycle tubing, reported to have made an assignment.

Toledo, Ohio.—The Toledo Brazed Fork & Tube Co., receiver's sale advertised.

Recent Fires.

Moorhead, Minn. — J. E. Johnson, bicycles, etc., destroyed by fire.



Washington, D, C.—Lee & Woods, bicycle repair shop, No. 467 Florida Avenue, N. W., slightly damaged by fire.

Windsor, N. S.—N. E. Davidson & Son, boots, shoes and bicycle repair shop, Gerrish Street, destroyed by fire.

CHARLES WEILAND,

149 CHAMBERS ST., NEW YORK.

I HAVE just purchased by chance, the greatest lot of first-quality Axes and Hatchets ever offered. They will be labelled with my special label, "H. J. Brown." I cannot use the manufacturer's name, as the prices I am offering the goods at would hurt the market for these goods forever. Below you will be convinced that if I was to offer the Axes together with the reputation they have, I would surely ruin a manufacturer.

I bought this lot of goods for cash, and therefore can offer them at such a reduced price. You will also find that I am offering a great many other goods at sacrifice prices, which I have purchased by chance, at auction, and in the job lot way. I am working at a Fall Catalogue of a full line of goods I carry. This will be ready in about 10 days.

If you wish any of the bargains offered, send your order at once.

Single Bitted Axes, 1st Quality, made by one of the best makers, labelled H. J. Brown & Co. Black Painted. Assorted kinds and assorted weights.

H. J. BROWN & CO.'S S. B. AXES—1sts.

"Replies From All Sections."

McIntosh-Huntington Co., Cleveland, Ohio. [*General Hardware and Bicycles*]: As an advertising medium, we have recently had occasion to test HARDWARE in a manner that would give us some idea as to how successful it can be used. Our advertisement did not occupy a very prominent position, but was of a character to excite the cupidity of the reader. We found that within two days after your paper came out, we commenced to receive replies from all sections of the country to the advertisement. This would seem to be sufficient proof that yours is a good medium.

PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

CRONK'S

Combination Fencing Plier.

This newly invented fencing tool is needed by all people that build or have occasion to remove or repair wire fence, as it is made with two staple pullers, two hammers and two button cutters. They are the same heft as the 1½ Maydole Hammer, and they are made of forged tool steel. No good farmer will be without one. They are warranted to cut No. 8 hard or No. 6 soft wire. Like the celebrated Cronk Plier they are fully warranted in all respects. No. 12, 11 in. long, $12.00. Dis. . . .

THE BEST BARGAIN IS THE ARTICLE THAT SELLS BEST!

FLYER SCREENS STAY TOGETHER AND EVERY SCREEN WORKS WELL.

Should you conclude that you want *Value* for your money you are invited to investigate PHILLIPS SCREENS.

Low prices are nice, but it's still nicer to get value for your money.

Don't get so crazy for that low price (that inside price that no one else gets) that you lose sight of what you are paying for.

Many who stop to consider that they are buying Screen Goods to sell again and who find it pays to please their customers prefer Phillips goods because

PHILLIPS SCREENS ARE RELIABLE.

There may be

"A HOT TIME IN THE OLD TOWN TO-NIGHT"

but you seldom get more value than you pay for in silver, wheat or screens. Nevertheless,

PHILLIPS PRICES ARE LOWEST, values considered.

Send for our new Catalogue.

To Bicycle Riders.

WE MAKE OUR TUBE OF FIFTY CARBON STEEL

Because a Tube like this of our .50% CARBON STEEL Is just as strong as a Tube like this of .25% CARBON STEEL

While weight for weight in a Bicycle our FIFTY CARBON Steel will last so long [redacted]

and TWENTY-FIVE CARBON Steel will last only so long [redacted]

NOTE THE FULL IMPORT OF THE PARALLEL LINES.

The comparison which they graphically make indicates the result of the prolonged investigations of the most practical experts of the world.

That the tests in our own laboratory coroborate these results is merely so much to its credit; that the same is true of actual trial on the road equally proves the trial to have been made in bicycles of correct design and construction. THE FACT REMAINS.

The margin of safety is greatly increased by the use of this tube. Every bicycle manufacturer should use it; every dealer should insist on having it; every rider should demand it. Send for catalogue.

THE FULTON SIGN and PRICE MARKERS

Are the best, most complete and cheapest outfits for Business men to make their own Show and Price Cards, to print Shelf Labels, mark Boxes, Barrels, etc., etc. There is in fact no business where they cannot be used to advantage. Newspapers are using them for their Bulletin Boards, Ministers for Church Notices. Theatres for Announcements, Restaurants for Bills of Fare, etc. Their price in comparison to their usefulness amounts to almost nothing; it saves the cost of Sign Painters and Ticket Writers. A Boy can do all the lettering required in the largest Department Store. They last a lifetime and can be used for every language. We have

50 DIFFERENT STYLES

to select from in sizes from ½ to 4-inch letters. For marking Boxes and Barrels for shipping, or labels, they are far superior to adjustable stencils; the work is done quicker and neater and without blurring, making it look as if printed on a printing press. Nearly 100,000 sets of the **Fulton Sign Marker** have been sold, and they are in use daily by all large wholesale and retail business houses in the United States. Goods can be bought direct from us, or through your nearest wholesale house. Complete catalogues in English and Spanish sent free. Address

THE FULTON STAMP WORKS, **22 Beekman Street, NEW YORK.**

"SATISFACTORY RESULTS ON INVESTMENT."

Aladdin Lamp Co., Newark, N. J. [*Bicycle Lamps*]: We think that the Hardware trade is one of the best to handle the side line of bicycles and bicycle sundries, as it seems to be in perfect keeping with the other lines of goods which are kept in stock. We are also of the opinion that the trade will, in time, be controlled by a very few exclusive stores, and a large number of Hardware and carriage warehouses, where the bicycle can be sold at a legitimate price as a side line. Regarding HARDWARE it has always given us satisfactory results on investment made.

RATCHET STOP
For Micrometer Calipers.

Patented Nov. 6, 1894.

For Micrometer Calipers with Ratchet Stop add 50 cents to the regular price.

The Ratchet Stop can be furnished with any of our Micrometer Calipers. It is found convenient where a number of measurements have to be quickly taken, as it enables the objects measured to be subjected to the same degree of pressure.

If more than a certain degree of pressure is exerted the ratchet will slip by the pawl and prevent the turning of the measuring spindle. In opening the tool, the pawl positively engages the ratchet so that it cannot slip by, thus making the Ratchet Stop positive in its return. The ratchet and pawl are hardened.

ANY DEALER knows that a Stove Polish which other manufacturers try to imitate, is the Polish for him to sell. The enormous sale of

Enameline
The Modern **Stove Polish**

Proves that dealers are friendly to it, and that consumers will accept no substitute for ENAMELINE. Why? Because it's

"A Good Medium for Advertising."

Edw. K. Tryon, Jr., & Co., Philadelphia, Pa. [*Bicycles, Fire Arms, Sporting Goods*]: We consider the Hardware dealers as the legitimate and best class of trade to handle bicycles, and as HARDWARE reaches a great number of them we consider it a good medium for advertising this line. We think that sooner or later the bicycle business will be done almost exclusively through the Hardware trade, and in order to keep our line continually before them we shall continue to advertise in your columns.

A GOOD THING.

IT'S IN THE TEETH.

The Patent "REFORM" Curry Comb is composed of three shallow, oval trays, with corrugated edges. The parts are struck up from a fine grade of cold rolled steel, heavily tinned and bronze lacquered, firmly riveted together and warranted not to rust. The outer dimensions are 6½x4¼ inches and by reason of the large cleaning surface and peculiar arrangement of teeth, the comb will do its work with a large saving of time and labor, cleaning with equal thoroughness both long and short coats. There are no places to accumulate hair and it will not tear or injure the brush, the comb being quickly freed from accumulation by giving its face a gentle tap.

HARDWARE

VOL. XVI. NOVEMBER 25, 1897. NO. 4.

HARDWARE is a Review of the American Hardware Market, specially devoted to the Retail Trade. Published the 10th and 25th of each month, by the HARDWARE PUBLISHING CO., No. 148 CHAMBERS ST., NEW YORK.

BRANCH OFFICES: CHICAGO, - No. 1142 MONADNOCK BLOCK. BOSTON, - - No. 33 EQUITABLE BUILDING. CINCINNATI, No. 103 LINCOLN INN COURT BLDG.

Subscription, $1.00 per year. Subscription, Foreign, $1.50 per year.

JAMES H. KENNEDY, Editor and Manager.
HENRY HOPKINS, - - Associate Editor.
FRANK REIFSNIDER, - Western Manager.

The Circulation of "Hardware" is Larger Than That of Any Other Paper in the United States Devoted to the Hardware Trade.

Editorial Trade Review.

The holiday trade sets in early and bids fair for this season to be of more importance than for several years. The increased employment at good wages given the workers in the various divisions of labor, and the prosperous conditions felt by everyone to be underlying the plans of the future, have a tendency to respond liberally to the wish for holiday expenditure, and make possible the acquisition of some household convenience, or personal adornment, for which the present time is an appropriate season to entertain purchasing. By comparison with a year ago the times are infinitely better and more promising of certain results, even if the business man's extremely sanguine views with which the year commenced have failed to reach the most important achievement he had pictured.

Business since election has been more encouraging in its character than the fortnight before, showing that the excitement attending political campaigns, even in unimportant years, exerts an unhealthy influence in retarding trade; more attention being paid to the all pervading political agitation than to the demands of activity and application in material improvements.

With the prospect ahead of an unprecedented year for business in 1898, it is noticeable in many lines that movements are being inaugurated, having for their object the combination of leading manufacturers in order to control the output and prices on their various industries. This is done to prevent the cut-throat business which senseless competition invariably engenders, when a competitor's quotations and not conditions of cost form the basis of the bidding for business. The coming month will no doubt be full of these reports, some founded on fact, like that of the "Granite Ware" manufacturers, and others full of the desire to accomplish, but "letting I dare not wait upon I would, like the cat in the adage."

There is a movement among the jobbers of the West for the restoration of the charges for package and cartage, formerly the custom until a few years ago, when a leading house in Chicago decided to abandon it. It is a well-understood fact the retailer pays it in some other form, without feeling it so palpably as if made an itemized charge; but the close competition on many goods has made comparisons unfavorable when even this small percentage is added to an ascertained net cost. The old dealers will eventually decide it is better to make a specified charge as previously obtained, but will agree upon charging the cases and cartage at actual cost, and not endeavor to make the expense of shipping goods bear a proportion of profit out of all proportion to the goods sold, the close margin of profit on which is too well known to be made a subject of discussion by the retailer.

The money market keeps in a very easy condition. The arrangements in regard to the large payments on account of the Union Pacific syndicate were so conveniently attended to no disturbance of the money market resulted therefrom, and the New York loan market finds the supply of funds abundant, with no chance for a squeeze in rates, which it was at first feared would ensue.

The increase in the net earnings for 126 railroads during 1897 are such that compared with 1896 they show a net gain of nearly 11½ per cent. Twenty-six railroads of the number, during eleven months, show increased earnings reaching to $17,345,000. The three principal ones averaging over $2,000,000 each, shows only too plainly the prosperity of a state of affairs which sheds its sunshine over the future in no uncertain manner.

Solving the Problem of Prison Labor.

It is gratifying to find, from the statement made by Gen. Austin Lathrop, the superintendent of State prisons, that the present system of prison labor in New York is an undoubted success. The State prisons have been made self-supporting and the labors of the convicts actually made profitable by the production of supplies needed by the various institutions of the State, worth at selling prices $750,000. These goods were able to be sold by the prison authorities to the institutions needing the same at lower prices than they could be obtained for outside, so these institutions also can show a financial saving in expenses by the adoption of this wise and economic law.

This system, as may be remembered, was put in force in accordance with the provisions of an act, which was passed last year, in pursuance of a provision in the constitution of 1894, prohibiting the sale in the open market of goods made in prison. This law, which went into effect on January 1st of this year, provided that all State institutions, departments and political divisions should purchase all supplies and articles of equipment from the various prisons if it were possible to manufacture such articles there. It is gratifying to know the demand was one sufficient to keep all the convicts employed, and at the same time the prisons are able to show during eleven months a profit of $150,000 above the actual cost of manufacture, which profit, instead of, as previously, reaching the pockets of the contractors, will be credited to the taxpayers of the State.

The working of this wise provision permits the train-

Digitized by Google

ing of the convicts in the trades they pursue while in prison, and, as we argued before in these columns when the subject was one of general discussion, thereby increased the chances of the discharged convict in finding honorable employment, if so inclined, and becoming a self-supporting and law-abiding citizen. As has been truly said, 'a single convict restored to decent life, or a single young man saved from a life of crime, far more than offsets all the possible harm done by the competition of prison labor with free labor."

Is a Trade Winner.

The Merchants' Association, whose good work has been referred to before in these pages, have issued a summary from the registers kept in headquarters, showing the number of merchants who have visited the Association from August 9th to the present date, together with the number registered from each State, and from places outside of the United States. This shows that forty-nine States and Territories have been represented by these visitors. The executive officers of the Association announce that the campaign for the Spring trade will be waged even more actively than has been possible during the present Fall. The results must, of necessity, be of benefit not only to the trade of New York, but to merchants all over the United States, who certainly can benefit themselves and their business houses by a personal inspection of this market. At present, the list of resident members is something above 1100, while there are more than 26,000 names on the non-resident list. The list further shows that there were a number of visitors from Bermuda, one from Honolulu, one from Mexico, and a number from New Brunswick and Nova Scotia. The largest number of visitors from one State was, of course, from New York, with Ohio second, and Pennsylvania third. This Association was founded upon business principles, and has been conducted in a business-like manner, and its success during 1898 should be even beyond that of the present year.

Hardwaremen and Holiday Trade.

A passing reference to the fact that Hardware dealers are each year paying more and more attention to the holiday trade, found in one of our market letters elsewhere in this issue, suggests a point that is well worth careful consideration. Why should not the store of the Hardware dealer, both in the large cities and smaller country towns, become one of the chief points for the sale of holiday goods? The thousand and one artistic forms in which articles of Hardware and house-furnishing are manufactured, are as attractive as anything that can be found in the jewelry or the dry-goods store, and certainly no more useful line of presents can be found. In these days, when the modern Hardware store vies with those in other lines of business in the neatness of the store and the artistic method by which goods are displayed, there is no reason in the world why a special endeavor should not be made to catch the trade of the holiday buyer. A special window displayed about the first of December and afterwards, would certainly attract attention, not only to the general line of goods offered for sale but also to those which have a special bearing upon the Christmas season. We know of dealers who have made it pay them very well indeed, for all the trouble and money expended in pushing holiday goods, and letting people know that they are specially in the market with an attractive line of useful and ornamental goods.

The Annual Gathering, at Buffalo.

We believe that every reader of *Hardware* will decide, that the pages given in this issue to a full report of the annual gathering of the National Hardware Association, at Buffalo, are used to the best possible advantage. A great organization, which practically takes in the entire jobbing trade of the country, is too potent a factor in the Hardware business of America, and of the world, to be lightly regarded, or quietly dismissed. The recent convention at Buffalo was, in point of actual value to the trade, and of especial value to its members, equal in all respects to those successful gatherings which have been held heretofore. The affair was made signally successful by the labors of the entertainment committee, consisting of members of the Hardware trade of Buffalo, and of New York State generally, and we are certain that no one who was present will withhold the meed of praise to these enterprising and hospitable gentlemen. The next session will be held in Milwaukee, Wis., in the fall of 1898, and will probably demonstrate to the great Northwest, as already has been to the Middle and Eastern States, that the Hardware jobbers of America are a live and enterprising body of business men, and that they know how to create and maintain a national organization, that is a model of its kind.

New Members Hardware Club.

At a meeting of the board of governors of the Hardware Club of New York, held on November 11th, the following gentlemen were unanimously elected to membership:

L. V. Walkley, No. 26 Cortlandt Street.
Frederick W. Barker, No. 253 Broadway.
C. L. Burger, No. 253 Broadway.
W. E. Skinner, Temple Court Building.
Geo. S Brownell, No. 445 Pearl Street.

Hereafter in New York State all blacksmiths and horseshoers in cities of over 50 inhabitants must have a license granted by a board, the majority of whom are practical horseshoers.

Why Some Men Fail.

The shores of the commercial waters are strewn with many wrecks. It always has been so, and will continue the same down to the end of time. Of the many who embark, but few attain to the haven of competency or fortune.

Lack of capital is credited with many disastrous endings of a business career. 'Tis true that this is a great hindrance to the making of success, but the history of finance gives us many names of men who have made illustrious successes and achieved great fortunes without its aid. They began with no money, and by perseverance, foresight and industry, accumulated capital and proved that real merit always wins. On the other hand, firms with ample capital for their needs gradually get poorer and poorer, until some day the red flag of the auctioneer floats from the door.

Incompetence is responsible for many failures in business. Men who should have stronger minds and more matured judgment to give them direction, by dint of economy lay by a few hundred dollars, and because they think it is more honorable to be in business than to serve another man, they attempt what nature never intended them for, and as a result they are compelled to give up the race, and again seek a position with perhaps their former employer.

Some men make excellent clerks. They are honest, reliable and industrious, but are lacking in executive ability and the qualities necessary for the management of details. They are all right if they have some one to plan the campaign. They can then carry it out, but they are entirely at sea when compelled to depend upon their own resources.

Laziness causes many a man to miss that success which he might obtain were he alert. Many men start well, and make some progress, but as they see things going along smoothly, they think they can now "take it easy," and so leave the management of their stores to irresponsible clerks while they go on a hunting or a fishing trip, or spend many hours loafing around hotels when they should be behind their own counters.

A man cannot make a business success in this way, and he will be surprised to see how his trade is drifting away from him.

A man to succeed in these days of keenest competition, must work hard. He must have a constant oversight upon the minutest details of the business, and though he may not perform every task himself, he should know that it has been done properly by his subordinates.

Extravagance ruins many a man who otherwise might have achieved fortune. Young men on a salary are contented and save a portion of it. Bnt when these same men start in business, they are not content with their former pay. They fail to realize that in its initial stages every dollar left in the business is worth more than two dollars when a business is fully established.

They think because much money passes through their hands, that it belongs to them, and they spend it too lavishly in consequence. They have not sufficient self-control to bind themselves down to small wages, but think now that they are proprietors, that they are at liberty to spend more than when they were working for another man. This is a fatal mistake that many men make. They should consider themselves merely as servants of the business, and though they may earn more than formerly, and be entitled to more wages, yet the business, to get on firm footing, needs every possible dollar left in it. If they have the necessary foresight, they must know that by such a process, if they have sufficient patience, in a few years they can with safety use more for personal expenses.

Again, many men fail because they are not satisfied with a moderate success. They embark in business, and by economy and hard work they add considerably to their capital. They earn a good living and a comfortable surplus besides; but they are not satisfied with their profits, and think if they could branch out more and do a larger business, they would soon become rich. Instead of making slow but sure progress, they wish to achieve the success of older men at a bound. They are not content to plod slowly up prosperity's hillside, but must take the fast express to the goal of their ambition.

A case recently came within my notice. A young man had saved up a few hundred dollars, and with assistance from an uncle, opened a small store. He understood his trade, had a good location, and for a year or two made some progress. He worked hard, and his expenses were light. But his success unbalanced his judgment, and he launched out into larger quarters and made an extra push for a big trade.

But his expenses were very much augmented, and he thought he needed more spending money for himself, but only a year or two showed him he had made a mistake, and now he is clerking again.

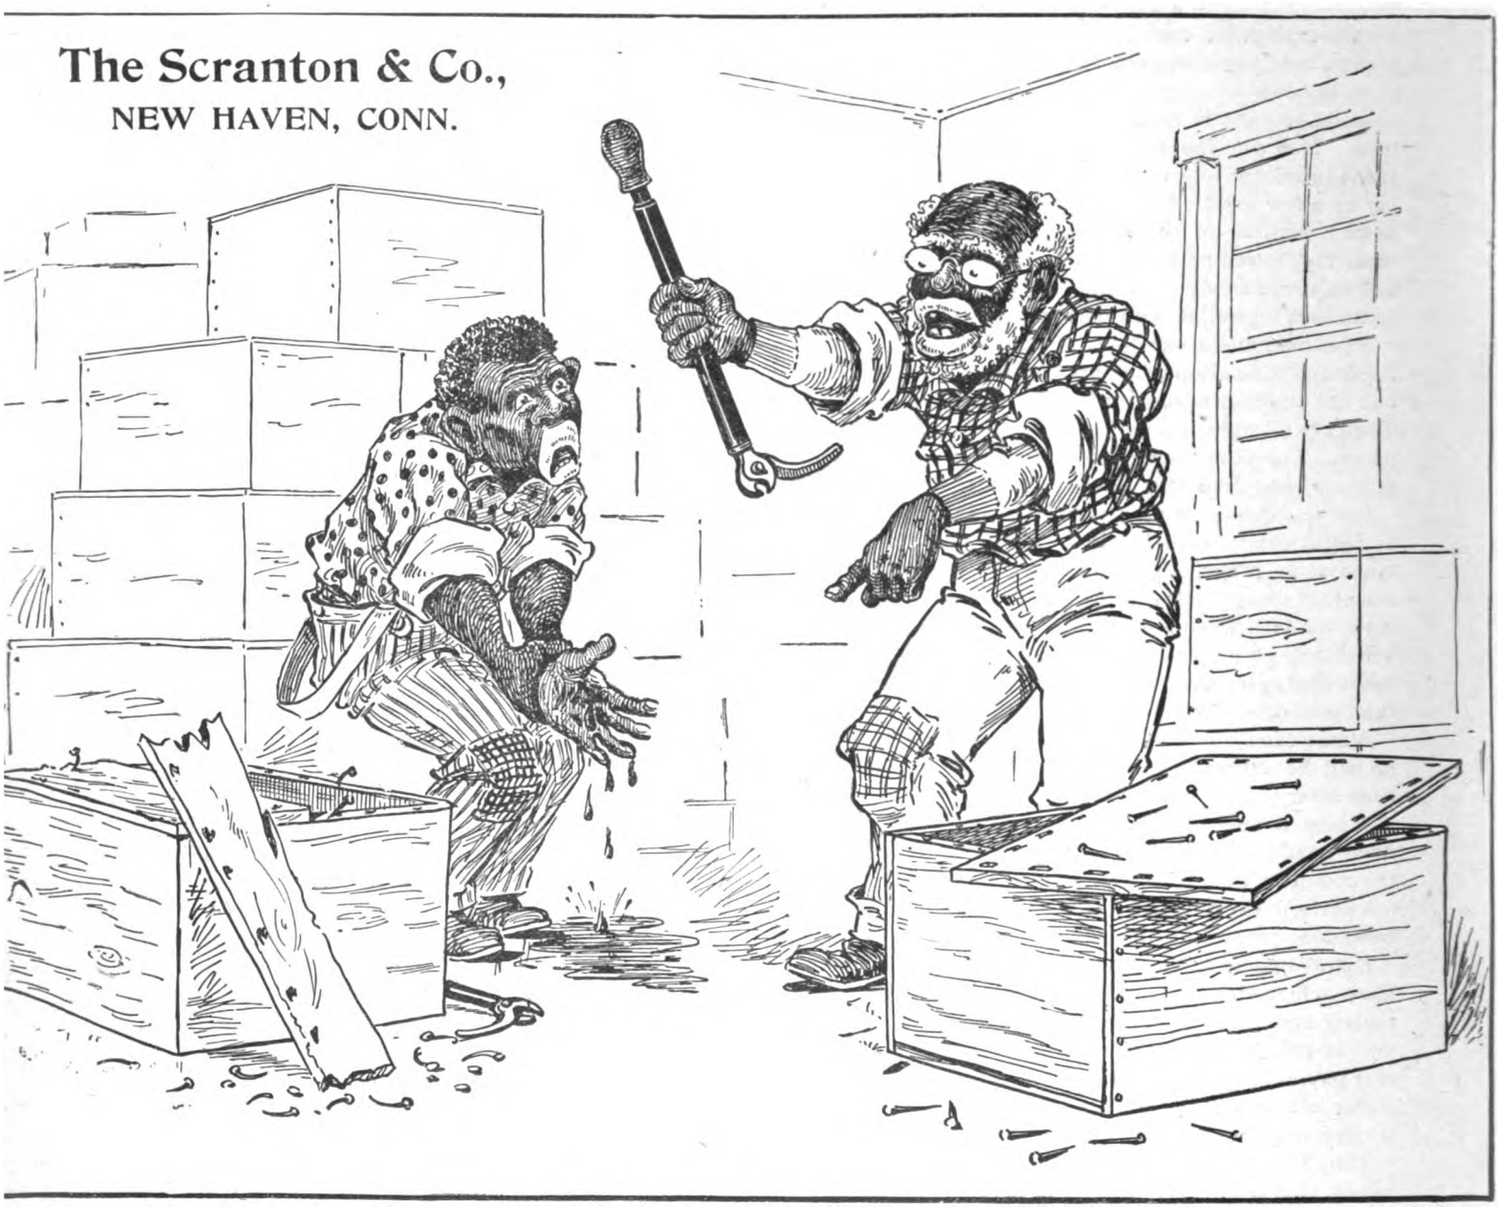
Had he been content to work along in a small way for a few years, with a small expense account, his success would have been assured. LYLE MERTON.

No Luck in Horse-shoes.

There is a truck-driver on Greenwich Street, in this city, who stands ready to demolish any man who attempts to persuade him that horse-shoes are lucky. He started up street the other day with a load of discarded horse-shoes, which were to be delivered to a junk shop in the neighborhood. He was hardly under way when the tail-board of his wagon fell out, and about a bushel of shoes were scattered on the pavement, and in picking these up, one of them fell upon his foot and injured him so that he limped for a week. While he was reloading, a rapidly driven car came down the street, and struck the rim of his wheel, demolishing two spokes, and he had hardly unloaded and started for home, before his horse took fright and ran away, demolishing his wagon and nearly killing him in the bargain by throwing him against a pillar of the elevated road. On reaching home he found three of the children sick with the measles.

The special electric locomotive now being tried on the Western Railway of France is past the experimental stage. The first locomotive of the type built was described some time ago. The new engine recently completed weighs 115 tons, excluding the tender, which can carry 20 tons of water, and has drawn a train weighing 355 tons at a speed of 62½ miles an hour over an ordinarily heavy road. There are eight motors and a corresponding number of pairs of wheels, and each of these motors actually gives 100-horse power generated by two dynamos of 1000 amperes at 450 volts. These electric generators have been constructed by Willans & Robinson. The locomotive is 93 feet long over all, and 9 feet wide, the chimney being 13 feet 9 inches above the rail level.

The very taking card of the Ferrosteel Co., Cleveland, Ohio, on page 75 of this issue is in illustration of the quality of their No. 20 iron, which was illustrated and described in our column of specialties in the issue last preceding. This iron is being very well received with the jobbing trade, and can be sold by retailers at $1.25 per set, and at this price ought to find a ready market.



Information was given out in Philadelphia, recently, that the Imperial Japanese Government had just contracted with the Illinois Steel Co. for 26,000 tons of steel rails and fastenings. These rails are to be of the Pennsylvania Railroad standard and seventy-pound section.

Don't get stuck with unknown brands of stove polish; sell Enameline.

Scranton Nail Pullers.

Sometimes a sermon can be preached far more effectually by an appeal to the eye, than by an attempt to reach the heart or the judgment through some other medium. The young colored gentleman, whose justified expletive we see in connection with the expressive picture shown in this connection, is learning a very valuable lesson—which is that the cheapest is very often the costliest in the long run. The scene here depicted is doubtless familiar to anyone who has spent any length of time in a shipping room, and the illustration which is pictured, teaches that trouble of this character could be obviated by the use of the Scranton

YOUNG MOSE: "DAMN!!"
OLD EPH: "DEMS YOU JUST DISERTS. DID'N I TOLE YOU CONSIDERABLE DAYS AGO TO GO FROW AWAY DAT OLE PULLER AN BUY ONE OB DEM SCRANTON NAIL PULLERS WHAT CANT HURT DE HAN, LEAVES DE NAIL STRAIGHT AND WILL LAST TIL DE TRUMPETS BLOWN?"

Improved Nail Pullers. These nail pullers are manufactured by The Scranton & Co., New Haven, Conn., and sold through J. C. McCarty & Co., No. 10 Warren Street, New York, as selling agents. They are constructed of material most suited to the purpose, and of designs which have proved entirely satisfactory. They are built in two designs and three sizes.

The Scranton & Co. have for years successfully manufactured Nail Pullers, and are now prepared with increased facilities, to furnish them in any quantities. They would be pleased to have all parties interested in the sale of these goods apply to J. C. McCarty & Co., No. 10 Warren Street, New York, for latest circulars and prices.

Mr. Connors Enlarging.

Information comes from Troy, N. Y., of an important purchase made by William Connors, the well-known manufacturer of paints, etc., of that city. He has come into possession of the Olympic mill on River Street, which is one of the best manufacturing sites in Troy, having two large water-wheels of 150-horse-power each. Mr. Connors proposes to remodel the present building and equip it especially for the manufacture of American Seal paint, and erect a separate building, which will be used exclusively for the grinding of dry colors. The machinery to be used in operating this plant will be entirely new, of which Mr. Connors is the sole owner and patentee. His method not only reduces the cost of production, but makes a much better article than can be produced by the present means. This extensive improvement is actuated by the steadily increasing demand for American Seal paints, and when completed will be one of the finest plants of its kind in this country. It will be five stories high, with a frontage on River Street of 123 feet, running back to the river about 100 feet. Plans are now under way and work will be begun at once and must be completed before March 1st.

Money dammed up by the father often drowns the son.—*Hardware and Metal Reporter.*

Ready Made Advertising for Customers.

Sargent & Co., New York, and New Haven, Conn., are doing good work for dealers handling their specialties by distributing in pamphlet form proofs of a number of electrotypes they have prepared, in a handsome and artistic manner, expressly for use as advertisements by their customers. They are all numbered for convenience in selection, and are furnished by Sargent & Co. gratuitously for the purpose of exploiting the "Eclipse Door Check and Spring," the season for the sale of which being close at hand. They vary in size from a two-inch single column, up to and including 6¼ inches double column. We present in the course of this article several of the smaller sizes, and where the customer prefers using wording of his own, any of the cuts necessary for advertising the "Eclipse"—illustrations of which are also contained in this pamphlet—will be furnished free of charge. This method of assisting publicity, by helping the dealers do justice to seasonable specialties in their local advertising, is on advanced lines and worthy of imitation.

No. 6. 2 inch Single Column.

No. 1. 2 inch Single Column.

No. 31. 4 inch Single Column.

Awards at the Brussels Exposition.

All manufacturers of machinery and users of the same, will be interested in the list of awards made at the Brussels Exposition in the section of Machine Tools, and we accordingly give the same in detail as follows:

1st—The "Grand Prix," or highest possible distinction, was awarded to but three concerns, one foreign and two American: Brown & Sharpe Mfg. Co., Providence, R. I.; The Pratt & Whitney Co., Hartford, Conn.; Le Progres Industriel, Brussels, Belgium.

2d.—The Gold Medal, or next to the highest distinction, was awarded to eight foreign and nine American competitors: Cincinnati Milling Machine Co., Cincinnati, Ohio; Gould & Eberhardt, Newark, N. J.; G. A. Gray Co., Cincinnati, Ohio; J. Becker Mfg. Co., Fitchburg, Mass.; Morse Twist Drill & Machine Co., New Bedford, Mass.; Norton Emery Wheel Co., Worcester, Mass.; Prentice Bros., Worcester, Mass.; Bullard Machine Tool Co., Bridgeport, Conn.; Warner & Swasey, Cleveland, Ohio.

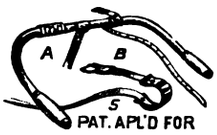
3d—The Silver Medal was awarded to eight foreign and nine American competitors: Acme Machinery Co., Cleveland, Ohio; W. F. & J. Barnes, Rockford, Ill.; Bickford Drill & Tool Co., Cincinnati, Ohio; Bradford Mill Co., Cincinnati, Ohio; Gisholt Machine Co., Madison, Wis.; Landis Bros., Waynesboro, Pa.; F. E. Reed Co., Worcester, Mass.; Bradley Co., Syracuse, N. Y.; Hendey Machine Co., Torrington, Conn.

4th—The Bronze Medal was awarded to four American competitors: D'Amour & Littledale, New York City; Dwight Slate Machine Co., Hartford, Conn.; Hurlbut Rogers Machine Co., South Sudbury, Mass.; L. S. Starrett Co., Athol, Mass.

The Brown-Lewis Cycle Co.

Among the most widely known of bicycle dealers is the Brown-Lewis Cycle Co., of Chicago, Ill., and the very large business which they have built up during the past few years is but another proof of the old adage that "honesty is the best policy," and shows that fair dealing is bound to win against any kind of competition. They took a long step in the lead when they originated the plan of shipping bicycles anywhere on the continent, subject to full examination and approval before acceptance, trusting wholly to the public's appreciation of a good thing at the right price. Their line is one of the most complete in America, embracing machines of all grades, at prices within the reach of every one. Just now, they are advertising some very remarkable Fall bargains to sell out this year's stock, in order to make room for 1898 models, which will soon be on the market. They state that satisfaction is guaranteed in all purchases, and any who desire anything in their line will do well to correspond with them.

The deepest shaft in the United Kingdom is said to be that of the Ashton Moss Colliery, near Manchester. It is 2880 feet from the surface to the bottom. The seams dip at the rate of 9 inches per yard. The greatest vertical depth attained is at the Pendleton Colliery, near Manchester. This pit has an incline of 1 in 3, which has been sunk 4700 feet from the bottom of the shaft, which is 1575 feet deep. The greatest vertical depth is therefore 3474 feet.—*Exchange.*



The hardest things that can be said againt a competitor are too soft and weak to be used as business building material.

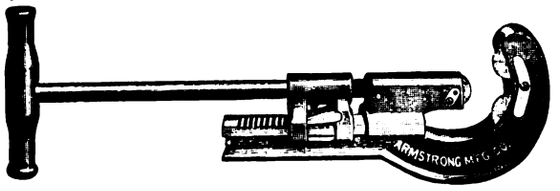
NEW GOODS AND SPECIALTIES.

Phœnix Bicycle Luggage Carrier.

The little illgstration shown herewith, is of the Phœnix Bicycle Luggage Carrier, manufactured by N. H. Benjamin & Co., Phœnixville, Pa. This Carrier is a strap of 26 inches

in length, made of very strong and finely finished russet leather. The spring which clasps over the handle-bar of a bicycle, is made of tempered steel, nickel-plated. The buckle is also nickel-plated, and each pair is packed in a box, which has a sliding telescope lid. This Carrier can be fastened to the bar at any point that may be desired, the spring holding the strap rigid. The weight is but one and a half ounces per pair, and the Carrier can be adjusted or taken off in an instant. They retail at 25 cents per pair.



The Star Truck.

We present in this connection an illustration of the Star Truck that is being manufactured and placed upon the market by the Boston & Lockport Block Co., No. 142 Commercial Street, Boston, Mass. It is shown that this truck will handle with equal facility large and small boxes, kegs, tubs, or barrels of any size. The iron points at the bottom are sharp and cannot slip, while the hook shown above the cross slat slides readily up or down in the slot in the handle, adjusting itself to the height of the article to be moved. It is made of selected ash with steel axle, cast wheels 3¼ in. diameter, and is strongly built every way. The manufacturers further state that it is just the thing for use in general stores, etc., and that anybody interested in this line of goods should send for a sample order, and prove this fact for himself.

A New Armstrong Pipe Cutter.

The illustration shown here is of an improved form of the well-known No. 3 Pipe Cutter, manufactured by the Armstrong Mfg. Co. This tool, it is claimed, is "the strongest and most rapid working pipe cutter on the market, and it is also the cheapest; this by reason of its taking a larger range of pipe than any tool known that is made

for a like purpose, viz: from 1½ inches to 4 inches inclusive." The change from the smallest to the largest size is made by simply raising a pawl and allowing the hooked bar to slide outward. To change to a smaller size, the hooked bar is pushed in to the required size, when it is ready to cut. The thread on the handle is only used to follow up the cut as the cutter is revolved about the pipe. This cutter may be changed from a three-wheel to a one-wheel cutter by simply substituting rollers in place of the two cutter wheels at the end of the hooked bar. Full information will be furnished our readers upon application either to the home office of the Armstrong Mfg. Co., at Bridgeport, Conn., or No. 139 Centre Street, New York city.

Self-Oiling Hangers.

J. K. Williams, Akron, Ohio, is placing upon the market with no small degree of success, a line of Self-Oiling Hang-

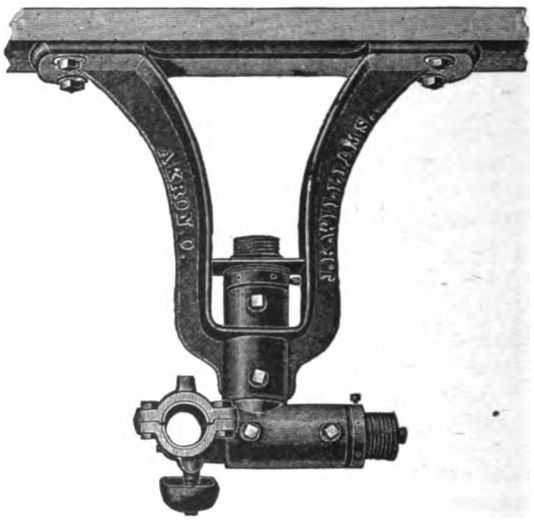


FIG. 1.—SELF-OILING DROP-HANGER NO. 1.

ers, a good idea of which can be learned from the accompanying illustrations. His Self-Oiling Drop Hanger No. 1 is shown in Fig. 1. In Fig. 2, may be seen his Self-Oiling Post-Hanger, which is adjustable in all directions, and which, in this case, shows a two and one-half-inch hanger, with the center of the shaft fourteen inches from the post.

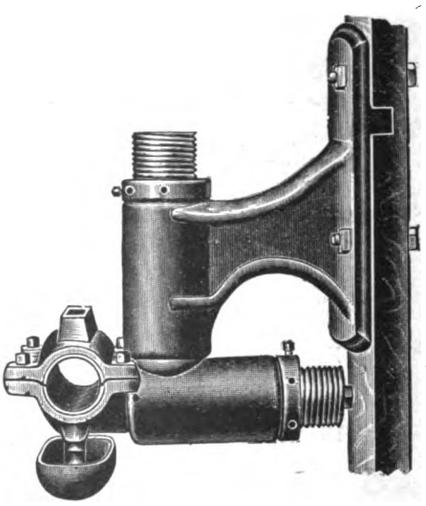

FIG. 2.—SELF-OILING POST-HANGER.

In Fig. 3 is shown the same Self-Oiling Post Hanger, turned, four inches from the center of the shaft to the face of the post. He also makes other varieties of these goods, full information concerning which, with prices, he will send upon application. Mr. Williams states that in offer-

Digitized by Google

ing these hangers to the public, he does it with the consciousness that they fill truly a long-felt want, as they are really adjustable. He has had a great deal of experi-

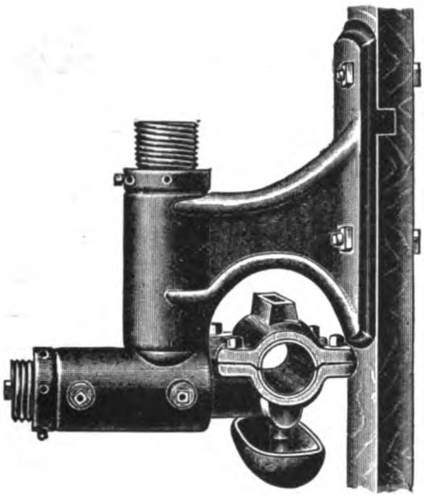

FIG. 3.—SELF-OILING POST-HANGER.

ence in putting up shafting, and declares that for economy and value, no better hangers can be found in the market.

"Queen" Pulleys.

The Queen Sash Balance Co., No. 150 Nassau Street, New York, are placing upon the market the Queen Frame Pulleys, consisting of the Queen Single and Mullion Frame pulleys, which can be used as an overhead pulley, without the necessity on the part of the architect of allowing extra head room when making plans. The single frame pulley is illustrated in Fig. 1. Among the desirable advantages claimed for the Queen pulley, many of which are of great importance, may be mentioned the following: "The Queen pulley can be placed in any window in which the ordinary side pulley can be used. No iron or steel work in any building will interfere in any way with the perfect action of the pulley. No extra space for head room will have to be allowed by architects when specifying the Queen pulley. The construction of this pulley is such that the cord, tape or chain can be applied quicker than with any other overhead pulley. In using the Queen pulley a large amount of pocket room is gained over the side pulley, thus doing away with lead weights and reducing the cost. No grooving of the sash is necessary. The Queen pulley is concealed from view when in use, and the least possible space is left around the pulley, so that air and insects are practically prevented from entering the room in that way. The cord, tape or chain will not leave

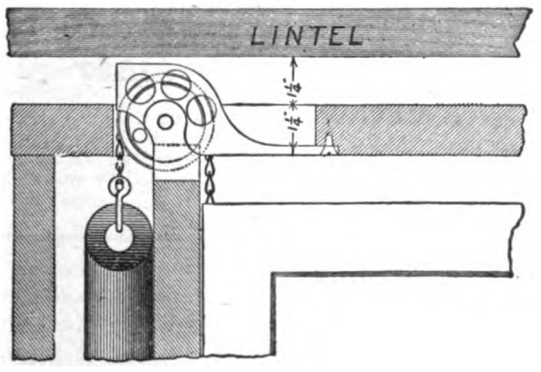

FIG. 1.

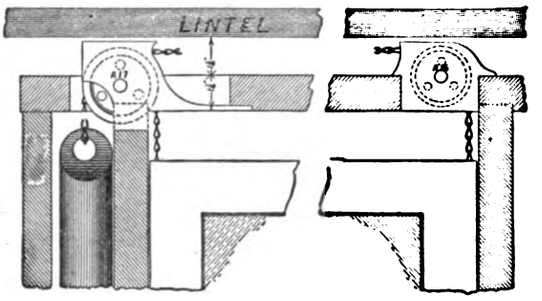
the pulley under any strain or by a sudden jerk. No special tools are required to put the Queen pulley in place. Requires at least one inch less head-room." Fig. 2 illustrates the Queen Mullion Frame Pulley, by the use of which the necessity for a "mullion pocket" in twin windows is entirely done away with. By the aid of the Queen mullion pulley, the sashes are operated by one weight only, the same result being obtained as by the old method of using two weights, at the same time giving from 6 to 8 inches more glass space than would be obtained by the ordinary methods previously in vogue. Particular attention of architects is called to the fact, as shown in illustrations



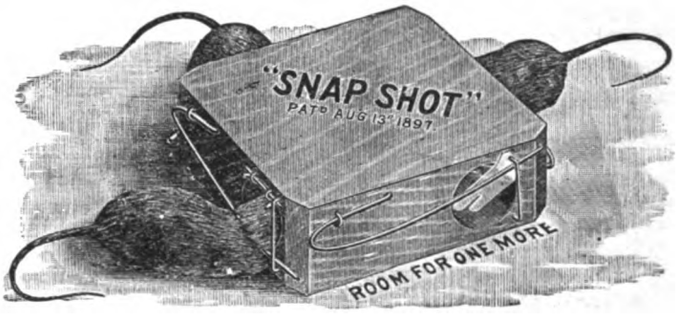


FIG. 2.

above, that the space necessary above window head is only 1¼ inches, or 2½ inches from top of sash. It is claimed that an investigation of their merits by a progressive architect will result in their adoption for the purposes indicated, the wheels, pinions and castings, being made from superior material and constructed with more skill than is usually given to goods of this kind. The company will be pleased to forward a sample pulley to architects upon request.

The "Snap Shot" Mouse Trap.

The Specialty Novelty Co., Lancaster, Pa., Allerton, Clarke Co., No. 79 Reade Street, New York, agents, are placing upon the market, both here and abroad, the Snap Shot Mouse Trap, which is claimed to be the greatest improvement in ordinary every-day mouse traps that has been noted since the war. It possesses patented features that would seem to promise large sales as a novelty of great originality, especially as the prices are so established that it will be possible to sell at five and ten cents respectively the two most salable styles, viz.: the two and four hole varieties. It is constructed in such a way that stepping upon it does not impair its usefulness, and it will, and is calculated to, stand more knocking around and still be found "right side up with care" than any ordinary

trap of similar appearance now on the market. The simplicity in its makeup enables it to be set by lifting the long wire to the top of the hole, where it rests on the small projection on the flap, with no possible danger to the fingers while fixing the bait or setting the wire. The export agent is C. B. Corwin, No. 15 Whitehall Street, New York.

A New Firm of Enamelers.

Walter M. Hall & Co., the senior partner of which new firm was for several years the energetic manager for the Benfield & Milne Mfg. Co., have established themselves in business at No. 89 Fulton Street, this city, a location immediately opposite the old stand. They are now prepared to continue this growing business under more favorable auspices than ever. Enameled lettering for window and special sign advertising has become of wide scope during the past few years and now assumes a trade importance worthy of being cultivated by the Hardware dealer.

THE NATIONAL HARDWARE ASSOCIATION.

The third annual convention of the National Hardware Association was held in Buffalo, N. Y., on November 17th, 18th and 19th, 1897. Formed in Cleveland, Ohio, in 1894, under favoring auspices, and with an initial staff of officers who were in themselves a guarantee of its success, this great organization met in Pittsburg in 1895, again in Philadelphia in 1896, and the present year Buffalo had the honor of being the seat of its deliberations. The gentlemen who are connected with the Hardware business of that city, backed loyally by the jobbers of the great Empire State, played the part of hosts to perfection, and nothing that lay within their power that could contribute to the good work of the Association, or entertainment of its members, was left undone.

A COMPREHENSIVE PROGRAMME

of the occasion had been prepared in advance, under the trained direction of T. James Fernley, at headquarters in Philadelphia, showing in detail the work that had been laid out. The programme in full, with a representation of its initial page, will be found as follows:

OFFICIAL PROGRAMME.

LIST OF OFFICERS AND COMMITTEES

President: William W. Supplee, Philadelphia.

First Vice-President: H. H. Bishop; McIntosh-Huntington Co., Cleveland, Ohio.

Second Vice-President: John Alling; John Alling & Co., Chicago, Ill.

Secretary-Treasurer: T. James Fernley, Philadelphia, Pa.

Executive Committee: F. P. Strong; Farwell, Ozmun, Kirk & Co., St. Paul, Minn. Brace Hayden, New York, N.Y.; Dunham, Carrigan & Hayden Co., San Francisco, Cal. Theodore D. Buhl; Buhl, Sons & Co., Detroit, Mich. Col. Morris B. Belknap; W. B. Belknap & Co., Louisville, Ky. John Bindley; Bindley Hardware Co., Pittsburg, Pa. William Chamberlain; the Emery-Waterhouse Co., Portland, Me.

Membership Committee: H. S. Blossom, Cleveland, Ohio, Chairman. D. C. Delamater, Detroit, Mich.; Rufus K. Hireman, New Orleans, La.; C. L. Reynolds, Los Angeles, Cal.: C. W. Hackett, St. Paul, Minn.; W. M. Glass, Omaha, Neb.; Jos. K. Whipple, Boston, Mass.

Fraternal Relations Committee: Richard W. Shapleigh, St. Louis, Mo., Chairman. George Deming, Cleveland, Ohio; Thomas A. Harvey, Saginaw, Mich.; Cortland Van Camp, Indianapolis, Ind.; Charles M. Biddle, Philadelphia, Pa.; R. M. Dudley, Nashville, Tenn.; A. S. Burwell, Seattle, Wash.

Press Committee: George T. McIntosh, Cleveland, Ohio, Chairman. Charles Kruse, Cincinnati, Ohio; J. H. Fall, Nashville, Tenn.; George A. Braun, Toledo, Ohio; Col. J. R. Nutting, Davenport, Iowa; George B. Logan, Pittsburg, Pa.; W. A. Parker, Atlanta, Ga.

Grievance Committee: J. C. Koch, Milwaukee, Wis., Chairman. Hon. C. B. Lockwood, Cleveland, Ohio; A. C. Rulofson, San Francisco, Cal.; William Quincy Wales, Boston, Mass.; G. R. Vaughn, Mobile, Ala.; George Tritch, Jr., Denver, Col.; J. H. Boucher, Rochester, N. Y.

Transportation Committee: Capt. Frederic Barker, Elmira, N. Y., Chairman. Simeon H. Crane, Chicago, Ill.; F. H. Mason, Spokane, Wash.; Jacquelin S. Holliday, Indianapolis, Ind.; W. E. Newill, Atlanta, Ga.; J. G. Standart, Detroit, Mich.; John B. Varick, Manchester, N. H.

Entertainment Committee: Hobart Weed, Buffalo, N. Y., Chairman. C. Whitney Tillinghast, 2d, Troy, N. Y.; Chas. H. Turner, Albany, N. Y.; Griff D. Palmer, Rochester, N. Y.; Harry Walbridge, Buffalo, N. Y.; John R. Griffith, Philadelphia, Pa.; G. J. Laighton, New York City, N. Y.

Metal Committee: William T. Gummey, Philadelphia, Pa., Chairman. G. W. Herrick, Boston, Mass.; Charles W. Potts, Philadelphia, Pa.; C. W. Hackett, St. Paul, Minn.; H. H. Rudd, Cleveland, Ohio; James M. Horton, Chicago, Ill.; P. E. Strauss, Boston, Mass.

ORDER OF BUSINESS.

Wednesday, November 17th, 9.45 A.M.: Meeting called to order by the president. Chorus, "My Country 'tis of Thee." Calling of roll. Reading of minutes—1896 convention. Annual address of president. Report of secretary-treasurer. Report of executive committee. Report of membership committee. Report of grievance committee. Report of fraternal relations committee. Report of press committee. Report of transportation committee. Report of entertainment committee. Report of metal committee. Introduction of official representatives and communications from Hardware associations: Cleveland Hardware Jobbers' Association, represented by Mr. Lockwood. New England Iron & Hardware Association, represented by A. J. Chase. New York State Hardware Jobbers' Association, represented by Chas. H. Turner, president. Missouri Valley Hardware Jobbers' Association, represented by J. A. Warner, secretary. Southern Hardware Jobbers' Association, represented by J. D. Moore. Pittsburg Hardware Jobbers' Association, represented by W. C. Reitz, president. Pacific Coast Hardware & Metal Association, represented by Brace Hayden. Iowa Hardware Jobbers' Association, represented by J. P. Patrick, president. In-

Digitized by Google

dianapolis Hardware Jobbers' Association, represented by Cortland Van Camp, president. Nashville Hardware Jobbers' Association; Cincinnati Hardware Jobbers' Association; Portland (Maine) Hardware Jobbers' Association; Detroit Hardware Jobbers' Association, represented by C. T. Fletcher, president. Hardware Merchants & Manufacturers Association of Philadelphia, represented by James H. Ritter, vice-president. National Hardware Association of Great Britain, communication from Hon. Thos. F. G. Coates, Honorable Secretary. Communications. Miscellaneous business.

Afternoon Session, 2 P.M.: Reading of papers: "Importance of each Jobbing House having a minimum selling price," J. T. Jenkins, of Gray-Dudley Hardware Co., Nashville, Tenn.; Leon C. Carter, of Dana Hardware Co., Boston, Mass. Discussion. Opening of question box. Answers and discussions. Miscellaneous business.

Nine to 11.55 P.M.: Smoker at Ellicott Club.

Thursday, November 18th: Miscellaneous business. Opening of question box. Answers and discussions. Miscellaneous business.

Afternoon Session: Miscellaneous business. Reading of papers: "What is the Proper Medium Through which Hardware should be distributed?" D. C. Delamater, of Freeman, Delamater & Co., Detroit, Mich. Discussion. Opening of question box. Answers and discussions.

Thursday evening: Meeting of New York State Hardware Jobbers' Association. Meeting of metal jobbers connected with our association.

Friday, November 19th, 10 A.M.: Election of officers. Arranging seat of next convention. Miscellaneous business. Opening of question box. Answers and discussions.

Afternoon Session: Introduction and installation of officers. Miscellaneous business. Opening of question box. Answers and discussions.

Friday evening: Annual banquet in Hotel Iroquois.

MEMBERS NATIONAL HARDWARE ASSOCIATION.

The official advance programme also contained a list of the members, as follows:

A'abama. Moore & Handley Hardware Co., Birmingham; May & Thomas Hardware Co., Birmingham; Barney-Cavanagh Hardware Co., Mobile; Cunningham Hardware Co., Mobile; Teague, Barnett & Co., Montgomery.

Arkansas. Fones Bros. Hardware Co., Little Rock.

California. Dunham, Carrigan & Hayden, San Francisco; Miller, Sloss & Scott, San Francisco; Baker & Hamilton, San Francisco; Holbrook, Merrill & Stetson, San Francisco; Geo. W. Gibbs & Co., San Francisco; W. W. Montague & Co., San Francisco; Geo. H. Tay & Co., San Francisco; Harper & Reynolds, Los Angeles; Union Hardware & Metal Co., Los Angeles; Schaw, Ingram, Batcher & Co., Sacramento.

Colorado. The George Tritch Hardware Co., Denver.

Florida. The S. B. Hubbard Co., Jacksonville.

Georgia. King Hardware Co., Atlanta; Beck & Gregg Hardware Co., Atlanta; Clarke Hardware Co., Atlanta; Palmer Hardware Co., Savannah; J. D. Weed & Co., Savannah; Edw. Lovell's Sons, Savannah; Dunlap Hardware Co., Macon.

Illinois. John Alling & Co., Chicago; Horton, Gilmore, McWilliams & Co., Chicago; C. Sidney Shepard & Co., Chicago; Edwin Hunt's Sons, Chicago; Clark, Quien & Morse, Peoria; Isaac Walker Hardware Co., Peoria; Cummings & Emerson, Peoria.

Indiana. Van Camp Hardware & Iron Co., Indianapolis; Hildebrand Hardware Co., Indianapolis; Boetticher, Kellogg & Co., Evansville.

Iowa. The Empkie-Shugart Co., Council Bluffs; Schreiber, Conchar & Westphal Co., Dubuque; A. Tredway & Sons Hardware Co., Dubuque; Knapp & Spalding Co., Sioux City; Drake Hardware Co., Burlington; Charles F. Schmidt, Burlington; Sickels, Preston & Nutting, Davenport; J. D. Seeberger, Des Moines; Patrick & Luthe Co., Des Moines; A. Weber & Co., Keokuk; Huber & Kalbach Co., Oskaloosa.

Kansas. J. W. Crancer Hardware Co., Leavenworth; W. A. L. Thompson Hardware Co., Topeka.

Kentucky. W. B. Belknap & Co., Louisville.

Louisiana. A. Baldwin & Co., Ltd., New Orleans; Stauffer, Eshleman & Co., New Orleans.

Maine. The Emery-Waterhouse Co., Portland; Houghton, Clark & Co., Portland; Edwards & Walker Co., Portland.

Maryland. The Tabb & Jenkins Hardware Co., Baltimore; Carlin & Fulton, Baltimore.

Massachusetts. Bigelow & Dowse Co., Boston; Frye, Phipps & Co., Boston; Baldwin, Robbins & Co., Boston; Brown & Wales, Boston; Joseph Breck & Sons, Boston; Dana Hardware Co., Boston; Eldridge, Winnek & Irving, Boston; Chase, Parker & Co., Boston; Fitz, Dana & Co., Boston; Dodge, Haley & Co., Boston; Holder & Herrick, Boston; Bolles & Wilde, Boston; Butts & Ordway, Boston; Miles F. Brennan & Co., Boston; Richards & Co., Boston; Austin & Doten, Boston; The Arthur C. Harvey Co., Boston; E. P. Sanderson Co., Boston; Geo. F. Blake Jr. Co., Worcester.

Michigan. Standart Bros., Detroit; Freeman, Delamater & Co., Detroit; Buhl Sons & Co., Detroit; Fletcher Hardware Co., Detroit; Morley Bros., Saginaw; Foster, Stevens & Co., Grand Rapids.

Mississippi. Lee Richardson Co., Vicksburg.

Minnesota. Marshall-Wells Hardware Co., Duluth; Janney, Semple & Co., Minneapolis; C. W. Hackett Hardware Co., St. Paul; Farwell, Ozmun, Kirk & Co., St. Paul; R. D. Cone Co., Winona.

Missouri. Wyeth Hardware & Mfg. Co., St. Joseph; Paddock-Hawley Iron Co., St. Louis; The A. F. Shapleigh Hardware Co., St. Louis; The Witte Hardware Co., St. Louis; Gille Hardware & Iron Co., Kansas City; Richards & Conover Hardware Co., Kansas City; Townley Metal Co., Kansas City; Rogers & Baldwin Hardware Co., Springfield; McGregor-Noe Hardware Co., Springfield.

Montana. A. M. Holter Hardware Co., Helena.

Nebraska. Rector & Wilhelmy Co., Omaha; Lee-Clarke-Andreesen Hardware Co., Omaha; Baum Iron Co., Omaha.

New Hampshire. John B. Varick Co., Manchester.

North Carolina. Odell Hardware Co., Greensboro.

New York. Albany Hardware & Iron Co., Albany; Walbridge & Co., Buffalo; Weed & Co., Buffalo; Sidney Shepard & Co., Buffalo; Barker, Rose & Gray, Elmira; Irving D. Booth, Elmira; Russell & Erwin Mfg. Co., New York City; Sickels & Nutting Co., New York City; Underhill, Clinch & Co., New York City; Matthews & Boucher, Rochester, Weaver, Palmer & Richmond, Rochester; Bradford Kennedy Sons & McGuire, Syracuse; Burhans & Black Co., Syracuse; Wright, Dana & Co., Utica; Charles Millar & Sons, Utica; J. M. Warren & Co., Troy; Babcock Hardware Co., Binghamton.

Ohio. The McIntosh-Huntington Co., Cleveland; The W. Bingham Co., Cleveland; The Geo. Worthington Co., Cleveland; The Lockwood-Taylor Hardware Co., Cleveland; H. W. Leutkemeyer & Sons, Cleveland; Howell, Gano & Co., Cincinnati; The Johnson Bros. Hardware Co., Cincinnati; The Kruse & Bahlman Hardware Co., Cincinnati; E. H. Huenefeld, Cincinnati; Bode Hardware Co., Cincinnati; The Smith Bros. Hardware Co., Columbus; Kilbourne & Jones Co., Columbus; The Stollberg & Clapp Co., Toledo; Bostwick, Braun & Co., Toledo; Canton Hardware Co., Canton.

Oregon. Corbett, Failing & Robertson, Portland; Honeyman, DeHart & Co., Portland.

Pennsylvania. Supplee Hardware Co., Philadelphia; Shields & Bro., Philadelphia; Biddle Hardware Co., Philadelphia; W. H. & G. W. Allen, Philadelphia; James M. Vance & Co., Philadelphia; Seltzer-Klahr Hardware Co., Philadelphia; T. James Fernley, Philadelphia; Merchant & Co., Philadelphia; W. F. Potts, Sons & Co., Philadelphia; Gummey, McFarland & Co., Philadelphia; Hall & Carpenter, Philadelphia; Bindley Hardware Co., Pittsburg; Logan-Gregg Hdw. Co., Pittsburg; James C. Lindsay Hardware Co., Pittsburg; Wolff, Lane & Co., Pittsburg; Demmler Bros., Pittsburg; Lautner Hardware Co., Allegheny.

Rhode Island. Congdon & Carpenter Co., Providence.

South Carolina. Marshall, Wescoat & Co., Charleston.

Tennessee. C. M. McClung & Co., Knoxville; George Brown, Knoxville; W. W. Woodruff & Co., Knoxville; Langstaff Hardware Co., Memphis; Buford Bros., Nashville; J. H. Fall & Co., Nashville; Gray-Dudley Hardware Co., Nashville; H. G. Lipscomb & Co., Nashville; Tenison, Son & Rose, Nashville.

Virginia. Barker-Jennings Hardware Co, Lynchburg.

Washington. Holley, Mason, Marks & Co., Spokane; Seattle Hardware Co., Seattle.

West Virginia. Ott Bros. & Co., Wheeling.

Wisconsin. John Praitzlaff Hardware Co., Milwaukee; Wm. Frankfurth Hardware Co., Milwaukee; Fred. Kroner Hardware Co., La Crosse.

The members began to arrive as early as Monday, and by Tuesday night a large number were present. Wednesday morning saw many additions, and when the session opened at 10:30 A.M. of that day, there was a large representation to answer to the roll call. Each delegate was given a badge, and a number to correspond, and a list containing the badge numbers and the names had been prepared for the purpose of identification.

Digitized by Google

THE LIST OF THOSE PRESENT

as above described, was as follows:

Alabama.

1. J. D. Moore; Moore & Handley Hardware Co., Birmingham.
2. T. W. Gathright; May & Thomas Hardware Co., Birmingham.
3. Barney-Cavanagh Hardware Co., Mobile.
4. Cunningham Hardware Co., Mobile.
5. Teague, Barnett & Co., Montgomery.

Arkansas.

6. Col. D. G. Fones; Fones Bros. Hardware Co., Little Rock.

California.

7. Brace Hayden; Dunham, Carrigan & Hayden, San Francisco.
8. A. W. Milligan; Miller, Sloss & Scott, San Francisco.
9. Baker & Hamilton, San Francisco.
10. Holbrook, Merrill & Stetson, San Francisco.
11. Geo. W. Gibbs Co., San Francisco.
12. Chas. A. Belden; W. W. Montague & Co., San Francisco.
13. Geo. H. Tay Co., San Francisco.
14. Harper & Reynolds, Los Angeles.
15. L. C. Scheller; Union Hardware & Metal Co., Los Angeles.
16. Schaw, Ingram, Batcher & Co., Sacramento.

Colorado.

17. Geo. Tritch, Jr.; The Geo. Tritch Hardware Co., Denver.

Florida.

18. The S. B. Hubbard Co., Jacksonville.

Georgia.

19. Geo. E. King; King Hardware Co., Atlanta.
20. W. A. Parker; Beck & Gregg Hardware Co., Atlanta.
21. Clarke Hardware Co., Atlanta.
22. A. B. Palmer; Palmer Hardware Co., Savannah.
23. J. D. Weed & Co., Savannah.
24. Edw. Lovell's Sons, Savannah.
25. Dunlap Hardware Co, Macon.

Illinois.

26. John Alling; John Alling & Co., Chicago.
27. Horton, Gilmore, McWilliams & Co., Chicago.
28. C. Sidney Shepard & Co., Chicago.
29. A. L Hunt; Edwin Hunt's Sons, Chicago.
30. C D. Clark; Clark, Quien & Morse, Peoria.
31. Frank Jack; Isaac Walker Hardware Co., Peoria.
32. Geo. F. Emerson; Cummings & Emerson, Peoria.

Indiana.

33. Cortland Van Camp. 34. R. P. Van Camp; Van Camp Hardware & Iron Co., Indianapolis.
35. Hildebrand Hardware Co., Indianapolis.
36. Boetticher, Kellogg & Co., Evansville.

Iowa.

37. L. C. Empkie; The Empkie-Shugart Co., Council Bluffs.
38. J. W. Conchar; Schreiber, Conchar & Westphal, Dubuque.
39. A. Tredway & Sons Hardware Co., Dubuque.
40. C. A. Knapp. 41. H. L. Spencer. 42. G. N. Spencer; Knapp & Spalding Co., Sioux City.
43. S. H. Jones; Drake Hardware Co., Burlington.
44. Chas. F. Schmidt, Burlington.
45. Col. Jas. R. Nutting; Sickels, Preston & Nutting, Davenport.
46. J. D. Seeberger, Des Moines.
47. J. P. Patrick; Patrick & Luthe Co., Des Moines.
48. A. Weber & Co., Keokuk.
49. W. H. Kalbach; Huber & Kalbach Co., Oskaloosa.

Kansas.

50. E. W. Crancer; J. W. Crancer Hardware Co., Leavenworth.
51. J. G. Bauer; W. A. L. Thompson Hardware Co., Topeka.

Kentucky.

52. Col. Morris B. Belknap. 53. John W. Price; W. B. Belknap & Co., Louisville.

Louisiana.

54. Rufus K. Hireman; A. Baldwin & Co., New Orleans.
55. Walter Stauffer; Stauffer, Eshleman & Co., New Orleans.

Maine.

56. Wm. Chamberlain; Emery-Waterhouse Co., Portland.
57. Houghton, Clark & Co., Portland.
58. Edwards & Walker Co., Portland.

Maryland.

59. The Tabb & Jenkins Hardware Co., Baltimore.
60. Carlin & Fulton, Baltimore.

Massachusetts.

61. Samuel A. Bigelow; Bigelow & Dowse Co., Boston.
62. A. M. Wiley; Frye, Phipps & Co., Boston.
63. John H. Robbins; Baldwin, Robbins & Co., Boston.
64. Wm. Q. Wales; Brown & Wales, Boston.
65. Jos. Breck & Sons, Corp., Boston.
66. Leon C Carter; Dana Hardware Co., Boston.
67. Eldridge, Winnek & Irving, Boston.
68. A. J. Chase; Chase, Parker & Co., Boston.
69. P. E. Strauss; Fitz, Dana & Co., Boston.
70. Dodge, Haley & Co., Boston.
71. Geo. W. Herrick; Holder & Herrick, Boston.
72. The Bolles & Wilde Co., Boston.
73. Fred. H. Butts; Butts & Ordway, Boston.
74. Miles F. Brennan & Co., Boston.
75. H. W. Waite; Richards & Co., Boston.
76. Harry L. Doten; Austin & Doten, Boston.
77. Arthur C. Harvey; The Arthur C. Harvey Co., Boston.
78. E. P. Sanderson; E. P. Sanderson Co., Boston.
79. C. C. Lewis; Geo. F. Blake, Jr., & Co., Worcester.

Michigan.

80. J. G. Standart; Standart Bros., Detroit.
81. J. Freeman; D. C. Delamater; Freeman, Delamater & Co.
82. Theo. D. Buhl; Buhl Sons & Co., Detroit.
83. Chas. F. Fletcher; Fletcher Hardware Co., Detroit.
84. R. C. Morley, Edward Morley, T. A. Harvey; Morley Bros., Saginaw.
85. Sidney F. Stevens, Grand Rapids.
86. Chas. C. Philbrick; Foster, Stevens & Co., Grand Rapids.

Mississippi.

87. Lee Richardson & Co., Vicksburg.

Minnesota.

88. H. C. Marshall; Marshall-Wells Hardware Co., Duluth.
89. Janney, Semple & Co., Minneapolis.
90. T. G. Walther; C. W. Hackett Hardware Co., St. Paul.
91. R. A. Kirk; Farwell, Ozmun, Kirk & Co., St. Paul.
92. W. J. Landon; R. D. Cone Co., Winona.

Missouri.

93. J. A. Warner; Wyeth Hardware Mfg. Co., St. Joseph.
94. Paddock-Hawley Iron Co., St. Louis.
95. Richard W. Shapleigh; A. F. Shapleigh Hardware Co., St. Louis.
96. The Witte Hardware Co., St. Louis.
97. A. D. Bayles; Gille Hardware & Iron Co., Kansas City.
98. A. L. Riehl; Richards & Conover Hardware Co., Kansas City.
99 Townley Metal Co., Kansas City.
100. Rogers & Baldwin Hardware Co., Springfield.
101. McGregor-Noe Hardware Co., Springfield.

Montana.

102. W. B. Holter; A. M. Holter Hardware Co., Helena.

Nebraska.

103. Rector & Wilhelmy Co. Omaha.
104. H. J. Lee, Omaha.
105. W. M. Glass; Lee-Clarke-Andreesen Hardware Co., Omaha.
106. Baum Iron Co., Omaha.

New Hampshire.

107. John B. Varick; John B. Varick Co., Manchester.

New York.

108. Chas. H. Turner; Albany Hardware & Iron Co., Albany.
109. Chas. E. Walbridge, Buffalo.
110. Harry Walbridge. 111. H Walbridge Bowen; Walbridge & Co., Buffalo.
112. Hobart Weed. 113. Jas. R. Smith. 114. E. C. Neal. 115. Shelton Weed; Weed & Co., Buffalo.
116. Jas. G. Forsyth. 117. Jas. F. Foster. 118. Chas. W. Wells; Sidney Shepard & Co., Buffalo.
119. Capt. Frederic Barker; Barker, Rose & Gray, Elmira.
120. Irving D. Booth; Irving D. Booth, Elmira.
121. Geo. J. Laighton. 122. W. G. Smythe. 123. B. A. Hawley; Russell & Erwin Mfg. Co., New York.
124. Sickels & Nutting Co., New York.
125. A. D. Clinch; Underhill, Clinch & Co., New York.
126. Matthews & Boucher, Rochester.
127. S. J. Weaver. 128. Griff. D. Palmer. 129. Lee Richmond; Weaver, Palmer & Richmond, Rochester.
130. H. L. Kennedy; Bradford Kennedy Sons & McGuire, Syracuse.
131. H. N. Burhans. 132. J. W. Black; Burhans & Black Co., Syracuse.
133. Geo. F. Dana; Wright, Dana & Co., Utica.
134. Chas. Millar & Sons, Utica.
135. J. J. Tillinghast. 136. Gen. C. Whitney Tillinghast; J. M. Warren & Co., Troy.
137. B. M. Babcock. 138. J. H. Underwood; Babcock Hardware Co., Binghamton.

North Carolina.

139. Chas. H. Ireland; Odell Hardware Co., Greensboro.

Ohio.

140. Geo. T. McIntosh. 141. H. H. Bishop. 142. W. H. Coles; McIntosh-Huntington Co., Cleveland.
143. H. S. Blossom; the W. Bingham Co., Cleveland.
144. Geo. Deming. 145. W. D. Taylor. 146. C. A. Jewett. 147. H. H. Rudd; Geo. Worthington Co., Cleveland.
148. B. L. Pennington; the Lockwood-Taylor Hardware Co., Cleveland.
149. E. H. Leutkemeyer; H. W. Leutkemeyer & Sons, Cleveland.
150. Howell, Gano & Co., Cincinnati.
151. The Johnson Bros. Hardware Co., Cincinnati.
152. Chas. Kruse; the Kruse & Bahlmann Hardware Co., Cincinnati.
153. Bode Hardware Co., Cincinnati.
154. E. H. Huenefeld, Cincinnati.
155. T. F. Smith; the Smith Bros. Hardware Co., Columbus.
156. E. B. Kurtz; Kilbourne & Jones Co., Columbus.
157. John Stollberg and T. Harrison; the Stollberg & Clapp Co., Toledo.
158. Geo. A. Braun. 159. Wm. H. Standart; Bostwick, Braun & Co., Toledo.

THE FIRST SESSION

was called to order at about 10:30 A.M., Wednesday, in the ladies' parlor of the Hotel Iroquois, which was the official headquarters of the convention. President William W. Supplee was in the chair, with Mr. Fernley filling the duties of secretary. After calling the roll and reading the minutes of 1896, President Supplee delivered the

PRESIDENT'S ANNUAL ADDRESS,

which was, in full, as follows:

Gentlemen of the National Hardware Association: Acting upon the authority conferred upon your presiding officer, I am pleased to extend to our members a cordial welcome to this, the third annual meeting of our Association.

We meet in the city of Buffalo, which stands pre-eminently before the country as one of the most progressive commercial cities in our land and has the advantage of both valuable lake and railroad facilities unsurpassed by any other city, and whose recent achievement in the bold enterprise of utilizing the water power of the far-famed Niagara Falls stands as a marvel before the world.

It is not my desire or intention to present a lengthy address at this convention, nor do I think it essential or necessary, having anticipated this moment in several recent letters addressed to our members, in which I stated my convictions in regard to the essential work for the coming year and especially referred to matters pertaining to internal administration and reforms. These letters should certainly have given food for thought, and I shall therefore leave it to the executive committee, with whom I have so frequently conferred on these subjects, to bring these matters before you in detail.

The large and representative attendance at our last meeting, held in Philadelphia, one year ago, gave evidence of the interest then manifested by the majority of our members, and during the interim we have no reason to believe that there has has been any lack of interest, nor are there any signs of smouldering dissatisfaction or discontent.

Our Association was formed after a struggle of one year of depressed trade and for reasons fully expressed in our Constitution and By-Laws, Article II. of which reads as follows: "The object of this Association shall be the promotion of more friendly business relations, and mutual confidence and good-will with each other and with manufacturers." For two years after the formation, general trade conditions throughout the country continued most unfortunate, during which time we have all been made to realize what a small line could be drawn by the average trader between a positive profit and an actual loss. Notwithstanding this fact our Association has flourished and

PRESIDENT W. W. SUPPLEE.

succeeded to an extent that has amazed many older national organizations, and it has been commented upon as the most successful organization in its results that has ever been formed.

The year that has just passed has not been dissimilar to the two preceding years so far as the possibilities are concerned of making money on the part of anyone engaged in mercantile trade, nor has the wholesale Hardware trade been an exception to the rule. I do not stand before you as a pessimist, for I do believe that there has been recent improvement in trade conditions, and in the outlook for the future there can be seen a wide silver lining. But let us not deceive ourselves. I believe that for a few years to come, under the most favorable view of the case, it will require the most careful and prudent business management of those engaged in the distribution of Hardware and its correlatives, be they either in the capacity of manufacturer, wholesale jobber or retail merchant, to recuperate from what has been lost in capital, energy and labor during the last four years. If this be the case, how can anyone afford to be either thoughtless, careless or indifferent in the general management of his business?

I feel we have an era of prosperity approaching, pushing

Digitized by Google

back in its march the dark clouds of the recent past. May we not take advantage of the situation, and while we hold fast to that which experience has proven to be good, let us strengthen those points in which we are weak.

In recent letters which I have issued I have endeavored to bring the workings of our organization into the counting house of each individual member. I have also stated that manufacturers who three years ago had contemplated becoming their own distributors for possible business in the near future, have watched our course with an eagle eye, and many of these to-day prefer not to make any further attempt of general distribution outside the legitimate channel, the jobber.

There has been a sober influence on the part of manufacturers during the entire Fall, which has prevented their making speculative prices, but there is a disposition on the part of all manufacturers to secure a profit beyond the actual cost of production, and this alone must gradually end in some advances in prices.

I am creditably informed, however, that no small amount of fear exists on the part of some manufacturers that jobbers who may have made a purchase early in the season might not sustain these necessary and reasonable contemplated advances upon goods already purchased. My answers have been that our Association has already placed itself upon record: "That all jobbers should sustain manufacturers' established prices for an equal quantity of goods," and it is therefore a declared policy of the Association to sustain all reasonable and necessary advances made by manufacturers, notwithstanding the fact that these changes may take place between seasons. I would, however, like some discussion upon this subject.

Our Deliberations: Let us at this meeting freely and intelligently discuss these and other problems which have presented themselves during the interim since our last meeting, remembering that there is no one member of our Association who stands upon so high a pedestal as to make him a gladiator of prices, and that all of us are more or less affected by experimental, untried and unwise methods, not only of our immediate, but of our most distant competitors. The old maxim, that "competition is the life of trade," is old and threadbare, and it might be more truly said that competition unrestrained has been, and will be, the death knell of many.

It is the earnest desire of your president that all delegates to this Convention unhesitatingly rise and present their views and freely discuss any, or all, subjects which may come before you. It has always been the desire of your officers to undertake the handling of questions in such manner as may be pleasing to the rank and file of our organization, and unless we have a free expression of your opinions, they certainly are in no position to know what you desire.

Tariff Changes on Cutlery: In a circular letter to our members, March 26th, I made reference to certain proposed changes of the tariff on pocket cutlery. In doing this I had before me for guidance the position that our Association has always taken in regard to increase in price of any commodity to a point that is out of reason. (See page 54, 1896 Annual Report, also explanatory remarks, Page 148).

The proposed tariff on cutlery, which has already passed the House, showed excessive rates and inaccuracies. New York importing houses had made appeals for modifications, and had secured the aid of more distant importers, but without success. In the meantime the tariff schedule had reached the Senate. I, therefore, quickly communicated with the Chairman of the Finance Committee, calling attention to certain glaring and harmful inconsistencies, and presented a number of detailed illustrations. I might say here, that my communications were courteously received and acknowledged, and I was given to understand that the schedule before the Committee would be investigated and a comparison made with the one presented by your president.

In illustrations sent them it was made plain that a one-blade pocket knife, costing with the then existing tariff 68 cents, with the proposed tariff would cost $1.04, or a duty of 130 per cent. A two-blade pocket knife, costing abroad about 2 marks, to which add the then existing duty would cost 74 cents, the proposed duty would make the knives cost $1.59, or about 220 per cent. on original cost. The retail price on the knife was then about 15 cents, and it would necessitate a retail price of 25 cents. On another two-blade knife, which then existing duty made cost 74 cents, proposed duty would make it cost $2.10, or about 323 per cent. on original cost, which would rule the knife out of the market. On a popular four-blade knife, it was shown where the proposed tariff duty would be 270 per cent., and still another 205 per cent. And it was shown where certain knives under the Wilson Tariff were about 51 per cent. duty, under the McKinley Bill 83 per cent., and with the proposed duty variously from 100 to 325 per cent. The illustrations further showed inaccuracies, where high grade goods, which are largely made in this country, could be imported at less than under either the Wilson bill or McKinley bill, or the bill which existed for many years prior to either of the foregoing.

Communicating with the executive committee, I found they agreed with your president, that we should proceed on the line which he had indicated. I incidentally heard that the chairman of the Senate Finance Committee had called the committee together and presented our view of the case, and they were amazed at the statements and illustrations furnished by us.

I would further say I presented a schedule for their consideration. A messenger came from Washington to see your president, and between the two it was agreed that a revised schedule would be considered. A peculiar incident occurred in the interim: I was informed that the Government desired a revenue on pocket cutlery of $816,000, and was naturally amazed that the schedule presented by your president would, according to 1896 importations, give them a revenue of $815,000. The small difference would look to a person who had not investigated the matter as almost incredible.

I further found during my investigation that the proposed tariff would bring in a revenue of $1,740,000, or an excess of $924,000, which was more than double what was stated they were aiming at. It was some two weeks before conclusions and a compromise were arrived at, and some changes were necessarily made in the compromise schedule. Therefore, without any changes abroad, and according to 1896 importation, the income would still be some $400,000 in excess of what they stated was wanted, but as was naturally inferred by the Committee, and by more than ordinary inference on the part of the writer, prices would be reduced in Germany on many styles of pocket knives to meet existing conditions of the present tariff. There has been quite a revision also in the price of George Wostenholm & Son's goods to meet present conditions of tariff. Therefore the present tariff on cutlery will not show great hardship beyond what heretofore existed to the consumer. Taking this view of the case, it is but natural that your president should feel very comfortable over his efforts.

Revised Classification on Hardware: In my last report I suggested that a special committee be appointed with authority from this Association to take such steps as might be deemed expedient to induce railroads using Official Classification to make some changes in the classification of Hardware. Before it was necessary to appoint this committee, I learned a bill was before the Senate in which it was resolved that the Inter-State Commerce Commission

Digitized by Google

be authorized to prepare and publish a classification of freight articles and rules, regulations and conditions for freight transportation, to be known as National Freight Classification.

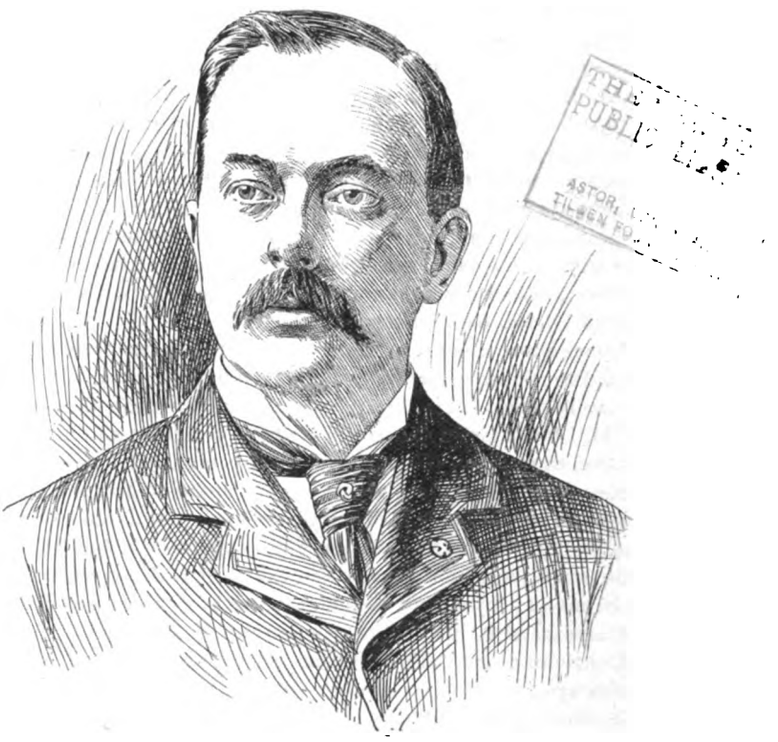
I further learned that owing to the depressed conditions of trade during the two preceding years, the results had not been satisfactory to the railroad companies, and they were not likely to consider changes, at least prior to a revival in trade. Since July 1st, however, I have made an effort to have an interview with C. F. Gill, chairman of the Classification Committee, and also have had some correspondence with the Pennsylvania Railroad officials, but nothing in this direction has yet been accomplished. I therefore suggest that the same authority be given to the incoming president to continue this work, as the time now seems more favorable to accomplish what we desire.

Secretary-Treasurer's Report: I shall only refer incidentally to this report, nor have I the details up to date, but the balance of cash on hand was submitted to the members of the executive committee at their meeting, September 22d. At that time the balance on hand had been reduced, and would be about $1500 less than the balance on hand at the time of our last meeting. This is owing to the extraordinary demand made upon the treasury according to the consensus of opinion of our members as well as the executive committee, and conforming to these views our secretary has visited various local organizations scattered all over the country and as far west as the Pacific coast, not only in the interests of the local associations, but also in the interests of the members of our Association.

You fully understand that it would not be possible for the president to either absent himself or give the time which is deemed necessary, so it has been our aim to have our secretary-treasurer during the past year visit each member of our organization as far as possible, and for purposes which will be explained in his report.

Your president did, however, upon special invitation, attend the last meeting of the Southern Hardware Jobbers' Association, held in Savannah, Ga., and at the request of that Association not only read the paper which has recently been sent to our members on "What Constitutes the Cost of Doing Business?" but was given all the privileges of that Association, and therefore entered freely into all the discussions which came before that body.

The work during the last year has, therefore, you will notice, reduced our surplus somewhat. I have not, however, changd my mind in regard to this surplus to which I have referred each year, and I feel that our Association should always endeavor to conduct these expenditures so far as possible to conform to each year's receipts. Had we not had this surplus one year ago our efforts for the benefit of our members would have been restricted. I do not approve of the plan adopted by some other national associations of assessing the membership during the year. I know from personal observation where this is done it has been in some cases exceedingly unpopular.



Your president and secretary-treasurer have always worked in perfect harmony with one high aim in view, namely: the general welfare and good of the Association.

Executive Committee: I shall not touch on the report which will be presented by the executive committee. You understand there have been some yearly changes made in this committee, but there has been no change in the unanimity of good feeling between the members themselves or between them and your presiding officer. The members of this committee have all been most prompt in giving their opinion on matters so frequently asked for through the mail, and in their various meetings have worked intelligently and conscientiously in the interest of our members.

I shall not at this moment touch upon the workings of the various other committees during this year, nor have the reports been sent in at this writing. According to our constitution and by-laws the reports of all committees shall be referred to the executive committee before the same shall be presented. I, therefore, leave it to this committee to pass upon these reports, and also the detailed workings of our Association.

Local Associations: We have made a strong effort to have each local association send a representative from their organization and address you during the convention. We feel that their reports will convince us that while competition does exist there is a desire in various sections to have competitors upon friendly terms and willing to consult with each other on matters pertaining to their general welfare.

Death of Alfred Tredway: During the past year and until within the last two weeks the cold hand of death has dealt most kindly with our members. But on November 5th, Alfred Tredway, senior member of the firm of A. Tredway & Sons Hardware Co., of Dubuque, Iowa, died at the advanced age of eighty years. He was one of the early settlers in that State, and highly esteemed and respected not only in his own city, but throughout the entire

VICE PRESIDENT H. H. BISHOP.

State. He lived a life of great usefulness, and the loss will be keenly felt not only by his own firm, but by all those who have come in contact with him.

Death of B F. Dunham: On Thursday, November 11th, we were pained at the receipt of a telegram from Frank L. Brown, secretary of the Pacific Coast Hardware & Metal Association, informing us of the death of B. F. Dunham, senior member of the firm of Dunham, Carrigan & Hayden Co., of San Francisco, Cal., and president of the Pacific Coast Hardware & Metal Association. The high regard in which Mr. Dunham was held is signified in the fact that all members of the Association of which he was president placed flags at half mast. Mr. Dunham was most highly respected and esteemed throughout the entire Pacific Coast, and his loss will be keenly felt by the members of his firm and by many friends who had become endeared to him.

Peace to his ashes.

And now, gentlemen, I desire to say we have arrived at the time and will soon arrive at the hour when I shall lay aside the robes of office with which you have so long and so kindly favored me. Two years ago I suggested a change in the constitution and by-laws, limiting the eligibility of

Digitized by Google

the president for re-election. I then stated it might be unwise, or perhaps even disastrous, to make the limit of time one year, but I suggested the extreme continuous limit should not exceed three years. In this I have the courage of my convictions and opinions. I have now served you continuously for three years, during which time I have been most kindly treated by all the members of the Association. The members of your executive committee have been exceedingly courteous, nor has the past year been an exception to the rule. The various special committees appointed have been efficient and prompt, and the standing committees have cheerfully responded to all that has been asked from them.

When first elected to this office I did not realize the work that must necessarily fall upon the president. I have, however, conscientiously performed all duties, as far as in my power, to the best interests of our members. I have in all cases laid aside what might be looked upon as self-interest, or what might be looked upon as to the interest of any one, or any few members, but have worked for the general good of the whole.

I do not, however, think it wise for any one person to continue in this office longer than the time which I have served you, and must therefore ask that the nominating committee, which will be appointed, will not consider my name in connection with names that may present themselves. I must also ask that my name be not considered in connection with the privilege granted in Section A, Article 5, which reads: "After the report of the nominating committee it shall be the privilege of any member of the Association to place in nomination the name of any person he should desire, which name shall be added to those reported by the nominating committee."

I once more desire to thank our members for their continued kindness towards me during the past year. It has certainly been an incentive to the unwavering devotion which I have given to the work which you have so long entrusted to me, and if any errors of my creation have been made, they certainly have been of the head and did not originate in the heart. My interest in the laudable efforts and welfare of the Association will not diminish, but when, like yourselves, marching in the ranks, it will be my effort to be no less loyal and considerate to your president than all have been to me.

Gentlemen, from the bottom of my heart I once more thank you.

Following the address of the president, came the annual reports of the secretary-treasurer and of the various standing committees, as named in the official programme above, and then the introduction of the official representatives of other Hardware associations. The session then adjourned.

ENTERTAINMENT COMMITTEE REPORT.

Among the reports above referred to, was that of the entertainment committee, which was as follows:

The entertainment committee would report that the mayor has extended to the members of this Association a most hearty welcome. He has instructed the superintendent of police that, in case any of the delegates should in any way be overcome by the exhilarating air of Lake Erie, the button on their coat will identify them, and they will be promptly returned to the hotel without any annoyance or inconvenience to themselves.

We also have the strongest assurance from the proprietors of the Iroquois Hotel that they are anxious to make the sojourn of the delegates as pleasant in every way as lies in their power, and should any one feel neglected, if he will kindly report to the chairman of this committee, they will be greatly obliged.

Walbridge & Co. and Weed & Co. extend a most cordial welcome to the members, and trust they will make their establishments headquarters during their stay in the city.

We have arranged for a "Smoker" on Wednesday evening, at the Ellicott Club, commencing at nine o'clock, and it is earnestly desired that each one will feel that the show belongs to him and that the members will improve this opportunity for becoming better acquainted and all formality be laid aside and introduction unnecessary.

Thursday night having been set apart by your worthy president for meetings of different bodies, this committee has made no preparation.

Friday evening the banquet will be given in this hotel, commencing at 7:30, and we trust that the arrangements will prove satisfactory to you all.

When your enterprising and genial secretary was in the city a short time ago, he suggested that an opportunity be given the members to visit the Falls and inspect the greatest electric plant in the world. In accordance therewith the following arrangements have been made:

Train will leave Terrace Station Saturday morning, at time to be named later, and, on arrival at the Falls, the party will take the electric cars over the gorge road, returning to the Falls for lunch at the Tower Hotel. Afterwards there will be a drive around Goat Island, through Prospect Park, then to the power house, which must be of the greatest interest to every member present. For all these privileges we have been able to get a figure of $2 for each person, which covers every possible expense. All members desiring to take advantage of this opportunity will kindly notify the chairman of this committee, or Harry Walbridge, as soon as possible, that proper arrangements may be made accordingly.

The committee stand ready to give any information, or offer any assistance in their power to the members of this Association.

Hobart Weed, chairman; Harry Walbridge, Chas. H. Turner, Geo. J. Laighton, Griff. D. Palmer.

The full report of the secretary-treasurer is as follows:

ANNUAL REPORT OF THE SECRETARY-TREASURER.

To the President and Members of the National Hardware Association. Gentlemen: Another year has rapidly passed, bearing with it the record of opportunities presented, projects undertaken, duties performed and purposes accomplished. It has necessarily been a period of ceaseless activity on the part of the corresponding and recording scribe of your vigorous and progressive organization, the journeyings of the year covering 30,455 miles, and consuming 101 days and nights. Ninety-one nights have been spent as the guest of the Pullman and Wagner Palace Car Cos., of course at your expense. During these travels your secretary-treasurer has been in and through forty-two of the forty-six States of the Union. In addition to these States he has been frequently in the state of anxiety, state of expectancy, state of happiness, state of misery and a good many other states not now necessary to mention.

He has traveled from the rock-bound coast of Maine to the noble Pacific, where the Golden Gate stands ever open to the traveler from the Orient (unless he be a Chinaman). He has visited the Hardware interests from that land where daylight disappears at about midnight, to that delightful country where the ground, at any season of the year, has but to be tickled with the hoe to ripen into a bountiful harvest.

It has been his constant aim to meet every official requirement, to fully realize the responsibilities of the position assumed, to keep burning brightly in the hearts and minds of a widely scattered yet homogeneous and more and more united membership, the fires of enthusiasm which have so brilliantly and hopefully characterized each of our annual gatherings, to be a watchful medium of reliable communication, whereby the interests of one is made the concern of all, to push forward (by all legitimate means) the work to which all are zealously committed.

Digitized by Google

The correspondence of the year has been voluminous and is, we believe, productive of good results. Forty-three special letters have been written you, containing 102 pages, in all a volume of 30,668 words. Besides these, the president has communicated with you through the secretary's office ten times during the year, thus adding twenty-three pages to the volume. Inasmuch as his wisdom so far excels that of your secretary-treasurer, it is scarcely fair to count the number of words, as the value per word is far disproportionate. He has also corresponded with the executive committee an innumerable number of times in your interest.

A great number of communications have been addressed to the members of the Association, embodying inquiries and suggestions upon important subjects hitherto earnestly discussed and others which must attract attention in the future. There are many serious problems awaiting intelli-

SECRETARY-TREASURER T. JAMES FERNLEY.

gent consideration and wise decision. We are told, upon the highest authority, that in a multitude of counsellors there is safety.

The cumulative wisdom, based upon life-long experience and thorough study of business methods, of the influential and increasing membership of The National Hardware Association should lead the way to equitable adjustment of all trade contentions and abundant prosperity for all concerned.

Personal visitation. At the first meeting of the executive committee a sentiment seemed to prevail that during the present year our united labors should be more in the line of introducing improved business methods. With this end in view the president of the association, early in the year, addressed the members of the executive committee, asking their approval of a plan which involved an extensive tour on the part of the secretary-treasurer.

The committee seemed to be a unit on this subject and we have, as already stated, spent a large part of our time in the field. In this way personal visits have been made to nearly all of our members and in many cases we have visited the same houses two or three times.

Local meetings: After interviewing separately the members of the National Association in the places visited it has been my unvarying custom to have a meeting of all the members in that city, even where there would be only two jobbers located. At these meetings many matters have been discussed which were of a local trade nature, and those taking part in a free interchange of views have separated with a much more kindly feeling towards one another than existed before they were thus brought together. January 21st we held an interesting and profitable meeting with the jobbers of Pittsburgh and on the following day in Cleveland, and on February 10th we attended a meeting of the New York State Jobbers' Association. February 17th we divided between the members of our association in Boston and Worcester. Between April 2d and 12th we visited the jobbers in Atlanta, Charleston, Jacksonville, Montgomery, Birmingham, Savannah, Knoxville, Nashville and Louisville. In nearly all these cities meetings were held, local difficulties adjusted and much progress made along the lines laid down by the executive committee. April 23d there was a meeting of the jobbers in Toledo and also one of a similar character in Detroit. April 25th a meeting in Cincinnati was likewise attended, a most encouraging spirit being everywhere manifested.

To the West and Far West: May 31st we started on a trip which extended over five weeks, the objective point being the Pacific Coast, Davenport, Chicago, St. Paul, Dubuque, Des Moines, Minneapolis, Omaha, Sioux City, St. Joseph, Kansas City, Denver, Salt Lake City, San Francisco, Los Angeles, Portland, Seattle and Tacoma, were included in this itinerary. In all of these cities, where two or more jobbers were located, satisfactory meetings were held and subjects connected with the work of our organization were discussed.

In some places jobbers who had not connected themselves with our Association were invited to confer with those who were members. We found everywhere prevailing the very highest opinion of the work of the National Association, and our opinion was kindly sought on all current questions of interest to the Hardware trade.

A useful device. In order to have all questions freely discussed we inaugurated a system of having a "Question Box," into which each one present had the privilege of placing any question on business methods upon which they might desire an opinion. At a given time we withdrew these questions and answered them in order, explaining that we did not pretend to have any more innate knowledge than others, but inasmuch as the Secretary of the National Association travelled from city to city and had the opportunity to examine into the business methods of the most progressive houses of the country, he might be in a position to satisfactorily answer questions and throw light upon interesting subjects, acting as a sort of individual and semi-official clearing house of information. We found this idea extremely popular. In some Conventions, after everything had been talked about that seemed of interest, the "Question Box" would develop food for much greater discussion.

In many ssctions of the country it is highly important that these local associations be kept up. Yet if there is not some effective medium through which new life can be enthused into them periodically, they are likely to be of short duration.

Pacific Coast Enterprise. One of the most interesting and profitable of the meetings attended was the Second Annual Convention of the Pacific Hardware and Metal Association, held in Portland, Oregon, June 17th to 19th. This promising two-year-old offspring of the National Association is already one of the most enterprising and vigor-

Digitized by Google

ous organizations in the country. Its entire membership is thoroughly imbued with progressive ideas. Live questions of the hour were discussed with inspiring freedom and earnestness. The official representative of the parent association was received literally with open arms, and his well known capacity of utterance on trade topics severely taxed and his modesty sorely tried. Warm hearted greetings were extended to you and your officers, and a return message from this Convention you may rest assured will be most cordially appreciated. The men of business of the Golden Coast are models of intelligence, courtesy and fidelity.

Fraternal Relationship. In addition to visiting the membership, your secretary-treasurer, December 8th, called upon the metal jobbers of New York city, in company with Messrs. Hayden, Gummey and Strauss.

December 9th the meeting of the Shovel Association was attended.

December 19th the Chain Manufacturers were met with in Philadelphia.

February 10th the Revolver Manufacturers, in session at Worcester, Mass., were pleasantly called upon, and on March 10th the Shovel Manufacturers, at their annual meeting, in New York city.

All these well known trade organizations manifested the kindliest spirit towards the National Hardware Association.

Reference may appropriately be given to the correspondence which the secretary-treasurer of your association engaged in early in the year with the Hon. F. G. Coates, of London. He desired some information regarding the workings of our organization. The formation of the National Hardware Association in Great Britain was contemplated.

Our business rivals on the other side of the great pond have been quick to discern the manifest advantages arising from an organization of their strongest and most intelligent forces.

A communication received from the honorable secretary of this organization, which was formed in July of the present year, will be presented to the Convention which will display the kind spirit in which they make their acknowledgments of the benefits they have received from our organization, although such a vast expanse of water separates one from the other. Proper acknowledgment will in due time be made to this communication.

Words cannot adequately express the kind treatment which I have received from the membership, the efficient aid rendered by the Executive Committee, and the wise counsel and advice of the President of the Association.

He has given me his time for your interests freely, regardless of his personal interests, and if your secretary-treasurer has succeeded during the past year in accomplishing anything for your interests it is largely due to the fact that a wise, safe and judicious counsellor was ever ready to advise and direct.

With grateful appreciation of many courtesies extended, confidence bestowed and timely assistance constantly rendered in the performance of my duties, I am,

Sincerely yours,

T. JAMES FERNLEY, Secretary-Treasurer.

THE AFTERNOON SESSION

of Wednesday convened at 2 P.M. A paper on the "Importance of Each Jobbing House Having a Minimum Selling Price," was read by J. T. Jenkins, of the Gray-Dudley Hardware Co., Nashville, Tenn. A discussion followed, opened by Leon C. Carter, of the Dana Hardware Co., Boston. The opening of the question box, and general miscellaneous business followed.

A NOMINATING COMMITTEE

to select officers for the coming year, was appointed during the session of Wednesday, consisting of the following gentlemen:

John Freeman, Detroit, Mich.
Leon C. Carter, Boston, Mass.
Richard W. Shapleigh, St. Louis.
W. D. Taylor, Cleveland, Ohio.
A. D. Clinch, New York City.
A. B. Palmer, Savannah, Ga.
J. A. Warner, St. Joseph, Mo.

CARING FOR THE LADIES.

As a number of the delegates were accompanied by their wives, Buffalo hospitality embraced them all, and the ladies were most hospitably entertained, while the gentlemen were undergoing wear and tear of mind at the "Smoker," and other business sessions. In charge of Mrs. E. C. Neal and Mrs. Harry Walbridge, they were taken for an extensive drive about the city on Wednesday, followed by a lunch at the Ellicott Club. On Thursday Evening, they attended a concert by the Symphony Orchestra, at Music Hall, and on Friday were shown through several of the public institutions of the city, followed by an evening at the Star, to see and hear Sol Smith Russell and his company.

THE SMOKER

at the handsome and spacious room of the Ellicott Club on Wednesday night, was a great success, and was attended by the greater part of the convention. There was music, vocal and instrumental; refreshments, solid and liquid; and speeches, solid and otherwise. The rare but hidden musical ability of Hobart Weed had found expression in the preparation of a programme of vocal gems, commencing with "My Country, 'Tis of Thee," and running around the circle of the emotions, to "All Coons Look Alike to Me," and these were sung by all present at various times in the evening. Mr. Weed acted as toast master, band-master, drum-major and ring-master, and, for a small man, kept things moving in a lively manner. He introduced the Hon. Edgar B. Jewett, mayor of Buffalo, who made the visitors welcome to the "Electrical City," in a short, but expressive speech.

MAYOR JEWETT'S WELCOME.

Members of the National Hardware Association: In the name of the people of the city of Buffalo, whom I have the honor to represent, I extend to you a most cordial and hearty welcome. Great honor has been done us by this Association in selecting this city for your convention, and we are proud to have you with us as our guests.

The giant strides made by our city in population, commerce and manufacturing during the last decade, have excited the wonder and admiration of the whole country, and it is more than a pleasure to find you assembled here from every corner of this broad and glorious land, viewing with your own eyes the many evidences of our prosperity, and taking back to your homes the almost fairy-like story of the "Greater Buffalo," together, we hope, with pleasant memories of your sojourn here.

All that this city is to-day is the result of the labors of a comparatively few years. Less than a century ago, the land now built up with modern office buildings, busy factories and comfortable homes, was a wilderness. Much less than a century ago this city was the railroad terminal to the West; to-day the Queen City of the Lakes is a gateway to the sea.

Our receipts at this port, of grain going East, for this year, will exceed two hundred million bushels, which is more by many millions than any record this city has made so far. This places Buffalo as one of the largest ports in the world. It is only exceeded by the commerce of London, Liverpool, New York and Chicago.

One fact I wish to call your attention to and that is, that we have the best lighted business streets in the world,

Digitized by Google

which you will notice if you are able to see after leaving this smoker.

Our citizens are quiet, thrifty and industrious, law-abiding and liberty-loving.

They are conservative in business affairs, but open-hearted and most hospitably inclined toward the strangers who are within our gates.

It is a city of individual homes, and not of tenements.

It is a city of comfort, and not of show; of sincerity, and not of sham; of neatness, cleanliness, sobriety and health.

Again I extend to you, most cordially, the freedom of the city, hoping that you will be pleased with our humble efforts to entertain you, and that you will carry away pleasant memories of your visit to Buffalo, and a desire to come again at some future time.

There was a solo by T. James Fernley; a recitation, of no small dramatic ability, from President W. W. Supplee; a speech from Walter J. Shepherd; a song from the Philadelphia Quartette, and a vaudeville entertainment from various professionals.

Mr. Fernley's song was a work of art—something like a crazy-quilt in texture—and had been put together by himself, Hobart Weed, and several other carpenters and joiners, during a session of several hours. There were some sixty-one verses, no two alike, and each one a little worse than the others. The chorus was borrowed from a well-known song, and was therefore quite good. Here are samples:

"Now, fill the jovial bowl again,
And drink to good Supplee!
In all the world of rain or shine,
There's none so fine as he.
He deals in Hardware when he's home,
Talks Association when away;
There's none more true, away or home—
He's the popular man of the day!

Bindley comes from a smoky town
Where Lupton has full sway;
Where Reitz puts on a buyer's frown,—
Logan & Gregg not far away.

Another man, who Foots the bills,
Is very fond of Files,
And captures every customer,
On whom his visage smiles.

And Hobart Weed, good Hobart Weed,
He isn't very tall,
And though done up in package wee,
Of him there's nothing small.
Now sing I of a pious man,
To be like him I'd wish,
Whose fine ecclesiastic name,
Commences with a 'Bish.'
He wears no mitre on his brow,
Carries no gilded cane,
And though he's 'Vice' he has no vice,
From which he should refrain.

Mr. Fernley got out of the room alive.

It was a good natured gathering.

THURSDAY'S SESSIONS.

The Thursday session of the Association opened bright and early, with everybody in shape for business. After the usual miscellaneous business and the opening of the question box, F. R. Boocock was introduced, and delivered an address full of valuable suggestions and information to the members of the Association, outlining methods by which the credit department of each great establishment could be improved. The address was so well received that a resolution was offered by H. C. Marshall, of Duluth, to the effect that "the thanks of this Association be extended to the gentleman and the Association he represents for the very able paper he has presented." R. A. Kirk, of St. Paul, moved an amendment to the effect that "We give the hearty endorsement of this Association to the National Association of Credit Men." The resolution, as amended, was unanimously adopted.

In the afternoon, a paper entitled "What is the Proper Medium through which Hardware should be distributed?" was read by D. C. Delamater, of Freeman, Delamater & Co., of Detroit, Mich. The discussion upon this, with the question box, etc., occupied the rest of the afternoon.

On Thursday evening, there were several pleasant gatherings of gentlemen connected with the Association and their guests. A meeting of the New York State Hardware Jobbers' Association was held, but little business of a formal nature was presented. There was also a meeting of the metal jobbers connected with the Association.

One of the most pleasant incidents of the evening was an elegant dinner given by James D. Foot, of the Kearney & Foot Co., New York, to a number of his friends, journalistic and others. This dinner was served in a small dining-room of the Hotel Iroquois, with Mr. Foot presiding at one end of the board, and T. James Fernley occupying an equal post of honor directly opposite. A most generous and elegant menu was served, and two hours were occupied in the discussion thereof, after which the meeting adjourned, and with Mr. Foot still as their genial host, spent a very pleasant evening in witnessing the entertainment provided by Sol Smith Russell and his company at the Star Theatre.

FRIDAY'S SESSIONS.

Business of considerable importance was transacted at the sessions of Friday. It was first decided that the next meeting of the Association should be held on the third Wednesday of November, 1898, at Milwaukee, Wis.

The election of officers was the next thing in order. In his annual address, President Supplee had spoken very emphatically in regard to his retirement from the office which he has filled with such signal ability for the last three years. Mr. Supplee was thoroughly in earnest in his wish to retire, and the Association seemed to have been equally determined that he should continue in the office which he has so ably filled. The report of the committee formulated this wish upon part of the Association by the presentation of Mr. Supplee's name, and it is needless to say that he was unanimously re-elected in face of his expressed wish. As Mr. Supplee is a gentleman who is always ready to do his duty in whatever position he may be placed, and as he could not very well set up his personal opinion against the combined wisdom of the Association, he was compelled to see himself again made the presiding and executive officer of this great Association. The full list of the officers, as reported by the executive committe, and elected, is as follows:

President, William W. Supplee, Philadelphia, Pa.
First Vice-President, H. H. Bishop, Cleveland, Ohio.
Second Vice-President, Brace Hayden, New York.

EXECUTIVE COMMITTEE.

F. P. Strong; Farwell, Ozmun, Kirk & Co., St. Paul, Minn.
Theodore Buhl; Buhl, Sons & Co., Detroit, Mich.
John Bindley; Bindley Hardware Co., Pittsburg, Pa.
William Chamberlain; Emery-Waterhouse Co., Portland, Me.
H. S. Blossom; W. Bingham Co., Cleveland, Ohio.
R. W. Shapleigh; A. F. Shapleigh Hardware Co., St. Louis, Mo.

The only changes in the executive committee from that of last year is the promotion of Brace Hayden to the vice-presidency, and the leaving out of Col. Morris Belknap, of W. B. Belknap & Co., Louisville, Ky. Colonel Belknap sent a special request to the Association that he be omitted from the committee for the present year. The addition of Messrs. Blossom and Shapleigh will add to the strength of this committee.

In the afternoon, the introduction and installment of officers occurred, after which miscellaneous business was disposed of, and the session of the Association came to an end.

It was the general opinion of those present that the meeting had been one productive of gratifying results. Upon this occasion, as never before, the closest possible

Digitized by Google

attention was paid to the discussion of business methods, with suggestions as to ways by which they can be improved, and the best practical results secured. The members entered into the spirit of the discussions with interest, and it would be speaking very poorly of the fertility of the field upon which this good seed was sown, if there were not many practical and direct results.

THE ANNUAL BANQUET.

The annual banquet of the Association was given on Friday evening, in the main dining-room of the Hotel Iroquois. As the gentlemen entered the room, they were greeted with a scene of beauty, long tables being elaborately decorated with flowers, and everything in keeping with the festal nature of the occasion. A very handsome combined programme and menu card had been prepared, the cover of which was of a very artistic character printed in colors. A string orchestra furnished music during the evening.

It was nearly eight o'clock when the gentlemen entered the dining-room, each one having a diagram which showed the exact location of his seat.

When they were all in place, President W. W. Supplee, who presided during the evening, rapped for order, and the whole audience stood still while singing the old doxology, "Praise God From Whom All Blessings Flow." They were then seated, and the following elaborate menu was discussed:

MENU.

Massachusetts Bays.
Celery. Old Amorosa.
Green Turtle, Americaine.
Kennebec Salmon, Hollandaise.
Cucumbers. Potatoes, Parisienne. Lieblfraumilch.
Varies. Varies. P. A. Mumm & Co.
Filet of Beef Pique, Fresh Mushrooms.
Green Peppers, Farcie. String Beans. Pontet Canet.
Vol-au-Vent of Chicken, a la Reine.
Gem Peas. Moet & Chandon
Sorbet Iroquois. White Seal.
Quail Sur Canape aux Cresson.
Lettuce and Tomatoes Mayonnaise.
Vanilla Ice Cream. Jelly Macedoine.
Assorted Cakes. Bonbons. Fruit.
Fromage de Brie and Roquefort. Coffee. Cigars.

At the conclusion of this portion of the exercises, the president arose, and calling the gathering to order, introduced the second, or literary portion of the programme, a full list of which is as follows:

TOASTS.

GREETING, - - - - - The President.
"BUFFALO," - - - - Herbert P. Bissell.
"SIGNS OF THE TIMES, - - - R. R. Williams
"OLD GLORY," - - - Gen. C. W. Tillinghast.
Long may she wave in all the ports of the world.
SONG AND CHORUS, - - - "Star Spangled Banner."
"CONFESSIONS OF AN EDITOR," - - James H. Kennedy.

PRESIDENT SUPPLEE'S ADDRESS.

The president was taken somewhat at a disadvantage, as he had expected the honor and pleasure of introducing some other gentleman as the presiding officer of the evening. He rallied, however, with his usual facility, and spoke as follows:

Gentlemen of the National Hardware Association and Invited Guests: When I stated some two months ago to the members of our executive committee, that upon this particular occasion I must be excused from making any after-dinner remarks, I was in earnest and meant all it implied, and it was quite noticeable how cheerfully they excused me. And when the same committee suggested that the president act as toast master I cheerfully agreed, knowing full well my three years of service would entitle me to release, and I thought I knew equally well that the mantle of president would be thrown upon other shoulders.

Now I do not pose as one of those after-dinner speakers "always on tap," with one or two unspoken speeches in their pocket, nor one of those for whom you have only to touch an electric button and in answer can have an electrifying and pyrotechnic display of fireworks.

The manufacturers and invited guests who are present may not realize the fact that having presided over the convention for three successive days the sound of my voice must naturally be like the buzzing of a mosquito, and the effect of further remarks much like a bite from the same insect at the sea-shore in mid-summer.

The few remarks that I had thought over in my mind were all pertaining to a retiring president and a new incoming president, and I be permitted to flutter for a few brief moments like a butterfly among the delightful foliage of early spring, and strut for a few moments looking at the gorgeous surroundings, and then bid farewell to all past greatness. But our members have decided differently, and have further honored me (notwithstanding my protest) as your president for another year. I am duly conscious of this honor, and once more kindly thank them.

I do desire to say, however, that your president is not a one man power, nor would it be safe for anyone to assume for a moment any such thoughts. I desire to assure you I have never entertained them. Your executive committee do not permit the president to usurp their prerogatives, but expect him to fully consult with them on all important matters, join in their councils, ask their advice and abide by the voice of of the majority. I admit that you shoulder him with a large amount of responsibility, which you expect him to conscientiously and judiciously use for the best interests of our members.

Associations of similar intent to ours, while of comparatively recent creation here, the annals of English history show existed in that country as far back as 1600. The Marquis of Salisbury, in recent remarks at the Lord Mayor's banquet, stated that commercial and business considerations were far over statescraft, and that England's aim was to extend commerce, trade and industry, throw open as many markets as possible and bring together as many consumers and producers as possible.

Almost simultaneously with the above remarks, one of the most distinguished statesmen of our day recently stated that in the dark days of 1776 soldiers were needed and quickly responded and fought for our flag and our country. After liberty was attained statesmen were needed in the formation of our Constitution and in matters incident to the same, but at the present day business men in all departments of trade and commerce are what is necessary and essential to the prosperity of our country.

Referring for a moment to this beautiful city of Buffalo, where the towering branches of grand old trees meet in the center of two of the most beautiful streets in the world, bordered by residences of architectural beauty and terminating in a grand park of over 900 acres and a park driveway of nineteen miles. His Honor, Edgar B. Jewett, Mayor of this city, is authority for the statement that the population of Buffalo has increased in the last seven years over one hundred and forty thousand, that within a radius of four hundred and fifty miles of Buffalo, that is drawing a circle with Buffalo in the center, that within that circle live *one half* of the inhabitants of the United States, or over thirty-five million people, and within that circle are one hundred and thirty-five cities with over twenty thousand inhabitants, and from the most remote city you can reach Buffalo in a luxurious sleeping car in one night.

We may therefore feel considerable pride in the selections we have made for our annual conventions, as this city compares very favorably with those selected for former meetings, Philadelphia, Pittsburgh and Cleveland.

It is now with the greatest amount of pleasure that I introduce to you the first speaker of the evening, a gentleman who stands pre-eminently high as a lawyer, not only in this city but throughout the country, and one who holds

Digitized by Google

several high positions of responsibility and trust, Mr. Herbert P. Bissell.

In the absence of the mayor, the toast of "Buffalo" was eloquently responded to by Herbert P. Bissell, a member of the Buffalo bar. His speech was full of hits and good points, and much information concerning the city which he had the honor to represent.

The next speaker was R. R. Williams, the Hardware editor of the *Iron Age*, who spoke upon "Signs of the Times." After alluding to the circumstances under which the association met, the necessity for organization, and the advantages which resulted from the cultivation of fraternal feelings, Mr. Williams spoke of Great Britain and her colonies and dependencies as a great aggregation of commercial interests, referring to the extent of her possessions and the enormous volume of her commerce. He emphasized the point that the extension and maintenance of the British Empire was not secured so much by force of arms as by means of trade, this being the secret of England's growth and power. In closing he touched upon the resources of this country, its pre-eminence in manufacturing, and the indications which point to its speedily occupying a commanding position in all the markets of the world.

The next speaker was Gen. C. W. Tillinghast, adjutant-general of the State of New York, and also a member of J. M. Warren & Co., of Troy, N. Y. His speech, which was an eloquent presentation of the extension of American trade under the protecting folds of the star-spangled banner, known upon the toast as "Old Glory," was, in full, as follows:

SPEECH OF GEN. TILLINGHAST.

It is always interesting to delve into a subject that touches closely our national pride and supremacy, one that is as far reaching as the East is from the West, as the farthest known north is from the most southern of the discovered lands. And I find the subject upon which I am to speak tonight especially so, because of its close connection with our own business career, because the vast increase of exports that yearly leave our shores, amounting in the last twelve months to some two hundred and twenty-five millions of dollars, consists largely of machinery. Surely in this, we as iron and steel merchants, are deeply interested, and we can well turn our thoughts for a moment tonight toward the building of the ships that bear this wealth from our ports, and to the Stars and Stripes that should float wherever wind and sail carry those ships.

I am informed by the secretary of our association that Colonel Belknap, who was charged with the selection of the toasts for this banquet, was prompted in the naming of mine by the fact, that in his recent travels abroad, he had so seldom seen our flag. Hence, the beautiful thought came to him of the appropriateness of blending, as the artist does the colors of a painting, that both delights the eye and softens the heart, of blending, I say, into one toast the idea of commercial supremacy and the emblem we all love, that standard of our United States, "Old Glory."

As soon as I heard of it I sympathized fully with the sentiment because I am so thoroughly a merchant, that I would have the merchant marine of my country all *prevading*, and so loyal and enthusiastic an American, that had I my way, our ships would rest in every port of the world. Then, too, it recalled an incident that so stamped itself on my mind as ever to remain in memory. It was a simple incident, so simple that to many the repeating may seem boyish, yet oft times it is the homely, quiet sayings of a loved one, or the simple influence of our early home life, that make the strongest impressions and influences more, yes far more, than the apparently greater ones, the forming and shaping of our after lives.

It was just twenty years ago, and I had been spending several months in the south of France, when one afternoon, in driving along the famous road that skirts the Mediterranean, a sudden turn brought me in sight of the harbor of Ville-Franche. Then for the first time in my life I could realize the feelings of that wandering poet, when he penned the words of earth's sweetest song, "Home Sweet Home"; for there below, in the quiet waters of the port, lay a war ship, grim messenger of aid to "sufferers" and of vengeance to "offenders," and best of all, from her stern floated an ensign that I pray will ever bear peace, where peace can be had with honor, and dread war, where peace and honor have become divorced; it was our flag, "Old Glory."

Strange indeed it must seem, when we take time for thoughtful investigation, that this grand and wonderful country, with its eight thousand miles of sea coast, its marvelous inland lakes, almost seas, its harbors equal to any in the world, its system of light-houses, light-ships and buoys; its corps of brave and hardy men, ready at any hour of day and night to risk life, that those who "go down to the sea in ships" may be saved.

Strange indeed it must seem, that with so much to stimulate and encourage our carrying trade on the seas, the subject of a merchant marine should receive so little encouragement from our Government, and create so small an interest among our people. The people, apparently, have forgotten the enormous revenue which year by year they have been paying into the coffers of other nations, and especially Great Britain, to whom alone in the year just ended, they gave the enormous sum of three hundred millions of dollars.

Sir Walter Raleigh said: "Whoever commands the sea, commands the trade; whosoever commands the trade of the world, commands the riches of the world, and, consequently, the world itself." This sentiment has successfully ruled Great Britain for years, until now she carries fully seven-tenths of the ocean-borne commerce of the world, and her power and supremacy on the sea is the immediate result.

We point with just pride to the wonderful achievements of our people on the land, but we seem to have entirely lost sight of the added power among nations, and the increased prosperity that might have been ours, had we encouraged our men and boys to seek it in our ships.

Statesmen, in the early life of our country, realized better than we, all that it meant for a nation to be rich in its ocean power. They knew what it meant to have our flag seen in foreign ports; they knew that a prosperous merchant marine, trained men, who would be invaluable in the defense of their country, should their land be called upon to arm her sons for war. They realized that neglect was inexcusable. And as Thomas Jefferson so aptly put it in speaking of our merchant marine, "as a branch of industry it is valuable, but as a resource of defense essential." Those founders of our country were wiser far than we have been, for in the bright and peaceful days *they* built bulwarks to protect them from the storms of the winter.

And when we think of all we have done, all that we have accomplished for internal commerce, by our miles of canals and our vast railroad systems, it should cause us to halt and consider well, whether we have not neglected a field broader than the land we have been tilling with such infinite care, and whether we have not left for other nations the opportunity to reap what the Founder-of-all intended should be part of our heritage.

From the days when Egypt was all powerful, commerce and navigation have been considered the avenues to wealth and power. Spain lost most when her commercial strength on the seas waned, and England, realizing all this, protected and encouraged, not only her merchant marine, but

Digitized by Google

insisted that her ships should be built at home, even though the cost of construction, because of the scarcity of timber, when wood was used, made the purchase price much greater. She has forged ahead while we have lagged behind.

From the year 1792, when our government first offered a helping hand to its infant ocean child, until 1828, when the child had become so strong as to carry ninety per cent. of all her commerce, the United States took a coveted position among the great nations of the earth. Since the day when protection was withdrawn, we have gradually but surely fallen, until now our ships carry a beggarly eleven per cent. only of the merchandise that leaves our shores.

England has encouraged, we have discouraged, one of our greatest sources of national wealth.

But let us turn for a moment from the wreckage thrown up by the seas and think of the grand achievemements that as a nation we have accomplished on land. Brains, industry, steam and electricity have so surrounded and encompassed us that our men-of-war, equal in their class to any manned by foreign crews; our buildings, wonders of architecture and height; our locomotives that whirl us through space, have made the name, "American," famous.

And to-day we think with awe of the trained and fearless mind that planned the structure that makes one the two largest boroughs of our great metropolis.

We look with wonder at the skill of the engineers who controlled the Mississippi with those great levees.

And the world stares with astonishment when it realizes that the ingenuity of man has compelled the almost irresistible power of our great Niagara to yield to him and do him service.

With such a record of success, and the knowledge that we are daily instructing the nations of the old world, our supremacy on the sea will again be assured, if we but decide among ourselves as a people, that we will carry the flag of our country into every harbor of the world.

As merchants, it would be difficult to find a wider field for useful labor than the neglected commerce of the sea.

As American citizens, who have inherited a legacy from brave and hardy forefathers, men far-seeing, fearless and devoted to their country, we cannot find a work that is more worthy of our best efforts, than to pick up and strive to splice the rope that long years ago they wove and that thoughtless years of success have snapped asunder.

True, we cannot all advocate its value on the floor of Congress nor in the halls of legislation, but as the pen is oft-times mightier than the sword, so must public opinion, if intelligently directed, compel action that has been too long deferred.

And, as a dash of sentiment, which is always so welcome to a true man, I give you this thought, Our Flag, whether in peace or whether in war, still Our Flag.

At the conclusion of his speech, which was most generously applauded, the audience arose and sang with stirring enthusiasm the glorious old song, "The Star Spangled Banner." The manner in which it was rendered showed that the words, "National Hardware Association," also stand for "Patriotism" and "The Old Flag."

The next toast, which was "The Confessions of an Editor," was responded to by James H. Kennedy, editor of *Hardware*, New York, who spoke as follows:

"THE CONFESSIONS OF AN EDITOR."

Mr. President, and Gentlemen of the National Hardware Association: As I sat here this evening, studying this artistic programme, and listening to the able gentlemen who have so entertainingly instructed us, the thought has occurred to me that the double-headed vegetarian committee having the preparation of the evening's exercises in hand—the little Weed of Buffalo and the rotund Fernleaf which grows upon the banks of the Schuylkill—missed something in the educational life of that little red schoolhouse, of which both speak with such patriotic eloquence—and that was the chapter in their arithmetic which treats of *proportion*.

The Buffalo plant said to me in the assignment of this toast, "Now get up young man, and own up to it all. Tell us the why, the when, and the how. Confess, for once in your life, the errors and shortcomings of your profession." Then the Philadelphia end of the contingent telegraphed me, fearing that the mails would be too late, "We will give you just three minutes, and if you don't quit at the end of that time, we will turn the band loose upon you."

Well, gentlemen, this is a serious dilemma in which to place any man. Confess the sins of twenty-five years and of a profession whose members are discovered in every hamlet between California and Maine, and then to give him but three minutes in which it is to be done! It would take me three times that long to confess the sins of brother Williams here, to say nothing of my own. I mean those of his of which I have knowledge, for the legal law of equivalents is, that when one possesses so many, and such conspicuous virtues, he must have some choice bits of human nature in reserve, to make it even.

If I only knew the exact things about which confession might be made, the task would be much easier. There is one form, however, that comes with readiness to us all. I will illustrate it by a bit of true, but pathetic history, that has been often related to me in the privacy of my own home by brother Clinch—there is but one Clinch—the Pooh-Bah of the New York Hardware Club. In years gone by, when the late Benjamin F. Butler and young Clinch were little boys together on the old ancestral farms of Massachusetts, they were one day playing with a little Bradley axe. After they had slashed their way through the orchard, and gone into an adjoining field, little Alfred cut into a small chestnut tree that was his father's special delight—and we all know that Clinch has been cutting into chestnut trees ever since. When the father came home he saw the ruin that had been wrought, and took down the strap and said: "Alfred, who cut my little joker?" And Alfred looked up with that soulful gaze, that has held so many of us spellbound when he was giving out tickets and taking cash for the dinner of the Hardware Club, and said: "Father, I cannot tell a lie. Ben Butler did it."

Thus, gentlemen, it is very easy to confess the sins of someone else. The world has been full of sorrow and bitterness, backbiting and hatred, because of this willingness on the part of so many of us to bear our neighbor's burdens. I am reminded of the old man who sat in church that morning, when the minister was discussing the various sins to which humanity is heir. As he touched upon the sin of drunkenness, an old fellow who sat in the front pew began to wiggle about, and finally, unable to stand it longer, jumped up, and said, "I have got to own up, Mr. Minister, I know you are hitting me!" He then sat down, and the dominie passed on to the other heads of his discourse. When he reached the sin of hypocrisy, the old man again began to wriggle, and finally, with his finger extended to the deacon who sat in the next seat, he shouted "Get up, Deacon Jones, get up. I did."

Grover Cleveland, when the heat of a great campaign was upon him, telegraphed to a friend: "Tell the truth about it," and Grover Cleveland has twice been elected president, and stood a good chance of another term. George Washington got his start in life by telling an unexpected truth at a trying moment. So have many other men told the truth in a way that came as a surprise to those who knew them best. They had been pushed into a corner and had to.

Speaking of truth telling and its contingent virtues, let me say here seriously, gentlemen, as a deserved tribute to American manhood, and especially to American business men, that I believe that truth telling, and honesty, and

Digitized by Google

modesty, and clean living, and clean thinking are more usual among men than they were a generation or so ago. I believe that men were never more honest in their business dealings in the history of the world than they are today. Not merely because honesty is the best policy, which it is, but because that with advanced culture and increased education, they have come nearer to the great fundamental truth that man should do right because it is right; not so much through the stern commands of the Ten Commandments, as because they have come to live nearer and nearer to the sweet truths of the Sermon on the Mount.

The honest man, the upright man, does right because he likes to feel that an honest man is the best company he can keep; because he likes to be in good company when he is alone; because he likes to associate with a pure man day and night, in his lying down and his rising up, and when in the silent watches of the night he is alone with his God and his own naked soul.

But I am getting away from my text.

There was a time when the toast of "The Press" was given a place of formal honor upon all programmes on occasions like this, with that to "The President," "Our Country" and "The Ladies," God bless them. I am glad to see that that time has passed away. The press has been relegated to its proper place with the other professions and lines of business, and now it seems that upon an important occasion like this, opportunity has been found to bring it to the bar of public opinion, where it is told to own up, like a criminal at the bar.

There may be a reason for this. Yellow journalism may have had something to do with it. But I want to say to you, gentlemen, that if there were no yellow readers there would be no yellow newspapers. The demand makes the supply here as it does in nuts and bolts and nails and shovels—in which, we are sorry to confess, the supply sometimes exceeds the demand.

You will have just such a newspaper, gentlemen, as you ask for. First cast the yellow mote out of the public eye, and the newspapers will return to their original tinge of purity.

In your own especial line, the trade journals are just what you make them. If, as I believe they are, they are clean and respectable, it is largely because they have a clean and respectable business to cater to. If they are not just what you want, please bear in mind what they might be. If they don't always publish just what you want them to, remember how much they leave out. If brother Williams here, or some other trade editor, should happen to rummage through headquarters over in the other end of this building, and publish all the letters in those long boxes marked "Confidential," there might be a stir in the Hardware trade; and if the letters of sympathy and condolence that our Fernley writes in reply, should also be published, the Hardware world would say: "Behold, here is one who

knoweth that molasses catches more flies than vinegar. There is indeed a balm in Philadelphia."

In referring to the doings of this Association, I wish to compliment one committee in the highest terms, although I have been brought up sharply against it many a time, and that is your press committee In the old legend of the garden of the Hesperides, there was a seven-headed dragon that kept all passers by from straying into the golden orchard. He did it well, with his seven mouths wide open, and all of them vociferous. Your seven-headed dragon, clothed in the plaid of the McIntoshes, does its work with equal effect, but silently, courteously and in a manner that, while sifting the news carefully, leaves no hard feelings and no sting. Therefore, gentlemen, if there is anything in the line of news about this Association that you want and don't get, please blame this committee, and not the editors.

In conclusion, permit me, gentlemen, to add my testimony in favor of that glorious thing which will hereafter and forever be known as "Buffalo Hospitality." This hospitality is not merely a thing of the present time, but it has always existed. Your honored mayor, at the "Smoker" the other evening, referred to Buffalo as the gateway to the sea. There was a time years ago when it was also called the gateway to the great and untrodden West. I had occasion, some time since, to look up some matters in connection with the origin of the city of Cleveland, and came across an incident which shows what Buffalo hospitality always has been. In the year 1796, a little party of surveyors were sent forth from New England to lay out the great Western Reserve, under the direction of that sturdy old pioneer, General Moses Cleaveland. On a beautiful morning in June, they reached that little stream which then, as now, bore the name of Buffalo Creek. As they rowed into its mouth, they looked away to the left and saw the verdant fields and the green forests and the blue sky, all smiling a welcome, and as they turned their eyes toward the Western bank, there stood with outstretched hand, ready to sell them tomahawks or scalping-knives or other implements of Hardware, cash down and no discount, that eminent Hardwareman, that prince of good fellows, Hobart Weed.

This speech concluded the set programme of the evening, but as it was yet early, a number of gentlemen were called upon, and responded with brief, but telling addresses, all of which fitted the occasion. Among these were Hobart Weed, Harry Walbridge and Walter J. Shepard, of Buffalo; H. H. Bishop, of Cleveland; John Bindley, of Pittsburg, and the secretary-treasurer, T. James Fernley. The remarks of the last-named gentleman were, in full, as follows:

SPEECH OF T. JAMES FERNLEY.

Mr. President and Gentlemen: When called upon in this unexpected manner I scarcely know where to begin my remarks. I had hoped that the gentlemen who preceded me would have opened up some line of thought which would have given me food for a few moments' attempt to entertain you. But, alas, gentlemen, such is not the fact.

I have prepared a few impromptu remarks, however, and will endeavor to make them just as brief as the correspondence with the *Iron Age*, from the pen of Supplee Hardware Co., and will endeavor to put as much thought into the subject about to be discussed as McIntosh-Huntington Co. put into the preparation of the articles which they write to *Hardware*.

We have been favored with a magnificent address from the editors of two of our representative trade papers. We also have heard eloquent remarks from one of the former members of our executive committee, whose position in connection with our association undoubtedly did much to attract the attention of the appointing power of New York State, so that we now are able to look upon him, not as an ordinary Hardware civilian, but as a General.

Thus, gentlemen, you have to-night had an illustration of the "Pen and the Sword." It would not be fair to say that upon this occasion the "pen" has been mightier than the "sword." Indeed, they are both in their way Mighty. This is an age—an era—where journalism is practically the controlling force.

Fortunately, we do not need the sword, unless it may be "the sword of the spirit." Truly, in the history of the world different classes have, at various times, come to the front and been the controlling influence. Centuries ago orators of Rome and Greece held sway. Subsequently, those who were skilled in the arts, particularly the sculptor and the painter, were revered. Afterwards we had these wonderful men produced by the Reformation. Then, what great musicians. Who does not revere Handel, Wagner, Mendelssohn and Mozart?

Literary genii have held their sway and were worshipped, as it were. Who has not read the writings of Shakespeare, Milton, Bunyan, Tennyson, Carlyle and Supplee?

This is all past and now two forces seem to be the ruling ones—Journalism and Organization.

The Journalism which fears not danger. Is it not a fact that Journalism has done much to breast the glaciers of the North and to nail the flag on the North Pole? Is it not a fact that the journalist, fearless, rushes into the plague? Is it not a fact that the journalist would not be deterred from going into the very caverns of the sea, if information could there be gleaned?

I say, gentlemen, to night you have heard from men who are fearless. Who, but these, could perform such wonderful work as did Karl Decker, who assigns one of his men to the most hazardous undertaking, probably, of the present century? Who is it but the able, fearless and brave journalist, who could dare to have undertaken to rescue the beautiful Cuban maiden, Evangelina Cisneros, from the cruel Weyler Spanish dungeon? Cuba must be, shall be, free. Our association owes much to the journalism of the trade.

It is true that, at times, they make quotations which are a little hard to meet and at the same time cover the expense of doing business, but we feel that if this most important work was in the hands of less conscientious gentlemen, considerable more danger would confront us.

The other factor which has such a controlling influence on the present age is that of organization, that of associations.

Indeed, gentlemen, the pages of history which are being written at the present day will reveal what gigantic results are accomplished by organized effort, which could not have been attained by individuals. And, right here, it might be well for me to ask "Why individuals do not, as individuals, protect themselves?" My answer is, that "This is practically impossible."

Scattered as we are over such a vast country, which vastness cannot be imagined by anyone who has not traversed it—and right here let me say that I feel that I am an authority on this vastness, for, as I said in my annual report, I traveled 30,000 miles, covering the distance from the rock-bound coast of Maine to the magnificent Golden Gate of the Pacific, which stands ever open to the traveler from the Orient (unless he be a Chinaman), and having traveled from that land where daylight only disappears at midnight to the beautiful country where the ground has to be tickled by the hoe to ripen into a bountiful harvest—having done this (for you, gentlemen, in your interests) I do claim to be somewhat of an authority on the vastness of our country.

And let me say that this is the reason why it is impossible for individual effort to avail. How would our esteemed friend, Chamberlain, residing as he does on the rugged coast of Maine, know what was in the heart and mind of our friend Mr. De Hart, who lives probably nearer to the Klondike regions than any other gentleman now

Digitized by Google

present, if it were not for the fact that there is a common medium through which they may communicate and act?

And I, gentlemen, am proud of the fact that up to the present moment I have been this common medium. Your Executive Committee meets to-morrow, and it may be that they will conclude to get some other common medium, in which case I will simply subside, cherishing always the fond memory of my official duties in this Association.

One reason why associated effort seems so necessary is that heretofore there has been such a lack of confidence on the part of one jobber in another. In the words of Demosthenes to the Athenians I would say, "Yes, Athenians, I repeat it—you yourselves are the controllers of your own road. Lives there a man who has confidence enough to deny, let him arise and assign if he know of any other cause of the success and prosperity of Philip." But you reply, "What Athenians may have lost in reputation abroad she has gained in splendor at home. Was there ever a greater appearance of prosperity and a greater face of plenty?"

Have not the Jobbers endeavored to impersonate in some way the Athenians, and are there not many jobbers present who can say, "Have we not built up a magnificent business? Have we not more customers and a greater degree of prestige than any other house in our locality?"

Yea, Athenians, this may be true, but if you have done this at the expense of the profits of your business what have you to boast? In your great stride to command business is it not a fact that you have compelled these manufacturers, these loyal and honorable men, who use their skill and their money in converting into magnificent tools, locks, hinges, axes, shovels and all other useful commodities made from iron and steel—Is it not a fact that from this over-zealous competition you have compelled them to reduce their prices to such an extent that they cannot make a proper profit? Such I allege, gentlemen, is the fact.

The time has come when all this must cease if we expect to live commercially. I remember once taking the ride which we to morrow will take, from Buffalo to Niagara Falls, and I asked the gentleman who was seated beside me what was the name of yonder river. He said, "That is the Niagara River." I said, "How far are we away from the Rapids?" "Oh, only a mile or two," was the reply. The reason I asked the question was that I saw a boat fairly well built in the middle of the river, and in it were several Jobbers of Hardware. One was from New England, one from the Western part of our country. I saw one gentleman with a beautiful florid complexion who was from the South. The other gentlemen I could not recognize. Looking out from the car window I saw how near they were to the dangerous waters and I called out "Men, ahoy. The Rapids are below you." They laughed derisively. They had been used to danger. They had been making dangerously low prices for several years. They said, "We have heard of the Rapids. We are not fools enough to get into them."

The Jobbers who had the oars rowed onward. My heart throbbed. I would have jumped into the surging waters and rescued them were it not for the fact that there were other Jobbers of Hardware in whom I have an interest, who are living on the banks, as it were, of the Niagara River, and I thought I was not justified in risking my life, but that I could do more good in trying to live a little longer and prevent others from pursuing methods which would cause them to have the same fate as those who were about going over the brink at Niagara Falls.

Indeed, gentlemen, it is a fact that both jobbers and manufacturers have pursued such business methods in the past that they have gone into the Rapids and, hence, are not with us to-night; and if this organization, which under the masterly supervision of this gentleman, who is held in the highest esteem by everyone associated in any way with the Hardware business of this country, can succeed in inducing both jobbers and manufacturers to refrain from such business methods as will lead them to ruin we certainly, then, have performed our mission.

Let us help one another to reach the high places. It was my pleasure in June of this year to visit a member of our association, who is well esteemed, Mr. George Tritch. After having spent a little time with this man, who was a pioneer in the Hardware business in his day and also a pioneer settler in what is now the city of Denver, I was advised by his son, Mr. George Tritch, Jr., who is now at this board, to take a visit to Pike's Peak. He told me that he thought there was a jobbing house there and, of course, it was my duty, inasmuch as I had to pass Pike's Peak, to stop off for a couple of hours and see if I really could find a jobber. While standing there, some 14,000 feet above

CHAIRMAN HOBART WEED.

the sea level, my mind, of course, dwelt upon lofty things. I heard the story of General Pike, who was the first civilized being to ascend this peak. I learned how he, with his noble little company, camped out night after night, wild beasts lurking around their camp fire threatening to devour them, General Pike probably ascending a few hundred feet each day, and I said to the old aborigine who was there, "How did this party ascend to such wonderful heights? How did they get over these rugged boulders?"

"Well," he said, "there were quite a few of them and they joined hands and one man took the lead, grasping the hands of the next, and he with his fellow, they gradually ascended until finally the topmost part of the Peak was reached."

My mind immediately went back to you. You, gentlemen, who were toiling at your respective desks, while I was toiling in your interests in ascending the Peak. My mind went back to the jobbers of this country. And I thought how possible it was for you to ascend to the very highest

Digitized by Google

peak of commercial success if you would help one another. The verse of poetry came to my mind:

"The heights by great men reached and kept,
Were not attained by sudden flight;
But they, while their companions slept,
Were toiling upward in the night."

There is a path which leads to almost every peak. The presence of one on the peak, who has been in the gorge, is conclusive evidence of such a path. Is it not far better for us to aid each other to ascend this peak than to endeavor to ascend ourselves by pushing down others?

Let this, gentlemen, be our effort, to help each other to attain the highest eminence in commercial success.

I hope that you will pardon me for having taken so much of your time with these impromptu remarks

With these remarks, the banquet came to an end.

On Saturday, the members and their wives visited Niagara Falls, in accordance with the programme outlined in the report of the entertainment committee given above. The day was one of pleasure and interest, and upon the return to the city, the greater part of the members and their friends departed for home.

THE SECRETARY-TREASURER.

At a meeting of the Executive Committee, held on Saturday, the position of secretary-treasurer was unanimously tendered to T. James Fernley, who was also the unanimous choice of the members of the Association. It is to be hoped that he will accept, as no more energetic, faithful or willing officer could be found.

THE ENTERTAINMENT COMMITTEE

which had the entire proceedings of the convention in hand, are worthy of the highest praise for their endeavors to make the occasion a source of pleasure and profit to all who were present. It is needless to say that their endeavors were crowned with success. The names of these gentlemen are as follows:

Hobart Weed, chairman, Buffalo.
Gen. C. W. Tillinghast, Troy.
Harry Walbridge, Buffalo.
Charles H. Turner, Albany.
John R. Griffith, Philadelphia.
Griff D. Palmer, Rochester.
G. J. Laighton, New York.
E. C. Neal, treasurer, Buffalo.

Good Business Manners.

No man can be methodical without being punctual; and without these two qualities, he becomes a nuisance to himself and every one about him—to himself, because he is always in a fume and muddle; to others, because want of method and punctuality are generally accompanied by irritability, want of consideration and injustice towards them. For it is a reliable (though unwritten) law that the unpunctual and unmethodical man invariably blames anything and everything, animate or inanimate, in his dilemmas, rather than attribute them to himself and his failings. He is always the hardly oppressed individual, who is too busy to be civil or obliging, and is having more put on his shoulders than his share (so he says); while others find time for a periodical "breather," and so remove their noses from the business grindstone. And, so far, he is truthful—he is always at work in a measure; that is to say, he is never free of it; and why? Not because he has a super-abundance of legitimate work in hand, but because he invariably starts late and has a nucleus of a day's business left over from yesterday instead of clearing-up, as he goes on the principle that, "Sufficient unto the day is the work thereof."

Punctuality should begin at both ends—if a man arrives at his office or business punctually every morning, he ought, and can, leave punctually every night. I am a disbeliever in overtime, especially for the brain worker—no one is much good for figures after nine hours' "hard slog" in the office.

The unpunctual man is a failure, in every sense of the word. He never, except by mistake, keeps an appointment, and thereby frequently offends a good client. A further sequence to this is often found in "differences" among the workers who, entirely owing to this irritating person, have nothing to do but to kill time for an hour at a time, and then, towards closing time, more than can be done without overtime. Now, is it to be wondered at if they resent this treatment? Nothing is more galling to a punctual and energetic man than to be forced to loaf about one hour and then put on double-pressure the next, when he knows, perfectly well, that it only wants method to keep the ball well and constantly moving.

Moreover, these "rushes" are accountable for half the errors. When men are driven hither and thither against time or letters written post-haste, it is not at all remarkable that grosses are ordered instead of dozens, letters placed in wrong envelopes, cheques sent away unsigned, and articles omitted from their proper parcels or placed in wrong ones. Unfortunately, the blame is seldom brought home to the right quarter. Another possible result of this pernicious habit is that men are sometimes sent off in a wrong train, simply because they arrive at the station at the last minute and assume that the train they enter is the right one, as there is no time to inquire. This may be a serious loss to the employer, and if he is the cause thereof, it serves him right. If, however, it is the manager—well, his room will very soon be preferable to his company, if the business is to prosper.

Search into the private affairs and character of any successful man you like, and you will invariably find that, among other virtues, he possesses rigid punctuality and method. Minutes lengthen into hours, and it is well to avoid the tendency of being a minute late (and not minding). Next time it will be two, then five, and so on. It is quite possible to be at one's post to the tick of the clock nine days out of ten.

Clear up as you go, as far as possible. Finish one thing well before you start another. Don't begin a half dozen and finish neither—they will have to be finished by some one. Be punctual and methodical, and you will be calm and collected and bring forth your best. Business worries must come, but don't manufacture them for yourself on the premises.—*The Hardware Trade Journal.*

The experiments in wireless telegraphy are being continued at Dover, and successful and interesting results have been obtained. In some experiments in which the South Foreland Lighthouse was made the objective, messages transmitted from Fort Burgoyne were easily read, and an electric bell was rung at the lighthouse by means of the wireless current. As the transmitter is only at one end, the ordinary means of signaling with the heliograph, etc., is adopted between the points. The accumulators used for the experiments are charged daily at the Dover Electric Light Works. The induction coil used is an exceedingly powerful one, and produces a thick spark nearly a yard long, the messages being transmitted from a vertical wire carried up a pole. So far the experiments are considered highly successful and encouraging. The application of the system to lightships is to form a portion of the experiments at Dover.—*Exchange.*

A clever workman in a cutlery factory in Sheffield, England, has recently made a dozen pairs of shears each so minute that they all together weigh less than half a grain. That is about the weight of a postage stamp. Each pair was perfect and would cut if sufficiently delicate material could be found. Lying on a piece of white paper, they seemed no larger than fleas.

Changes on Chambers Street.

Notwithstanding that official notice was given in May last, that the erection of the Public Record Building on Chambers, Reade and Centre Streets would occasion the demolition of the premises now occupying the selected site, the firms interested, largely identified with the Hardware trade, seemed to have an abundant faith in the "law's delay," and made little preparation to vacate. A recent notice to all owners and occupants of the buildings from Centre Street up to, but not including, the building of the American News Co., that on November 26, 1897, all the buildings and parts of buildings, would be sold by public auction, gave the community a final shake-up. Steps were at once taken to select other quarters, which in some cases have made widely separated changes among old neighbors, and may possibly have a future bearing on some localities, completely changing the character of a whole neighborhood.

It is anticipated that after the sale of the buildings to the house wreckers to-morrow, the customary fifteen days only will be permitted to raze the buildings and cart away the material; to those large houses running through from street to street, and carrying large stocks of goods, it will be found a very difficult job to transfer their stocks to new localities already leased in which radical changes in inner construction may be necessary to fit them for the changed conditions.

Of the leading firms who are thus compelled to leave old quarters they have held for upwards of a quarter of a century, Sargent & Co., a most representative house, is compelled to move the farthest away. The necessity existing for enough space to make provision for the extensive line of goods always carried in their stock, compelled them to canvass a larger area than the other establishments. The premises finally selected are at Nos. 149, 151 and 153 Leonard Street, just east of Centre Street, a substantial building, built within five years past, having all modern improvements and about 70x115 feet, with a basement and seven floors above the pavement, in which ample space will be provided for all requirements. Workmen are already occupied in making the necessary changes, and it is hoped that early in December will find them in their new quarters. It is in contemplation to use the third floor as a packing department, while the offices will be conveniently located on the second. Having one passenger elevator and two freight elevators, the business will be greatly facilitated.

The facts of the ease with which the shipping could be done, and the premises reached by the wagons of their local trade, through the improved conditions from repaving Centre Street and widening Elm Street, were large factors in the selection of the building; the change will doubtless prove of no detriment to their present prosperity.

Peck, Stow & Wilcox Co. were fortunately able to find within the prescribed Hardware limits the premises suitable for their wants, although restricted in area over their premises at No. 27 Chambers Street. They will move to the store at Nos. 31 Warren and 27 Murray Streets, recently occupied by the Atlas Tack Co. They have leased the store floor and two basements, which extending as they do, 150 feet from street to street, will doubtless furnish the needed space for active business requirements. As they are already making the imperative changes and alterations required, they will soon be able to transfer their stock to the new premises.

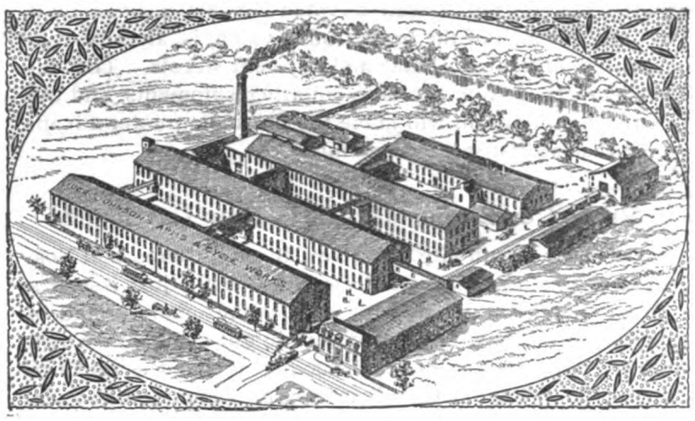
Stanley Rule & Level Co. after spending thirty years on Chambers Street, were loth to depart from its tradewinning influences. They were successful in leasing the entire floor in the Cary Building, No. 107 Chambers Street, immediately over the premises of the Union Nut & Bolt Co. As the floor is of generous dimensions, running through to Reade Street, 50x100 feet, they will suffer no inconvenience from the change beyond the bother of moving their stock; and the change into this recently modernized building will bring them better facilities for transacting business and an opportunity for rearranging office requirements giving them improved accommodations.

U. T. Hungerford, the successor of Wallace & Sons, No. 29 Chambers Street, was compelled, in order to get accommodations positively requisite, to make almost as radical a move as Sargent & Co. He succeeded in leasing the large building No. 121 Worth Street, having six stories and a cellar, 80x22 feet, which. after alterations are completed, will be found well adapted for his business and not out of reach of the brass trade, which is already represented on Centre, Duane and adjacent streets. The improvement of Elm Street facilitating shipments, and the convenient location, will make the move of greater advantage than at first seemed possible.

Russell & Erwin Mfg. Co.'s New Catalogue.

Russell & Erwin Mfg. Co., New Britain, Conn., and Nos. 43 to 47 Chambers Street, New York, have just issued a new catalogue under date of 1897, handsomely bound in embossed linen; with cover design in gilt and color, which while giving evidence of their having joined the ranks of those who believe in the advantages of portable catalogues, has succeeded as well in presenting a very attractive and beautifully printed volume of 290 pages, 5x8 inches in size, that will be welcomed by all whose hands it may reach. It is evidently intended to be more especially an Architect's Catalogue, as its contents cover such lines of goods as would fill specifications emanating from such a source. All their specially attractive designs are shown in an extremely tasty manner on pages printed by the albertype or similar process, in such a manner that every page of this kind seems to have a faint tinted background to set off the beautiful pattern of the articles illustrated. Nearly all of the pages so arranged show, in illustrations of reduced size, the knob, front door and vestibule escutcheons, sliding door escutcheon, drawer pull and push button of each design, and on the opposite page is given in every instance the full description, catalogue number, size and list price of every article made of the design illustrated. When it is realized that few if any of these new goods are shown in their 1894 catalogue, with 1896 appendix, the utility of this new catalogue, its handy size and fullness of information, will be abundantly appreciated by the patrons of this company.

There are thirty-four styles and patterns fully illustrated in the manner we have referred to, representing every school of design, from the Grecian to the Romanesque. In addition to this varied assortment, a full line of mortise knob locks and latches, sliding door locks, wrought steel and other rim locks are also shown in connection with the butts, store door handles, and such other builders' Hardware as makes the volume doubly attractive and extremely valuable to the trade. A full discount sheet accompanies the catalogue.



The *American Wheelman* in its issue of last week announced that hereafter it will be devoted entirely to cycle trade subjects; also that racing and other general matters connected with cycling will be eliminated. This publication has always been one of the authorities on trade matters, and has a corps of editors and contributors who are thoroughly conversant with them. The energy and ability of the staff will now be concentrated on the subject, and it is promised that the publication will be a distinct departure in cycling journalism. As heretofore H. L. Saltonstall will manage the business department, and G. L. McCarthy will have charge of the editorial work.

Iver Johnson's New York Depot.

The Iver Johnson's Arms & Cycle Works, Fitchburg, Mass., have decided to open a new depot in New York City which will be located at No. 99 Chambers Street, under the management of William H. Cole, for many years associated with the firm of Tower & Lyon, New York.

The New York office, salesroom and warehouse is now being rapidly fitted up by Mr. Cole, and will comprise the entire second floor of the building, No. 99 Chambers Street, the lower floor of which is occupied by the American Wringer Co. This entire second floor will be fitted up for

the use of the depot, the Chambers Street end containing the offices, handsomely constructed with paneled oak partitions and plate glass sections, with other modern office equipments which will be in harmony therewith; the floor being covered with moquette carpet and Persian rugs. The middle section will be the space occupied by sample and show rooms where in appropriate sample cases the firearms, guns, revolvers and their police goods will be attractively displayed, while in the larger and lighter division of the Church Street front, will be shown the full line of high grade cycles made by this old and reliable house. From the packing room in the rear of this floor, all the shipping will be attended to by the aid of a convenient elevator and the storage facilities afforded by a loft above, will enable a large stock to be carried, from which prompt shipments can frequently be made, that will prove of great advantage to their agents and others handling their large lines of goods.

Mr. Cole in his new sphere of action has the best wishes of the trade who have long and favorably known him when identified with Tower & Lyon, the experience gained in which connection can now be largely drawn upon to ground the successful business which he will undoubtedly establish for his present company.

The Iver Johnson's Arms & Cycle Works have for more than thirty years enjoyed a reputation as builders of high grade firearms, second to none, and for twelve years past have sustained a reputation equally as high, as makers of high class cycles. We present in this article an illustration of their extensive plant which more than any extended comment conveys the knowledge of unexcelled facilities backed up by an abundant capital for all possible requirements.

Orders by Telegraph.

Great preparations are being made by the manufacturers of special lines of goods for the anticipated demand, which is usually the feature of the holiday trade. The Bissell Carpet Sweeper Co. about December 1st will make the following special announcement to the trade, printed in two colors on a neat fancy card:

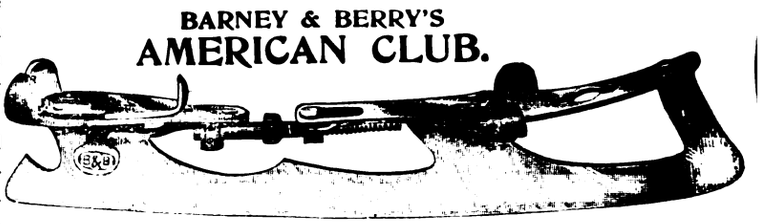
"TELEGRARH YOUR ORDER AT OUR EXPENSE."

To our Customers: If you have not already placed your Christmas order with us, to insure having the goods reach you in time for the holiday trade, you are at liberty to wire your order at our expense.

We beg to impress upon you the increased demand that always comes for Bissell sweepers during the holiday season, and trust you will see to it that you have a sufficient stock of our goods to carry you over this period. There is no article on the market at the price that makes as desirable and acceptable a gift as a latest improved Bissell sweeper with "cyco" bearings, and that this is generally understood, is shown by the greatly increased demand for our goods during the holiday season.

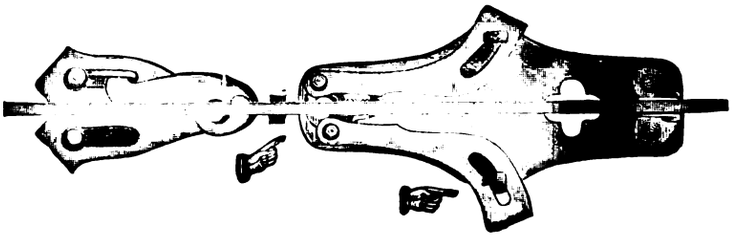
Please bear in mind that we have the most complete line of toy sweepers on the market, at prices ranging from $2.50 to $6 per dozen, subject to rebates for quantity.

Remember no sweeper stock is complete for the holidays without "cyco" bearings; your customers will demand this feature, hence if you have none of these goods in stock, and no order with us, why not wire your order to-day at our expense?



Barney & Berry's Latest Improvement in Skates.

The first blasts of the wintry season which places the thermometer below "the 33d degree," make the skate manufacturer hustle into the busy marts of trade and claim special attention as he takes his place at the head of the procession.



Barney & Berry, Springfield, Mass., the name of which firm is synonymous with the club skate, the artistic excellence of which has been before the trade for a quarter of a century, are this season placing upon the market their latest improvement of the world-famed American club.

This consists of a new "link attachment," which is this year attached to grades 3 and 5 of this skate, and which is illustrated in Fig. 2.

By means of this attachment the skate can be adjusted to the proper position sidewise upon the shoe, whatever

the style or shape. It is claimed to be an original feature and which no other keyless skate permits, in its method of adjustment. This will be found to be a taking principle for ease of application of the skate to the foot, and no dealer should fail to investigate its obvious advantages. The grades 3 and 5, to which it is applied, have "polished and

nickel tops and steel-faced blades, highly tempered and warranted to retain their cutting edge," making it a desirable skate for general sales. The New York office is at No. 114 Chambers Street.

The "safety" match is said to have been invented by a Swede named Lundstrom, in 1855. The head of the safety match contains chlorate of potash and sulphur, while the friction paper on the box is spread with a paste of amorphous phosphorus and antimony.

A man that assumes airs is usually full of wind and empty of everything else that is worth possessing.

Weed's Special File and Handle.

The Arcade File Works, Anderson, Ind., and Nos. 97 Chambers and 79 Reade Streets, New York, have recently placed upon the market the Weed Special File and Handle, which is presented in the illustrations herewith, Fig. 1, illustrating the handle and showing a portion of the file indicating its method of adjustment, and Fig. 2, showing a 5-inch slim taper file in its natural or full size, indicating the different construction of the shank.

These special files are intended to make it unnecessary for the few similar imported files to find a market in this country, and to make this possibility subject to no adverse criticism, the finest grade of imported steel is used in their manufacture. Especial care is taken in the cutting and the tempering, which is done under Mr. Weed's supervision, and is perfected by an improved process, especially adapted for this high grade of file. The handle sold in connection with these files possesses superior advantages over any special handle previously adapted to this use. It is provided with a metal ferrule, into which is fitted the taper shank of the special file in such a way that it can be easily adjusted or as easily loosened.

The company have completed the range of sizes for slim tapers to include 4, 4½, 5, 5½ and 6 inches; to which they are now adding rounds and squares of the same sizes, and fitted to the same special handle. It is claimed that the time will be short before this "special file" will be found in every Hardware stock on its own merits, which should be known to the up-to-date dealer.

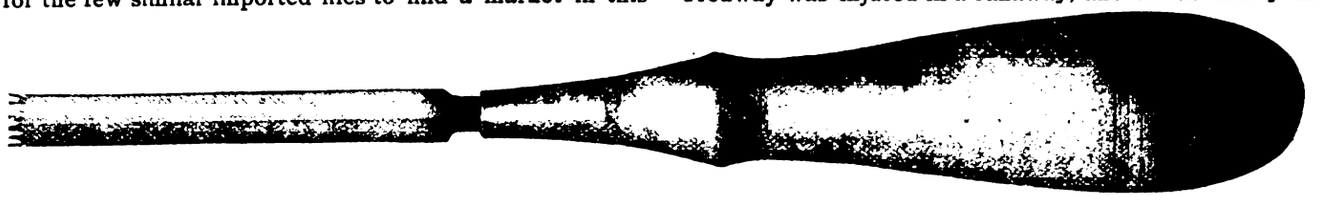

FIG. 1.

FIG. 2.

Death of Benjamin F. Dunham.

Brace Hayden, of the Dunham, Carrigan & Hayden Co., San Francisco and New York, was suddenly called to the Pacific Coast some days since, because of the sudden death of his senior partner, Benjamin F. Dunham, who died at his home in San Francisco on November 11th, of congestion of the lungs, after an illness of only a day and a half. Mr. Dunham may well be regarded as one of the pioneer merchants of the Pacific Coast. He was born in Plymouth, Mass., in 1830, and in 1850 left home for Boston, where he entered the employ of Butler, Keith & Hill, at that time one of the leading Hardware houses in New England. Deciding upon the far West as his future place of residence and occupation, he went to California in 1853, and entered the employ of Hooker & Co., of Sacramento. Toward the end of the year 1859, he removed to San Francisco, where he was connected with the house of Conroy & O'Connor, soon becoming one of the leading managers of that concern. In 1872 he became a partner in the house, and was accompanied in this move by Brace Hayden and E. W. Playter, the firm name being changed to Conroy, O'Connor & Co. In 1875 there was a change of interest, and the firm of Dunham, Carrigan & Co. came into existence, and in 1888 the company of Dunham, Carrigan & Hayden was formed, with Mr. Dunham as president. Mr. Dunham has been a force in no small degree in the development of the Hardware business of the Pacific Coast. At the time of his death he was president of the Pacific Coast Hardware & Metal Association. He was connected with many other interests of a business and social character, and was always found in the front when anything came up by which the best interests of the company he represented or the Hardware trade in general could be aided.

Death of Alfred Tredway.

Alfred Tredway, of A. Tredway & Sons Hardware Co., Dubuque, Iowa, a pioneer merchant in his line, died at his home in the city above named, on the afternoon of November 5th. Some years ago, when 62 years old, Mr. Tredway was injured in a runaway, and for several years thereafter was in a critical condition. His strong constitution, however, enabled him to partially recover, but he has never possessed full health since then.

Mr. Tredway was a native of New York City, where he was born on August 11, 1817. He began life as a clerk at the age of 18, in the Hardware store of Smith & Ruthven, with which firm and its successors he remained until 1843. In that year he opened a general store at Lyons, N. Y., where he remained until 1851, and went West on a prospecting tour. He went first to Chicago, and then to Dubuque, and becoming favorably impressed with the little place, determined to cast his lot there. The opening he considered most propitious there was a foundry and machine shop, and returning to New York, he formed a partnership with H. A. Rouse. They purchased a complete outfit of tools, machinery and appliances necessary for the business and immediately set out for Dubuque. The trip to Chicago was made by canal and the lakes. From Chicago a railroad extended to Elgin, Ill., and from Elgin to Dubuque the journey and transfer of machinery, etc., was made by wagon.

Arriving there, Mr. Tredway selected the site of the Iowa Iron Works for his new enterprise, purchased the property from its St. Louis owners, and founded the institution which has made Dubuque famous.

Mr. Tredway remained in the foundry and machinery business only until 1853, when he sold out to J. P. Farley, and in company with William Andrew, under the firm name of Andrew & Tredway, engaged in the Hardware business at Nos. 484 and 488 Main Street. He afterwards succeeded to the whole interest of the firm, took his sons into the company with him, and in 1879 removed to the present quarters of the company, on Iowa Street.

Mr. Tredway was married in September, 1846, at Lyons, N. Y., to Miss Elizabeth L. Taft.

Mr. Tredway leaves surviving him besides his aged widow, five children, three sons and two daughters as follows: Alfred W. Tredway, Harry E. Tredway, and John C. Tredway, and Mrs. Edward C. Peaslee and Mrs. Charles M. Peaslee.

Mr. Tredway was essentially a home man. His concern always was his family and home and away from his business he shone brightest at his own fireside and among a circle of intimate friends. Some years ago he relinquished the active management of the large concern he founded to his sons who, trained by him, have taken up the work, extended its scope and in their achievements have realized his fondest expectations.

Primitive Mining and Metal Working.

The earliest miners and metal workers of whom we have record were the Aryan peoples of Euro-Asian origin, who, though of pastoral and arboreal habits, were familiar with the metals and worked with them—at least with the metals, gold, silver and bronze. Chaldeans and Assyrians, as we know from the cuneiform inscriptions which go back 3000 years B. C., were undoubtedly expert in the use of metals; while the Egyptians had an intimate knowledge of the arts and sciences. In the brick and other inscriptions, recently discovered, artisans are seen at work with curious details of their methods and tools. Potters, indeed, had attained eminence in their art, and the Egyptians had certainly a knowledge of chemistry, as the samples of their glass-blowing and the stone pictures of tools, forceps, blowpipe, etc., prove. Gold was largely used at an early period—between 4000 and 5000 years B. C., as we find from some newly-discovered and ingenious weighing balances. Many centuries older than the Pyramids, which date from fifty to sixty centuries back, we have examples of engineering in Memphis, which could not have been constructed without tools, and necessarily an acquaintance with metals. The word "metals" is of Semitic origin—the Hebrew word "matal," to forge, indicates an early acquaintance with the fusing of ores and the malleability of metals.

How these early primitive people discovered the use of things must, of course, have been through their wants and needs, particularly after they left pastoral and tent life and began to build cities. The Arabs are credited with being early acquainted with the alloys, though alchemy, as a science, dates only from the 16th century.—*Self Culture.*

Brainerd, Tanner, Gallien Co

Albany, N. Y., will soon have fully established another industry. The Brainerd, Tanner Gallien Co. is the name of a new company which has acquired the interests of the G. J. Dickson Mfg. Co., formerly dealers in Hardware specialties, and has purchased of John Pennie the property and buildings, Nos. 72–74 Church Street. The buildings will be extensively improved by the addition of the latest machinery for the manufacture of builders', piano, cabinet and plumbers' Hardware and other Hardware specialties. This will make necessary the employment of a large force of men. The officers of the company consist of B. M. Gallien, the former owner of the Dickson plant, who will be president and treasurer; H. J. Brainerd, the vice-president, is a well-known New Yorker; and W. F. Tanner, the secretary, is a former Albanian. The New York office of the firm will be at No. 107 Chambers and No. 91 Reade Streets.

One of the principal features at the Fourth Annual Sportsmen's Exposition and Bicycle Show to be held at Madison Square Garden, January 13th to 22d, will be the second annual grand championship rifle tournament. There will be in the programme of events individual championship match open to all, 100 yards off hand at a 25-ring target, distance 100 feet. Entrance fee for this test is $5, which will include a season ticket of admission to the Exposition. First prize championship trophy and $20. The other twelve prizes will divide $110. A continuous match, open to all, distance 100 feet off hand at a 25-ring target. Entrance fee for ticket of three shots 50 cents. First prize $50. $140 divided in other prizes. There will be a target of honor open to all, and a bull's eye target open to all. Full money prizes and premiums will be given. The target of honor will have $100 in cash prizes.

Hardware Specialty Co., Newark, N. J., have recently issued a catalogue covering their productions, which consist of bicycle and table bells, rotary hammer door bells, push buttons, etc., all fully illustrated.

The 1898 Dinner Committee.

President Peter McCartee, of the New York Hardware Club, has announced the following gentlemen as members of the dinner committee for the annual Hardware dinner of 1898:

Alfred D. Clinch, Chairman.
Eugene Bissell.
J. Leonard Varick.
James H. Kennedy.
George H. Sargent.
Edward C. Van Glahn.
Richard R. Williams.

John Alling & Co. Sell Out.

A recent business change in Chicago has caused a great deal of surprise and no small degree of interest in all parts of the country. The old wholesale Hardware concern of John Alling & Co., on Lake Street, has sold out to Hibbard, Spencer, Bartlett & Co., the sale being made on the 12th of November, and the actual delivery occurring on December 1st. John Alling & Co. was composed of John Alling, Simeon H. Crane and R. A. Scovel, and under various names has been doing business in Chicago for many years.

A. Adamson, of Akron, Ohio, has scored a very successful season in the manufacture of his special lines of goods. One of these is the making of special rubber machinery, and he has supplied articles of this character to the larger rubber manufacturers throughout the entire country. Among his other specialties are screw presses, hydraulic presses, tire repair presses, tubing machines, wrapping machines, automatic jar ring machines, steam traps, bicycle tire molds, molds for soft rubber goods, dies for hard rubber goods, hard rubber lathes, drilling heads, special machinery, etc. Any one desiring articles in these lines will do well to correspond with Mr. Adamson, whose machine and pattern works are among the best known established institutions in that section of the West.

Manning, Bowman & Co., Meriden, Conn., have ready their special catalogue No. 26, which is filled with the excellent wares being manufactured by this company in the way of house-keeping specialties, such as tea and coffee pots in many and various styles including handsomely decorated, planished copper, and nickel-plated specialties.

The Youngstown Specialty Mfg. Co., Youngstown, Ohio, who are large manufacturers of maple syrup goods, issue a pamphlet covering the many articles comprised in an assortment desirable for this class of trade, which includes tin can screws, round can trimmings, sap spouts, sap pails and covers, both in tin and galvanized iron, etc.

C. A. Hiles & Co., Nos. 336–338 Carroll Avenue, Chicago, Ill., who make a specialty of ice tools, etc., issue a catalogue and price list, covering these seasonable goods, and illustrating the various articles such as chisels, scoops, bars, tongs, hooks, axes and saws, plows, scrapers, grapples, etc.

The Porter Screen Mfg. Co., Burlington, Vt., are distributing their illustrated catalogue for the season of 1898. Among the contents is included a large variety of the adjustable window screens and a number of screen doors which form the principal product of the company.

The Harber Bros. Co., who handle wholesale farm machinery, wagons, etc., at Bloomington, Ill., have sent us a very taking announcement card concerning their lines for 1897-1898. They handle an excellent line of goods which are most excellently displayed.

Digitized by Google

Review of the Markets.

Trade is moving but slowly in a general way, the wants in what might be called legitimate lines being handled in an extremely conservative manner. The fine weather we have been having of late all over the country would have been gladly welcomed had the thermometer indicated colder surroundings. Good, solid freezing weather would have a stimulating effect on many lines of goods now in stock in anticipation of wintry severity. In the month of November additions to stock are handled very warily as the jobbers usually take inventory the following month, with the retailers making a close second a month later. Prices are not being modified to any extent to close the present season. No doubt manufacturers and jobbers have in contemplation certain methods to adopt to insure opening the anticipated good trade of 1898, with a tone of confidence which, it is hoped, will continue without a break throughout the season. Everything indicates a prosperous condition of affairs as affecting the future, and no doubt exists but what the season will prove a satisfactory one all around.

Wire nails. The market for this staple is in a satisfactory condition, no especial weakness being manifested, prices remaining about as last reported. Little change from the present tone is not anticipated, the production not being particularly heavy, and the demand no more than meeting it comfortably. It is believed the manufacturers would like to see some movement to make a combination of interests that would strengthen the market, but it is not likely to take place at once. Quotations are still held at $1.45 for carload lots at mill, which price could possibly be shaded for a good sized order. New York quotations are $1.55 and $1.60 for carload lots on dock, while smaller lots from store are held at $1.65.

Cut Nails: Notwithstanding more of an effort is being made to introduce cut nails in certain quarters on account of the more moderate condition of prices, the movement of trade has not been greatly increased thereby, and similar conditions prevail in the market, as was noted in our last report. Prices may be quoted at $1.15@$1.18 base, f.o.b. mill, with New York prices as follows: $1.30@$1.33 for carload lots on dock; and 10 cents a keg advance for smaller lots from store.

Linseed Oil: The Dean Linseed Oil Co., No. 181 Front Street, New York, under date of November 18, quote prices as follows: In lots of less than 5 barrels, 39 cents per gallon; in lots of 5 barrels or more, 38 cents per gallon. The five-barrel price only applies to deliveries of that quantity at one time. Boiled linseed oil, 2 cents per gallon higher than raw. Calcutta oil, 54 cents per gallon.

THE COLUMBUS TRADE.

Business is still above the average of 1896, and we have no cause for complaint. We are kept out of mischief by having no time for anything but business. If we had leisure, no telling what some of us would do. The weather has been encouraging for the past two weeks, plenty of warm, gentle rains that have made the Fall pasture and wheat get a good start. Wheat is coming along now in good shape, and farmers are very much encouraged. Farm products are some lower, both stock and grain; still prices are better than they have been for some time. Cattle and sheep are bringing good prices, but hogs are lower. Farmers seem anxious to get them to market, and the result is that too many have been offered, and the price dropped about ½-cent per pound. Cattle are ¼-cent per pound off, but even 4¼ cents is a good price for cattle.

The trade in ammunition and guns never was as large as this year. It has been an impossibility to get either fast enough, and the cheaper grades of guns seem to be cleaned up all over the country. The poor Bob White and Cotton Tail have troubles of their own, and many there are that tickle the palate of the wicked hunter and his friends. The writer was out one day last week, and I know of some palates that expected to be tickled with quail on toast, that were disappointed. All they lacked was the quail. For some reason my gun did not shoot right (at the birds). After giving up shooting for six years, you get off your quail. At any rate, the quail gets off once in a while. You hit one accidentally; and a rabbit's tail bobbing up and down, hypnotizes you. Well, a rabbit is poor, dry meat anyway, but it is fun to see him run after you shoot.

Some staple goods are lower in price. Wire and nails are both weaker than they were the first of the month (we mean the price is weaker; guess the articles are just as strong). Strap hinges are a little lower Glass is any price you ask, providing you can furnish the glass. The stock of glass, we think, has never been so low; at any rate for several years.

It will soon be time for stock taking and shaping up for 1898. We are well satisfied with 1897 business, and feel very sanguine about 1898. We are in receipt of a circular from the secretary of the Chicago Jobbers' Association, stating that hereafter a reasonable charge will be made for box and cartage. We are glad they are coming to their senses. Chicago jobbers were the first to announce that they would make no charge for box and cartage, and it is right that they should lead in restoring a just custom. It is a big item of cost in marketing goods and must be added to the cost and selling price of goods. Manufacturers know just how much a box holds, and know exactly what the box costs. If it is 2 per cent., it is added to the cost the same as any other item of cost, and the selling price is based on the cost with cost of box included. No merchant is foolish enough to think that they give the boxes away. It must come in some place, and when actual cost *only* is charged, it is a very small item on each invoice. No manufacturer or jobber should charge more than actual cost for box and cartage. If that is done, we don't think any merchant will complain.

SMITH BROS. HARDWARE CO.

THE PHILADELPHIA TRADE.

If the editor of *Hardware* would only allow us to draw on our imagination for our customary semi-monthly letter, and not confine us strictly to facts, it would be very much easier to send an epistle which would be much more interesting than the average. Unfortunately, however, the editor asks for facts, not romance, and, as business to-day is very uneventful, it is hard to find any startling news.

Prices, apparently, are on the bottom, so that manufacturers cannot stand another turn of the screw, and, with the trade moving along in the average way, and prices hesitating before taking an upward turn, it is most difficult to report anything new or unusual.

The air is full of rumors about a proposed gigantic wire and wire rod combination, which seems to have every sign of becoming a matter of fact, but as yet the final arrangements have not been announced as made. A moment of reflection shows that wire now enters into so many manifold uses, a firm advance in rods must necessarily influence a vast variety of goods These reports have been raised so often that all hands are inclined to wait their accomplishment before basing any action upon their likelihood.

As for prices, manufacturers are certainly pursuing a very wise, conservative policy. From all sides we hear reports of busy factories, and yet complaints are many that the goods so manufactured are being sold at, or below, the cost of manufacture. Manufacturers are, therefore, simply biding their time for an advance, when they judge it wise to take this step.

Labor is also reported as very restless, and, as the average working man always thinks that a large amount of

Digitized by Google

WE MANUFACTURE

FIRE POTS, TORCHES, BRAZING MACHINES, CORE AND ENAMELING OVENS,

SELF-HEATING TAILOR IRONS,

Confectioners' Heaters, Bicycle Pumps, Wall Torches, &c.

Union Heater Supply Co.*, 91 Congress St. E., *Detroit, Mich.

business means corresponding profits, it is more than likely that ere long some advances will be compulsory by reason of the advance in the price of labor.

At present there are no changes to report in prices. Wire nails and barbed wire still hold their own, while the supply on the market does not seem to be excessive.

Cast goods of all kinds are still practically at the lowest point, and will probably be among the first to feel the benefit of any higher quotations.

It is very gratifying to report that collections are improving—this is a sure sign of better times—and few things are more important to the jobber than the cutting down of his suspense account, and no one is more anxious to see his customers succeed than is the jobber, whose welfare is necessarily entwined with those of the dealers to whom he sells. BIDDLE HARDWARE CO.

THE PITTSBURG TRADE.

November is proving a very satisfactory month in this section, so far as volume of trade is concerned.

Increased activity in the manufacturing and mining interests helps the merchant, and as all the furnaces and mills are running full, and the coke works also have everything in operation, the men are buying more freely than for several years.

Cautious people think this activity will be short-lived, but the signs of the times seem to point to a good year in 1898, with possibly a slight halt about midwinter.

At this writing our representatives are getting ready to attend the Hardware Jobbers' National Association Annual Convention, where we hope to meet our competitors from other cities in a social way, and compare notes as to our mutual interests. This Association has proven very advantageous in bringing about a better feeling and a higher standard of business methods during the three years of its existence, and is now in full vigor, and likely to be permanent. LOGAN GREGG HARDWARE CO.

THE CHICAGO TRADE.

We have been most agreeably surprised to see how quickly business has responded to the late change in the weather.

The last few cold days have caused an excellent demand for sleigh bells, skates, stove boards, cross cut saws, axes and other lines of seasonable goods.

Cutlery, both pocket and table, never sold better with us, and while prices for many articles in the line of Hardware are very near cost of production, we presume that we will have to be satisfied for the present with large sales and small profits.

Collections are much better than one year ago; failures fewer and of smaller size. Everything looks encouraging to us. WELLS & NELLEGAR CO.

THE TOLEDO TRADE.

We are glad to say that trade for the last two months has been considerably better than for the same period a year ago. In fact, it is quite good now, but still we could do considerably more.

Collections have been considerably better than a year ago; in fact 50 per cent. better.

Prices in general are still very low, although on some few articles in order to obtain quick shipments, buyers have been compelled to pay some advances, but which condition is being lessened very materially at the present time.

We think there would have been a considerably better business this Fall if the weather had been a little colder.

Seasonable goods such as stove-pipe, elbows, coal hods, sinks, mica and kindred goods have been moving rather slow, considering the time of the year, which is brought about no doubt by the extreme warm and pleasant weather we have been having in general.

Business in general in Toledo has been quite satisfactory to most of the jobbing houses and manufacturers this Fall, but we expect a considerably better business next year. STOLLBERG & CLAPP CO.

THE MINNEAPOLIS TRADE.

The beautiful Fall weather we have had, has enabled builders to proceed with outside work. In consequence, there has been some business in this line this season that there otherwise would not have been, the larger class of building being medium priced residences. General trade has not been quite up to expectations, and while the good price for wheat has been a great help, still it has been found that, generally speaking, the crop is small, much smaller than was earlier estimated. In consequence of light yield and poor quality, the farmer has been obliged to pay big prices per bushel for threshing, and in many instances his wheat would not grade No. 2. Fortunately, their other crops such as corn, barley, potatoes, etc., have been abundant, and prices ranging high. Thus, in spite of the discouraging features in connection with the wheat crop, a large amount of money is being distributed among the farmers, which will in due course of time find its way through the regular channels of trade.

Sawmills generally will close within the next week or ten days, but the greater part of the employes will have an opportunity to go into the woods as there will be more logs cut this year than for several years before. We think, generally speaking, laboring men who want work will have little difficulty this coming winter. We can see no reason why business should not be good the coming year. We would like to see real estate move a little better and bring a higher price. That will probably come later.

W. K. MORISON & CO.

THE DAVENPORT TRADE.

Work is progressing on the Crescent bridge. We hope soon to have two railroad bridges at this point, and that the result will be a union passenger depot that will accommodate the C. B. & Q., C. M. & St. P., C. R. I. & P., R. I. & P. and the B. C. R. and N. railroads centering here. The fact that a number of the United States senators, among whom was Allison, of Iowa, have been here recently, and also an extended visit from Gen. Flagler, chief of ordinance, has increased the prospect of getting the small arms gun plant at the arsenal here. There is already a large amount of infantry, cavalry and artillery equipment made for the regular army. Field and siege gun carriages are perhaps the most important at present.

Digitized by Google

The Sylvan Steel Co. are running up to their full capacity, and will soon put in an open hearth steel plant. The Bettendorf Metal Wheel Co. are very busy. The Bettendorf Axle Co. are extending their plant and increasing their capacity, and still seem to have all they can do. Should any of the readers of *Hardware* happen this way, they should certainly visit this manufacturing company. They stamp out of steel not only axles, but bolsters, tongues, whiffletrees and in fact everything that is used in wagons and many parts of railroad cars with surprising rapidity—all inventions of Mr. Bettendorf, who not only makes all these things, but makes the machines to make them.

The Rock Island Stove Co. report they are running full time, and sales show a handsome increase over last year.

The Iowa Hardware Jobbers' Association was well represented at the National Hardware Association at Buffalo. If the members of the parent society get along as harmoniously as the members of its two-year old Iowa child, there can be no doubt but great pecuniary advantage will result, not to mention the pleasure enjoyed at the annual meetings. We hope Davenport will sometime be selected as a place for one of their interesting conventions General Hardware trade continues to improve, and shows a healthy increase over this season last year. Collections fair.

SICKELS, PRESTON & NUTTING CO.

THE ST. PAUL TRADE.

We have had freezing weather, and the result is an increase in business, as the farmer is obliged to stop plowing and buy Hardware to make him happy for the winter. As the holidays are in the near future, goods for presents are in demand, and we notice that the trade is more willing than usual to buy this line. Altogether we find the trade feeling that the next year is sure to be a fair one. They are hopeful for the future, and are paying up very well at present. C. W. HACKETT HARDWARE CO.

Wheels.

"Ride a cock-horse to Banbury Cross," sang old Mother Goose, and the melodious dame was a truer prophet than she deemed; for somewhere about 1818, a rough wheeled affair of that name jogged through London streets. Here is how the poet John Keats describes it:

"It is a wheel-carriage to ride cock-horse upon, sitting astride and pushing it along with the toes, a rudder wheel in the hand. A handsome gelding will come to eight guineas, however. They will soon be cheaper, unless the Americans take to them."

This was followed by the dandy-horse, an improvement with the head of a steed, wooden wheels, and padded seat, on which the postman pranced through the rural districts, in the thirties, at about the rate of seven miles an hour. The dandy continued in use until the advent of the velocipede. This was a cumbersome structure, and ere long gave place to the "ordinary," the first real bicycle, but six feet in height. Still, the right track was reached at length, and ultimately, with rival variations in the form of tricycles and unicycles, the present "safety" was evolved. It has held its own for a full decade, and probably will continue to hold it until some electric motor of moderate price puts it to the blush.

In ball game and on the fleetly speeding bicycle woman now takes her place, side by side with man, as she never did before. Our grandmothers, in their sedentary youth, spun on picturesque whirring wheels beside the open fire; *fin de siecle* maid takes spins upon the merry modern wheel with pneumatic tires.—*Lippincott's.*

Sold the Machine.

The book agent, the sewing machine agent, the insurance agent have each and all won distinction by their perseverance, but the agent of the washing machine is worth his weight in gold to the house for which he travels, if all there is said about him in the following is true:

Exasperated Woman of the House—I have told you a dozen times I don't want the machine! Sic him, Tige!

Agent (while the dog is gnawing his leg)—Don't want the machine, ma'am? Pardon me, you haven't yet seen half its good points. It washes the clothes cleaner than any other, and in less than half the time. It never tears off a button It—

"Good heavens! Don't you see what the dog is doing?"

"Yes, quite a playful animal. This machine, ma'am, uses less soap, takes up less room——"

"He'll tear you to pieces if you don't go. Run, for mercy's sake! He's tasted blood, and I'm afraid I can't stop him now."

"I have to put up with such things, madam, and it's in a good cause. This machine is the best one that ever was invented. If I can succeed in introducing one into a family I always feel that I have done a benevolent act. You can use any kind of water, hard or soft, hot or——"

"Oh! oh! oh! He'll kill you! What is the machine worth?"

"It's worth a million dollars in any family, but I'm selling it for only $5, and——"

"Here's your money. I'll take it. Tige! Tige! Let go!"

"Looks as if we were going to have rain. Well, I must be going. Good afternoon, ma'am."—*Exchange.*

Buy what you require, but do not buy that which some one wants to sell you but for which you have no use.

HARDWARE'S "Prices Current" are reliable.

New Process of Galvanizing.

At a meeting of the Franklin Institute recently a paper was read by George C. Reese describing a new process of galvanizing wire. Enormous quantities of steel and iron wire are required to be "galvanized" or plated with zinc, and the long-established process has been to unwind the wire from one coil and wind it upon another, passing it in the meantime through baths or other means of chemically cleaning the wire, then through a long trough containing a large quantity of melted zinc kept constantly hot, and between wipers of asbestos or other material.

The process has always been a slow and tedious and expensive one, the objectionable features of which it is not necessary to enumerate. By the new process the wire is coated more satisfactorily than before and without the necessity of even unwinding the coils. The coils or bundles of wire are first cleansed by acid. The whole bundle is then dipped into the bath of melted spelter, and when it has received a thorough coating it is quickly dropped into the basket of a centrifugal machine. For small or light coils the machine may be already in motion, while for heavier wire it must be started after the wire is put in. The surplus coating is almost instantly thrown off from the wire, and an excessive speed is not required. The machine is stopped and the bundle of wire is removed as quickly as possible and is jarred upon a block to prevent the wires from soldering together. Barbed wire has been successfully treated by the new process after it has been twisted into shape and formed into bundles. When wire is galvanized before being barbed and twisted much of the coating cracks and peels off and the points quickly rust. Treated by the new process, the wire is more durable and retains its efficiency much longer. Wire cloth finer than eight meshes to the inch cannot be galvanized by the old method, while by the new process cloth of any fineness may be coated, if the speed of rotation is increased according to the fineness. Samples were shown of 12x13 fly wire 16 mesh, believed to be the first of the kind ever successfully galvanized after weaving.

Iron-Making Countries of the Future.

Says the *Iron and Coal Trades' Review* of London: The iron-making countries of the past have been India, Russia, Sweden, Spain, the North American colonies and Great Britain. Between 1840 and 1882 Great Britain had three-fourths of the world's iron trade. Since 1882 Germany and the United States have made such rapid progress that we now only average about a third of the trade of the three countries, although during last year we are likely to have averaged more than that proportion.

The other iron-making countries, in the order of their importance, are France, Russia, Austria-Hungary, Sweden, Belgium, Spain and Canada. Practically, it may be said that India, the countries of South and Central Ameriea, our Australasian colonies, China, Japan and the countries of South and Central Africa, have not as yet entered the lists, although small quantities of iron are produced in some of them, as in India.

Put in another way, it is about correct to say that up to the present time, Asia, Africa and Australia stand outside the pale of iron-making industries, and that more than one half of the American continent is in the same position.

This condition of things cannot be expected always to continue, seeing that most of these countries are possessed of iron-making resources, some of them of practically unlimited extent. Already, indeed, China and Japan have taken the bull by the horns. The Chinese have erected large works at Hankow, and the Japanese are about to expend half a million sterling on large works destined to make their own railway and shipbuilding material.

The Newport News Ship Building & Dry Dock Co., Newport News, Va., are erecting at their ship yard a crane capable of lifting 140 tons. This crane is to be used for the placing of engines, boilers and other machinery in the large war vessels which they are constructing for the government, and will be also used for placing on the sides of these vessels their armor plates, some single pieces of which weigh from 40 to 50 tons. The crane will have sufficient reach so that it will cover the entire width of a large cruiser. This crane revolves in a circle on a turntable which is supported on a steel foundation about 25 feet high. This steel foundation is to carry, besides its own weight, the weight of the crane, its machinery, and whatever load may be lifted, which altogether will aggregate 900 tons. The steel support for this crane is being furnished and erected by the Berlin Iron Bridge Co., East Berlin, Conn.

C. Rogers & Bros., Meriden, Conn., Maltby, Henley & Co., No. 20 Warren Street, New York agents, are distributing to the trade Catalogue No. 51, embracing in its finely illustrated contents, the large variety of silver-plated ware made by them. Included in this, are to be found: Spoons, forks, knives, carving sets, fish and salad sets, nut crackers, nut picks, etc.

Scheeler's Sons, Buffalo, N. Y, have recently issued general catalogue No. 4, designed for 1898 business, and covering in its pages a complete line of their manufactures, illustrating: Wire cloth and wire goods, extending in its scope to wickets, grills, office railings, and the other artistic wire work now so generally used in modern office and bank edifices.

most trouble comes from the inside. So long as the stomach keeps sound its owner keeps useful. Just so with hose, and the fact that it has a rubber stomach doesn't alter the principle. Water hose is all right so long as the rubber tube remains tight, but once break its surface with a pin-hole or crack, and what happens? The water leaks through into the plies of duck and rots one after another until the strength of those remaining is unequal to the pressure—then there's a burst. **What causes pin-holes?** Particles of foreign matter in cheap, heavily adulterated rubber. The high grade rubber which we use in **1846 Para, Double Diamond** and **Carbon** hose contains so little foreign matter that the chance of pin-holes is practically wiped out. **What causes cracks?** Poor rubber again—unelastic rubber—rubber that can't respond to the bending, stretching and twisting which hose receives in service. **1846 Para, Double Diamond** and **Carbon** rubber is full of life and elasticity—bending, stretching and twisting does not rupture it.

Our Hose is built to last. Every thing about it is first-class—your customers will like it. Send for samples and prices.

Weed's Special File and Handle.

The very latest in Files.

Manufactured from the finest grade of imported steel, tempered by an improved process expressly for this special file. ∴ ∴ ∴ ∴ ∴ ∴ ∴

The handle has a solid metal ferrule with taper socket into which the taper shank of the file fits—metal to metal—rigid, yet easily adjusted or loosened. No mechanic need be told that the old style wooden handle is "not in it" with the Weed special, which will not only outwear ten ordinary handles, but in appearance is a fitting companion to the fine tools in use to-day. ∴ ∴

Recent Trade Publications.

Any dealer, whether American or foreign, who wishes to post himself thoroughly on the subject of Refrigerators from A to Z, should be in possession immediately of the handsome 1898 catalogue issued by the Baldwin Refrigerator Co., Burlington, Vt. We are tempted to say a great deal about the artistic appearance of this publication, and certainly whoever was interested in its preparation had a fine eye to general effects, and an artistic taste in the selection of paper, the designs for the illustrations, the color used in the printing, and minor accessories. This is a book of 80 and more pages, printed upon heavy calendered paper, and so arranged that some specimen of the many varieties manufactured by this company is seen upon every page, printed in effective color, which brings the article out in bold relief. The catalogue is not only one of the finest ever issued, but most varied in its contents, covering 125 varieties, which, a representative of the company informs us, is "a larger assortment of popular prices and styles than is, we believe, made by any other manufacturer." In a prefatory note to the trade, the Baldwin Co. direct special attention to the many improvements made in their goods, as shown by new cuts from photographs, and to the numerous advantages which they are prepared to offer the trade. They call attention to the large variety in styles and sizes made both in hardwood and softwood, zinc-lined and spruce-lined, and state that the dealer who handles the Baldwin is not obliged to purchase from several sources in order to get a sufficient variety to meet the wants of his different classes of customers. They say: "Our list prices are low, particularly for the popular-selling sizes, a decided advantage to the dealer who caters to family trade, and our discounts liberal." The quality and design of their goods have been materially improved during the past year, and with the increased facilities offered by a new and enlarged factory, and the very latest machinery for their purpose, it is their intention not only to maintain the present standard of excellence, but to still further improve in this direction. They say: "An established reputation is to the thoughtful dealer a consideration. The Baldwin Refrigerator is not an untried experiment. It has been on the market many years. It is built by a reliable concern that has had long experience in the refrigerator business, and is used by many of the largest public institutions in the United States. In its new dress it presents an appearance second to no other make of refrigerator, while for results and variety in style it is not excelled." They have always made a specialty of prompt shipment, and with unusually good manufacturing and shipping facilities, can promise patrons continued satisfaction in this respect. Cars are run direct to their factory and store-house, and goods are frequently shipped within an hour from receipt of the order. They further state that while this catalogue contains a large variety of goods calculated to meet the wants of all ordinary purchasers, it occasionally happens that a special size or style is desired to fill a certain space, or the means of access do not admit of the passage of large size refrigerators or coolers, which must be built in sections. They build such goods to order, and estimates will be gladly furnished on receipt of sketch and general details. This handsome and valuable catalogue is just out, and a copy will be sent upon application.

Coates Clipper Mfg. Co., Worcester, Mass., Alfred Field & Co., No. 93 Chambers Street, New York, sole agents, have just issued their 1898 catalogue of horse and toilet clippers and clipping machines. The catalogue contains a considerable amount of new matter and many additions to the descriptive matter over any previous catalogue. This company, established in 1877, are now in possession of a plant covering 25,000 square feet of floor space, devoted entirely to the manufacture of clippers. The catalogue, which is a pamphlet of 50 pages, fully illustrates a line of power clippers, combined with their Champion flexible shaft, and constructed to be used with stand or from hanger and shaft connections. Also fully illustrated are

CUSHMAN & DENISON, Mfrs., 172 9th Ave., N. Y.

their hand clippers; horse and toilet are shown in large assortment, and at varying list prices, suitable for the trade of different sections, and complying with a large demand for export. Among the clippers, for the manufacture of which they have long been identified, are the centre tension "Magic" horse clippers, Nos. 19 and 79; double thumb nut clipper, No. 89; fetlock clippers, No. 9 and 71, and curved fetlock clipper, No. 81. A very popular clipper is the "Handy," No. 2; among the new styles more recently introduced may be mentioned the "Easy Running," Nos. 91, 101 and 111, and the "Ball-Bearing" clipper, No. 59; all of which possess original features that are fully described in the catalogue. Their line of toilet clippers, well and favorably known, are fully illustrated and described, from the low-priced varieties to those of the highest grade.

The Philadelphia Lawn Mower Co., Philadelphia, have condensed into a small space a great deal of valuable information, artistically presented in a catalogue of the "Genuine Philadelphia Lawn Mower for 1898." The cover is printed in gold, red and white, and the pages are filled with illustrations. description and prices of this most admirable and well-known line of goods In a prefatory note they call attention to the reasons why their mowers have held their supremacy, pointing out their simplicity. durability, lightness and easiness of handling; their possession of self-locking pawls that will not slip; the fact that the knives sharpen themselves while cutting; that the grass is thrown back clear of the cutter; and that they are honestly made of the very best material. They illustrate their styles M, S, T, C, L, K, A, E, so that anyone can size up the article itself in a glance at the illustration. They also illustrate their Philadelphia grass collector, Philadelphia lawn sprinkler, pony mower, horse mower, lawn sweeper, etc. This handsome little catalogue will be sent free to all applicants, as will also their repair list.

Walter W. Woodruff & Sons, Mt. Carmel, Conn., have published an attractive leaflet covering the announcement of their coach and carriage Hardware, in fine mountings, for the season of 1897-8. In this they state that they have purchased of the Atwood Mfg. Co., of Amesbury, Mass., their entire business of carriage mountings and all the patterns, tools and machinery pertaining to the same, and shall continue the manufacture of all such goods as are desired by the trade.

Gibbs Mfg. Co., Canton, Ohio, John H. Graham & Co., No. 113 Chambers Street, New York, agents, have recently issued their 1898 illustrated catalogue of Hardware and household specialties. They manufacture largely, lawn rakes and sprinklers, garden trowels and weeding hooks, post hole diggers, curry combs, mincing knives, vegetable mashers, can openers, etc.

RETAIL TRADE RECORD.

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Hardware Stores.

Arenzville, Ill.—Huss & Batis.

Carthage, N. C.—A new Hardware store will soon be opened here by R. W. Carter of Manchester, Va.

Covington, Tenn.—The Covington Hardware Co. has been incorporated by W. T. Hamilton. Capital stock, $4500.

Elkton, Mich.—A. J. Aldrich.

Grand Rapids, Mich. — A corporation which will be known as the Clark-Rutka-Jewell Co., the stockholders of which are well-known local citizens, filed articles of association recently. The company will engage in the wholesale and retail Hardware business. The capital stock of the company is $25,000, all paid in. The stock is owned as follows: Melvin J. Clark, $10,000; John J. Rutka, $5000; Frank Jewell, $5000; Laurens W. Wolcott, $5000.

Hibbing, Minn.—T. H. Lees is preparing to open a Hardware store in the Van Horn building.

Ironwood, Mich. — The Prescott Hardware Co. has been incorporated with a capital stock of $25,000.

Kalamo, Mich.—A. H. Daugherty has established a stove business.

Leonidas, Mich.—Rev. F. M. Aunks contemplates establishing a new Hardware store.

Louisburg, N. C.—The Louisburg Hardware & Supply Co. has been incorporated by Joseph J. Barrow, Walter L. Payne and Jordan S. Barrow. Capital stock, $50,000.

Salem, Ore.—The Jewell Hardware Co; objects, to carry on a general mercantile Hardware business and buy and sell gold dust; capital, $20,000, divided into shares of $5; principal office and place of business, Grant's Pass; incorporators, L. L. Jewell, A. M. Jewell and S. S. Prentiss.

Trenton, Mich.—F. Bailey, Hardware and builders' supplies.

Wyandotte, Mich.—F. Kemp, F. Bailey and T. Wilkins will open new Hardware and shoe store.

In our issue of October 25th, the new store of Morris & Fields was located at Loogootee, Ind., whereas it should have been at Shoals, Ind., where they are carrying on a successful Hardware, tinware and stove business. They write us that because of this error, much of their mail is going to Loogootee.

Changes and Removals.

Asheville, N. C.—An important deal in local business circles was concluded when Claybrook James, of Richmond, Va., purchased outright the entire Hardware stock of the J. E. Dickerson Co., the purchase being made of Receiver J. E. Rankin, of the Dickerson Co. Mr. James assumed control of the business at once. Mr. James is a young man, but has had long experience in the Hardware business, and for eight years was connected with the Watkins-Cottrell concern of Richmond. He will conduct his new business under the name of the Asheville Hardware Co., and will have a valuable advantage in the fact that the Watkins-Cottrell Co. will allow him the use of their buyer in New York in the purchase of goods.

Coloma, Mich.—The Coloma Hardware Co., F. W. Witbeck, manager, is closing out its stock of Hardware at Coloma, and will consolidate its business at Millburg.

Darlington, Ind.—Seybold & Co., Hardware; A. K. Peterson has bought an interest in the business at Darlington.

Derry, N. H.—F. L. Bray, who has conducted the Hardware business for a number of years at West Derry, has sold his stock to John Gegenheimer, of Old Orchard. Mr. Gegenheimer will continue the trade at the old stand.

Denver, Colo.—The George Mayer Hardware Co. will remove to No. 1520 Arapahoe Street, when the alterations at new quarters are completed. The new location will be centrally located as regards any part of the city.

Melbourne, Ia.—J. B. Pence has sold his Hardware stock to his son-in-law, E. P. Miller, who will conduct the business.

New London, Ia.—W. B. Gannaway has purchased the interest of Mr. Benner in the Hardware firm of Rundorff & Benner, Burlington, Iowa. Mr. Gannaway has been actively identified with our business interests for several years and has a host of friends who will regret to see him leave.

Port Angeles, Wash.—H. C. Strong, the well-known Hardware merchant of this city, has sold a half interest in his business to Robert D. Willson, who recently removed here from Braddock, Pa. The combination makes a strong firm.

Warren, Mass.—John E. Walsh & Co., who have kept a Hardware store on Southbridge Street for several years, are disposing of their stock at auction, and will close up the store.

Business Embarrassments.

Calais, Me.—Frank Grimmer, the Hardware dealer on Main Street, has made an assignment for the benefit of his creditors. The store has been closed all week, and it is not known as yet whether Mr. Grimmer will open up again or not.

Kuttawa, Ky.—The Clinton Dycus Hardware Co. have assigned, naming Hon. W. J. Stone as the assignee. This was the largest Hardware concern in the county, and the assignment comes as a surprise to every one. Dull trade and slow collections are given as the cause.

Louisville, Ky.—Michael Heil, the Summit Street Hardware dealer, has assigned to E. D. Scrafford. The assets are about $1500 and the liabilities about twice that amount. A chattel mortgage for $672 in favor of Rosa A. Heil was filed before the assignment.

Marysville, Ohio.—J. P. Connor, Hardware, has made an assignment to Dr. A. Biylan. The liabilities are $6000, and assets $4000.

Nashville, Tenn.—Wm. Livingston, surviving partner of J. M. Hamilton & Co., dealers in Hardware, at No. 212 North College Street, has made an assignment to W. M. Pollard. He conveys to the assignee all of the stock in said store, notes, discounts, etc.

Taylor, Tex —Robertson & Prewitt, dealers in Hardware, saddles and harness, have made an assignment, with James G. Blaine as trustee. The liabilities amount to between $5000 and $6000, with assets of $6000. The firm was composed of M. V. Robertson and J. T. Prewitt, both of this place, and had only been in business a short while.

Washington, Ind.—R. S. Beeson & Sons. Hardware dealers of this place, have assigned. The liabilities are about $2500; assets, $1500.

Recent Fires.

Asbury Park, N. J.—Joseph D. Newlin, $4000.

Bangor, Me.—A clerk dropped a match into some loose powder in the Hardware store of Patterson & Porter, Mercantile Square, recently, causing a sudden burst of flames among cartridges and other explosives in that part of the store. The clerks fled and the fire spread rapidly, scorching the whole interior. The firemen came just in time to remove the box containing 25 pounds of powder, and then flooded the place with water. The loss is from $3000 to $5000, fully covered by insurance.

Baxter, Iowa.—J. W. Bisby, Hardware, damaged.

Center, Ind.—S. E. Lett, Hardware, destroyed by fire.

Farmersville, Tex.—T. E. Ball, implements, etc., damaged, at a loss of $1500 or $2000.

Gibsonburg, Ohio.—Mr. Shumaker, Hardware, store destroyed, at a loss of $21,000.

Johnstown, N. Y.—John G. Ferres. Badly damaged. Covered by insurance.

Marion, Ohio.—Fox & Kilbury, Hardware, store destroyed.

Montrose, Iowa.—Daniel Tripp, Hardware, damaged. Insured for $1900.

Pilot Mountain, N. C.—F. L. Smith, Hardware, damaged, at a loss of $2500; insured for $1500.

Pinconning, Mich.—Shook's Hardware store destroyed by fire.

Providence, R. I.—George Peterson, Hardware, damaged, at a loss of $10,000.

Nicholasville, Ky.—S. E. Holloway, Hardware, damaged by fire.

Burglaries in Hardware Stores.

Los Angeles, Cal. — Russell Hardware Co., $30.

Sanford, Me.—Prescott Emery, $25.

Smithville, Ohio.—Brenaman & Co., $200.

Yorktown, Ind.—Thomas Parkinson, $200.

Woodland, Cal.—M. Diggs, $350.

Wyandotte, Mich.—James Mate, $300.

HARDWARE MANUFACTURERS' RECORD.

Hardware manufacturers, the country over, are requested to contribute to this page. News of new factories or companies, changes, improvements, etc, will be gladly received, and promptly published.

New Companies, Etc.

Bay City, Mich.—George Reigel has established a new knife factory.

Brooklyn, N. Y. — The Edward Jones Tubing Co. has been incorporated by Edward Jones, to manufacture brass and metal tubing. Capital stock, $1800.

Detroit, Mich.—The Peerless Hose Coupler Co. has been incorporated by James H. Donaldson, Wilbur W. McAlpin and Louis E. Eastman, and will manufacture and sell hose couplers. Capital stock, $9000.

Eldred, Pa.—The new cutlery factory that was started at this place, of which C. Platts & Sons are the proprietors, is doing a fine business, and the firm recently added to their force of workingmen. The new building is well arranged for the accommodation of the men employed.

Evansville, Ind.—Robert K. Dunkerson, Samuel Bayard and Frank Lohoff have filed articles of incorporation for a company to be known as the Evansville Tool Works. The capital stock of the company is $100 000.

Keene, N. H.—The Reeves Anchor Mfg. Co. have filed articles of incorporation under the laws of New Hampshire. The capital stock of the company is stated to be $150,000, divided into 6000 shares of $25 each, and its business is to be the manufacturing, making, buying and selling of all kinds of machinery, tools, implements, and parts thereof, screws, rivets, anchors, builders' and manufacturers' Hardware. Mr. Reeves is the inventor of a patent anchor, and the company is formed, as appears by the record, to manufacture and deal in that instrument and a very large number of other things.

New York, N. Y.—Branches of the Corbin Cabinet Lock Co. and of the P. & F. Corbin Co. have been incorporated under the laws of the State of New York. The branch concerns will be used as agencies for the disposal of the goods manufactured at the New Britain plant. The directors are Philip Corbin and Charles H. Parsons, of New Britain, Conn.; William Bishop, Edward C. Jones and Frederic G. Dow, of New York city.

Pittsburg, Pa.—The Standard Steel Co., recently incorporated, have prepared plans for an immense plant to be located at Pittsburg. About 1000 men will be employed when operations begin. The company will manufacture Bessemer and open-hearth steel.

Waterbury, Conn.—The Boston Enameling Co. is a new concern which has opened business in the rear of No. 35 Benedict Street. It is to make a specialty of all sorts of enameling, including bicycle lamps, chandeliers and the like.

Waterbury, Conn.—The Standard Mfg. Co. was organized here a short time ago with Dr. S. G. Howd as president, W. A. Sparks, secretary and treasurer. The directors are Dr. S. G. Howd, J. L. Morgan and P. Concannon. They have leased the basement of the E. E. Brown machine shop on Edwards Street. The company will engage in the manufacture of tableware by a special process, and other patented specialties. The factory will be run under the superintendence of P. Concannon, a skilled mechanic from New Haven, who is also one of the directors.

Improved Conditions.

Cincinnati, Ohio.—B. B. Quillen, secretary and manager of the Davis & Egan Machine Tool Co., says: "A year ago we were about as busy as we are now on foreign trade, but we are doing fully twice as much home business as we did this time a year ago. During the past three weeks we have taken more orders in this country than during the previous two months. Almost every mail is bringing good home inquiries and orders, and the best part of it is they are coming from all parts of the United States. We feel pretty certain business is going to pick up very rapidly from now on. To back up our opinion, we just bought a new building across the street for $50.000, and will shortly have 150 additional men at work.

Hellertown, Pa.—The Thomas Iron Co.'s blast furnace, which has been idle for two years, has resumed operations.

Marion, Ind.—The Alexandria Wire Nail Works has been sold by S. G. Phillips to S. Free, who will put the plant in operation immediately.

Stockton, Cal.—The directors of the Stockton Agricultnral Works, which were destroyed by fire recently, have decided to rebuild at once.

Changes and Improvements.

Allentown, Pa.—The Sheriff has sold the plant of the Allentown Hardware Works to W. K. Ruhe, for the stockholders, for $26,000.

Anderson, Ind. — The American Wire Nail Co. has begun enlarging its plant and adding 25 more nail machines. The company has just enlarged its rod mill. Seven hundred men are employed.

Ansonia, Conn.—The name of the Driggs-Seabury Gun & Ammunition Co. has been painted in big letters on the factory of the Brady Mfg. Co.'s shop, as the latter company has been merged into the former, which will hereafter conduct the business of the Brady Co. The Brady Co., since locating here, last winter, has conducted a general machine business, its work being confined principally to small machine work, but it is now rumored that the new management is to enlarge the plant for the manufacture of Driggs' machine gun and other war implements.

Cleveland, Ohio.—The Ohio Brass & Iron Mfg. Co. will erect a new $9000 building.

Indianapolis, Ind. — The Indianapolis Stove Co. has settled in its new plant, the former Indianapolis Cabinet Works, and its large new foundry is completed. This, President Bennett says, is the largest and most complete stove foundry in the West.

Jackson, Mich.—F. R. Bassett, manager of the Challenge Churn Mfg. Co., located at Paw Paw, has been induced to move the works to Jackson. The work will commence as soon as the machinery can be removed here and set up.

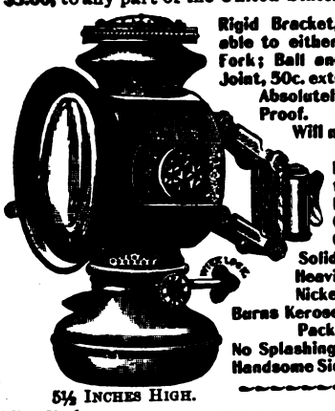
Kankakee, Ill.—The Bradley Implement Mfg. Co. will erect a large new addition to their factory.

Martin's Ferry, Ohio. — The Laughlin Nail Co. will increase the capacity of the tin plant at this place to double its present size. The present plant was built in 1895, at a cost exceeding $200,000, and it is the intention of the company to duplicate it. About 500 additional men will be employed.

Millbury, Mass. —The Millbury Razor Co.'s plant will be moved from the old quarters at Charles Buck's shop on Canal Street, to more commodious quarters in W. G. Farnsworth's mill, better known as the "Dority Mill." The reason given for the change is that the business requires more commodious quarters and a plant where power can be had six days a week.

North Indianapolis, Ind.—The Reliable Edge Tool Co. has its new building completed and begun working there. This establishment started on a limited scale several years ago in a little building on St. Clair Street and soon built up an excellent reputation for an axe it manufactured, and which it is now selling in every State in the Union. In the new building it has added the manufacture of knives, and has ten expert workmen manufacturing bread knives of the finest quality.

Recent Fires.



Brantford, Ont.—The most disastrous fire in the history of Brantford took place here October 26th, resulting in the serious injury of two firemen and the loss of property to the value of $75.000 to $100,000. At 5:30 the two hundred and twenty hands at the Verity Plough Works were busily engaged at their work, and there was not the slightest sign of impending danger, when suddenly the men in the big painting room on the third story at the top were startled by a column of fire which seemed to leap as if by magic from a tank of composition, composed chiefly of benzine and other inflammable stuff. In an incredibly short time the immense factory was a sheet of flame. The buildings were completely gutted. The Veritys have been working day and night for some time, and there was a very heavy stock of ploughs on hand. Mr. Verity stated that he valued the buildings and contents at a hundred thousand dollars. They carried fifty thousand dollars insurance. A good deal of iron work will not be much damaged. A loss of seventy-five thousand dollars will no doubt cover it.

BICYCLE TRADE RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Companies, Agencies, Etc.

Bethlehem, Pa.—Harry Collins, the local inventor of the pneumatic bicycle hub, has been induced by the Sayre Land Improvement Co. to locate there, and has awarded the contract for the erection of a two-story brick factory, 50 by 250 feet. Land valued at $12,500 was presented to Mr. Collins, and Sayre capitalists subscribed $50,000 in cash towards the new industry. Reading, Allentown and Hazleton were after the new industry. The new industry will be in operation before the holidays. it is expected.

Camden, N. J.—The Hardware Mfg. & Exporting Co. has been incorporated to manufacture Hardware, and bicycles.

Dothan, Ala.—Simonton & Co., musical merchandise, will add a line of bicycles, and are inviting propositions from manufacturers.

Eustis, Fla.— George W. Church, jewelry, will add a line of bicycles. Correspondence with manufacturers invited.

Geneva, Ala.—Laniar Bros., jewelry, desire agency for a good bicycle.

Gloucester City, N. J.—Joseph Van Nest, one of our well known bicyclers, has opened a bicycle and repairing store on Market Street in the rooms formerly occupied by the Union League.

Harvey, Ill.—Gibler Bros., furniture, will add a bicycle department.

Madison, Ala.—Farley & Gillespie, drugs, desire agencies, with a view of adding a cycling department.

Owensboro, Ky.—Albert Hare is interested in bicycle company, with capital of $50,000, which is to buy out the Delker Co., of Owensboro. The new factory commences operations December 1, 1897.

Saginaw, Mich. — A stock company is being formed to manufacture bicycles, on a large scale. It proposes to put out a wheel at manufacturers' prices. George W. Emendorfer, manufacturer of wheels, will be the manager.

Sheboygan, Wis. — Fairweather & Wiegand have established a new bicycle livery and first-class repair shop.

St. Augustine, Fla.—A bicycle plant, etc., is to be brought to this city from New Jersey.

Syracuse, N. Y.—Olive Wheel Co. has been incorporated, with a capital of $300,000. It will begin business with $30,000 paid in. Its directors, all of Syracuse, are: Thomas Wheatley, Francis T. Gridley, Charles F. Bennett, Daniel W. Gridley and Frank Q. Alsop.

Changes and Improvements.

Alpena, Mich.—Steele & Weber, bicycles, reported to have been succeeded by Steele & Collins.

Beaver Falls, Pa.— The machinery and stock of the Morado Bicycle Co. have been sold at public auction to A. Saladin & Co., of Ensworth, for $2735. The stuff will be moved to another building and a factory started.

Charleston, W. Va.—Charleston Supply Co., bicycles, etc., reported to have been succeeded by Chas. W. Young.

Chatham, N. J.—Cyril G. Smith will remove his bicycle stock to the new store on Main Street, now being erected by Frank L. Kelley.

Covington, Tenn.—H. M. Moore, bicycles, has been succeeded by I. H. Lowenhaupt.

Dennison, Minn. — Steile & Austinson have added a bicycle repair department at their new quarters, on the corner of Flaten Avenue and Main Street.

Grand Rapids, Mich.— The Hamilton-Kenwood Bicycle Co.; John Duffy, the former secretary of the Fox Machine Co., is the new office manager.

Grand Rapids, Mich.—The Leather Grip Co. has been incorporated by Bert W. Fish, C. W. George. Arthur L. Smith, Alton A. Lyttl, William C. Shepard and James Warren Brown; to manufacture bicycle handle-bar grips, to deal in bicycle sundries and do a wood-turning business. Capital stock, $10,000.

Kenosha, Wis. — The Charles H. Sieg Mfg. Co. has increased its capital stock from $100,000 to $250,000.

LaPorte, Ind.—John Lonn & Sons, harness, etc., have purchased the plant, machinery, etc., of the Crown Cycle Co., and will push the bicycle business in connection with their other business.

Lockwood, Mo.—Bird, Thumser & Co., Hardware, bicycles, etc., have been succeeded by McDermid & Thumser.

Union City, Mich.—Boll & Spring, bicycles, etc., sold out to F. C. Boise.

New York, N. Y.—The Liberty Cycle Co. has been incorporated by Wm. I. Allen, William F. Wilson and John H. Holden. Capital stock, $100,000.

Owensboro, Ky.—The Delker Cycle Mfg. Co. contemplate increasing their capital stock, to enlarge operations.

Salt Lake City, Utah.— The Western Cycle Co., F. A. Margum, manager, have purchased the stock of the Salt Lake Cycle Co. They are also the agents for Cleveland and Crescent bicycles.

Springfield, Mass. — The Waltham Mfg. Co., manufacturers of bicycles, have decided to close the branch office in this city.

Toronto, Ont.—Bertram & Co., wholesale Hardware and bicycles, reported to have sold to Bertram, Wilson & Co.

Recent Embarrassments.

Baltimore, Md.— Heller & Snodeal, bicycles, reported to have applied for receiver.

Brooklyn, N. Y.—The Ideal Rubber Co., manufacturers of bicycle tires and druggists' sundries, at Nos. 28 and 30 Rodney Street, and Nos. 631 to 637 Kent Avenue, are offering to compromise with creditors at twenty-five cents on the dollar. The trouble is attributed to losses in the manufacture of bicycle tires, which branch the company began about two years ago. The business was started in December, 1887, by Anton C. Eggers, to manufacture druggists' sundries. He incorporated it in October, 1890, with a capital stock of $30,000, which was afterwards increased to $50,000, and he continued as president, with A. Van Praag as treasurer.

Buffalo, N. Y.—The Superior Cycle Mfg. Co. have made a general assignment to John F. Nagel. This was in accordance with a resolution adopted at a meeting of directors of the company. The company manufacture bicycles at No. 1453 Niagara Street, and the stockholders voted that the president and board of directors should make a general assignment to the concern's president, John F. Nagel, of No. 647 Spring Street. No preferences are named.

Chicago, Ill. — Fowler Cycle Mfg. Co. have made an assignment. The amount of assets and liabilities are not exactly known, but the liabilities are thought to be close on to $500,000, and the assets much less. The chief creditors of the firm are Hermann Boker & Co., manufacturers of tubing; the Anglo-American Cycle Fittings Co., of New York, and the Morgan & Wright Co., of Chicago.

Middletown, Conn.—Judge Davis of the Probate Court has heard the application of John Byrnes, of New York, a stockholder in the Worcester Cycle Mfg. Co., asking that the company be declared insolvent. The application was opposed by other stockholders, but Judge Davis found that the company was insolvent, and granted the petition.

Oxford, N. C.—The assignment of W. W. Jones, bookseller and bicycle dealer, has occurred, J. Crawford Biggs, trustee. The liabilities are about $1000 and the assets are not known.

Richmond, Ind.— The appraisement of the Richmond Bicycle Co. plant, which recently passed into the control of a receiver, was tendered to the court recently. It shows the assets to be $51,330.31 and liabilities $40,977.56. Finley Newlan, the receiver, reports that there will be a considerable shrinkage in assets when a careful examination of the appraisement is made,

Springfield, Mo.—The bicycle and sporting goods house of George Magnien, on College Street, has been closed by T. J. Delaney, trustee. The amount of assets and liabilities is yet unknown, though the assets will be $1200, with liabilities about equal. The business was opened in January, 1896, under the firm name of Burns & Magnein.

Recent Fires.

Lambertville, N. J. — The New Jersey Rubber Co., building for making bicycle tires, destroyed by fire. Insured for $7000.

Kingsville, Ont. — Howard Scratch, bicycle works, etc., destroyed by fire at a loss of $2500; insured for $1000.

Glens Falls, N. Y.—Budd Bros. Mfg. Co., destroyed by fire at a loss of $1500. Insured

PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

CRONK'S

Combination Fencing Plier.

This newly invented fencing tool is needed by all people that build or have occasion to remove or repair wire fence, as it is made with two staple pullers, two hammers and two button cutters. They are the same heft as the 1½ Maydole Hammer, and they are made of forged tool steel. No good farmer will be without one. They are warranted to cut No. 8 hard or No. 6 soft wire. Like the celebrated Cronk Plier they are fully warranted in all respects. No. 12, 11 in. long, $12.00. Dis. . . .

CRONK HANGER CO., ELMIRA, N. Y.

BURLINGTON, VT.

To Bicycle Riders.

WE MAKE OUR TUBE OF FIFTY CARBON STEEL

Because a Tube like this of our .50% CARBON STEEL Is just as strong as a Tube like this of .25% CARBON STEEL

While weight for weight in a Bicycle our FIFTY CARBON Steel will last so long [redacted] and TWENTY-FIVE CARBON Steel will last only so long [redacted]

NOTE THE FULL IMPORT OF THE PARALLEL LINES.

The comparison which they graphically make indicates the result of the prolonged investigations of the most practical experts of the world.

That the tests in our own laboratory coroborate these results is merely so much to its credit; that the same is true of actual trial on the road equally proves the trial to have been made in bicycles of correct design and construction. THE FACT REMAINS.

The margin of safety is greatly increased by the use of this tube. Every bicycle manufacturer should use it; every dealer should insist on having it; every rider should demand it. Send for catalogue.

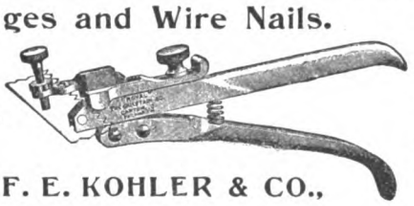
Patented January 5, 1897. Others applied for.

IT EXPLAINS Why it is Superior to all other Hose Reels. This The Hartzell Self-Draining Hose Reel will carry more hose, it will drain, preserve and greatly increase the durability of Hose.

It is a beautiful ornament for a lawn. It is convenient, light, strong. It will please your customers as it saves money. For prices and Sample Reels, address

The Hartzell Novelty Works, (Sole owners and man'f'rs) ALLIANCE. OHIO.



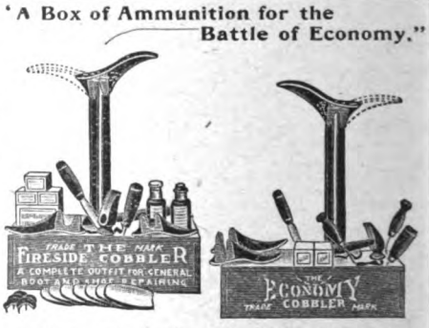
We make Strap Hinges and Wire Nails.

THE ROYAL SAW SET

Gives Full View of Saw Teeth while Using.

NEW AND NOVEL.

SPECIAL SIZE FOR CROSS CUT SAWS.



F. E. KOHLER & CO.,

The Hardware Specialty Manufacturers,

Canton, Ohio, U. S. A.

For setting saws no vise is needed
If the advice I give is heeded.
Buy a ROYAL, then be seated on a stool,
In one hand hold the saw, with the other work the tool.

"A Box of Ammunition for the Battle of Economy."

The C. R. Meres Heater Mfg. Co.,

Norwalk, Ohio.

HAS PROVED VERY SATISFACTORY.

Zenith Cycle Saddle Co., Philadelphia, Pa. [*Bicycle Saddles*]: We believe that the trade on bicycle sundries must drift to the Hardware trade, as being so much more reliable. Your paper must then prove the most reliable as an advertising medium. Our advertisement has proved very satisfactory.

FIT FOR THE TABLE OF A KING OR QUEEN.

THE

ROGERS' "ANCHOR" BRAND SILVER PLATED WARE.

The "Anchor" Brand is the original and genuine. . . . . .
Every piece of it impresses one with its individuality and high quality.

Don't let simply the name "Rogers" satisfy you. Look for the "Anchor" Brand, get it and then you're safe. . . .

AGENCY **JOSEPH RODGERS & SONS, LTD.**

THE BEST IS EVER AND ALWAYS CHEAPEST.

The merchant can recommend with confidence.
The consumer will report superiority.
Excellence will insure enlarged demand.
Satisfaction will leave no ground for complaint.

Why, then, sell inferior Cutlery when

THE VERY BEST

can be had at a small advance over poorer

QUALITY?

FOR CENTURIES THE WORLD RENOWNED HOUSE OF

JOSEPH RODGERS & SONS, LTD.,

SHEFFIELD, ENGLAND,

Has had neither equals nor superiors in the manufacture of

CARVING KNIVES and FORKS,
TABLE CUTLERY,
SCISSORS,

"Replies From All Sections."

McIntosh-Huntington Co., Cleveland, Ohio. [*General Hardware and Bicycles*]: As an advertising medium, we have recently had occasion to test HARDWARE in a manner that would give us some idea as to how successful it can be used. Our advertisement did not occupy a very prominent position, but was of a character to excite the cupidity of the reader. We found that within two days after your paper came out, we commenced to receive replies from all sections of the country to the advertisement. This would seem to be sufficient proof that yours is a good medium.

A GOOD THING.

IT'S IN THE TEETH.

The Patent "REFORM" Curry Comb is composed of three shallow, oval trays, with corrugated edges. The parts are struck up from a fine grade of cold rolled steel, heavily tinned and bronze lacquered, firmly riveted together and warranted not to rust. The outer dimensions are 6½x4¼ inches and by reason of the large cleaning surface and peculiar arrangement of teeth, the comb will do its work with a large saving of time and labor, cleaning with equal thoroughness both long and short coats. There are no places to accumulate hair and it will not tear or injure the brush, the comb being quickly freed from accumulation by giving its face a gentle tap.

FRANK REIFSNIDER, - Western Manager.

The Circulation of "Hardware" is Larger Than That of Any Other Paper in the United States Devoted to the Hardware Trade.

Editorial Trade Review.

The season of the year is again at hand when the nervous anxiety caused by a careful inventory, becomes inseparable from the established facts there demonstrated, and the problem of how a more liberal allowance of profit on a year's hard work can be made by pursuing different methods, becomes a subject for animated discussion.

The year has undoubtedly been a disappointment to many business men throughout the country, who believed increased prosperity, arising from continuous effort and advancing prices, would be the prominent feature of the year's business; there are numerous cases where this was not the result accomplished. While on every hand the feeling is a pronounced one that the look ahead is still of a hopeful character, the volume of our exports largely in excess of all previous records, and the indications for good business by no means unpromising, still there is a feeling of uncertainty about present methods of distribution; the relative expenses of which, it is everywhere admitted, must be more economically adjusted, or it may result in changes and consolidations, combinations and new corporations, that will add to the perplexity of every business man affected by the discussion.

The agitation regarding the formation of a huge corporation to control the output of wire rods, wire nails and similar products, has stiffened up the prevailing quotations on the lines of goods naturally affected. Without expressing any expert opinion as to the advisability, from the dealer's standpoint, of the making of so many trusts in connection with the Hardware business, the general effect of the formation of the one now under consideration, has been to lessen the weakness in prices in those lines of manufacture that are in harmony with the wire-producing interests.

The wire nail mills have been booking the December product to an extent rarely noticeable in previous years, and with fair prospects for advanced quotations after January 1st, the orders for a later date than December 31st have at present no chance of being entertained.

Markets in other lines have received no special impetus, and at this late date in the season no great efforts are being made to encourage the purchase of heavy stocks of goods at the extremely low prices that have been current for some time.

The Wire Trust.

After several months of effort to accomplish the project, it looks as though the wire and wire rod manufacturers would succeed in establishing a combination that will consolidate their interests, and enable them from a central headquarters to control the output and the prices of wire rods and wire nails.

It is claimed that a combination of this character would limit, to a great and important extent, unprofitable competition, and that frequently unwise and dangerous surplus in the hands of makers who may be lacking in ordinary sagacity how to dispose of it without loss.

There are many in the Hardware trade who view with apprehension, born of previous experience less than two years old, this aggregation of manufacturing interests in a line of product so staple as wire and wire nails. There are at the present time so many articles in the Hardware business of which wire forms a prominent part, that the effect of a combined effort to materially advance prices would have an influence so far-reaching that it would be considered detrimental to the interests of jobber and retailer, who are to-day engaged in a hand-to-hand struggle for existence, having been able only to make both ends meet in a business sense, on the more encouraging quotations of the present.

While at the outset a combination, such as is now almost an accomplished fact, gives the assurance that they contemplate no material advance in prices, the dealers feel an announcement of this character is only made to secure their approval of a scheme which has for its object the creation of a power, the effect of which will inevitably be felt when once the markets are securely within its control. Conforming as they evidently intend to do, within the limits of existing laws respecting trusts, the so-called "combination" will be a new corporation, legally responsible, after having purchased the plants and business of the various mills embodied in the plan, whose only object in consenting to this loss of individuality and prestige would be the promise of greater profits, which advanced prices in the future could alone make certain.

It seems like a confession of weakness on the part of these prominent producers of Hardware necessities, that with a tariff formed on the lines of the greatest protection from foreign interference in our domestic markets, such combinations or corporations as the one outlined are confessedly necessary, in order to enjoy the profitable fruits of honest toil. The fear seems to be that if any of these large plants is left free to exercise the business judgment of their respective managers, they will simply cut each other's throats in the

Digitized by Google

loving ambition of widespread quotations, and one and all eventually go to the "demnition bow-wows."

As the jobbers and retailers themselves are just ending a year of business, in which net profits are an indefinite quantity, and expenses to market their stocks loom up so largely as to give anxiety to their domes of thought, the Hardware trade are surely not in sympathy with the throttling of a healthy competition between manufacturing plants amply protected by tariff legislation solely in their favor. All the governmental authority in existence cannot prevent the foolishness of unwise competition, the throwing away of opportunities to sell at a profit upon an ascertainable cost, which is too readily done when the desire to see goods move, is stronger than the old-fashioned business sense that argues a halo of profit should surround them when they do.

It is a matter worthy of comment and remembrance, that the National Hardware Association of the United States, whose annual convention was so successfully held in Buffalo, recently, has been the model after which another association of like character in Great Britain has been modeled. Correspondence was opened some time since between leading Hardwaremen of England, and the officers of the American association, and the information which was so gladly and willingly given by these officers, has borne direct fruit in the Old World. The English association was started on July 9th of the present year, and to-day has upon its roll some forty of the leading Hardware manufacturers, wholesale and retail houses, etc. This number is expected to be largely increased in the immediate future, and several local associations have become affiliated with the parent concern. One of the officers of this association, in writing to the secretary of its American neighbor, declares that "We see the promise of a most complete organization of the Hardware trades of this country. We are working very much on your lines. We, like yourselves, do not attempt to regulate prices, but we are to-day against trading between manufacturers and the public, believing that the ironmonger is the necessary medium for all retail trading."

A reception was tendered on December 1st by the Hardware Merchants' & Manufacturers' Association, of Philadelphia, Pa., to John Needham, of Manchester, England, who was visiting the City of Brotherly Love on the invitation of William W. Supplee, president of the National Hardware Association. Mr. Needham is visiting this country with a view to opening trade connections with manufacturers in the Hardware line. He favored the Association with an address on the commercial relations existing between Great Britain and this country, and expressed the hope and expectation that the sale of American goods in his country was yet in its infancy.

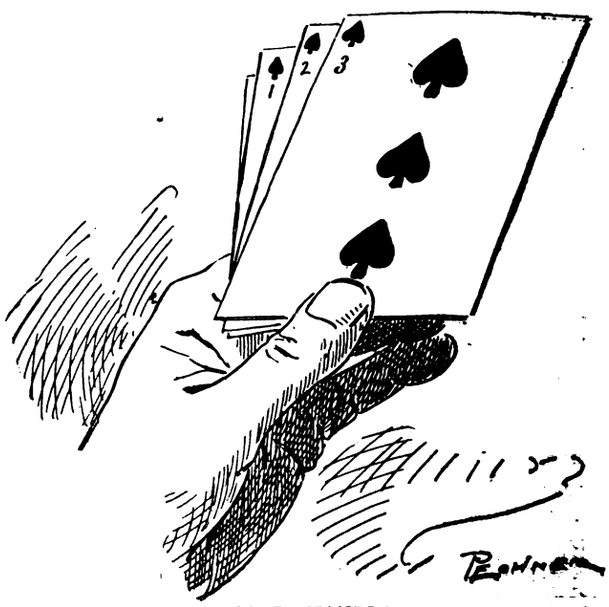
Edward Miller & Co., Meriden, Conn., and Nos. 28-30 West Broadway, New York, are issuing a handsome little catalogue describing and illustrating the Burdick Cyclometer, a full description of which may be found in our page of specialties for this issue. It is a handsome and attractive publication. They are also furnishing the trade with several leaflets descriptive of Miller's A1 Bicycle Lamp, the Everlit Bicycle Lamp, their Bicycle Lock Stall, Gem Bicycle Holder, etc. The leaflets will be sent upon application.

Poetry Hath Charms.

A Cleveland Hardwareman, prompted by an article published recently in *Hardware*, on the subject of collecting poor accounts, writes us agreeing that more is to be accomplished by a dunning letter couched in good natured language than one breathing threats in harsh words, and relates the following as an illustration:

"It was our custom to have a new clerk put in his spare time writing letters to slow customers. A clerk's merits were measured largely by the result of this work. I remember that up in Michigan we had a particularly bad case. It was a bill of $12 against a man named William Rose. It had become outlawed, and was considered a dead duck, but every once in a while we gave it a whirl. Finally one day, the last clerk put on, a bright young fellow, laid the following verses on my desk and asked permission to mail them to Rose:

Oh, William Rose, oh fragrant rose,
Yourself it is who surely knows
Unsettled bills are bad.
They soil our books, they spoil our looks
And make the heart grow sad.
So William Rose, feel in your clothes
And find twelve dollars there.
The goods were sold in days of old
Before we had white hair.



"They were forwarded, and inside of a week the man sent us the money, explaining that 'he had always intended to pay the account some time, but couldn't hold out no longer agenst sech a demand.'"

Reduction in Clippers.

The Gillette Clipping Machine Co., Nos. 110–112 West Thirty-second Street, New York, manufacturers of the famous Gillette Clipping Machines, announce under date of December 4th an important reduction in prices. Their Model B has been reduced from $35 to $20, and their Model E from $25 to $10. Two cutters go with each machine, and orders can be sent direct or from any dealer or agent. These clipping machines have been too long upon the market to require any extended description in this connection.

The W. Bingham Co., Cleveland, Ohio, have issued a handsome little guide for the holiday shoppers, giving a list of seasonable goods handled by the Hardware trade, with special application to the Christmas season. It is surprising, when looking over this list of three full pages, to see what a great opportunity the Hardwareman has for the display of holiday goods.

HARDWAREMEN AND RAILROADS.

There has been so much said in times past concerning the complaints of shippers, of unjust treatment and discriminations in the handling of freight, that *Hardware* was moved recently to make inquiries of prominent Hardware houses in various parts of the country, as to the exact situation at the present date. We can honestly confess that these inquiries were put forward with the expectation that a great many more evils would be uncovered, than has been the result so far. The above frank admission does not detract from the fact that it is with pleasure we record the various expressions and statements of experience, found in the following letters. The present situation shows the fruit of excellent labor on part of such associations as the Southern Hardware Jobbers' Association, which, we believe, has made the freight question in times past a matter of serious study. If the railroads of to-day are giving better satisfaction to the shippers of freight, it is because of agitation and concerted action on behalf of those most interested, and the result shows that this question, like all questions of public policy as applied to business, is settling itself, and coming to a fixed basis.

The houses which we quote are representative in their line. There are a number of small points brought out in these letters which are of interest and worthy of attention. We should be pleased to hear from any one who has special knowledge upon any of the points touched upon, or who can throw light upon the relation of the railroads to the Hardware public.

A number of the letters which we have received are as follows:

TWO WAYS IN OHIO.

Editor Hardware: In our opinion, there are two ways to handle railroad companies. One way is, where there happens to be a delay on a shipment, to growl at them, jump on them, condemn that and every other railroad in the country, thus getting them in an unpleasant mood to start with, and making it very hard for them to hold their temper, and carefully consider and correct your complaint.

Another way is, when there is any cause for complaint, to call the proper official's attention to it in a nice, gentlemanly manner, and ask him if he won't correct it. Our experience in the latter is the only way to treat complaints against railroad companies. We have pursued this course on many occasions, and have never yet failed to find a very accommodating gentleman in charge of the department; a man who realized that the merchants' and railroad companies' interests were identical, and was only glad to have any irregularities reported, as this is about their only chance to discover incompetent and careless employees.

Railroad companies have their faults; so have we; and when brought into contact with them, you are very liable to find out that your own faults are about as numerous as theirs, and that certain corrections can be made in our own shipping department, that will aid the railroad companies very much without any extra trouble to ourselves, and thus working together, all will be harmonious.

Cleveland, Ohio. THE MCINTOSH-HUNTINGTON CO.

HAD SOME BITTER EXPERIENCES.

A prominent jobbing house in the Southwest writes us:

Editor Hardware: We, like a great many others, have, as you state in your letter, had some bitter experiences. So far as our inbound freight from all commercial centres is concerned, we have no complaint to make against any of the railroads; the difficulty in our case being that the through rate of freight from our competitive points, to a great many points in our territory, is a disadvantage to us. The inbound rate, plus the local rate out, is considerably greater than the through rate. Occasionally, when this matter is brought before the proper authorities, they in a measure correct these errors, but not to the extent to which the jobbers are entitled. Another evil that we encounter is the difference in weights. We now have on record in our office quite a number of instances where the railroad weight has exceeded the actual weight of contents of car, all the way from three to ten thousand pounds. While we do not pay the freight in these instances, nevertheless it causes us inconvenience and time, for in order to convince the railroad people of this fact, we have to make affidavits of the weights and our invoices, and render them copy of the same. To our way of thinking, there is no reason why the weights should not be correct, and there should be some measures taken to force the railroad companies to abandon this practice. We think that the cause of it, in a great many instances, is that the weigher is not careful enough, and permits a part of the car, either in the front or rear of the car being weighed, to be on the scales at the same time with the car containing the contents being weighed.

We also encounter difficulty on overcharges on less than carload lots, and also weights.

The above stated complaints are the main ones; we could also point out some minor ones, and at any time we can be of further benefit to you in the matter, we shall be pleased to assist you.

TROUBLE WITH EXPRESS COMPANIES.

The following pertinent suggestions come from a prominent house in the South:

Dear Hardware: There is trouble in this section of the country with the express companies, and we think you could include that in your work as well as the railroads. When we order an article by express, we have no way whatever of knowing what the express is going to be, and we find that the charges are not at all uniform. Sometimes they are twice as much as at others—in other words, it seems to us that express companies are arbitrary as to their charges, and they should be required to furnish a tariff sheet of their rates to any customer requesting same.

We think the mere fact of having this information, even though their tariff sheet should be high, would be a great benefit.

GIVES THEM FULL CREDIT.

A Southern correspondent speaks as follows:

Editor Hardware: We are not in any way interested in railroads, except as shippers, but we can only say that for us, taking all things into consideration, the railroad companies do their work remarkably well. There is not as much trouble with them in proportion, as there is with the average factory, and much less than with the average customer. That they make mistakes, is unquestioned. Who does not? But we believe they make a conscientious effort to do the best they can, both for the community and the individual; but in this, of course, they have to consider their own interest, just as the rest of us.

We have never, in our entire business experience, made a reasonable request from a railroad company, that was not granted; in other words, we were never refused a request made to a company, because we only made a reasonable request.

We have attended business meetings with regard to rail-

Digitized by Google

roads and freight, and we have never attended to one where, to our mind, the requests made were reasonable. The speakers usually seem to think that the railroad company should do its work for nothing, and be kicked in the bargain. We have found railroad people just like other people; no better and no worse; usually a little broader than other people, because their position made them so. We have obtained from them concessions which have been of enormous benefit to our particular trade in our community, and we have done this by trying to work to their advantage as well as to our own, and we are sure that the concessions obtained were of advantage to every Hardware jobber in our section. Animosities, as a rule, do no good, and very few people seem to understand this.

NO TROUBLE IN ATLANTA.

Editor Hardware: We have little or no complaint against the transportation companies.

Atlanta, Ga. BECK & GREGG HARDWARE CO.

GET SLOW DELIVERIES.

A leading house up in Maine says:

Dear Sir: Answering your kind favor, we could give you quite a number of points from which we get very slow deliveries from the manufacturers.

From Pittsburg, our freights are, on an average, over two weeks in transit, even where we have full cars, and sometimes over three weeks

From New Haven, Conn., our freights are from seven to ten days in transit.

From St. Johnsbury, Vt., five to seven days in transit.

Points farther west than Pittsburg, three to four weeks.

ALL RIGHT IN IOWA.

An Iowa house says:

Editor Hardware: In reply to yours, we beg to say that we have no complaints to make with regard to the transportation companies engaged in business at this point.

Our business both in and out is promptly handled and at fair rates to all concerned. You probably know that the railroads in Iowa are working under what is known as the "Iowa Commissioners Distance Tariff." These rates seem to give satisfaction to both shippers and the railroad companies. As far as delays and annoyances are concerned, the companies represented here are very considerate, and endeavor to handle the business very promptly. We therefore have no complaints to make.

Overcharges are settled promptly, and we know of no discrimination existing at this point.

DO VERY WELL.

This statement comes from Kentucky:

Editor Hardware: We have no complaints to make of the railroads handling goods. Indeed, we think they do wonderfully well, all things considered. As it is to their interest to get and transport freight, and as the competition between them is quite keen, we believe that difficulties which used to be encountered are overcome. We have goods arrive in good condition, if properly packed, and with reasonable promptness.

The only thing which occurs to us which would improve the service greatly, would be the adoption of the "civil service" rules by which the older employees, who have proven themselves worthy, should be retained. Confusion which sometimes arises, is from exercise of favoritism on the part of officials in putting new and untried material into places of responsibility.

THE SITUATION IN CLEVELAND.

Editor Hardware: Upon receipt of your recent favor regarding transportation facilities from Cleveland, Ohio, we referred the same to the Transportation Committee of our Chamber of Commerce, asking them to tell us what they could, that we might transmit the same to you. We are just in receipt of their reply, which we enclose. We will say that our experience confirms Mr. Scott's letter. We really cannot, from our own records, pick out a point or a line where there is habitual delay or poor service, and so far as we know, the other houses here could report a similar condition of affairs. Yours very truly,

Cleveland, Ohio, December 4, 1897. THE W. BINGHAM CO.

The W. Bingham Co., Cleveland:

Gentlemen: We take pleasure in replying to your recent favor relative to the desire of the editor of *Hardware* to publish something bearing upon transportation conditions in this city.

While our shippers are not, of course, exempt from all the annoyances and difficulties which naturally arise in handling the traffic of a city as large as Cleveland, the transportation conditions generally are satisfactory. Rates in most instances are equitable; quick dispatch of shipments is the rule, and a very decided improvement has been made during the last three years in the time required for the settlement of claims. The above results, as you know, have been brought about largely through the united co-operation of our shippers with the transportation committee of this organization. This committee entered upon its work in 1893, with the desire to treat all matters laid before it in a spirit of fairness, both to the shipper and the transportatiou lines. It has endeavored to adhere rigidly to this policy, and its work in consequence has been one of mutual helpfulness, and has always received hearty encouragement and support from the transportation lines. The following quotation from the report of the board of directors of this chamber two years ago, so aptly represents the situation as it is to-day, that it seems worthy to be submitted: "Our relations with all the common carriers have been uniformly of a pleasant and cordial character. Our interests are mutual and identical, and any course of opposition, the one to the other, is fraught with danger to each, and the popular notion of necessary conflict between the two is without the semblance of a foundation. Cleveland has no better friends than the representatives of her transportation lines, including our valuable lake service; in the maintenance of a spirit of mutual helpfulness will reside one element of the strength of this organization."

Should you desire to forward to the editor of *Hardware* any portion of this letter, it, of course, need not be used anonymously; on the contrary, the committee will gladly furnish any further information in connection with its work which may be considered of interest to the readers of that journal. Very respectfully,

F. A. SCOTT,
Secretary Transportation Committee.

The Cleveland Chamber of Commerce, December 4, 1897.

A UNIFORM CLASSIFICATION.

A Western house writes us:

Editor Hardware: We have no particular grievance against the railroad companies, for while we get hints now and then of cut rates, we have nothing tangible to submit. If you can agitate the substitution of a uniform classification East and West, think it would serve to remedy some of the existing evils.

The New England Sportsmen's Association, of Boston, Mass., has been incorporated with a capital of $20,000. It is organized to give public exhibitions of goods, arms, boats, camps, etc., and encourage athletic exercises and field and forest sportsmanship. Harry Dutton is president and W. L. Hill, treasurer. The remaining directors are Edward Read, F. G. Webster, E. J. Wardwell, O. R. Dickey, Paul Butler, Butler Ames, John E. Thayer, and Charles W. Dimmick. F. H. Prince, E.D, Jordan, H. E. Russell, E. V. R. Thayer and F. B. Crowinshield are stockholders.

Echoes From Buffalo.

The man who carries a cheerful frame of mind, a healthy body, and a good pair of lungs, to a convention of the National Hardware Association, is pretty sure of having a good time.

If he don't, let him blame nobody but himself.

If he hides his identification button, goes off into a corner, covers his face with a newspaper, and grows gloomy over the market reports, he is quite sure of being left alone, and can sit and peacefully breathe in his own company, without interruption. No one is going to turn a search light upon him, nor will President Supplee appoint an investigating committee to look him up.

This has no personal application, as we don't know of a member of the Association who is built that way.

On the contrary, the membership, taken through and through, from No. 162 to No. 56, or from No. 88 to No. 55, (see your key) are a genial and social aggregation, assembled in convention for business purposes, but making a holiday of the whole affair, and ready to let their light shine socially, in the hours when business is laid aside.

These hap hazard recollections and sentiments are brief gleanings from the prolific field of Buffalo, in the memorable campaign of mid-November.

Those identification buttons are a great thing, and no well-regulated convention can get along without them. You wish to find someone whom you have not met personally, but who is known wherever the trumpets of fame are blown—say James H. Ritter, of the Biddle Hardware Co. (we will assume, for the moment, that there is a Hardwareman who don't know Mr. Ritter, whose letters in each issue of *Hardware* are models of their kind). You take out your little book, turn to Pennsylvania, and there you see the legend: "167. Jas. H. Ritter, Biddle Hardware Co., Philadelphia." You slip the book into your pocket, and go about on a still hunt; and after a time you spot your man, introduce yourself—and the whole thing is done.

For instance, the writer of this entered the cafe of the Iroquois, for breakfast, and found himself *vis-a vis* with a handsome young man, from whose coat lapel depended the number "155." Out came the book, with the remark, "It may not be polite, sir, but as you are a member of the Association, I must see who you are"—and lo! the gentleman was T. F. Smith, of the Smith Bros. Hardware Co., Columbus, Ohio, who have been correspondents of *Hardware* for years. What was the result? An acquaintanee was formed, and a pleasant hour spent, where otherwise two strangers would have faced each other.

You look at the button—it does the rest.

It has been suggested that this idea could be employed to advantage in organizations like the New York Hardware Club, where one becomes so familiar with faces, but has no sure means of fixing the name to the face.

The sessions of the Association are run wide open—for the members—but are closed to everybody else. This is not because there are deeds of darkness, nor words of evil, to be done or spoken, within the walls. It is a little family conference of the jobbers of the country, and there are, of course, in every family, some things that need to be talked over in a friendly and confidential manner. One don't go about shouting personal affairs from the housetops. To all appearances, the sessions are devoid of noise and excitement, and in all the gatherings, no member has been seen to emerge from under President Supplee's gavel with broken bones or a bloody nose. Some talking is indulged in now and then, but it is dignified and good natured, and has for its main purpose the good of the trade.

An efficient press committee, whose chairman is George T. McIntosh, of Cleveland, are charged with the task of giving out such news as would be of interest to the trade; and so far this task has been performed with courteous promptness, with good judgment, and to the satisfaction of all concerned.

The great Hardware houses of Weed and Walbridge were thrown wide open for the use and entertainment of guests. Hobart Weed, Harry Walbridge and E. C. Neal were on hand all the time, ready to do anything that lay within the power of a mortal Hardwareman to make the visitors understand that they were the temporary owners of Buffalo. A favor may be done in a perfunctory way that leaves but a small sense of obligation, and, again, it can be tendered with such courteous tact as to leave a sweet taste in the mouth forever after. It is this latter brand that they keep in stock in Buffalo.

Barnett's Silver Medal Award.

The G. & H. Barnett Co., Philadelphia, Pa., the well-known proprietors of the Black Diamond File Works, have received an award from the Nashville Exposition, of a silver medal for the excellence of their goods. This was the only and highest award made on their line of goods, al-

though there were others exhibited. The fact speaks once more of the high character and reputation of the products of their factory, which have been so well known for so many years to the trade.

Brass Goods Mfg. Co.'s New Salesroom.

The Brass Goods Mfg. Co., Nos. 86 to 92 Third Street, Brooklyn, N. Y., who are large manufacturers of stamped bronze, brass and tin goods, many of which comprise a complete line of lock manufacturers' trimmings, have recently opened a new sample and salesroom at No. 117 Chambers Street, this city, which will be in charge of their New York representative, W. F. Brainerd, who in his position of local selling agent, has become familiar with the introduction of similar goods to the trade in recent years.

We bespeak for Mr. Brainerd the confidence of the trade, as his long experience in this important line has made him well-known among the local and nearby dealers.

Curtis & Curtis, Bridgeport, Conn., have published a leaflet calling attention to some very important changes which have been made in their No. 116 Power Pipe-Cutting and Threading Machine, by which it will be much more simple of operation and more compact, as well as being more effective, and a much better machine in every way. The leaflet carries a full description of the same, and is accompanied by a circular describing Brock's Patent Chain Pipe Wrench, which they are also successfully manufacturing.

The Stowell Mfg. & Foundry Co., South Milwaukee, Wis., are sending their friends a number of cards illustrative of their registers and ventilators, hangers and rail, shoe lasts and stands, etc., etc. On the reverse side of the card is a picture of their extensive works, and some information as to the character and quality of goods which they are putting forth.

BRUCE & COOK.

In the last decade many changes in the method of transacting business, greatly increased facilities for the acceleration of commercial movements, and every possible means that could be devised for the prompt filling of orders, have marked the most radical of changes in many mercantile houses which have previously been counted as the most conservative.

Bruce & Cook, Nos. 186, 188 and 190 Water Street, and Nos. 248 and 250 Pearl Street—the oldest metal house in the city, having been founded in 1812—have been subjected to the necessity which makes change a condition of commercial existence, and have recently been undergoing a transition state in order to keep pace with the exactions of

their constantly increasing business, producing in the interior of No. 190 Water Street improvements more modern in scope and connections more convenient for the transaction of business.

The main office on the lower floor has been perceptibly enlarged in area, by absorbing the old-time entrance and passage way connecting, and by so doing, providing ample room for the desks and office equipment needed for the convenience of the individual members of the firm, which now consists of Russell W. McKee, S. A. Jennings, P. R. Jennings, F. C. Jennings, I. R. Bruce and E. C. Cook. The entrance to this floor has been changed to the opposite side, entering from No. 188.

The second floor has been entirely renovated and refitted for the convenience of the office department, the staff of assistants finding increased accommodations in their new and convenient quarters, adjoining which is the mill order department, now cozily and comfortably located, and able to receive proper attention, being under the care of A. G. Cooper and his assistants. This department, annually increasing in importance, greatly needed the improved facilities now provided for the growing traffic.

The great business of this old house to-day shows in every division of its industry greater evidence of increased life and vigorous vitality than would have been deemed possible during the few years past. The changes that have been made in the transaction of the metal trade during that short period have been many and far-reaching; shipments of importance in tin plate and sheet iron, running into thousands of boxes of the one, and hundreds of bundles of the other, can now usually be made by telegraphic aid direct from the mills, making only one handling of freight essential, which at the present close margin of profit is an item of prime importance.

Still this old house has an extremely large local tinners' and manufacturers' trade, to the wants of which in every analogous branch of their important business, they have successfully catered for too many years to count; and for their requirements the entire 37,000 square feet of their premises is fully stocked with the many and multifarious items constantly called for. Goods from this stock are sold in quantities of greater or less importance, and at prices somewhat in advance of mill quotations, as the pro rata expense of handling an assorted stock increases in an inverse ratio to the size of the quantity specified, ranging, as it frequently does, from a single sheet of a special gauge of iron, zinc or copper to full packages of either; or from a truck load of tin plate delivered on dock in New York, to a carload of the same shipped from mill direct.

The buildings Nos. 186 and 188 Water Street and Nos. Nos. 248 and 250 Pearl Street are so constructed that the interior of the buildings are connected by archways, so that every truck is loaded under cover systematically and perfectly, and upon every hand is noticeable the large stock of tin and terne plates, metals, sheet iron, copper and zinc, wire, etc., needed for their trade; the prompt shipment and delivery of which upon demand, has given them the great popularity they have so long enjoyed, to the advancement of their prestige and the furtherance of their prosperity.

In reference to this double building, built a number of years ago expressly for their purpose, it is doubtful if there is a building in the country more solidly constituted, it having been especially constructed for safe storage of goods of such immense weight as their regular stock. The flooring of the basement has four layers, concrete, brick, cement and planking; this makes a thick, compact and water-tight flooring, excluding all possible moisture. The superstructure rests upon numerous massive iron columns and solid masonry, which renders the whole building incapable of being shaken or jarred in the slightest degree, no matter what weight, moving or stationary, may be upon the floors. Numerous iron pillars sustain all the upper floors, while thick timbers and girders, closely placed together, impart unusual solidity and freedom from vibration to every floor.

The growth of business of this pioneer house in the metal trade from the earliest times would make interesting history, as exemplifying in a remarkable degree the evolu-

Digitized by Google

tion of business methods that have made this nation the leader of the mercantile world in all that pertains to progressiveness, enterprise, conscientious endeavor, ambitious achievement and deserved success.

This old and reputable house, with its esteemed predecessors, has occupied the same business location for eighty five years. The founder of the house, Mr. John M. Bruce, in 1812 was a young man, enterprising, conscientious and hard working, without cash capital, but with a natural ability and practical experience which proved, eventually, the most abundant capital by which he succeeded in laying the foundation of his fortunes. The walls of the very building he occupied now enclose the offices of the present firm, which are shown at the right of the lower portion of the illustration herewith, No. 190 Water Street. It is part of our local history as a city, that these walls formed part of a building erected in 1760 by the "English Copper Co.," and which was referred to in the journals of that conservative period as being an "imposing building, giving evidence of the thrift and business development of the city of New York and that vicinity."

The building was three stories in height and 24x35 feet in dimension. In this building, which in common with the merchants of the period (1812) was used as a dwelling as well as a workshop and store, Mr. Bruce laid the superstructure of a continued prosperity which by industry, honesty and fair dealing forming the foundation stones, has never known a backward step since this early day of its inception.

This old establishment even now is filled with many associations reverently binding it to the past; and there is scarcely an old dealer in metals, who is still in business, after nearly a half century spent in the paths of traffic, but has found a grateful welcome within the precincts of this time-honored house at some time in his commercial career. The loving fragrance of the "good old days" still lingers harmoniously around this local landmark which, since 1855, has known no change in the name of "Bruce & Cook," although the personnel of the firm has in its makeup found the addition of younger partners, and more modern methods add the force and vigor demanded by the commercial requirements of an increasing activity.

Wants Catalogues, etc.

A severe fire occurred in Kittanning, Pa., on November 26th, by which a number of stores were consumed, at a loss of $100,000. The flames started in the store of the McCullough Hardware Co., on Market Street, about 2 A.M., supposed to have been caused by natural gas in the cellar. A number of other buildings were consumed. The loss of the McCullough Hardware Co. is estimated at $20,000. The manager writes us that he will reopen with a new stock at once, and wishes manufacturers to send him their catalogues and price lists at the earliest possible moment.

A Buyer Wanted.

A prominent jobbing house in the West would like to receive any information that is possible from manufacturers in regard to steam-fittings, iron pipe and fittings, valves, etc. They also have an opening as buyer in these special lines for some one who is well posted thereon. We can guarantee that they are a prominent and reliable house, and any communication addressed to us in response to this notice, will be forwarded to them immediately.

The Van Wagoner & Williams Hardware Co., New York and Cleveland, Ohio, are complimenting their friends with the presentation of a beautiful little Samson Anvil, made of steel, nickel-plated, and oxydized in gold. It makes an artistic paper weight, and has the honor of representing, in miniature, a successful and first-class line of goods.

Columbia Calendar for 1898.

For the thirteenth year the Columbia Pad Calendar makes its appearance promptly on time for 1898, and while its general style is of the same familiar character, the many bright thoughts it contains, contributed by its friends in many parts of the country, as well as abroad, are new, and will be appreciated by all who take an interest in bicycling, healthful exercise and good roads. The 1898 Columbia Pad Calendar contains a convenient arrangement of dates that will prove useful to busy men, and as plenty of space is reserved for memoranda, the pad may be used as a diary

and as a reminder for business appointments and obligations. It is neat in appearance, takes up but little room and is both ornamental and useful for the desk, while its stand is of such character that it may be used either upon the desk or hung upon the wall.

The moon's phases are indicated in the calendar for the benefit of those who wish to have this information. The calendar is ready for distribution and all orders for it will be filled upon the day of receipt. It can be obtained by mail pre-paid for five two-cent stamps by addressing the Calendar Department of the Pope Mfg. Co., Hartford, Conn.

Death of Joseph J. Tillinghast.

A dispatch from Troy, N. Y., under date of November 30th, announces the death of Joseph Joslin Tillinghast, one of Troy's most eminent and influential citizens, and the vice-president of J. M. Warren & Co. His death was caused by pneumonia. Mr. Tillinghast was born in Troy on January 30th, 1831, and was descended from an old New England family. The first of the family, Elder Parson Tillinghast, came to this country at the age of 21 years in 1643. Joseph J. Tillinghast was educated in Rhode Island and began his business career in 1846 as a drug clerk. He was treasurer of the Troy Savings Bank from 1851 to 1856. From 1857 to 1860 he was engaged in the Hardware business at Keokuk, Iowa. In 1861 he returned to Troy and engaged in the banking business with his father. In 1872 he entered the firm of J. M. Warren & Co. He was a member of the State Board of Charities, and was president of the Troy branch of that body. In the administration of Andrew Jackson, Mr. Tillinghast was Collector of the Port of Troy. He is survived by his widow and two brothers, Charles W. Tillinghast and William Henry Tillinghast, of New York city. Mr. Tillinghast was a member of the Reform Club of New York, and belonged to a number of local organizations.

In our list of members of the National Hardware Association, published in the issue just preceding, in connection with the annual convention in Buffalo, we omitted the name of Orgill Bros. & Co., Memphis, Tenn. This was done because of the fact that the name of this company did not appear in the list of members published in connection with the official programme.

The International Cycle Fittings Co., No. 74 Reade Street, New York city, are about to issue a voluminous catalogue for 1898. Inasmuch as they are catering especially to builders and dealers, it would be well for readers to send them a business card addressed in care of Department "L."

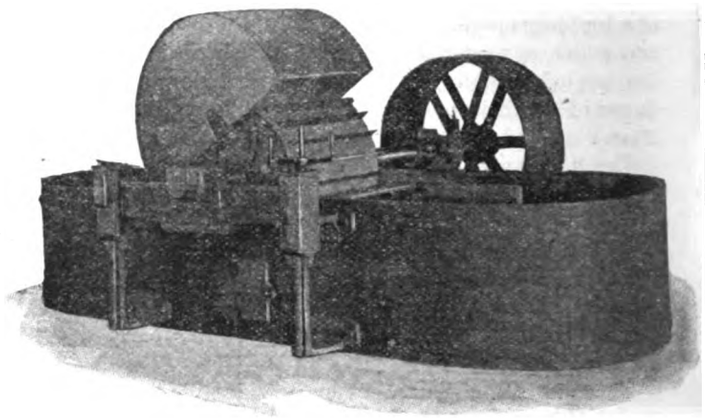
NEW GOODS AND SPECIALTIES.



The New Departure Cyclometer.

In this connection we illustrate, in full size, the New Departure Cyclometer, manufactured by the New Departure Bell Co., Bristol, Conn., and marketed by their selling agents, John H. Graham & Co., No. 113 Chambers Street, New York. The company state that they were the first to introduce the barrel form of cyclometer, and that this pattern has become recognized as standard. Their purpose from the beginning of their manufacture in this line has been constantly to produce an instrument possessing all the desired requirements and eliminating all objectionable features. They say: "The results of more than six years of watchful experiment, unsparing expenditure of skill and money, are embodied in the perfect form of cyclometer here shown, which possesses every feature of excellence that human ingenuity can devise or human skill produce. Effort has been directed to the production of a cyclometer possessing the essentials of accuracy, strength and durability, with the fewest possible working parts and the lightest construction. The elimination of all springs, ratchets, levers, pawls and other intricate parts, the use of mechanism giving direct and positive action, have co-operated to produce a cyclometer of smaller size than any heretofore devised, thus meeting the requirement of small size in the fullest manner. Constructed of a special nickel silver metal, possessing great strength and rigidity combined with extreme lightness, the New Departure Cyclometer is endowed with features of compactness, strength and solidity impossible of attainment with materials and processes heretofore employed. Following the best known methods of engineers and designers, adhering to the sound principles of mechanical demonstration, but few parts are employed, all motions made positive and direct, and all springs, levers, etc., likely to give trouble in use have been discarded. By such means only is possible the production of a cyclometer of absolute accuracy under all conditions, which will not become deranged with the severe usage to which cyclometers are subjected, but which does its work faithfully and accurately, giving results upon which the fullest reliance may be placed. Its operation being simple, sure and reliable, no attention is required when once applied. It can be read from the saddle at a glance. Figures are plain and bold, yet neat and in good taste. It records up to 10,000 miles and repeats, the last mile being shown by tenths, making easy reading for short distances. Adjustment to the wheel is easily and quickly made and the 'trip' is small and inconspicuous." The company announce that prices to the trade will be quoted by John H. Graham & Co., No. 113 Chambers Street, New York city, and quotations will be such as to assure dealers of a large and profitable business. The company guarantee this cyclometer in the fullest possible manner, and behind this guarantee is the reputation and standing acquired and sustained by many years of successful relations with the trade.

Rubber Washer.

The attention of manufacturers of rubber goods is respectfully called to the illustration presented herewith. The signs of the times indicate that there is a demand for superior goods, and it is now the object of the best manufacturers to secure an improvement of methods of production as well as in the improvement of the quality of goods. We present herewith an illustration of a Washer that the manufacturers, The Turner, Vaughn & Taylor Co., Cuyahoga Falls, Ohio, state will positively remove bark, seed and dirt from rubber stock that cannot be removed so successfully by the old process of rolls, for the reason that the rubber is pressed or crushed over and over again, doubling

back again and again, which keeps the dirt to a certain extent inside the web. The manufacturers say: "This Washer will clean and wash out everything foreign to the stock. The action of the Washer is to pull and stretch the stock and water rushing along, loosens the dirt and bark, and the same is carried away, and deposits the sand on the bottom and the bark on top, where it is skimmed off. The rubber being lighter than the sand and heavier than the bark, passes around through the beater roll until it is all clean and ready to take out, when the tub is again filled with another load of stock." The directions for the operation of the machine are as follows: "The crude stock is first crushed by the first rolls into a web or sheet which is in turn shredded and forked in the tub, at which time water is added and the operation of cleaning commences." They build tubs of various sizes:

No. 1,	10 feet 6 inches	long;	capacity,	10 hours.	..1200
" 2,	12 "	long;	capacity,	10 hours.	1400
" 3,	14 "	"	"	"	1600
" 4,	16 "	"	"	"	.....1800 to 2000

Tubs are either wood or iron, with iron bottoms or wood bottoms. A special arrangement for handling rubber stock is one feature of this arrangement of the machine, and "for hard rubber factories it has no equal; also soft rubber goods factories regard the merits of their goods as superior to any others, when same are free from holes and bad spots. This machine insures the product and will save money by saving stock and labor." They desire the correspondence of parties interested, and hope to make quotations. Send for particulars.

New Oilers for 1898.

Cushman & Denison, No. 172 Ninth Avenue, New York, who make oilers for almost the entire trade, have just introduced a couple of novelties for next season. Their "Perfect" Pocket Oiler, which is used with leading high grade bicycles, has been even further improved for 1898 by a change in the valve which includes an extra metal washer

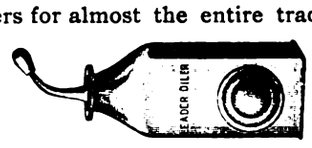


FIG. 1.—"LEADER" OILER.

Digitized by Google

and a spring of increased strength. These changes will make the "Perfect" tight even in the hands of careless users, and also render it practically indestructible. The "Star" Oiler has also been improved by a system of testing the soldering under hydraulic pressure in each oiler, making the body of extra elastic metal, using a specially cut

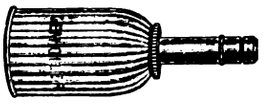

FIG. 2.—"GEM" OILER.

thread for the screw which prevents the spout from jarring loose in the tool bag, etc., etc. The new oilers include the "Leader" Oiler which is practically the "Star" with a curved spout. This curve in some makes of wheels renders the oiling of certain parts an easier matter. The spout is closed by screwing against a leather washer in a metal bulb. The oiler is about the same price as the "Star." The "Gem" Oiler is a cheaper oiler that will meet the approval of that part of the community always looking for something cheaper. Although low in price the "Gem" Oiler will be very well made. The body is cylindrical or barrel-shaped. The corrugated side adds strength to the oiler when knocking around with other tools, and also aids the flow of oil to the spout.

The Philadelphia Lawn Mowers.

In the issue last preceding, we made extended mention of the handsome new catalogue issued by the Philadelphia

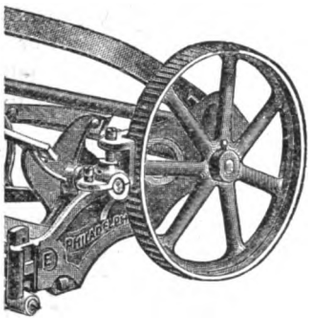

FIG. 1.—HIGH WHEEL.

Lawn Mower Co., Nos. 3107-3109 Chestnut Street, Philadelphia. An examination of this catalogue shows that this old-established concern is indeed in excellent shape to take care of the business for 1898. They also announce many improvements to their present line of Mowers, making them more simple and durable, as well as the addition of some new styles to their already large and complete line. Among their many new styles is the style E Mower, with ten-inch driving wheel. They have introduced in this

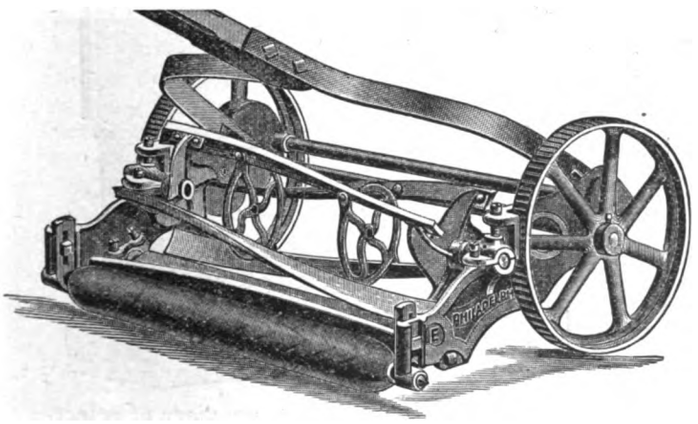

FIG. 2.—STYLE E 10-INCH DRIVING WHEEL.

mower some novel as well as practical features, not to be found in any lawn mower on the market to-day. By referring to the illustration, it will be seen that this mower can be stripped of the driving wheels, cylinder and gearing in two minutes, and these parts can be replaced in position and the mower placed in the grass ready for work, without any adjustment whatever being necessary, thus making the mower very simple and easy of repair. This mower is

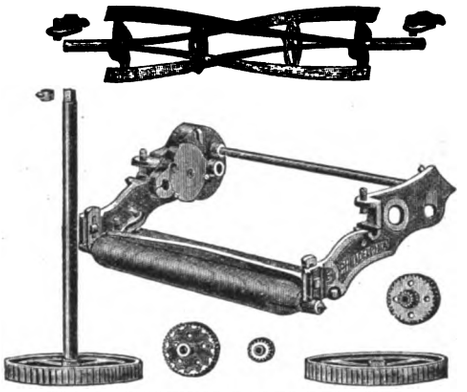

FIG. 3.—SHOWING PARTS REMOVED.

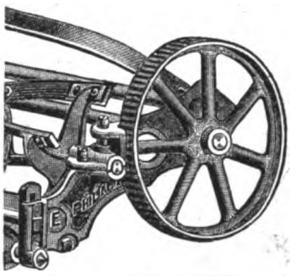
made in four sizes: 15, 17, 19 and 21 inch. They also make this mower, as shown in illustration, with an eight-inch driving wheel, in four sizes, 14, 16, 18 and 20-inch. They also manufacture a large and complete line of hand mow-



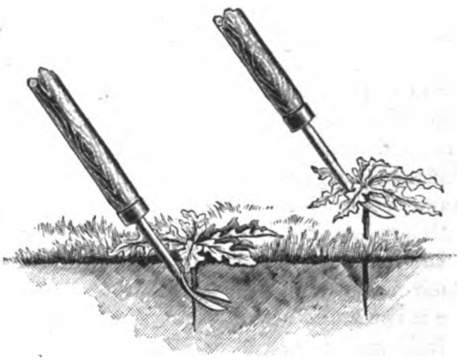


FIG. 4.—LOW WHEEL.

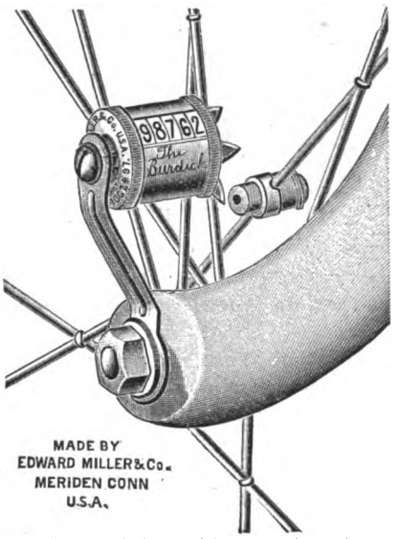
ers, horse mowers, sweepers, grass collectors, sprinklers, etc. They also manufacture the Drexel and Gold Coin mowers, which are of the best of the second grade mowers.

Pastime Weed Extractor.

The annexed illustration shows a very ingenious device for extracting weeds from lawns. The illustration shows the Extractor in two positions, first that of cutting the weed about two or three inches from the surface, and the second that of lifting the weed from the earth. It is described as "one of the most practical devices which has ever been put on the market, and while it has only recently been put on the market, it is meeting with considerable success and is destined to fill a long-felt want for an article for this work." It is manufactured by the Pastime Lawn Mower Co., De-

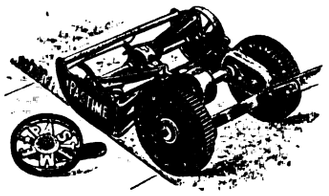


troit, Mich., manufacturers of the Pastime Lawn Mower, a mower put on the market within the last year. Full explanation and circulars will be sent to any one making application to the above firm.

The Burdick Cyclometer.

We show in this connection the Burdick Cyclometer, manufactured by Edward Miller & Co., Meriden, Conn., and Nos. 28-30 West Broadway, New York, which has been placed upon the market with a large degree of success. The aim in the creation of this cyclometer was "to combine accuracy with simplicity in the smallest space

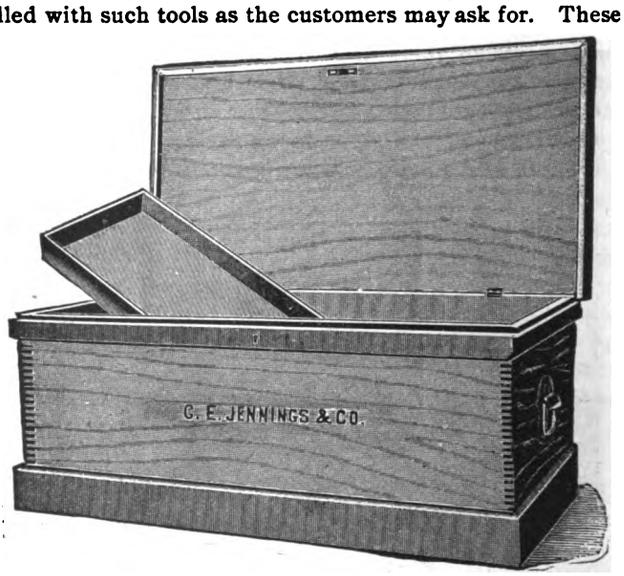
Digitized by Google



possible, on an entirely new principle." This, the manufacturers say, has been done, using less than one-quarter the number of parts in use in other cyclometers. They further state that all parts of the barrel, excepting the lettered cylinders and the external case, are turned out of solid rod metal, by the accurate work of the terret lathe. They further say: "The numbers are enameled on silver-plated cylinders, and thus stand out bold and conspicuous to the rider in the saddle. These numbers are all kept in perfect alignment, and do not change gradually, as in other cyclometers, but instantly. It registers tenths of miles, by the red-lettered right-hand cylinder. It registers ten thousand miles, and repeats. The figures are protected by a glass window, carefully ground and cemented into the case, and are further held in position by the knurled edges of the barrel. It will register forward only. Reversing the action of the wheel has no effect on the numbers. Hence a perfect record of distance traveled is always kept. Our Star Wheel on cyclometer will not over or under register. With six teeth in connection with our patented striker, it has been demonstrated that it will infallibly register, whereas in cyclometers of eight teeth in the sprocket wheel, there is danger of constant false registering. The only hole in the cyclometer is for the sprocket-

wheel shaft, and careful packing under the neck of this wheel prevents any entrance of dust and moisture. The bracket is a novel and ingenious device, allowing at all times a clean cut view of the barrel, and providing for all variations of width between the spokes and end of the axle. At its upper end it is provided with a split cylinder, tapered inside. When the cylinder enters the barrel, it can be adjusted to fractions of an inch by means of a special screw which spreads the split cylinder. The barrel can thus be held firmly at any desired position. The striker is made just large enough to be attached with ease by an ordinary screwdriver. It is quickly adjusted, and is provided with a roller of vulcanized fibre, which noiselessly engages the sprocket as the wheel of the bicycle revolves. Each instrument is carefully put together and tested before it is packed up and sent out of the factory, and each is fully guaranteed to do all that is claimed of it. The Burdick Cyclometer is made to record 720 revolutions, based upon the number of revolutions which a 28-inch wheel will make in a mile."

Improved Pastime Lawn Mower and Trimmer, 1898 Model.

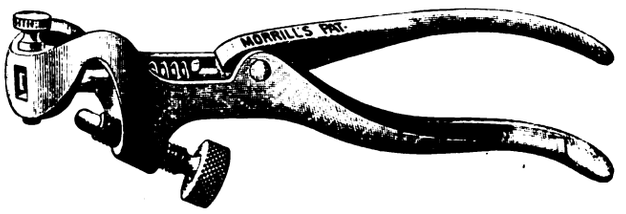


During the past season the "Pastime" Mower and Trimmer was introduced to the public for the first time, and on account principally of its trimming qualities, there was a large number sold. Like all new articles, there is always room for improvement, and on account of a few complaints that the mower did not cut absolutely even, it was decided to remove the wooden roller at the rear of the knives which caused the unevenness in the cut. In the present construction the two small six-inch guide wheels occupy the same relative position to the knives as the large wheels in the old style mower consequently making just as uniform and even a cut. While with this construction one of these wheels passes over the unmown grass, the weight is so slight, carrying as it does only the forward part of the mower, that it has no effect whatever on the grass in mat-

ting it down as with the old style. As will be seen from the illustration, the large wheels which carry most of the weight of the machine and the pressure of the operator go only over the mown grass. The side wheel and plate is absolutely as rigid as any part of the machine when in position, and can be put on or removed in less than five seconds. One or both of these side wheels may be removed. With this construction and handle adjustment that allows the handle to operate between its highest point, and on a straight line with the machine, this mower can be operated on steep inclines, terraces, etc. One of the principal features claimed for this Mower and Trimmer is that it can be kept sharpened by a novice by the use of a file, without the possibility of damaging the machine. It is made throughout of the very best material and fully warranted by the manufacturers, the Pastime Lawn Mower Co., Detroit, Mich., who will be glad to furnish any of their patrons with full particulars of the machine, which is contained in a circular which they issue to the trade.

Model Tool Chests.

C. E. Jennings & Co., No. 79 Reade and No. 97 Chambers Street, New York, manufacturers of mechanics' tools and Hardware specialties, are still making a specialty of Tool Chests, and are presenting a line of goods which have for some time past occupied a first-class position in the trade. These chests are designed particularly for the Hardware trade, and not for the notion or toy trade. They are getting them up complete with tools, or empty, as the trade may require, and when furnished empty, they can be filled with such tools as the customers may ask for. These



Gentlemen's Empty Model Tool Chests are made of selected chestnut, hardwood moldings, with sliding tray, fitted with a lock and key, and nicely finished. The various sizes run from 15x6½x5 inches, with movable tray, up to 32x18x16 inches deep, with two sliding trays, having saw-racks to take in the full length of the saws. A sample tray is shown in this connection. Full details, with prices, etc., will be sent on application.

Morrill's Saw Sets.

Mr. Morrill addresses the trade as follows: In substituting the new Set in place of the old one, re-arranging but still retaining the essential parts in the same relation, with new and correct devices for positive adjustment to suit all sizes and capacities of hand saws, I hope to meet the approval of all mechanics and the Hardware trade in general. I have had fifty years' experience in dressing saws for all kinds of work. I am still anxious to learn more. Every man to his

business. The saw maker knows best how to make a good saw; there his mission ends. It is an insult to the intelligent mechanic for any one to presume to prescribe what kind of file he shall use, the kind of clamp, or what saw set is best. In spite of all efforts to influence him, he will use that which appeals to his intelligence and more especially to the article that has served him best in times past. It is generally conceded that the great advantage of setting saws with Morrill's Set over the old method, viz.: with a hammer or a hammer set, or a punch and steel block, is if the saw is soft it will not fibrate; if hard, it will not granulate; either is fatal to the keen cut of the saw, for after undergoing the hammering process, the grain of the steel is so distorted that it will not hold an edge. The process of pressing is decidedly favorable. A good tool maker never hammers a piece of steel after it is cold, as it is a well-known fact that by so doing, the cutting quality of the metal is materially damaged, whether it be a saw, chisel or any tool for iron or wood work. I will here suggest that it is not necessary to break or injure the most delicate saw made, if the operator will only study the principle, and be guided by his own senses. The saw teeth should be set as near to their points as practicable without the set slipping; in that case drop the setting block a little. Set the saw often, as the teeth wear at their points on the outside, forming a wedge and the saw necessarily binds. By setting the teeth over again one-hundredth of an inch, your saw will then go on cutting smooth and straight. Two or three times setting between filings will be found advisable. A great many saws are spoiled, bent and broken for the want of proper attention.

The Jewel Boiler Drying Rack.

The Gem Mfg. Co., No. 167 Chambers Street, New York, is placing upon the market a very useful and salable article under the name of the Jewel Boiler Drying Rack, which is intended to be adjusted about a kitchen boiler in

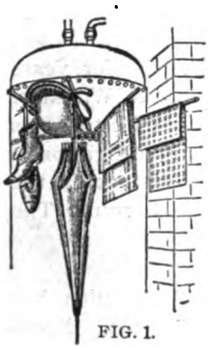

FIG. 1.

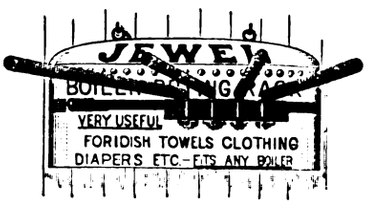

FIG. 3.

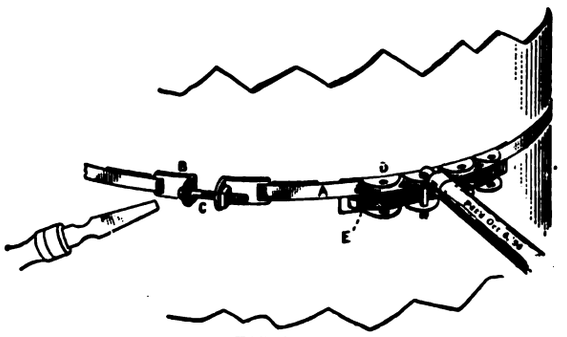
the manner indicated in the accompanying engraving, Fig. 1. It is easily adjusted and can be used on a stove-pipe as readily as on a boiler, and can be placed in such a position as to be entirely out of the way, when not in use as a dryer. In Fig. 2 is shown the supporting band, which, as well as the hangers, is made of steel, heavily tinned; the whole affair weighing but eight ounces; each rack is packed in a neat pasteboard box, ready to be handed out to a customer. It will undoubtedly prove a valuable addition to the kitchen, as almost anything liable to get wet, like clothing, hats, shoes, umbrellas and leggings, can be hung overnight conveniently, and without danger of scorching.



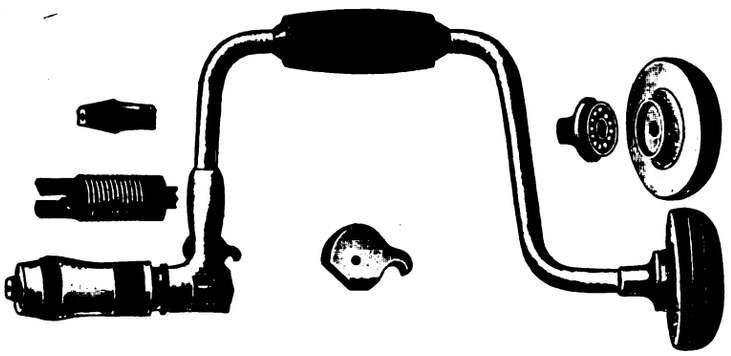


FIG. 2.

Dealers are furnished with all necessary circulars for local distribution, and in orders of one dozen or more a display rack represented in Fig. 3 will be forwarded, designed to represent the top of a kitchen range boiler, which is attractively lettered in colors, and provided with a bracket and four arms. They are intended to be retailed at 35 cents each; sample will be sent by mail to dealers only, on receipt of 25 cents in postage stamps.

Improved Ratchet Brace.

The accompanying illustration shows the improved patent Ratchet Brace now being placed on the market by the Lancaster Machine & Knife Works, Lancaster, N. Y. Among its important points is the simplicity in its mechanism, a lever blade being used for ratcheting, and so constructed as to ratchet either right or left and to work stationary, thus doing away with all pins, rings and pawls. The jaws are not depended upon to hold the bit entirely, as the

interior of the socket is slotted to receive the same, the jaws guiding the bit for an exact centre, doing perfect work with any size of bit. The twelve balls in the head run on two steel cups fully as strong and easy running as those found in the bicycle.

D. R. Harvey, who for the past eight years has held the position of manager of the bicycle department of the John P. Lovell Arms Co., Boston, Mass., has severed his connection with this firm, and accepted a position as general manager of the new store of the Iver Johnson's Sporting Goods Co., to be opened at No. 408 Washington Street, Boston, after January 1, 1898. Their line will be the Iver Johnson and Fitchburg cycles, together with a full stock of firearms, sporting goods, etc.

The Bigelow & Dowse Co., No. 229 Franklin Street, Boston, Mass., announce that they have taken the New England agency for the wheels of the Davis Sewing Machine Co., Dayton, Ohio, and are also agents for A. Featherstone & Co., Chicago, Ill., and the Juvenile line manufactured by the Fay Mfg. Co., of Elyria, Ohio.

Topical Western Matters.

Editor Hardware: Travelers covering Ohio, Indiana, Kentucky and Michigan are meeting with very gratifying success, and sober expectations have been realized thus far. The fall season opening late, buying was not done on as large a scale as had been anticipated by optimistic forecasters, yet the results would justify us to predict movements in the early spring which will compensate manufacturers and distributers for the check which had to be met this fall. If dealers did not stock up to their capacity, or commensurate with the conditions now prevalent, it was on account of the proximity of the year 1898, upon which our better hopes are based. The full extent of commercial prosperity can not reach us till then; industrial prosperity is already at hand, and the former is based on the latter. Our manufacturers can make no mistake in shaping their operations in the manner thus outlined. The new year will be a duplicate of 1892, as regards general industrial and commercial activity. Shrewd men have long since figured out this contingency, and are preparing to share in the results. Our shrewd men are the shrewd advertisers, and if you will watch their movements from this time forward, you can't go astray on the outlook for '98. In the words of a big tool manufacturer: "We let others talk and guess and grope about; we act, and that means *advertise*. There's nothing so conducive to restoring confidence and the buyer's spirit than a strong, healthy business announcement. Type has wonderful powers of persuasion."

CYCLE SKATING

may be one of this winter's features. The sport is said to be somewhat crude and clumsy, but these "foreign" defects will quickly disappear, American manufacturers once convinced that there is any sort of a future for the cycle skate. Little interest is manifested in the novelty by dealers, but let American youth fall in love with the sport, and those who will be prepared to meet the demand will certainly not rue the investment.

"CIVILIZED NIMRODISM

is a necessary accomplishment of every American gentleman who loves life and nature," is the somewhat strong passage of a "hunter's season" announcement of a Chicago Hardware dealer. Another passage reads: "The arms I handle are as infallible as can be made; they hit the mark. And if at first you don't succeed with the ammunition you have bought at my competitor's, try again with mine." A glossary reads: "To prove the effectiveness of my arms and ammunition I have secured from hunters using them, specimens of fowl and game. These are on exhibition in my store all the week. I handle artificial refrigeration, and there's no chance of their spoiling. If you are interested in effective and yet artistic shooting, come to my store."

RULES AND RULERS.

"Some men are made to rule, and others to obey. We rule in rules."

Union Nut & Bolt Co.'s.
Darling, Brown & Sharpe's.
Alfred Field & Co.'s.

This is the trenchant ad. of a dealer who specializes rules once a year. On the remaining 364 days he specializes something else, always couched in original presentation. When the year is up, he's astonished at his own success.

THE COLUMBIA CHAINLESS WHEEL

is attracting a great deal of attention. All up-to-date agents have it on "running" exhibition in their windows, and as a window feature it has no rival, for the present at least. The sales already made, and the inquiries, would prove that the novelty will be at least an experimental success. There will be a full quota of chainless wheels on the market by next spring—that's the outlook—but there seems to be at present a deal of secrecy in this matter. This secrecy would not obtrude itself were it known that many manufacturers have experimented in vain with producing a chainless model that will stand the test, and at the same time, be more than a crude success. Still others are guarding their achievements in this line behind closed doors, for reasons best known to themselves but apparent to the wise. There's many a ghost and skeleton in cycle factories now. And shall we be surprised once they are "unchained"? The coming cycle season will be of unusual interest—and perhaps disappointments.

AS TO STOVES.

"This will be your winter of discontent if you haven't got a good stove, and it will be doubly so if you have a good stove, but bad fuel. We have sold a lot of good stoves this season. We sell only good ones; yet some have been tried and found wanting. Of course, we heard of it—verbally and literally—profanely, too. But we didn't blame you until one of our stove doctors could make an investigation. Now, we are convinced our stoves are as good as represented when sold, and herewith proclaim it to the public. The fuel was at fault. Who's to blame now"?

This is the circular and newspaper announcement of an aggressive stove man. There's a moral to this: Stove buyers frequently inquire of the dealer what sort of fuel would be best adapted to the stove they have selected; especially is this the case in coal stoves. Wide-awake dealers are never at a loss to recommend coals that are uniformly reliable (it's none of our concern whether they make a commission out of it or whether they do it from a sense of accommodation or policy). So be prepared to satisfy this caprice; it only pertains to a certain class of buyers—as a rule, the best. "Cheap" buyers won't bother you about fuel, for that's often a very delicate matter with them. So if you must maintain a certain stove policy, be sure fuel is an element of it.

J. B. RINDFLEISCH.

Cleveland, Ohio, Dec. 4, 1897.

The Berger Mfg. Co., Canton, Ohio, are sending their friends a very cute and attractive representation of a "Yellow Kid" as the same is produced in Ohio. The brilliant light in which the kid finds himself, in his travels through the world, is due to the fact that he is carrying one of Berger's Improved Tubular Lanterns, which have won such great success since being placed upon the market. These lanterns are made in different sizes and shapes, information concerning which will be sent by the manufacturers on application. A good suggestion to those interested in lanterns is made by this company, in another circular which they have prepared, bearing and illustrating the word "Investigate." The company notify us that this lantern has given great satisfaction, and that the sales are such to convince them that it is about correct.

Salmon Washburn, fifty-three years old, who for years had been employed as a salesman by Burditt & Williams, Hardware dealers, at Nos. 18-20 Dock Square, Boston, was found dead in bed at his lodgings. Upon investigation it was found that one of the burners in a gas stove in the room was not lighted, while the others were burning. The gas was turned on at full force.

The Baltimore Implement & Vehicle Association has elected the following officers for the ensuing year: President, H. W. Matthews; vice-presidents, J. S. Rawlings, J. Albert Arnold; secretary and treasurer, A. J. Cleveland; board of directors, B. G. Thomas, D. C. Avery, V. S. Brumbaugh, George Fairbanks and the executive officers of the association.

HARDWARE costs only One Dollar a year.

Recent Trade Publications.

Hess, Snyder & Co., Massillon, Ohio, have issued a complete and attractive catalogue of the Boomer Wrought Steel Ranges, made so successfully by them of No. 14 gauge steel, and described as "the heaviest and best ranges on earth." These goods are shown in their various forms, and accompanied by other specialties which this company make, including their patented novelty well and cistern pumps, improved Boomer furnace, patent chimney ventilators, large bale kettles, cellar grates, etc. A detailed description of their ranges is furnished, so that any dealer can see at a glance just what points are advanced in substantiation of the statements above made. In a prefatory note the company say: "After a thorough investigation of all points of merit in steel range construction, we set to work upon a range that we feel confident will overcome existing difficulties. We are prepared with our improved machinery and many years' experience in working up sheet iron and steel to give the trade a steel range of much heavier material at a price considerably less than the same range could otherwise be sold for. We use No. 14 gauge cold rolled patent leveled steel throughout, no doubt the heaviest steel used in the body of any range to-day. (We would kindly ask the dealer in this connection whether No. 14 gauge steel can be successfully worked up by hand into a range.) Machinery used in this class of work is very expensive, the average range maker not having sale enough for their ranges to afford machinery, have continued to use lighter steel than they know it ought to be. Every dealer who has handled steel ranges for a number of years, certainly knows the consequences of light gauge steel, and will not hesitate to push a range that is made of the heaviest steel in preference to something inferior. We are honest with you in the above statements and kindly ask you to be with us from the beginning. In our opinion we can lead you on to a more satisfactory steel range business. The cast iron parts are elegantly carved and considerably heavier than we have ever used on a cast iron range. Notice well the weight of the Boomer Steel Range given under each cut."

The Monarch Refrigerator Works, Greene & Smith, proprietors, Burlington, Vt, have sent us a large and attractive catalogue for 1898, illustrating and describing their extensive line of Monarch Refrigerators. The illustrations have the benefit of being well printed on heavy paper, and anyone examining the same is about as well posted in regard to the character and construction of the goods as if he had the actual article before him. They show a complete assortment in all popular styles and sizes, and state that the line is a desirable one for the dealer to handle, as their list prices are low and their discounts liberal. In further explanation they say: "The new line of plain hardwood refrigerators and ice boxes, which we added last season, met the demand for a good, low priced article, and our trade increased largely as a result. These goods are well built from good stock, have neatly shaded frames and mouldings, and, being well proportioned, are more attractive than many of the so-called ornamental goods of other makes, at much higher prices, with which we invite comparison. If you desire a reliable 'leader,' our Nos. 75 to 89 will fully meet the case. These with our carved hardwood and softwood styles combine to make one of the most complete lines of refrigerators in the market. With the advantage of a long practical experience in the refrigerator business; a fine equipment of the latest and most improved machinery; a force of skilled mechanics, and an unlimited supply of first-class hard and softwood lumber and other material at our command, we are enabled to furnish our patrons with an attractive and reliable article at a moderate price. We also build special refrigerators for every purpose, and will gladly furnish estimates on receipt of dimensions, location and other necessary details as to style desired." This catalogue will be sent to any who are interested on application to the address above given.

In addition to the handsome little catalogue to which reference has already been made, the Philadelphia Lawn Mower Co., Philadelphia, Pa., have also issued an illustrated catalogue and price list for the year 1898, bound in boards, and giving a still more detailed and comprehensive account of the extensive and successful lines of goods manufactured by them. In a preliminary announcement they say: "We invite your attention to our twenty-ninth annual catalogue, and trust by careful inspection you will find some styles that are adapted to your trade; as we are the largest makers of lawn mowers in the world, our output consisting of thirteen distinct styles of hand, and four of horse and pony mowers. All our goods are constructed upon the best mechanical principles, being simple and superior in construction; are durable, having more useful and valuable features; are less liable to get out of order, and are guaranteed to do the finest work and give entire satisfaction. We solicit correspondence from new customers, and shall be pleased to furnish any information desired."

We have received from the Bissell Carpet Sweeper Co., Grand Rapids, Mich., and New York, a very attractive publication entitled "Advertising Helps," showing a large number of very attractive and taking advertisements which have been prepared for the benefit of those handling these sweepers. The same will be sent to any dealer upon application.

Albert Willey, No. 179 Lake Street, Chicago, is sending the trade an illustrated description of his improved enameling oven.

Digitized by Google

Review of the Markets.

With the ordinary requirements of the markets in the usual sluggish condition anticipated at this time of the year, but little business is being done through the regular channels. Such goods as meet with a quicker demand during the holidays are being ordered with a fair amount of confidence in their meeting with a ready sale after being exhibited. The thousand and one things which at this season make a representative Hardware stock attractive, have this year been abundantly taken advantage of, and the dealers' sales have been largely increased thereby.

Wire Nails. The orders for wire nails have been coming in from the trade in a very satisfactory way, so much so, the product for the month is being booked quite rapidly on a basis of $1.40 for car load lots at mill, with prospect of higher quotations in the immediate future. Purchasing is stimulated by unusual conditions, having reference to the combination of interests referred to in other columns and the usual January shut down. New York quotations are $1.55 for carload lots on dock, and $1.65 for smaller lots from store.

Cut Nails: Prices on this line of staple goods remain without much sympathy with the movement in wire nails. Prices are unchanged at the quotations recently given: $1.15 base for carload lots at mill; carload lots on dock, $1.30. Smaller lots from store, 10 cents per keg advance.

Carriage bolts, Nuts and Washers, etc.: Prices in this line of goods have been held very steadily for some time, the demand being regular, and less irregularity in price has been noticeable than was the case a few months earlier, the prices on the whole being fairly maintained.

Shovels and Spades: As in all other combinations to control prices, a strong disposition prevails among the manufacturers of these goods to make another advance before long. They feel confident in the strong condition of the market, there would be little difficulty in holding to the higher prices when established. The combination have so far worked very well in harmony with each other's interests; but the belief in an advance being desirable at this time is not generally encouraged.

Augers and Bits: The cheaper grades of goods in this important line have been held for a long time at very low and unsatisfactory quotations. This necessarily creates a great diversity in prices, as the demand for the better grades being only nominal by comparison, are constantly forced into the background by the purchases of greatly inferior goods. It is doubtful if much improvement will be felt under present conditions.

Enameled Ware: A strong movement is already referred to as being on the eve of making a consolidation of interests, by which the leading factories in this great line, the Eastern and Western manufacturers, can so divide the business of the country between them as will prevent irregular methods and prices in marketing the immense product constantly turned out. A consolidation of such vast interests, it is claimed, will result in greatly reducing the current expenses of marketing their product, and the economic saving so effected will be such a profitable advantage, that but few changes may be necessary in the low quotations now prevailing on these lines of goods. While this organization is not as yet an accomplished fact, it is claimed to be so far advanced that only minor considerations have as yet to be arranged for, before its final consummation.

Linseed Oil: The Dean Linseed Oil Co., No. 181 Front Street, New York, quote prices as follows: In lots of less than 5 barrels, 39 cents per gallon; in lots of 5 barrels or more, 38 cents per gallon. The 5-barrel price only applies to deliveries of that quantity at one time. Boiled linseed oil, 2 cents per gallon higher than raw. Calcutta oil, 54 cents per gallon.

THE DAVENPORT TRADE.

There is some disturbing element most of the time that detracts the minds of Hardwaremen from business. Elections, Congress, State and national conventions; and now we have the report that there is to be a three hundred million dollar syndicate formed that will monopolize the entire output of steel rods, wire, and all goods manufactured from wire. The result is business depressed, prices weak on goods made of wire, especially wire nails, screws, etc. From pools, combinations and trusts, good gracious deliver us! SICKELS, PRESTON & NUTTING CO.

THE PHILADELPHIA TRADE.

Just now the proposed wire rod combination overshadows all other interests, and while, at first thought, only wire and wire nails are, apparently, included, it needs but a moment's reflection to show how greatly the uses of wire have increased in the last few years.

Probably there are few articles which have been put to so many varied uses and substitutions as the single article wire, and when it is considered that a combination of this kind will probably affect everything in which wire has a part, it can readily be seen how far-reaching and manifold will be the effects.

Apparently matters are progressing favorably, and, unless some unforeseen obstacle intervenes, the combination will probably be an accomplished fact at an early date. The principals disclaim any intentions of radical advance in prices, and yet higher and firmer prices must inevitably result. It is claimed that practically all the wire rod mills in the country are in the combination, and the fact that it is not a combination, but a complete sell-out to a single corporation, will show the strength of the new company. Whether such an immense corporation is to be desired is altogether an outside matter, and we Hardwaremen must simply deal with conditions as they exist, but it is probable, as already stated, that prices will be greatly strengthened by such a move.

In other lines business is very even, and without any remarkable features. While skates, sleds, snow shovels and other winter goods have sold with some freedom, the mild weather so far prevents the customary rush which is pretty sure to come if we have a cold snap before Christmas.

BIDDLE HARDWARE CO.

THE BALTIMORE TRADE.

Any large amount of business at the present time is unlooked for, the sales being confined entirely to such seasonable lines as skates, carvers, plated ware and strictly holiday goods. If comparison with previous years serves as a reliable index, then it may be safely stated that the fall trade of 1897 has been very satisfactory. Sales during September and October show a comfortable increase, and had we been favored with a little cold weather it is more than probable that the month of November would have shown a proportionate gain. In one material respect the closing days of the year show a marked improvement

over the first six months ; we mean in the restoration of confidence. It is this return of confidence which makes possible any revival of business. It is not alone good prices for wheat or cotton or any other product, but the willingness of those who benefit by it becoming purchasers as well as sellers, sharing with others their prosperity. Provided no mal-legislation is inflicted upon us, this factor will furnish a tone to the spring trade exceeding the most sanguine hopes. The principal beneficiary of the higher prices for farm products has been the farmer himself. A large proportion of the Hardware sold in the spring is agricultural tools and farming implements. What more natural than to suppose the farmer will replenish his stock in the days of prosperity?

The far South has had two serious set-backs, the low price of cotton and the presence of yellow fever in their midst. But it is a land of perpetual youth. Out of the ashes of fallen hopes, they will arise, like Athens of old, to a new and more vigorous life.

President McKinley's message to the Fifty-fifth Congress is a masterly document in its way, conservative and patriotic. Upon the first reading, one is in doubt which to praise the most, the policy of what is said or the wisdom of what is left unsaid. His attitude on the Cuban question is quite in a contrast to the warmth with which he urges the ratification of the Hawaiian treaty. The Dingley bill and the deficit in the revenues are passed lightly by as subjects of small importance—left to the tender mercies of time to determine. If the present Congress secures the passage of a genuine currency reform measure, it will earn the lasting gratitude of the business community.

Collections continue fair.

THE TABB & JENKINS HARDWARE CO.

THE CHICAGO TRADE.

The most surprising and unexpected occurrence of late in the Hardware circle in this city of "startling occurrences" is the closing out of business of the late firm of John Alling & Co., a business house that has always enjoyed a first-class standing and an excellent reputation for business honor and integrity, which dates back for a space of thirty-five years or more.

This firm has had the reputation of keeping good goods, giving fair prices, and extending honorable treatment to their customers. We sincerely regret to see them fall out of the list of Chicago Hardware dealers.

Their action in selling out their stock has resulted in a number of applications to our house from their former salesmen, and we have made room and secured the services of five among their principal travelling salesmen, who earnestly hope, by the same treatment extended in the past to the trade, aided by our own efforts in the same direction, to carry their large list of customers in our direction. In point of fact, we are already receiving the best of results in the way of new accounts on our ledger, and it goes without saying that we shall treat them well.

Our house trade has increased wonderfully the past two weeks, so that every available space in our store is now filled with orders. Business is more than ordinarily good for this season of the year. Many future orders are also coming to us for such articles as Wabash screen doors, wire cloth, poultry netting, and other spring articles.

Trade for plain wire and wire nails is stimulated by reports of expected consolidations of rod and wire mills, and manufacturers are already asking ten cents per keg advance for wire nails. Whether this can be secured by them remains to be seen.

The future prospect for business seems most excellent in this vicinity, and we look for a largely increased trade in 1898.

WELLS & NELLEGAR CO.

THE PITTSBURG TRADE.

Probably the most important matter discussed at the recent Hardware Jobbers' convention was the expense of doing business ; and those present who had not kept a careful watch of their expense account must have been surprised at the high average percentage of the membership when call was made for the figures.

The truth is that while taxes, rents, salaries and travelling expenses are as high as ever, the value of goods has fallen so much that it takes two or three times as many goods sold to produce the old amount of profit. The selling, handling, billing and collecting accounts for this increased amount of goods (no larger in dollars than of old), adds greatly to the expense. Then increased competition leads to additional expenses, more men are used on the road, more advertising by catalogues, etc., more postage, etc., etc.

Indeed, an up-to-date jobbing house of to-day must be equipped with the very best facilities for the rapid and accurate transaction of business, to live at all.

The effort among wire and wire nail men to effect a consolidation is being used to stimulate the market just now. Prices seem to be low enough, and should the consolidation be effected, they will no doubt be advanced. Yet we hope there will be no repetition of the short-sighted policy of the last wire nail pool, advancing beyond reasonable limits, and leading to general and widespread dissatisfaction.

A moderate price based on cost of production, with a fair profit to the maker, will enable them to hold the market, and avoid building up new competition.

A fair amount of general business is moving, which would be helped materially by severe weather. This may come any day, and will be welcomed by merchants generally.

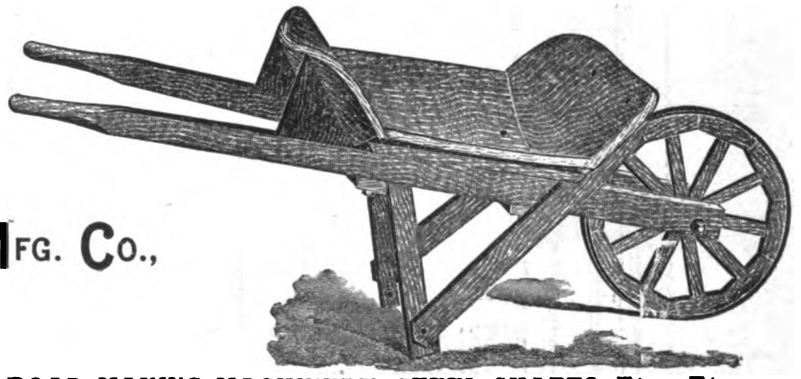
LOGAN-GREGG HARDWARE CO.

THE GRAPHITE TRADE.

It is too early in the month to get at the total of sales, as reports from branch salesrooms have not all arrived, but indications are that November will take its place as a banner month.

Every mail brings in among the orders a fair sprinkling of requests to hurry unfilled orders, or to give dates when shipments may be looked for, and datings and promises make up no small share of our correspondence.

This state of affairs pertains to every line of goods we manufacture, crucibles and pencils being the leaders.



Numerous crucible orders from new sources indicate an activity among the smaller brass workers who are generally among the first to quiet down under a depressed condition of business.

Our new graphite preparation for brazing purposes is meeting with quick success, orders from bicycle manufacturers proving its special value.

This has led us to manufacture a special crucible designed for melting brazing metal and scientifically shaped to fit the tubing for brazing. Orders for these crucibles are already in advance of their output. Large paint users are steadily appreciating the peculiar value of "Dixon's

"SCIOTO" for R. R. or Canal Work.

A thoroughly first class bolted barrow. Full sized Tray. Well planed, cleated, braced and bolted. Legs and cross pieces gained. Knocks down for shipping and is easily set up.

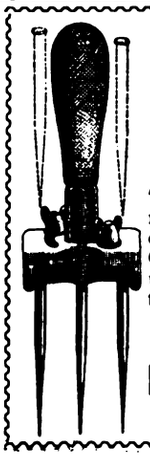
JOSEPH DIXON CRUCIBLE CO.

Death of Samuel Frisbie.



Samuel Frisbie, treasurer of the Upson Nut Co., and also secretary of the Union Nut & Bolt Co., died suddenly at his home in Unionville, Conn., on the 6th inst. He was a prominent figure in the last session of the Connecticut Legislature, and was looked upon as really the leader. His career there giving so much satisfaction, his name was prominently mentioned as a future candidate for governor. In local matters he was also prominent at the time of his death, being president of the Unionville Water Co. and interested in the electric road between Unionville and Hartford. His death will be keenly felt by all those with whom he came in contact.

The Foxboro Foundry & Machine Co., Foxboro, Mass., whose building was recently destroyed by fire, are to rebuild their plant in a substantial and fireproof manner. The main foundry building, which is about 80 feet wide and 140 feet long, is being replaced by a steel frame structure. A traveling crane runway, for handling materials in the building, is being arranged for, and provisions are also being made for suitable jib cranes. The steel framework is being furnished and erected by the Berlin Iron Bridge Co., East Berlin, Conn.

W. C. Heller & Co., Montclair, N. J., are issuing attractive leaflets in illustration of their shelf boxes, and also of their line of tool brackets. These goods are pretty well known to the trade, and have commanded a large degree of success since they were introduced. Both of them will be sent upon application.

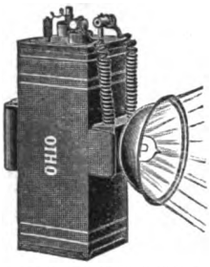
Spurt Advertising.



Spurt advertising, like a short-winded race horse, never wins the race. Just as well move your store every three months as to do spurt advertising. People may not need what you sell just now, but they will sooner or later, and if when they do want it they don't find your ad. where they first saw it, they will naturally conclude you have quit business. What a salesman is to your business, just such is your advertisement. Each sells your goods, and you cannot prosper without both.—*Age of Steel.*

Commercial Agent Moore, at Weimar, informs the State Department that there is considerable agitation in Germany in favor of a higher duty on American bicycles. He says that the duty is confidently looked for, in accordance with the usual German procedure when an American manufacture or product comes in competition with German products.

The Tabb & Jenkins Hardware Co.

Recently a small stockholder of the Tabb & Jenkins Hardware Co., of Baltimore, made application for a receiver for the company. This action came as a surprise, of course, to the trade everywhere, but no one was surprised when the bill of complaint was promptly dismissed in the Circuit Court of Baltimore City. The Tabb & Jenkins Co. have prepared a statement, which shows very conclusively its condition in a financial way, and in view of this statement, the finding of the court seems to have been the only thing possible. In their statement the company say:

Baltimore, December 1st, 1897.

To whom it may concern: Concerning the application made for a receiver for this company, we are pleased to submit the following information, which we trust you will take the time to read carefully. We call your particular attention to the condition of the company as per sworn statement made to the Circuit Court of Baltimore City up to November 26th, 1897. Trusting to merit your confidence in the future as in the past, we remain,

Very respectfully,
THE TABB & JENKINS HARDWARE CO.
C. Taylor Jenkins, Secretary and Treasurer.

COPY OF SWORN STATEMENT.

ASSETS..

Stock and Fixtures...	$73,412.79	
Good debts due the company	52,435.41	
Cash on hand and in bank	7,979.95	
		$133,828.15
Total liabilities		42,590.82
Excess of assets over liabilities		$ 91,237.33

Signed, MARTIN LANE, President.
C. TAYLOR JENKINS, Sec'y and Treas.

The order of the court in full is as follows:

This case having been set for hearing and having been heard by the Court and the Tabb & Jenkins Hardware Co., the defendant corporation, having by its answer denied the allegations of the bill of complaint alleging it to be insolvent and having shown that it now has an excess of assets over liabilities of $91,237.33, and the Court having read and considered the said bill and answer and all the proceedings and being of opinion that the plaintiff is not entitled to the relief prayed for.

It is thereupon this first day of December, 1897, by the Court adjudged, ordered and decreed that the Bill of Complaint be and the same is hereby dismissed with costs.

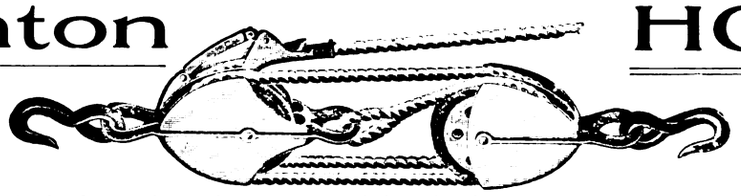
Signed, J. UPSHUR DENNIS.

New Wire Combination.

At last the plan of organization which for several months has been in a condition of preparation, is so far advanced that the consummation of its objects only awaits the report of the appraisers on the value of the various plants which are to be taken into the corporation.

It is stated that an option, expiring February 15, has been obtained from each individual plant. If nothing intervenes to prevent its final completion, the result will be the most gigantic industrial corporation in the United States; embracing every wire mill in the country, two or three iron mines, as many steel mills, including blast furnaces and converters, and the entire output of another big plant.

The new company will possess a capital stock of $50,000,000, but if necessary to effect the desired object, even this large amount will be increased. It is the intention to pay for the purchased plants by giving two-thirds in cash and the remaining one-third in stock of the new company.



The best information obtainable credits J. Pierpont Morgan with backing the scheme up with all the cash necessary, while the plan of organization is supposed to have been created by John W. Gates, of the Illinois Steel Co., the Oliver Bros., of Pittsburg, endorsing every move so far.

The establishments which are to be taken in are: The Baackes Works and the Rankin, at Pittsburg (the Consolidated Steel & Wire Co.'s plants); the Beaver Falls mills; the mills at Joliet, Ill. and St. Louis; the H. P. Nail Co.'s works at the American Wire Works, and the Cleveland Rolling Mill Co.'s plant, at Cleveland; the big plant of the Washburn-Moen Co., at Worcester, Mass. (to be bought outright); the Pittsburg Wire Co.'s plant, the Oliver Wire Co.'s plant and the Oliver-Snyder Steel plant, at Pittsburg; the two mills of the Salem Wire Co., at Findlay and at Salem, Ohio; the entire output, but not the plant, of the Joliet Works of the Illinois Steel Co., to be purchased. It is thought that either Harry W. or George Oliver, of Pittsburg, may be called upon to preside over the destinies of this great concern.

The Canton HOIST

Can be used perpendicularly, horizontally, and at any angle in factories of all kinds, foundries, quarries, mills and warehouses; also by contractors, carpenters, stone masons and all classes of mechanics.

MANUFACTURED BY THE NEY MFG. CO, CANTON, OHIO.

When completed in all its details, as at present projected, the corporation will manufacture wire in all its forms, from telegraph wire to wire cloth, furnishing its own raw material, and controlling the entire product from the mines to the market. The combination will be equipped to meet every description of competition at home or abroad, for after having absorbed all of the home variety they will have none to give a moment's thought.

It would appear that no disadvantage is at present contemplated toward the consumers. Certainly none that will arouse the old discussion regarding trusts, which was so fertile a subject for adverse criticism a year ago. With the control of the wire rod products, and the regulation of the home markets in consequence, a great opportunity will be given the company to reach out after foreign markets for a product large enough to control the world's supply of wire, and find every market on the globe open to conviction.

The consolidation of so many companies into one vast corporation will have the effect of disbanding the staffs of officers at the home offices, with the attendent representatives in various cities, the traveling salesmen, etc., who will all be dispensed with, in order to further the economic objects of the combination in the cost of production. On a product as large as is contemplated, radical changes like these will undoubtedly so cheapen production as to largely increase present profits independent of further economy in production.

The Simmons Hardware Co., St. Louis, Mo., has purchased the entire stock of the E. C. Meacham Arms Co., No. 306 North Fourth Street, one of the largest exclusive dealers in sporting goods in the West. This deal has been under consideration for about a month, and the purchasers will immediately institute a clearing sale. The Meacham Co. is composed of E. N. Beach, president; E. Weber, secretary, and Mrs. E. C. Meacham, widow of the founder of the business, was capitalized at $300,000, and the original value of the stock carried was $50,000 less. The firm did both a wholesale and retail business.

RETAIL TRADE RECORD.

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Hardware Stores.

Colusa, Cal.—J. L. Swank has opened new Hardware store, carrying a full line of Hardware, sporting goods, etc.

Edwardsburg, Mich.—C. W. Dennis will open a Hardware store in the old furnace factory, which will be remodelled for that purpose.

Goshen, Ind.—Joseph B. Sheffer, formerly a clerk in the Hardware store of F. V. B. Minnich and later with A. M. Allen, and Henry Lehman, Jr., have formed a partnership to carry on the Hardware business and will occupy the room in the Masonic Block.

Marshall, Ill.—Will Shipe and Jake Kohl will open a new Hardware store in the Archer building. A brand new stock of Hardware of all kinds, tinware, stoves, tools, etc., will be brought on and displayed for sale. Mr. Shipe has been in the Hardware business for many years and both the partners have a wide acquaintance.

Martin, Mich.—J. Burr will open a new tinware store.

Massillon, Ohio.—J. J. Ripple has opened a new Hardware store at No. 25 West Main Street. He has secured the services of W. E. Yost, who has had a large experience in the Hardware business as manager.

Nortonville, Kan.—The Laurence Hardware Co. has been incorporated. Capital stock, $5000.

Northfield, Vt.—Farnsworth & Deuell have opened their new Hardware store in the Bacon block.

Richmond, Va.—The Richmond Hardware Co. has been incorporated, with William H. Parrish, president. Capital stock, $20,000.

Savannah, Ga.—One of the new concerns just established in Savannah, is the Neal-Millard Co., whose store and warehouse is at the corner of Bay and Whitaker Streets. This company handle paints, oils, varnishes, steamboat and mill supplies, sash, doors, blinds, lime, cement, plaster and builders' Hardware. B. B. Neal is the president and F. P. Millard vice-president of the new company.

Stanton, Mich.—Z. E. Briggs and Charles Holland will open an agricultural implement store.

Switz City, Ind.—R. O. Law, Hardware, has opened new store.

Changes and Improvements.

Atlantic, Ia. — James Jones expects to soon move his stock of implements, etc., into the building north of Shoudy Bros.' Hardware store, formerly occupied by Johnson & Thompson.

Blair, Wis.—Dalton & Gilfillan, Hardware, succeeded by Charles Johnson.

Brock, Neb. — William Benson, Hardware, succeeded by T. G. Bell & Co.

Bruning, Neb.—Duis & Geiken, Hardware, etc., succeeded by J. Fitzsimmons.

Colfax, Ill.—Bechel & Ellington, Hardware; H. W. Ellington has sold his interest in the business to A. Bierblower, who has taken possession.

Corbin, Ky.—Martin & Herren, Hardware, etc., succeeded by H. D. Herren.

Cornwall, N. Y.—G. W. Crawford, Hardware, etc., succeeded by Chas. H. Elliott.

Cuyahoga Falls, Ohio. — The L. W. Loomis Hardware Co. are erecting a large new warehouse.

Davey, Neb. — Philip Opp, Hardware and agricultural implements, succeeded by Nelson & Christenson.

Earlville, Ill.—E. S. Morsch, Hardware; stock has been purchased by D. Tripp, who will continue the same.

Ellsworth, Me.—S. W. Davis is offering for sale the stock, fixtures, etc., of the Hardware store of the late James F. Davis.

Galena Ill.—Stillman & Stahl, Hardware, succeeded by Millhouse Bros.

Holdrege, Neb. — A. P. Erickson, reported to have been succeeded by C. A. Hedlund & Co.

Lexington, Ky. — The Campbell Co, plumbers, succeeded by Charles Edgar.

Mason City, Ill.—Eulow & Cates, Hardware, have sold business to Wilson & Wilson, who have taken possession.

New Haven, Conn. — John E. Bassett, Hardware, store enlarged and improved.

Northwood, Iowa.—W. I. Brebner, Hardware, succeeded by John K. Ofsthus.

Plymouth, Neb.—H. H. Koenig, Hardware and agricultural implements; sold half interest to William F. Bersche.

Prairie, Ind.—F. Spaulding and H. Perkins are erecting new building which, when completed, will be occupied by them as an agricultural implement and Hardware store.

Princeton, Ill.—The J. E. Dabler Implement Co. is erecting a new building.

Rice Lake, Wis.—M. T. Howard, Hardware, succeeded by Osborne & Hoag.

Roann, Ind.—Ocker & Stone, Hardware and agricultural implements, succeeded by S. L. Ocker.

Santa Cruz, Cal.—Heath & Byrne, Hardware, succeeded by Byrne Bros.

Spencer, Col.—P. H. Lund, Hardware, moving to Paonia.

St. Clairville, Ohio.—B. S. McBride Co., Hardware; B. S. McBride has purchased the interest of A. McBride in the business, and will hereafter conduct the same.

Union Bridge, Md.—Repp & Haines, Hardware dealers, have broken ground for the foundation of their large new store building. It will be of brick, two stories high, with cellar under it, and be 22x90 feet.

Wakefield, Mass.—S. F. Littlefield & Co., Hardware, succeeded by new firm under the same style.

Wolcott, Ind.—William A. Pitts, Hardware, has sold interest to W. Kinney. The firm name now is Hinchman & Kinney.

Business Embarrassments.

Bryant, S. D.—Underwood & Berg, one of the largest Hardware firms in this part of the State, have made an assignment to the Farmers & Citizens' Bank. Their liabilities are about $9000, and it is thought that the firm's resources will cover the amount.

Cambridge, Mass.—George W. Barnes, Hardware, has assigned.

Crown Point, Ind.—A. H. Maxwell, dealer in agricultural implements, at Lowell, has made an assignment for the benefit of creditors, naming R. W. Bacon as assignee. The liabilities are reported at $3000, with assets $2500. Failure to make collections and inactivity of the market is the supposed cause. Mr. Maxwell has been in business at Lowell for twenty years.

Eaton, Ohio.—Bonner Bros., Hardware and implement dealers, of this place, have assigned to George H. Kelley. Assets about $10,000; liabilities unknown, but not quite as large as assets. They were successors of W. A. Bonner, the leading Hardware dealer in this place for many years.

Syracuse, N. Y.—Confessions of judgment have been filed in the county clerk's office by John Hamm, Jr., the stove and tinware dealer at No. 212 East Washington Street. Upon these executions were issued and the store closed.

Westerlo, N. Y.—Hiram K. Jones, the owner of a grocery and Hardware store, has made a general assignment to Ansel C. Requa, for the benefit of creditors.

Westminster, Md.—J. Q. Stitely, a dealer in farming implements, machinery, wagons, etc., has made an assignment.

Burglaries in Hardware Stores.

Cabery, Ill. — McKenney & Goodman, cutlery taken.

Cooper, Tex.—J. F. Henlee, pistols and ammunition.

Greensburg, Pa.—Boetz Bros., revolvers taken.

Kankakee, Ill.—Whitham Sisters, $50.

Lincoln, Neb.—Humphrey Bros., $250.

Luray, Va. — T. W. Berry, Hardware, store burglarized and quantity of goods stolen.

Orwigsburg, Pa.—J. H. Long, $125.

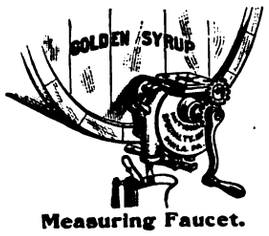
Scranton, Pa. — George Felton & Bro., $300.

Spencer, W. Va.—H. F. Goff, cutlery and revolvers.

Tamora, Neb.—Calder & Calder, $50.

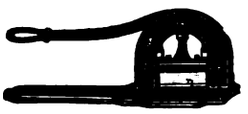
Grand Rapids, Mich.—A. Van Bree, razors, knives, etc.

Wyandotte, Mich.—Macy Bros., $100.



Recent Fires.

Asbury Park, N. J.—J. D. Newlin, Hardware, destroyed by fire, at a loss of $1500; insured.



Denton, Tex.—Joe Hall, Hardware, etc., at Argyle, destroyed by fire.

Fort Branch, Ind.—Walter's Hardware store, destroyed by fire. Also S. Gillespie's farm implement store.

HARDWARE MANUFACTURERS' RECORD.

Hardware manufacturers, the country over are requested to contribute to this page. News of new factories or companies, changes, improvements, etc, will be gladly received, and promptly published.

New Companies, Etc.

Albany, N. Y. — Self-Sharpening Plow Co. of Albany, to manufacture plows and agricultural instruments. Capital stock, $125,000. Directors: M. S. Northrup, Henry Norris, Charles La Dow, John J. Galloghy and George R. Meneely.

Decatur, Ill.—The Haworth & Sons Mfg. Co. has been incorporated by J. D. Haworth, C. D. Pattison and K. H. Roby to manufacture agricultural implements. Capital stock, $50,000.

Detroit, Mich.—Burr's Damascus Tool Works have been incorporated by J. H. Burr, J. W. Naller and H. E. Culverwell. Capital stock. $5000.

Kenton, Ohio.—The Champion Iron Fence Co. has been incorporated with a capital stock of $100,000.

Lynchburg, Va.—The Lynchburg Brass Mfg. Co. has been incorporated with John F. Slaughter, president; William Hurt, vice-president; E. C. Bayles, secretary-treasurer, and E. S. Whiting, general manager, for the purpose of manufacturing brass goods, etc. Capital stock, $15,000, with privilege of increasing to $25,000.

Los Angeles, Cal.—Bluebaugh Burner Co., formed to deal in oil and gasoline burners. Principal place of business, Los Angeles. Directors: Lugora A. Bluebaugh, San Fernando; W. C. Simpson, Redlands; Frank McEntee, Colton; J. S. Purdy, Chas. W. Allen, San Bernardino. Capital stock, $250,000, all subscribed.

Louisville, Ky.—Bridgeford & Co. have filed articles of incorporation. The incorporators are C. R. Adams, A. L. Adams and C. H. Sheild. The business to be conducted is the manufacture of stoves and hollowware. The capital stock is to be $75,000, with the privilege of increasing to $150,000. The above named incorporators are to constitute the first board of directors.

Marietta, Ga.—The Marietta Novelty Co. has been incorporated by W. E. Gilbert, H. W. Nicholas and R. N. Holland, to manufacture novelties. Capital stock, $2100.

Nashville, Tenn.—The Davidson Lock Co. has been incorporated by J. J. Davidson, J. D. Carson, D. B. Read and others.

New York, N. Y.—Bennett Combination Saw Tool Co., of New York city, to manufacture saws and saw tools. Directors: Richard Bennett, Raquette Lake; Edward R. Ladew, Joseph H. Ladew and Isaac L. H. Merikle, New York city.

New York, N. Y.—Edward J. Dewey Co., to manufacture lamps and gas fixtures. Capital stock, $3000. Directors: Edward J. Dewey, Francis W. Dewey and Thomas D. Carroll, of New York city.

Peoria, Ill.—Rhea-Thielens, implement manufacturers, will establish a branch house in Rockford.

Pioneer, Ohio.—H. M. Wood, formerly of Ransom Center, Mich., has started a new industry in the shape of a scythe snath factory in the Guy Smith building, on Elm Street.

Portland, Me.—Plumbers' Metallic Joint Co. has been organized by Maurice S. Ebeson, president; Thomas Davey, treasurer; for the purpose of manufacturing and dealing in pipe couplings, connections and plumbers' supplies. Capital stock, $500,000.

Improved Conditions.

Bridgeport, Conn.—The Bridgeport Machine Tool Co. is a very busy concern just now. Its factory is running thirteen hours a day, and yet it cannot keep up with the orders.

Cincinnati, Ohio.—The large building that has been fitted up by the Davis & Egan Machine Tool Co., across the street from the old plant, is now practically occupied by the concern. A heavy business is being done at present, mostly in foreign orders, and there are employed in the old plant 630 hands, and in the new there will be about 200. President Charles Davis has just established personally a branch at Vienna that is under the charge of F. D. H. Rieme, who came over to Cincinnati to learn the business before taking charge of the work. This makes eight branches of the company in Europe, as follows: London, Paris, Berlin, Copenhagen, Amsterdam, Moscow, Stockholm and Vienna. At all of these there are large stocks carried continually.

Indianapolis, Ind.—The new shop of the Indianapolis Stove Co. is now in operation, and it is one of the finest and best equipped in the country. The company enjoyed a good fall trade and the indications for future business are good. The factory is running full time with a full force of employes.

Springfield, Mass.—J. H. Sanderson, the treasurer of the Warner Mfg. Co., has rented a portion of the factory of B. B. Noyes & Co., and for the present will carry on there that branch of the business devoted to the manufacture of baby carriage Hardware. He has not yet reached a decision as to rebuilding on the site of the burned factory.

Walden, N. Y.—Col. Thomas W. Bradley, president of the New York Knife Co., at Walden, announces that the company will increase the scale of wages to all operators 10 per cent. on January 1.

Changes and Improvements.

Atlanta, Ind.—The Atlanta Steel & Tinplate Co. has decided to double the capacity of its plant.

Hartford, Conn.—The reorganization of the Sigourney Tool Co. has been effected, at a stockholders' meeting, by adding the names of J. H. Cooke, of Brooklyn, and Judge J. H. White, of Hartford, to the board of directors. The newly elected officers are J. H. Cooke, president and treasurer; F. D. Taylor, secretary; F. P. Reynolds, assistant treasurer. The company is very busy, having large orders ahead. It is running full time, employing more men than at any time since its organization.

Peoria, Ill.—The Hearst Corn Planter Mfg. Co., plant purchased by the Peru Plow & Wheel Co., which will remove the plant to La Salle, and manufacture the implements there.

Piqua, Ohio.—The Piqua Mfg. & Handle Co., finding its plant on West High Street inadequate to the growing business, have decided to erect another building. The several sheds directly west of the office of the company have been removed, and here is where the new structure will stand. The building will be three stories high, and will be constructed of wood and covered with corrugated iron. It will be 36x100 feet. According to the contract the building is to be completed and ready for occupancy inside of four weeks.

Quincy, Ill.—The contemplated improvements to be made to the plant of the Collins Plow Co., mention of which was made some time since, have begun. The roof of the old building on the corner of Twelfth and Hampshire Streets is being raised and another story added. The improvement is figured to cost about $1300. This concern is doing a big business. The need of more room indicates that fact.

Rochester, N. Y.—Another big trust, to be known as the American Woodworking Machinery Co., has been formed. It will control fourteen concerns, manufacturing seven-eighths of the wood-working machinery of the country. A member said that the object of the consolidation is to prevent the cutting of prices, which has interfered greatly with the business. Prices will not be increased, but manufacturers will be enabled to purchase machinery at a much lower price. In the combine are Rowley & Hermance, the Williamsport Machine Co., the Lehman Machine Co., Young Bros., Levi Houston, of Montgomery; Goodell & Walters, Philadelphia; Glencoe Machine Co., Brooklyn, N. Y.; Hoyt Bros., Aurora, Ill.; Globe Machine Co., Chicago; Fague & Co., Cincinnati; E. & B. Hayes Machinery Co., Oshkosh, Wis.; Frank H. Clement Co., of this city; C. B. Rogers Co., Norwich, and the Milwaukee Sander Co., of Green Bay, Wis.

Recent Embarrassments.

Union Bridge, Md.—The Indian Garden Mfg. Co., of manufacturers of door knobs, emery wheels and insulators, have made an assignment to E. O. Weant, trustee. The assets and liabilities are each about $3000.

Recent Fires.

Niagara Falls, N. Y.—Fire again visited the Dobble Foundry & Machine Shops on the Portage Road recently. The fire was not extensive, but it burned for two hours before the firemen could extinguish it. The flames, which were started by an overheated stove, burned beneath the floor and were very hard to reach. The damage is fully covered by insurance.

BICYCLE TRADE RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Companies, Agencies, Etc.

Albany, N. Y.—There has been incorporated the Monty Mfg. Co., of New York city, with a capital stock of $100,000, to manufacture bicycle specialties. The directors are William N. Arnory, John Beverley Robinson, Richard C. Voth and Campbell E. Lock, of New York city.

Baltimore, Md.—The Tribune Bicycle Co. has been incorporated, with a capital of $5000, by William M. Lerch, Conway W. Sams, A. A. Foreman, John J. McElroy and Harry J. Hush. The firm will open a place of business on West Fayette Street. It will handle the line of bicycles handled formerly by William H. Cole & Sons.

Chicago, Ill. — O'Connell Griffiths Mfg. Co. has been incorporated by W. Irving Osborne, M. H. Guerrin and J. W. Egan to manufacture bicycles, etc. Capital stock, $7500.

Chicago, Ill.—American Chainless Wheel Co. Capital stock, $100,000. Manufacture bicycles and Hardware specialties.

Colorado Springs, Col.—The Colorado Cycle & Supply Co., new firm, will open a modern bicycle warehouse in the De Graff block.

Cordele, Ga.—Arrangements have been completed for the erection of a bicycle factory and variety works in connection with an iron foundry in Cordele. Work will commence shortly.

Hartford, Conn.—The Cycle Supply Co. has been incorporated by D. J. Post, C. H. Veeder and H. W. Lester. Capital stock, $2000.

Le Sueur Centre, Minn.—C. H. Collins & Co., bicycles, Hardware, sporting goods, etc.; new firm have commenced business.

Live Oak, Fla. — Barkley & Groover, drugs, will add bicycles.

Marion, Ind.—Thad Butler will establish bicycle works, and will manufacture a wheel to be known as the Butler.

Mason City, Iowa.—Joe W. Konvalipka will commence the manufacture of bicycles.

Peoria, Ill.—Patee Bicycle Co. has been incorporated by Fred. Patee, H. A. Simpson and Charles. F. Vail, to manufacture bicycles. Capital stock, $15,000.

Reading, Pa.—John Wanamaker will establish an agency in this city to sell the Wanamaker bicycles.

Sayre, Pa.—The capital stock for the new bicycle manufactory at Sayre will be $200,000. The following gentlemen constitute the committee for the organization of the enterprise, viz.: C. S. Maurice, O. L. Haverly, Athens; R. J. Purcell, Robert Lockhart and A. L. Wickert, of Bethlehem; H. J. Baldwin, F. E. Lyford, of Waverly, and W. T. Goodnow, of Sayre.

Sheboygan, Wis.—John G. Riedel, furniture dealer, has taken the agency for the Imperial bicycle, a high grade wheel; also for the Arabian, Progress and Imperial. Jr.

Sheboygan, Wis —Weigand & Fairweather have opened up bicycle livery and repair shop in the Wagner building, No. 827 North Eighth Street. They will have the 1898 chainless wheel for rent.

St. Paul, Minn.—The C. F. Smith Cycle Co. have opened a jobbing house.

Toledo, Ohio. — Officers of the National Bicycle Sundry Co., a concern recently incorporated, have been elected as follows: President, D. V. R. Manley; secretary-treasurer, E. P. Hubbell; superintendent, J. E. Bancroft; manager, A. Rosenfelt.

Walkerton, Ind.—Work on the Cotton building is being rapidly pushed forward for the new bicycle factory which, it is expected, will shortly be ready to commence operations.

Toledo, Ohio.—H. J. Young, formerly of the Kirk-Young Mfg. Co., will soon launch another bicycle manufacturing enterprise on the market.

Weiser, Idaho.—Opp & Davis, bicycles, Hardware, sporting goods, etc., have opened new store.

Changes and Improvements.

Chicago, Ill.—The Turnbull & Cullerton Lath Co. have certified to a change of name to the Vim Bicycle Co.

Decatur, Ill.—Decatur Gun Co., sporting goods; M. P. Thackeray sold his interest.

Denver, Col.—A. Lillyblade Furniture & Carpet Co., furniture, bicycles, etc., Nos. 1717 to 1723 Lawrence Street, selling out old stock, preparatory to removal to Nos. 1625 to 1631 Arapahoe Street.

East Brookfield, Mass.—Walter Peters, bicycles, will move his business to the Riverside block.

Freehold, N. J.—The A. A. Zimmerman Bicycle Mfg. Co., plant purchased by a stock company, of which A. A. Zimmerman is president; Wm. McDermott, vice-president; J. H. Stokes, secretary and treasurer. Capital stock, $50,000.

Galveston, Tex.—Glover, Toebelman & Co., bicycles, reported to have sold out.

Grand Rapids, Mich.—The Cycloid Cycle Co., stockholders held annual meeting recently, and elected the following directors: Frank A. Simonds, Chauncey H. Fisher, James Cooper, William A. Jarvis, Anthony Vidro, J. C. Simonds and Benjamin Beal. A meeting of the directors was then held, and officers were elected as follows: president, Frank A. Simonds; vice-president, William A. Jarvis; treasurer, J. C. Simonds; secretary and general manager, Benjamin Beal.

Kansas City, Mo.—Atherton & Maedel, bicycle repairers, reported to have been succeeded by L. A. Maedel.

Keene, N. H.—The Trinity Cycle Mfg. Co. is moving its plant to this city. It will take until the middle of November before the machinery is all transferred to the new factory. The company has a number of orders on hand, and this will prevent it from moving the plant all at once.

Leadville, Colo. — Kyle-Lanphier Cycle Co., reported to have dissolved partnership.

Louisville, Ky.—R. F. Maxwell, local manager of the Indiana Bicycle Co. in this city, announces that his company would close up the branch house here about November 19th on account of the reduction in the price of wheels and the vast competition of cheap wheels now on the market. The Waverley Co. has decided to close up all of its branch houses and in future make all sales direct from the factory by letter.

Miamisburg, Ohio.—C. W. Dodds, sporting goods, etc., sold to Andrews Bros.

Newark, N. J.—Warwick & Stockton Co., manufacturers of bicycle supplies, reported to have been succeeded by Charles S. Stockton.

New Haven, Conn.—Hadley & Parmelee, bicycles, reported to have dissolved partnership.

Washington, D. C.—Jones & Burr, bicycle dealers, No. 513 Ninth Street, N. W., dissolved by mutual consent, R. R. Burr retiring. All accounts owing to and owed by said firm should be paid to and will be paid by R. C. Jones.

Winston, N. C.—M. P. Taylor, Jr. & Co., bicycles, etc., have removed to the old National Bank building.

Worcester, Mass.—Trinity Cycle Mfg. Co., moved to Keene, N. H.

Recent Embarrassments.

Bloomington, Ill.—S. E. Haggard & Co., dealers in farm machinery and bicycles, have made an assignment to C. M. Rayburn. The liabilities are about $6000; assets, $14,000.

Buffalo, N. Y.—Seyfang, Prentiss & Co., bicycle manufacturers; Charles H. Avery appointed receiver. Dissatisfaction with the conduct of the business is given as the cause. The assets, it is said, are double the amount of liabilities.

Buffalo, N. Y.—Sheriff Lamy has seized the plant of the Martin & Gibson Mfg. Co., on an execution secured by the People's Bank on a note for $5538.96. The plant is one of the largest devoted to bicycle making in this city, and the failure of the firm caused a stir. The leading wheel made at the factory was the Kensington. The firm have a store on Main Street for retail business. The company hold a chattel mortgage on the store. The last statement of the company showed this condition: Capital stock, $60,000; paid-up stock, $38,000; debts, $36,000; assets, $74,000.

Buffalo, N. Y.—The Superior Cycle Mfg. Co., bicycles, reported to have appointed a receiver.

Providence, R. I.—Walter J. Taylor, bicycles, etc., reported to have made an assignment.

Recent Fires.

Cohoes, N. Y.—Albert Tanner, sporting goods, etc., destroyed by fire; insured.

To Bicycle Riders.

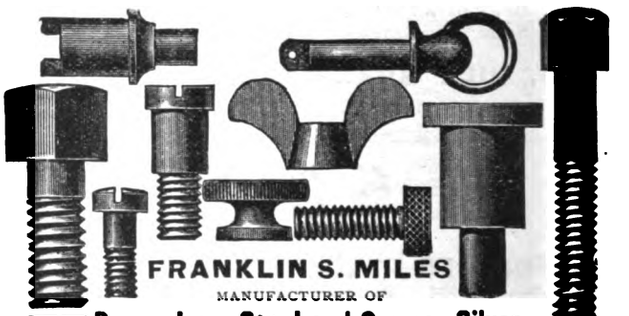
WE MAKE OUR TUBE
OF FIFTY CARBON STEEL

Because a Tube like this of our Is just as strong as a Tube like this of

.50% CARBON STEEL

.25% CARBON STEEL

While weight for weight in a Bicycle our FIFTY CARBON Steel will last so long [redacted] and TWENTY-FIVE CARBON Steel will last only so long [redacted]



NOTE THE FULL IMPORT OF THE PARALLEL LINES.

The comparison which they graphically make indicates the result of the prolonged investigations of the most practical experts of the world.

That the tests in our own laboratory corroborate these results is merely so much to its credit; that the same is true of actual trial on the road equally proves the trial to have been made in bicycles of correct design and construction. THE FACT REMAINS.

The margin of safety is greatly increased by the use of this tube. Every bicycle manufacturer should use it; every dealer should insist on having it; every rider should demand it. Send for catalogue.

"Has Our Esteemed Favor."

Edward Darby & Sons, Philadelphia, Pa. [*Wire Goods*]: For the past few years we have been in HARDWARE, and we beg to remind you that it has our esteemed favor, and will recommend the same to anyone desirous of a good, useful, common-sense trade journal such as HARDWARE is.

Digitized by Google

PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

CRONK'S

Combination Fencing Plier.

This newly invented fencing tool is needed by all people that build or have occasion to remove or repair wire fence, as it is made with two staple pullers, two hammers and two button cutters. They are the same heft as the 1½ Maydole Hammer, and they are made of forged tool steel. No good farmer will be without one. They are warranted to cut No. 8 hard or No. 6 soft wire. Like the celebrated Cronk Plier they are fully warranted in all respects. No. 12, 11 in. long, $12.00. Dis. . . .

Don't buy Christmas presents,

But become a subscriber to "HARDWARE," and get some of the valuable premiums offered in the following pages. ∴ ∴ ∴ ∴ ∴ ∴

Don't let your wife see this paper,

Because she'll probably insist upon your sending ten years' subscription in advance, to secure some of those premiums offered with "HARDWARE." ∴ ∴

Perhaps you can't come to New York,

But "HARDWARE" will bring New York to you, in the ensuing premium list. ∴ ∴ ∴ ∴

If you are still alive

And read, write, think, or act, you will find some very interesting and valuable premiums to "HARDWARE" in the following pages. ∴ ∴ ∴

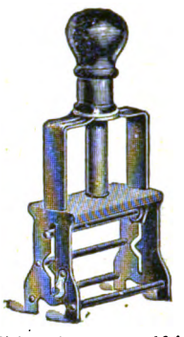
And remember

That with all these premiums you get "HARDWARE" with its "Prices Current," its "Hardware Buyer's Directory," its Trade Review and multifarious other attractions. **It is absolutely indispensable to the intelligent Hardware dealer. . . .**

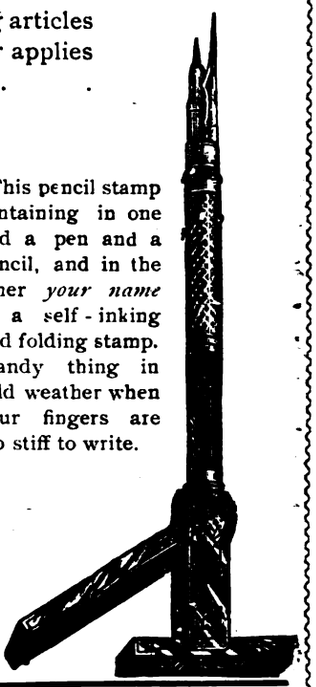
FOR ORDER BLANK SEE PAGE 62.

Digitized by Google

"HARDWARE" GIVES THESE AWAY.

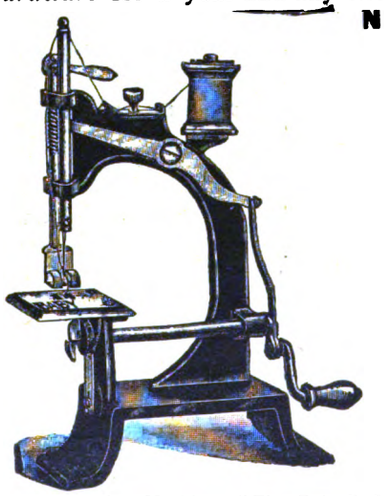


Send us $1.00 for a year's subscription and any one of the following articles designated by you, will be forwarded free of expense. This offer applies to new 1895 subscribers only. . . . . .

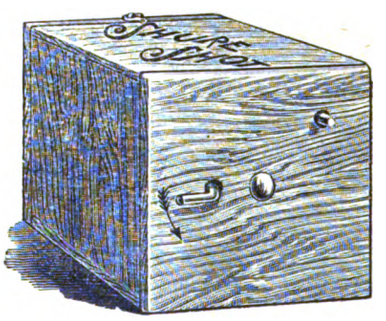


A numbering stamp, which will number from 1 to 999,999. You can number every article in your store with this stamp. It is indispensable to the careful retailer.

A dating stamp that will last till 1902, with 12 special entries for marking letters and bills.



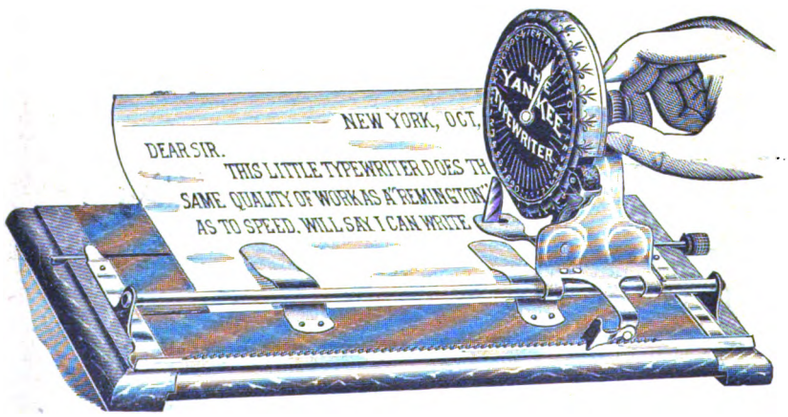
This elegant self-inking stamp, with *one line* of print *to order*. Your name, your business, your address, or whatever you wish.



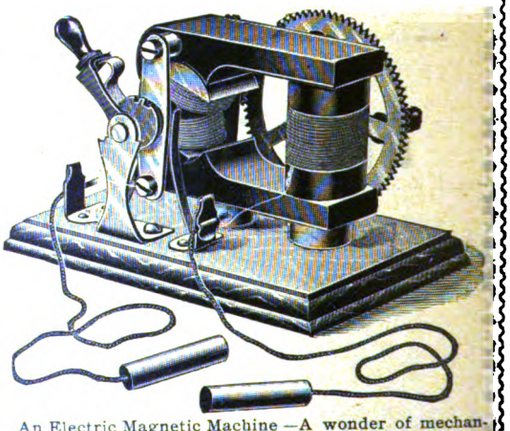
This pencil stamp containing in one end a pen and a pencil, and in the other *your name* in a self-inking and folding stamp. Handy thing in cold weather when your fingers are too stiff to write.

HERE'S OUR HOLIDAY OFFER.

Hardware for a year and any one of the following attractive premiums for $1.50. This offer applies to **NEW 1898 SUBSCRIBERS ONLY.**



A perfect Sewing Machine. "The Baby." It uses regular Wilcox & Gibbs needles and ordinary machine thread. It is strong and simple; won't get out of order; can be clamped on any table, and is so constructed as to make it almost impossible for the smallest child to injure itself with the needle.



Just think—a complete Camera and an outfit to print, develop and mount. Makes a picture 2½x2½ inches, and its work compares favorably with any higher-priced ones of which it possesses all the best features, including an instantaneous shutter, adjustable to time exposures if desired, and operated by a lever and button just as your $50 outfit is.

An Open-Faced Nickel-Plated Watch; fully guaranteed for a year. Winds and sets in back of case, and will stand rough usage, and keeps as good time as an expensive watch.

The Yankee Typewaiter—A perfect machine at a low price. Will write 15 to 20 words a minute; will take any size paper, from postal card to foolscap size. Has automatic carriage and paper feed. Mounted on highly finished hardwood base, and packed in a strong wooden case.

An Electric Magnetic Machine—A wonder of mechanical perfection and cheapness. Supersedes the old style medical batteries, and gives a stronger current without the expense of renewals. It has a current regulator which can be adjusted to a nervous child or to overpower the strongest man.

FOR ORDER BLANK SEE PAGE 62.

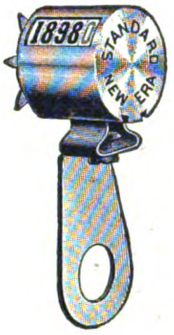
SEE WHAT 25 CENTS WILL DO, WITH "HARDWARE."

"HARDWARE" for one year and any one of the following premiums will be sent to each NEW 1898 SUBSCRIBER, on receipt of $1.25.



1. A Perfect Fountain Pen with 14 kt. gold pen and a filler, warranted to give the most satisfactory results.

2. A Cut of your Premises for illustrating your advertisements. You send us the photograph—we will do the rest.

A "New Era" Cyclometer, just out. Spool shape; smallest size; 10,000 miles; a perfect gem. Fully guaranteed.

4. Any one of the following valuable books, handsomely bound in cloth, a handsome gift at the holiday season:

Law Without a Lawyer. Chas. O'Malley. Count of Monte Christo. Don Quixote. French Revolution. Harry Lorrequer. Les Miserables. The Wandering Jew.
Payne's Business and Social Letter Writer.

5. Any one of the following Poets, in handsome cloth binding, gilt top, library edition. You can't buy them retail for less than $1.25.

Browning. Bryant. Burns. Byron. Chaucer. Coleridge. Dante. Faust. Hood. Keats. Longfellow. Milton. Moore. Pope. Shakespeare. Shelley. Swinburne. Tennyson. Whittier.

6. Five Books of the following well-known authors. These books are neatly bound in paper and well printed, and will be sent post-paid.

Will. Carlton.	George Ebers.	William Black.	Fergus Hume.
Cervantes.	George Elliot.	R. D. Blackmore.	Rudyard Kipling.
Wilkie Collins.	B. J. Farjeon.	M. E. Braddon.	Sir E Bulwer Lytton.
Hugh Conway.	G. Manville Fenn.	Charlotte Braeme.	Florence Marryat.
J. Fennimore Cooper.	Emile Gaboriaux.	Charlotte Bronte.	Ik. Marvel.
Marie Correlli.	Max Adeler.	Robert Buchanan.	Justin McCarthy.
Bertha M. Clay.	Gustave Aimard.	Capt. Fred. Burnaby.	Miss Mulock.
Alphonse Daudet.	Grant Allen.	Hall Caine.	David Christie Murray.
Charles Dickens.	Mrs. Alexander.	Mrs. H. Lovett Cameron.	Max O'Rell.
A. Conan Doyle.	Sir Samuel Baker.	H. Rider Haggard.	Ouida.
F. Du Boisgobey.	S. Baring Gould.	Thos. Hardy.	Chas. Reade.
The Duchess.	J. M. Barrie.	Nathaniel Hawthorne.	Sir Walter Scott.
Alex. Dumas.	Walter Besant.	Victor Hugo.	Robert Louis Stevenson.
Wm. M. Thackeray.	Count Tolstoi.	Anthony Trollope.	Jules Verne.	John Strange Winter.

YOU MAY DATE YOUR EXISTENCE,

In a trade sense, from the time you begin your subscription to "HARDWARE."

OLD SUBSCRIBERS AND NEW

May take advantage of the following liberal offer:

"HARDWARE" for one year and the "AMERICAN HARDWARE STORE," for $3.00.

The "AMERICAN HARDWARE STORE," containing 450 pages and 500 illustrations, is an exhaustive treatise on the most approved methods used by the successful merchants of this country to arrange, display and sell Hardware. It is edited by R. R. Williams, editor of the *Iron Age*, and published by the David Williams Co., of this city, at $3.00. By a special arrangement, we are enabled to combine "HARDWARE" with the book at the same price. Present subscribers will be credited for a year, in advance of their present subscription. . . . .

FOR ORDER BLANK SEE PAGE 62.

OF COURSE, YOU TAKE A MAGAZINE,

Probably one in the subjoined list, if it is not, let us know and we'll put it there. But listen to our offer. The first column is the price you would have to pay for the magazine alone. The second column indicates the price at which we will send you "HARDWARE" and the magazine for a year. In many cases you will find the combined price is no more than the single one, and you know you can't afford to do without "HARDWARE." This offer applies to **New 1898 Subscribers only.** You'll find the order blank at the end of this advertisement.

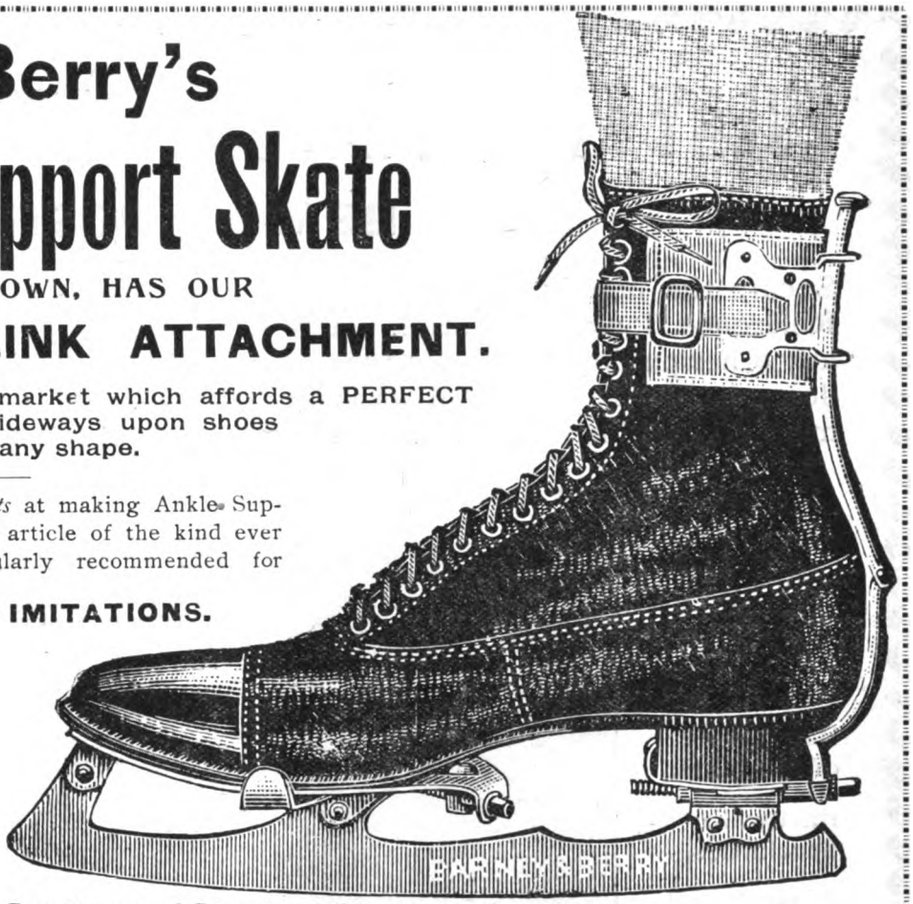
Barney & Berry's
Ankle Support Skate



HERE SHOWN, HAS OUR

NEW LINK ATTACHMENT.

The ONLY device on the market which affords a PERFECT adjustment sideways upon shoes of any shape.

There have been many *attempts* at making Ankle Supports, but this is the only *perfect* article of the kind ever offered to the public. Particularly recommended for ladies and children.

BEWARE OF CHEAP IMITATIONS.

To avoid FRAUD see that THE NAMES OF BARNEY & BERRY ARE STAMPED ON EVERY FOOT PLATE.

Complete Catalogue of Standard Skates on Application.

NEW YORK OFFICE, 114 CHAMBERS STREET.
PHILADELPHIA OFFICE, 412 COMMERCE STREET.
BOSTON OFFICE, 100 MILK STREET.

Barney & Berry, Springfield, Mass.

THE FULTON SIGN and PRICE MARKERS

Are the best, most complete and cheapest outfits for Business men to make their own Show and Price Cards, to print Shelf Labels, mark Boxes, Barrels, etc., etc. There is in fact no business where they cannot be used to advantage. Newspapers are using them for their Bulletin Boards, Ministers for Church Notices. Theatres for Announcements, Restaurants for Bills of Fare, etc. Their price in comparison to their usefulness amounts to almost nothing; it saves the cost of Sign Painters and Ticket Writers. A Boy can do all the lettering required in the largest Department Store. They last a lifetime and can be used for every language. We have

50 DIFFERENT STYLES

to select from in sizes from ½ to 4-inch letters. For marking Boxes and Barrels for shipping, or labels, they are far superior to adjustable stencils; the work is done quicker and neater and without blurring, making it look as if printed on a printing press. Nearly 100,000 sets of the **Fulton Sign Marker** have been sold, and they are in use daily by all large wholesale and retail business houses in the United States. Goods can be bought direct from us, or through your nearest wholesale house. Complete catalogues in English and Spanish sent free. Address

BEEN WITH YOU FROM THE BEGINNING.

Union Metallic Cartridge Co., New York. [Ammunition]: We have been with HARDWARE as advertisers from the beginning and expect to continue.

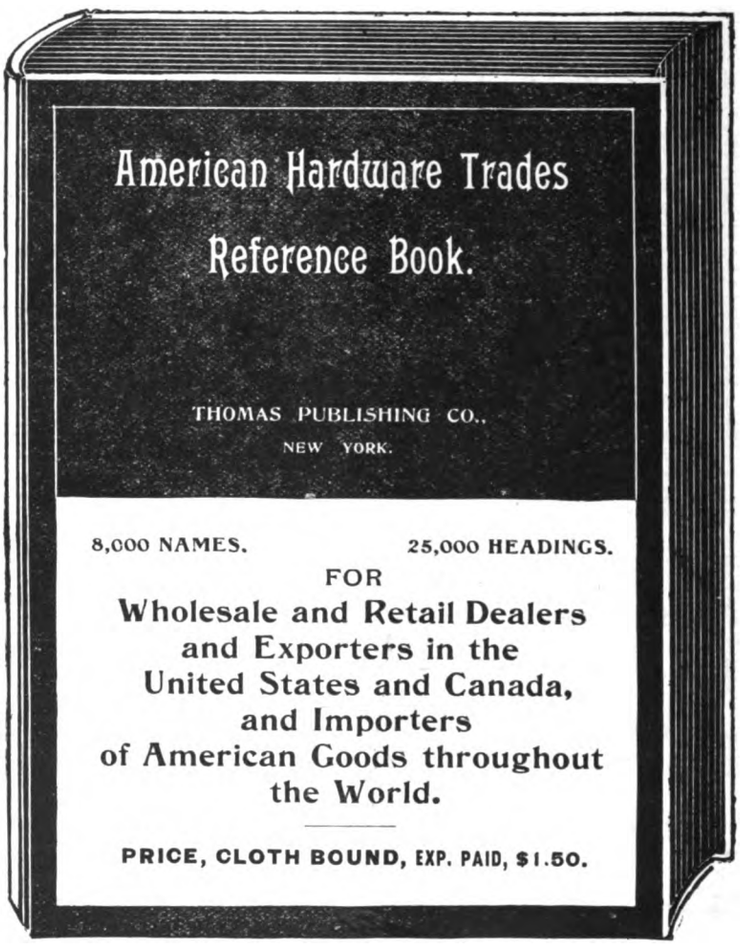
Digitized by Google

EVERY PROSPEROUS HARDWAREMAN

MUST BE WELL POSTED.

Secure the benefit of all possible Competition in Buying. A Dealer's Reference Book is essential. Here it is. A complete one, independent of any other publication, giving the names of ALL manufacturers, those who do not advertise, as well as those who do. The only work of the kind maintaining this feature. 1898 edition ready in few days. . . . .

IT COVERS THE FOLLOWING TRADES:



Hardware of All Kinds,

Hardware Specialties,

Agricultural Implements and Machinery of Every Description,

Carriages, Wagons, Harness,

Stoves, Ranges,

Tinware, House-furnishing Goods, Bicycles, Plumbing, Steam and Gas Fitting Goods of all Kinds and all Other Articles, Machines, etc., Handled by these Trades.

The object of the work is to enable the above trades to instantly find all the manufacturers of any article desired; the main and branch offices of every manufacturer in the trade, and the financial rating of every manufacturer.

Completeness.—The names of all manufacturers, regardless of whether they advertise or not. We give the names ver 8,000.

Classification.—By our method of classification, we index every manufacturer under every article manufactured. We name some manufacturers under as many as 300 headings. We make no charge whatever for any number of headings required to completely represent every manufacturer. The book gives nearly 25,000, fifty times as many as any other publication gives to these trades. We do not use general headings, such as are used in ordinary directories, as for instance: "Hardware," "Agricultural Implements," "Vehicles," "Plumbing Goods," etc., but state the specific article and the special kind of article, and for what purpose used, as for instance: "Door Locks," "Bicycle Locks," "Refrigerator Locks," "Gang Plows," "Sulky Plows," "Swivel Plows," "Ditching Plows," "Brass Faucets," "Wooden Faucets," "Beer Faucets," "Steam Heating Boilers," "Combination Steam and Hot Air Boilers," "Air Valves for Radiators," etc., etc., throughout the 25 000 headings, naming every article, every special kind of article needed by these trades. It enables the user to instantly find exactly what is wanted. Nothing like this minute classification has ever been attempted before.

Ratings.—The financial rating of every manufacturer is given.

SAVES SUBSCRIBERS 100 TIMES ITS COST.

THOMAS PUBLISHING CO., SOLE PROPRIETORS, 40 Broadway, New York.

Digitized by Google

Special to our Subscribers.

WE have contracted with the Thomas Publishing Co. for 10,000 copies of the 1898 American Hardware Trades Reference Book, which we are offering to the trade of the United States, with a year's subscription to "Hardware" for $1.50; the price of the book alone. . . . . .

Those who are already paid subscribers to "Hardware" may take advantage of this offer by sending 50 cents. . .

We do not agree to hold this offer open for any specified length of time, as it will be impossible to furnish the Book alone at less than $1.50 after these 10,000 are taken.

SEE OPPOSITE PAGE.

AGENCY **JOSEPH RODGERS & SONS, LTD.**

THE BEST IS EVER AND ALWAYS CHEAPEST.

The merchant can recommend with confidence.
The consumer will report superiority.
Excellence will insure enlarged demand.
Satisfaction will leave no ground for complaint.

Why, then, sell inferior Cutlery when

THE VERY BEST

can be had at a small advance over poorer

QUALITY?

FOR CENTURIES THE WORLD RENOWNED HOUSE OF

JOSEPH RODGERS & SONS, LTD.,

SHEFFIELD, ENGLAND,

Has had neither equals nor superiors in the manufacture of

CARVING KNIVES and FORKS,
TABLE CUTLERY,
SCISSORS,
RAZORS,
HUNTING and BOWIE KNIVES,
POCKET CUTLERY, &c.

Its Corporate Mark

Is among the oldest, and now over **200 YEARS** old. It is known the world over as a guarantee that all articles so stamped are absolutely superior to all others.

We are the sole agents in the United States for JOSEPH RODGERS & SONS and carry a full line of their manufactures in stock.

If you cannot procure goods of their make from your jobber we shall be pleased to supply full information on application.

"Replies From All Sections."

McIntosh-Huntington Co, Cleveland, Ohio. [*General Hardware and Bicycles*]: As an advertising medium, we have recently had occasion to test HARDWARE in a manner that would give us some idea as to how successful it can be used. Our advertisement did not occupy a very prominent position, but was of a character to excite the cupidity of the reader. We found that within two days after your paper came out, we commenced to receive replies from all sections of the country to the advertisement. This would seem to be sufficient proof that yours is a good medium.
